Homecoming '95 concludes on campus

Jennifer Eng
Staff

I t was a week of Vandal pride, chalk wars, parades and rain—
it was Homecoming Week '95. Homecoming week ended on
Saturday with 14,824 people at the Kibbie Dome watching the Vandal
football team win over Eastern Washington University.

For living groups it was a busy week—for alumni it was a chance to come back to the campus to visit old memories.

"It’s been fun. Our chairpersons Amy and Katie have done a won-
derful job," said Sue Pierce, ASUI senator and member of homecom-
ing committee.

Amy Czarniecki, assistant Homecoming chairperson said, "Katie Jolley did an exceptional job. We were really lucky to have
Homecoming committee full of dedicated and hardworking indi-
viduals."

As for the competition part of Homecoming the points for the chalk drawings, Vandal Jingles, clothing drive, banner, and parade
were added up and the winner declared after the parade on Saturday.

For the bonfire even in the men’s division Phi Gamma Delta came in first place with Alpha Kappa Lambda in second place, Delta Chi in
third and Upsilon Hall in fourth place.

In the women’s division Phi Beta Phi and Kappa Kappa Gamma tied for first with Alpha Gamma Delta and Gamma Phi Beta tied for sec-
ond place, Phi Sigma Upsilon in third place and Foney Hall came in fourth place.

The parade on Saturday culmi-
nated the competitive events. Marching bands from area high
schools and junior highs came out to walk in the parade. U.S. Senators Dirk Kempthorne and Larry Craig, both alumni of the University of Idaho, participated in the parade.

The student living groups made were judged Saturday and helped judges determine the winner. The

float, a large Viking ship, from
Kappa Kappa Gamma and Alpha
Kappa Lambda was pulled by
members of both houses in the
norse tradition.

The winners for the float com-
tepition were Delta Chi and Pi beta
Phi in first place with Alpha Kappa
Lambda and Kappa Kappa Gamma in
second, Alpha Tau Omega and Sigma Chi in third and Farm
House, Tau Kappa Epsilon and
Alpha Phi in fourth.

Overall, the men of Alpha Kappa
Lambda came in first place with Phi Gamma Delta in second, Delta
Chi in third and Farm House in
fourth place.

The women of Kappa Kappa
Gamma came in first with Phi Beta
Phi in second, Alpha Gamma Delta
in third and Alpha Phi in fourth place.

Shamia Crocielke from Kappa
Kappa Gamma said, "It’s been fun.
It seems that a lot more people
came out and became involved.
"

At the boofest on Friday night the
royalty was announced. The 1995
Homecoming King is Brad Warn
and the queen is Gina Merlot. First
attendees were Jeremy Chase and
Katie Fous. The second attendees were Jeremy Winter and Jeni
Teach.

Czarniecki said, "I had so much fun putting it together. I love
Homecoming, I love this time of
the year, I’m really looking for-
ward to a dynamic Homecoming
next year, we have a lot of new
ideas."

Although Homecoming is a cam-
pus wide event, many people still
regard Homecoming week as a
Greek and Alumni event. Czarniecki said, "It’s going to be
one of my main goals next year to
breakdown the previous miscon-
ception that Homecoming is a
Greek and alumni event because
it’s not—a student event."

Czarniecki who will be the
Homecoming chairperson next fall
also said, "If you thought this year
was great, just wait until you see
next year!!"

The University of Idaho tube players march to their own beat at Saturday’s Homecoming parade.

1,250 e-mail accounts
‘cracked’ on Computer

Sean Tepoton
Staff

A password-seeking computer program named "Crack,"
invaded the University of Idaho computer system last week.
The program searched electronic mail accounts for passwords
and cracked over 1,200 of them.

Computer Services disabled accounts affected by the Crack pro-
gram, leaving many people without
access to their accounts.

Passwords detected by the Crack program were considered too sim-
ple to prevent unauthorized users
from getting into accounts not
belonging to them. The accounts
disabled last week posed a breach in system security.

"Crack is part of normal security
procedures for all e-mail accounts," said Greg Brown, senior
network system analyst at Computer Services.

"It is good system security to
have a non-guess-able password," Brown said.

Brown said a password should be six to eight letters long, containing
a mixture of numbers, letters, or special characters. "It should not
contain words from any dicton-
ary," he said, "that includes for-
eign language dictionaries.

Brown says people trying to
crack e-mail systems look for the
same of the account holder in the
password. "Many people do pass-
words as derivations of their names," he said. "That is the first
place hackers will guess."

Hacker programs, including
Crack, are available to the public.
Brown said approximately 1,250
accounts at UI were vulnerable to
hackers last week. "That repres-
sents a fairly big security risk," he
said. "We have to stay one step ahead."

Computer Services ran the Crack
program on both student and facul-
ye-mail networks. Passwords were
revealed in one of 10 student
accounts, and one of six faculty
and staff accounts.

"Many people have unsecured
passwords that should be changed," said Kye Larson, Help Desk spe-
cialist at Computer Services. "Students with accounts that were
disabled need to come to the Help
Desk to get new passwords."

Many of the same passwords
exposed last week were uncovered
by the Crack program last July.
Account holders were notified last summer their passwords had been
detected and were asked to change
them.

Brown said Computer Services
may run the Crack program in two
month intervals. "The next time we
run Crack, we will notify the user
that they need to change their pass-
word, and hard-verify whether they
have changed it or not," he said.

"Based on the July experience, we
had to force the issue. We have to
say 'if you won't change it, we are
going to change it.'"
Family does not want youth prosecuted

EMMETT, Idaho—Criminal charges are possible against a 14-year-old boy in connection with a fatal shooting that left three victims over the weekend.

The two Emmett families involved are longtime friends and members of the same church, Christ of Latter-day Saints. Both attend the Emmett Butt Ward.

"It’s something that happened, and this boy’s going to have to live with this for the rest of his life," said Susan Howard, the mother of Clinton Hierold of Emmett.

Clinton Howard died Tuesday from injuries he received earlier when Kevin Manwaring turned into his path on Black Canyon Road, Idaho State Police said.

Manwaring had taken his parent’s car while the two were out of town. Police cited him for driving without a proper license.

A state police dispatcher said speed and inexperience on Howard’s part may have played a role in the accident.

Kenneth Lee, a freshman at Emmett High School, said the families have always been close.

"We’re just so devastated," Lee said to Emmett about 18 or 20 years ago, when they were our first friends," he said.

Research Council associateship program

The National Research Council announces the 1996 Resident, Non-Medical Doctoral Research Associateship Program. The program provides opportunities for Ph.D. scientists and engineers of all disciplines and ability to perform research on problems largely of their own choosing. For more information, call 202-877-6267 or 202-334-2759. Information is also available at http://www.nas.edu/rap/wel-come.html

Another Career Services workshop will be held this week: Starting with a session called "Marketing Yourself with a Resume and Cover Letter," to be held today at 3:30 p.m., and on Thursday, "The Do's and Don'ts of a Workshop" titled "International Work Opportunities" will be held. Another class called "Introduction to the UI Career Services" will be held Oct. 19 at 2:00 p.m.

All workshops are free but pre-registration is required. For more information call 885-6212.

The US Department of Energy is sponsoring an Industrial Hydrogen Graduate Fellowship Program, and is accepting applications for the upcoming academic year beginning Sept. 1999. The deadline for applications is Jan. 29, 1999.

Administered by the Oak Ridge National Laboratory, Oak Ridge, Tennessee, Science Education appointments in the Industrial Hydrogen Graduate Fellowship Program for 2000. Fellows are required, beginning September 1999, to enrol in a full-time course of study. The annual stipend is $15,600 in 12 monthly payments of $1,300 and $4,000 in health insurance.

The program is open to U.S. citizens who have attained a graduate degree and who have not completed more than one academic year of graduate study by the effective date of the fellowship appointment.

For application materials or additional information contact:
Mary Kinney, Industrial Hydrogen Graduate Fellowship Program, Science/Engineering Education Division, Oak Ridge Institute for Science and Education, 120 Badger Avenue, P.O. Box 117, Oak Ridge, Tenn, 37832-0117, telephone (423) 576-9550.

Cooperative Ed. orientation today

The Cooperative Education orientation is held today, Oct. 17, at 10:00 a.m. Love how to get paid work opportunities which provide practical experience related to school disciplines. For more information call 885-5822.

Just how fit are you?

There will be a health and fitness fair held Oct. 19th, 1999, the Student Union ballroom from 9 a.m. to 4 p.m. The fair is designed to increase awareness of a healthier lifestyle and includes fitness testing, health tips and free food.

Learn Quatro Pro

The Quatro Pro Program is designed to teach students how to code, format cells, and use Quatro Pro data in different fonts and line techniques.

Classroom instruction and hands-on experience Administration Building room 225 on Tuesdays and Thursdays, 4:30 to 6:30 p.m., Fall semester, 1999. Pre-registration is required. To register call 885-84 fee. For more information call 885-6486.

Who sits in what chair depends on a weird fact: seats vary from this to the next, and even show up in a two-seat car. An interesting one is to get rid of anybody.

He said one of the two associate vice presidents will be made responsible for technology programs and one for academic programs.

The current associate vice president of the School of Technology, probably would serve as associate vice president of technology programs, Holton said.

On remaining the position at Lewis-Clark State will be eliminated, but the other associate vice president will be responsible for programs now overseen by two people.

Reslee Parker currently is dean of the School of Arts and Sciences and Mike Vernon is interim dean of the School of Arts and Sciences. But Vernon said he plans to return to a full-time faculty position.

Holton said the changes are part in response to a report commissioned by the state Board of Education on the roles and missions of Idaho’s public higher eduation institutions.

The report found that Lewis-Clark State does have a distinct role from its community college function by focusing on technical degrees while School of Arts and Sciences enrollment has remained flat.

"We have been attempting to invigorate our technical program, and you’ve seen the changes that place in July 1, 1996. The college will begin a national search for a permanent vice presi- dient of academic affairs in the near future. Hugh Nichols has been interim vice president of academic affiars for two years, and said Friday he would apply for the permanent job.

Associated Press

LCSC to break down discipline barriers

LEWISTON—President James Hood, LSUC, announced a new policy to break down barriers between vocational and academic disciplines on campus.

Instead of separate schools of technology, arts and sciences and professional programs, all three will be overswn by a vice presi- dient of academic affairs. Two associate vice presidents, Holton said Friday.

"What we’re hoping to do is get more interaction across the board," he said. "I think that is the reason we’ve hardened some categories."

Hartford, the University of Connecticut, said in a statement that the changes place in July 1, 1996.

The college will begin a national search for a permanent vice presi- dient of academic affairs in the near future. Hugh Nichols has been interim vice president of academic affiars for two years, and said Friday he would apply for the permanent job.

It's time to get started on spring internships

Janet Birdsell

It's time to start planning for spring and summer internship opportunities. "Many students need to begin now to get all their materials together to apply for spring internships," said Alice Barbor, director of Cooperative Education. Application deadlines coming up this month include those for spring internships at the Governor's, Attorney General's, and Legislative Services offices in Boise. A limited number of fee waivers and stipends are available for these positions, Barbor said.

Internship orientation meetings are held every Tuesday at 12:30 p.m. in room 106 of the Academic Education building. After attending the meeting, students can fill out a registration form and submit a copy of their resume and transcript to complete their file. They are then entered into a database to receive and be notified about upcoming internship opportunities or opportunities of interest to them, Barbor said.

Co-op Ed also offers help with resumes. Students can make appointments to have their resume critiqued, Barbor said. "We want to make sure that what goes out from the University of Idaho looks really good and gives students the best chance at getting the position," she said.

In the past year, UI students were placed at 3M, ATT, Walt Disney World, Micron Technology, and NASA centers. "Our students really do go nationwide. They are very, very competitive and fare very well," Barbor said. WH "The only group that's not doing as well with their peers across the nation, it's difficult to connect them to apply for some of the bigger internships," she said.

Internship search information and position announcements can also be found on the Co-op Home Page at www.sidsko.edu. Barbor and her staff can be reached at 885-5822 for help and information.

Baton Rouge rally joins with ‘Million Man March’ in D.C.

Associated Press

Baton Rouge, La.—Victor Vandell could not go to the Million Man March in Washington, D.C., so he helped organize a similar event in Baton Rouge.

"There is no way I can take off. I have a 4-year-old boy to watch. So, why not organize something that we can be a part of," he said.

He and other groups have at least 500 or more participants in Monday's local march, which will start with a 9 a.m. meeting, prayer and devotion at the Centroplex. A march to the Capitol will end with speakers and a rally. "We'll move along the same time they are moving in Washington. We will move in unity," Vandell said.

Hundreds of other men are taking buses or cars from New Orleans, Baton Rouge and other cities around Louisiana to Washington. Speakers, including Dr. Luther Stewart and Rev. Jesse Jackson, will discuss what has happened to black men and discuss their roles in the future.

The rally will close with a ceremony by asking black males to rededicate themselves to leadership and responsibility within their communities—the same thing those in Washington, D.C., will be doing.

Like the Washington event, organizers here are calling on black men to stay away from jobs, school or church on Monday. "There is a spiritual side as well as informative, educational and informational side," Vandell said.

Vandell said he was somewhat disappointed that some people and groups chose not to get involved because they "do not agree with Minister Louis Farrakhan because of his religion."

Campus, community take stand on violence against women

Lisa Lunnigan

Crimes against women happen on college campuses everywhere every day, but for one night next week students and citizens will join together to take a stand.

Take Back the Night is the campus-wide, student-organized and community-supported event for 10 years. Participants walk together on the UI campus and then through the UI-NRHEC and the streets of the UI to raise awareness about women's safety and the need to end violence against women.

"Women and community to show we as women are tired of not being able to walk freely," Mosher said.

Mosher said the idea came from other campuses around the nation. "It's one of the goals we want to center around," she said.

"It's something we wanted to bring to campus," she added.

"Take Back the Night has been an event on the Washington State University campus before, but Mosher said this is the first time for the UI-NRHEC. "We hope to make this a tradition," she said.

"Along with the march, events for the week include an awareness program on sexual assault on Thursday and a movie night on Friday," "We encourage anybody and everybody to come," Mosher said.

Inmate flees North Idaho Correctional Institution

Associated Press

COTTONWOOD, Idaho—An inmate serving time for burglary and other crimes escaped from the Idaho prison sometime after 7 p.m. Friday, the last time he was seen.

No vehicles were spotted in the area at the time of the escape.

Hayworth was wearing a light gray jacket, green pants, green shirt and gray stocking cap. He is 5-feet 9-inches tall and 185 pounds, with blue eyes and blond hair.

Provost Yost wants new post

Andrew White

Provost John K. Yost, appointed by former President Elizabeth Zinner in spring of 1994, has asked to be reassigned to a different position.

On Oct. 12 Yost submitted a letter to UI interim President Thomas Bell asking to be reassigned. "He will assume the vacant position of the research development coordinator in the university research office," said Bell. "He has a rich background of experience in the research development area and will be an asset to that division." The research development coordinator position was formerly held by Dr. Ken Laurence.

Leslie Fowler, assistant to the president said, "It was his request that he be reassigned for personal reasons." Bell said, "We intend to fill the position internally or on an interim basis." Zinner hired Yost after a national search by an external search firm.

ASU President Sean Wilson said, "I wish him the best. Towards graduate students he was especially responsive. It's noteworthy to add that when the student advertising club went to nationals, Dr. Yost helped out with the funding and made it possible for them to attend." Yost could not be reached for comment.

PLUS A WHOLE LOT MORE!
Leaseholders want chance to buy lakefront lots

Associated Press

BOISE—The state Land Board is working on a trade to allow some leaseholders at Payette Lake to buy the lots they now rent from the state.

One leaseholder urged the board on Tuesday to expand the process, and allow more renters an opportunity to buy their property if they desire.

Gov. Phil Batt and other board members said they liked the idea, but want more details. Joe Steele, Boise attorney who represented Payette Lake leaseholders, will present a plan at a future board meeting.

The Land Board gave preliminary approval to a three-way land deal that will give the state more than 500 acres of timber land about 6 miles southwest of New Meadows in Valley County.

The owner, Evergreen Forest Products, would set 5,800 acres of state grazing land in seven segments, plus three or four extremely valuable lake lots at Payette Lake.

Board members were advised the plan would be for Evergreen to sell the parcels to the people who now rent them. No property would be included unless the current leaseholder agrees.

The state parcels, in Adams, Valley and Washington counties, were described by staffers as "scattered, relatively unsophisticated and difficult to manage."

Steele urged the board to set up a more formal process, to allow renters to buy their lots at any time. He said some parcels should be set up to allow the state to identify property it wants.

Lesseholders could purchase the property for trade to the state in exchange for their lake lots.

State Controller J.D. Williams said in the long run, the state should sell or trade Payette Lake property for productive timber land.

The state’s future losses in grazing timber land, not renting recreation property at Payette Lake:

"We are really good at managing timber land," he said. "This is the right way to go."

Attorney General Adolpho Bulrescia was concerned that public access to the lake would be restricted if lakefront property falls into private ownership.

"It is not an issue with this trade, but if there are enough of them, it will be a problem down the road," Lands Director Stan Hamilton said.

Referendum seen as a public relations ploy by Saddam

Associated Press

BAGHDAD, Iraq—Like many Iraqis asked about Sunday’s presidential referendum, the shop owner looked over both his shoulders before answering in a low voice.

"Sure I will vote ‘yes.’ There is no other choice," he said with a nervous smile outside his rundown store in the back streets of Baghdad.

But doesn’t the ballot allow people to vote ‘no’ and say they don’t want President Saddam Hussein to remain in power?

"People will be afraid to vote ‘no.’ Sometimes, people just can’t say what they want to say," he said.

"But please don’t use my name in your article. I don’t want to be arrested."

It is hard to imagine anything that the hard-pressed Iraqis need less than a presidential referendum in a country that Saddam has ruled with an iron fist since 1979.

Nearly five years after Iraq was crushed in the Gulf War, the economic sanctions that the world imposed on this oil-rich nation of 20 million people have left many of them poor and hungry.

U.S. officials say that 4 million Iraqis are completely destitute, compared to last year’s 2 million. Medicines as simple as aspirin are hard to find, even in hospitals.

The Iraqi dinar is worth so little now that people can be seen taking out large wads of money in marketplaces to buy items as small as a bag of fruit or a pack of cigarettes.

In a country where many adults earn about 4,000 to 5,000 dinars (42s) a month in their jobs, apples in the market sell for 2,000 dinars a kilo (2 pounds) and oranges for 1,000 dinars a kilo.

Products such as Pepsi Cola that are smuggled in from neighboring Jordan sell for as much as 1,700 dinars a can.

Some families have been forced to pull their children out of school to help earn enough money to purchase food. Others can be seen selling their furniture in marketplaces.

Nearly, small children work intersections,begging from cars at stop lights.

Despite all this, Saddam has repeatedly turned down a U.N. Security Council offer that would allow him to sell oil in the international market and use the money to buy food and medicine.

"The sanctions are hurting the common man across the board, leaving him frustrated and angry," a top U.N. official in Baghdad said on condition of anonymity. "But many believe it is too dangerous to criticize this government, even in a referendum."

Analysts believe Saddam’s victory is a foregone conclusion in a country where people fear they would be harshly punished as dissidents if they banded in a ballot marked ‘no.”

They also believe that Saddam is using the referendum as a public relations ploy after losing face in the last few months.

On July 17, Saddam said his government would stop cooperating with U.N. inspectors unless the economic sanctions were lifted.

But in August two of Saddam’s daughters and their husbands, including his daughter Hala and Kamil al-Majid, Iraq’s weapons chief, defected to Jordan. That made it appear that the main rival of Saddam’s power — his family was once off limits.

Saddam sent his son, Uday, to Jordan in an effort to turn the refugees back to Iraq. But King Hussein, who has been distancing himself from the former ally, turned the Uday delegation away.

All-Iraqi President who criticized Saddam’s regime, even in the slightest way, faced execution so he decided to flee and work for Jordan to overthrow the Iraqi leadership.

Preempting any possible revelations:

• See IRAQ PAGE 7
Voters could face record number of ballot proposals

Associated Press

Boise—Idaho voters could face a record number of ballot initiatives in the next general election. But Attorney General Alan Lance doesn’t think they will.

"Personally, I am skeptical of the chances that all 11 proposed ballot initiatives will make it on the November, 1996 ballots," Lance said.

His office on Friday released its reviews of four proposed initiatives. Two have serious constitutional problems, the reviews said, and two others won’t accomplish their goals without substantial changes.

The reviews are advisory only, and supporters are free to go ahead, even with initiatives that Lance says would be unconstitutional if they make it on the ballot and are approved by voters.

Initiative supporters must gather 41,335 signatures of registered voters by next July to qualify for the 1996 general election ballot.

This year, Lance and his staff have looked at 10 proposed initiatives, rejecting one because it improperly attempted to amend the Idaho Constitution by initiative. He said Friday it’s possible more could be submitted. "There are still 79 days left in 1995 and anything can happen," Lance said.

The 10 initiatives reviewed by state attorneys this year equals the record number that went before the staff of Attorney General David Leroy in 1982.

Lance said some of the questions, including abortion twice, have been controversial, but his staff had to work under a tight deadline.

"Given the controversial nature and the legal and constitutional issues involved, the turnaround time on reviews and the depth and quality of legal research has been remarkable," Lance said.

The reviews released Friday had Lance’s signature on them but said the legal analysis was done by deputy attorneys general Thomas Grassi, Thomas Nicholas and Margaret Hughes.

Politics is kept out. "It would not be fair to either the public or to the petitioner who submitted a proposed initiative to convert a mandatory legal review process into a means for setting any political point of view," Lance said.

He said the proposed initiative restricting abortions, proposed by supporters of the United States Militia, a hate group, violates the U.S. Constitution.

Because it runs contrary to the U.S. Supreme Court’s 1973 Roe versus Wade decision, the initiative would be unconstitutional were it to be approved by the voters, the attorney general said.

The initiative was among four presented by supporters of the United States Militia Association. Another of the group’s proposed initiatives also is unconstitutional, the attorney general said.

It attempts to ease restrictions on the formation of volunteer militia organizations. But Lance noted that’s unconstitutional, because the Idaho Constitution requires militias to be under control of the governor and through laws passed by the legislature.

Two other initiatives, filed by Mary Charbonough, attempting to remove the sales tax on food, clothing and water, and drop the rate from 5 to 3 percent, need to be changed to also cover laws on use taxes, the attorney general said.

Unless the initiatives are changed, Lance said, Idaho could have a 5 percent sales and use tax on some items and a 3 percent use tax on other items.

"The initiatives do not accomplish what the petitioners intended," the review said. "In order to accomplish the obvious purpose, the initiative needs to be redrafted and submitted as a new exemption to the Idaho sales and use tax," he said.

The measure also needs clearer definitions of "food, water and clothing," the review said.

We’re not a po-dunk school anymore
The best way to ‘track’ down your classmates, find jerks owing you money, harass a professor, look up a friend, and enter to win a real “Tracker™” GEO!

Registration Available Only between Oct. 17th-20th while “Tracker” displayed in front of UI Bookstore.

The New, Improved “Campus Directories” are Now on Campus, on Sale at the Bookstore for only $2.50

Directories pre-ordered by October 4th. will be delivered, no later than Weds., Oct. 18th.

Demonstrator GEO Tracker generously provided by All Star. Go by All Star Chevrolet on the Pullman highway and thank ‘em. Take a good look at all their other good-lookin cars, too.
Miss Molly Goes to Washington

Members of the Argonaut staff are going to Washington, D.C. on Nov. 1, and we are making plans to visit with Idaho's U.S. senators and representatives. So far, we have tentative plans to meet with Senators Dirk Kempthorne and Larry Craig on Nov. 1, and we'll try to make appointments with Representatives Helen Chenoweth and Mike Crapo.

We would like to represent you—the University of Idaho and the community—in Washington, D.C. We want your complaints, questions and suggestions for our politicians.

I know the advertisement we have run says it all, but this main opinion is an extra effort to get you psychoed up and ready to submit some tough questions. We want you to participate and help us come back with some answers to the questions we, as students and American citizens, are facing today.

Now, you may be wondering what kinds of questions you can ask. Anything goes. You can ask anything you want, and we will deliver it to the senator or representative the question is directed to.

You can ask about the proposed cuts to student financial aid, Medicaid, or welfare reform. Find out how Kempthorne, Craig, Chenoweth and Crapo feel about the Endangered Species Act—even though anyone who keeps up on the news knows how most of these leaders feel about the act.

And you want to get involved. Don't sit on your derrriere and complain about politics. Sitting on your butt and complaining—just for the sake of complaining—will never get you anywhere. Too many people in America partake in this sort of "inaction." They just sit back and let others from the Argonaut staff be your voice in Washington, D.C.

Even if you want to send a can of Alaskan salmon that you bought off the shelf of a grocery store, we'll take it. The only thought I can muster is that there are bombs and death threats.

Send your letters to Speak Out—Washington, D.C.; o/the Argonaut; 301 Student Union; Moscow, ID 83844-4271. The deadline is Oct. 30.

Make your voice be heard.

—Shelby Dopp

Mind your manners, please

Corinne Flowers

If you call me Miss Molly, it has to come to my attention of late that several of the less gentle faculty and staff members of the glorious University of Idaho are in the habit of saying, some of the more fundamental social things.

When I first arrived at school this fall, I was greeted by an employee of financial aid: "Since you are not registered for classes at the university, you are not eligible to receive your financial aid. You must track down each and every one of your instructors and have them personally sign an add-allow. Although you did in fact register several months earlier, if the classes are full now you'll just have to be put on a waiting list." Or, more simply put, "Tough daisy."

I must say that while the words didn't please me, the attitude is what truly angered me.

Now I realize the first week of school is a little tense for all people, but when I approached an individual employee with my face and pleasantness in my voice, I expected him to show me the ropes, not a hissing, splitting, politely rabid sorcerer.

Needless to say, I was so angered by the very negative and nasty behavior of the particular financial aid employee (we'll call her "Betty"; since that's my favorite name) I myself forgot my manners and uttered a few choice words.

In a separate but equally annoying incident occurring during the first week of classes, dealt with a particularly lovely member of the communications department (we'll also call her "Betty"). I very calmly and explicitly asked Betty that I needed to get into a computer. Because the computer had not yet been updated with my transcripts, it did not recognize my junior standing and would not let me add it. She, of course, tried to put the job off on some other staff member—also an annoying trend among a lot of the staff here.

After I convinced her I was indeed talking to the right person for the job, she gave me the green light and said "I wouldn't let you into this course anyway, your GPA is only 1.2." I maintained my composure, although my anger was growing, I calmly explained to her again that my transcripts had not yet been entered into the computer.

"I am not only a junior with 72 valid credits," I replied, "but my grade point average is currently

3.6, placing me on the Dean's List and making me more than eligible for this course." I eventually convinced her and although visibly disappointed, she indignantly signed the form.

No more did I get my situation straightened out and settle right down to work before another "Betty" reared its head.

I had need of a particular piece of equipment kept in the office of the department of communications, which I work study. While removing said piece, of equipment, I was stopped by yet another "Betty" department secretary (we'll just call her "Betty"): "Say "HEY YOU!"" Betty literally shrieked down the hallway, "You can't take that!" She asked me where I was going with it, and I told her, saying I figured she would rather have me move the statue to the mountain than transport the entirety of the mountain to the statue. She concurred, though rather reluctantly.

So in lieu of these and several other minor skirmishes with Betty employees of the university, I have taken it upon myself, as I always do, to voice my opinion and give some unsolicited advice. As a student, I—along with the tax payers of this state—am the patron saint for the existence of this institution. By all rights, you are

Who are you gonna blame? The federal government!

Brian Davidson

partly appears to be one of our own, Timothy McVeigh, army private, average Joe, Everyman. And who is the bad guy in this case?

The United States government, of course.

Then just last week, some wackos decide to make a statement in the process killed a man in protest against federal government-sponsored "oppression" demonstrated at such basements of "peace" and "diversity" like Waco, Texas and Ruby Ridge, Idaho. Who are the good guys?

The United States government, again.

Anti-government rhetoric is spun so easily as flax around these parts. "Parasites is growing in this country, these"—say-nay-say-say, "and somebody's got to do something about those bad guys out there." I agree with them.

Parasites is spreading in this country, but not exactly in the same form they thought or hoped. I worry what they're going to do next. I worry who they're going to blow up, or shoot, or next. I wonder if a friend, a family member or maybe even myself will be in the wrong place at the wrong time when these (for the lack of a better word, let's call them "idiots") decide to make another move.

Now I will admit that not every person who has harbored even the most mild anti-government feeling is a dangerous terrorist, but I will say this: the tide of paranoia and fear of governmental oppression which was spreading through this nation can, does, and will, collectively, if concentrated on the right individual or individu-als, make the most harmless of terrorism the likes of which this country has never seen.

As the flames of fear and misinter-pretation are spread by opportunistic, money-grabbing liars in the guise of Rush Limbaugh, G. Gordon Liddy, and the Grinch, we won't know where the next bomb will go off, or from where the next bullet will come when we come—and, yes, we will come—no matter what child, grand- mother, or father, or friend is killed, these terrorists will declare that they were killed in the name of Government Oppression.

Think about it. Every town in this nation is a potential target. If these ideas will blow up federal build-ings and detail government-submi- tted rails, what is to stop them from blowing up Social Security offices, nuclear research centers, courthouses or even the rinky-dink white-brick post office in Idaho Falls, Idaho, number one, 1,027, where my nieces go every once and a while to collect the family mail?

To those of you who harbor anti-federal government sentiments on this campus or in this town, I say go on doubting and questioning, but remember: lobbying for change is more effective through the ballot box, rather than through the bomb.

To those groups or individuals who feel their "Republican vs. Democracy-Freedom-vs. Shrewery" bias to tend the walls of the UCC, I offer this challenge: next time have the guts to sign your names to your flyers, or at least offer a method of communication back to you from those you are trying in vain to contact.

There is absolutely nothing wrong with questioning what our government does. We are not a nation of sheeple, albeit bowing to the whims of our appointed leaders—without questioning what those leaders do. On the other hand, we should not be a nation of rats, willingly to main and kill if our dann- ed little noses get put even the slightest bit out of joint.

Rational minds can deal with government oppression in methods which do not involve the rental of one's favorite bulle, the UCC. Case in point: On July 6 of this year, I received a letter from every- one's favorite bully, the UCC.

---END PAGE 10

Who are you gonna blame? The federal government!
Help control pet overpopulation
Bob Barker says it best when he closes his show by encouraging his viewers to “Please help control the pet population; have your cats and dogs spayed or neutered.” This can’t be reiterated enough.

The Humane Society of the Palouse, located on White Ave., near Safeway in Moscow, is constantly at its housing limits. While the shelter can hold up to 60 cats and 20 dogs at one time, there is a constant running list of dozens of other animals in the area waiting to be adopted. Why are there so many pets and so few homes to care for them? The answer to this question is simple:

irresponsible owners. Owners who don’t spay or neuter their animals and who let their animals run wild contribute significantly to the problem.

Unfortunately, as college students, we are often named as the blame for part of the problem. Students move into the area, adopt an animal, and then become too busy as students to responsibly handle the needs of a pet.

So, spread the word among your animal-loving friends: their dogs and cats should be spayed or neutered to control the unwanted pet population. Adoption options through the Humane Society of the Palouse make the procedure cheaper, and lessen the need for the use of euthanasia.

If your friends think the cost of the surgery is too much, tell them to think about the cost of raising a full litter of kittens or puppies.

—Kendra Miner

Plenty to do around Moscow
Mr. Schub describes the UI as a “hosting university atmosphere” (Oct. 13 editorial). What he is really saying is that you’re a boring person. What do the other 20,000 people in Moscow do on the weekends? Hike, bike, hike, camp, boat, fish, hunt, ski, jog, picnic, play cards, go to movies, rent videos, square dance, attend the theater and lectures, play sports, attend games, read good books and even study for classes. What a shame that Mr. Schub must endure such monotony.

—Bob Walz

MANNERS

They claimed that I owed them an additional $700 dollars in income tax. Rather than going into a fit over government “incompetence,” I wrote the IRS a letter, expressing tactfully my incredulity over her claims. I asked them to re-check their records. This August, I got another letter, in which the auditor said the problem, due to a mistake I made in filling out my own tax forms, had been resolved. I did not owe them a single penny.

Moral: If we learn to deal calmly, patiently, and reasonably with our government, they will most likely respond in kind. The IRS was not out to get me. They helped me to rectify a dumb mistake which I had made on my own tax forms. The courteous help I received from certain agents at the IRS offices in Oglen, Utah, helped me to avoid a costly tax bill. If that is government oppression, let’s have more of it.

Our government makes mistakes. Every government makes mistakes. Everyone of us makes mistakes. Just because the government makes mistakes doesn’t do us the right, as the Law of Moses states, to take an eye for an eye and a tooth for a tooth? Perhaps, but in the end doesn’t that, as was said in the musical Fiddler on the Roof, “leave us all blind and toothless?”

So, protest. Just protest in a fashion which leaves my teeth and my eyeballs, and the respective teeth and eyeballs of law-abiding citi- zens across the land, in the condition in which you found them in.

—Margaret Rice

Northwestern College of Chiropractic
Professional Success Through Clinical Excellence
For 35 years, Northwestern College of Chiropractic has been preparing doctors of chiropractic. We have more than 3,000 graduates across the globe who are successful, practical clinical practitioners.
Northwestern College of Chiropractic will provide you:
• A well-rounded, rigorous education integrating the basic and clinical sciences, degrees, 5-year chiropractic therapeutic and practice management
• Clinical education through every step of the curriculum, beginning with hands-on chiropractic technique classes in the first semester
• Locavores enrollment, small classes (15:1 student to faculty ratio), individual attention from faculty, and easy access to educational resources
• Clinical internships within 25 Kemezio community clinics and the College public clinic
• A research center known internationally as a leader in clinic-controlled research that is dedicated to advancing the knowledge of chiropractic
• Extensive financial aid resources
• Fiscal strength, full-time private practice opportunities in clinics around the world

Deadline is October 30.
The Daily Times, Farmington, N.M., on pornography
There's a lot of talk these days about pornography, and how it's become mainstream and how we need to be protected.

This is not new, but the availability of pornography appears to be growing. From ads for clothes to magazines to movies, "sex" is a big sell.

Many of the magazines promoting sex are what once were considered mainstream publications.

Movies and television shows with sex and violence draw large crowds, often selling out or receiving top ratings. Sex is in today's music, played over the airways. It's everywhere.

Some are calling this Hollywood's final push to break the final barrier holding back indecency.

The movie that's bringing this issue to the forefront is "Showgirls." From most accounts, it is a film primarily about sex. It is bringing forth a wave of protest and a call for action.

But there's nothing wrong here. Check out the lines at theaters where "Showgirls" is playing. Are the lines long or short? The magazines that are shifting more to a sexual theme are seeing sales increase, not decrease.

Though "Showgirls" is pretty much a porno flick, if it is a financial success, Hollywood will make more such films.

Recently, there were reports of some members of Congress thinking of some kind of action. Is that what we want? The government deciding for us what we can read or watch?

We don't think so.

The questions we should be asking ourselves as a society are: Do we want to stop? Do we want to return to morality? If the answer to these questions is "yes," then all we have to do is stop watching the movies or buying the magazines.

Films, books, magazines, television programs, billboards are all driven by market forces.

If people buy them, there will be more.

If the public does not buy, they no longer will exist.

The Times, London, on the European Monetary Union:

The future of Europe has been transformed. Helmut Kohl's declaration (Oct. 1) that monetary union is "probably not for this century" may sound like nothing more than a casual assertion of pragmatic common sense. But in the looking glass world of European diplomacy, Kohl's decision to utter an unverifiable truth about EMU is a shattering event.

In sum, it is now almost impossible to imagine a sequence of events that will lead to a monetary union in Europe in the foreseeable future. The slogan of the Euro-federalists has long been that "Europe will be built on a single currency or it will not be built at all."

For all those who care about a prosperous, stable and peaceful Europe, that slogan, and the thinking behind it, must now be overthrown. A stable, cooperative and prosperous Europe must now be built without a single currency; otherwise it will not be built at all.

The Jordan Times, Amman, Jordan, on the United Nations:

U.S. Secretary of State Warren Christopher's address to the new session of the U.N. General Assembly was no ordinary speech in the sense that it represented the views of the dominant power in the international organization.

One of the most striking features of his statement was his clear-cut call for permanent seats on the U.N. Security Council for both Japan and Germany.

Yet we see that the greatest challenge to a more democratically constituted Council lies not so much in who should represent these other areas of the world, but rather in the U.S. Charter which still reserves to certain select group of countries veto power.

In this context, the Charter needs to be amended and exactly in the area of the veto vote, which allows any single country among the five permanent members to freeze or neutralize international action on any particular situation or conflict.

Instead of the veto power which can be arbitrarily exercised by one or the other permanent members, we would like to see resolutions adopted by, for instance, a two-thirds majority vote without any certain capital having the privilege of undoing what the other council members would like to do.

At the same time we see no problem in having permanent members drawn from a list of the most powerful countries, but this issue must not necessarily be linked with the exercise of a veto power.

This is in fact what the General Assembly should address in its current session. There are not many issues that are more important than this one on the Assembly's agenda for this year.

The Daily Spokes (N.Y.) on nuclear testing:

There's reason to be concerned.

If a handful of national lawmakers— with the Christian Coalition and a few other twisting their arms—get their way, voters in such flyover places as Utah could be setting rules to govern the gambling industry. Of course, that's if they want the awful business to continue.

CHEAP SHOTS

Here are excerpts from editorials in newspapers in the United States and abroad.

Sound furthered? Not as far, unfortunately, as it would seem.

The first domino fell (Sept. 29) when the House Judiciary Committee met to consider a bill that would establish a national commission to undertake a multimillion dollar gambling study.

Once lawmakers get their study, there will be the obligatory nuclear deterrence states, we'll be told, just aren't ready to handle the proliferation of gambling. Once gambling is under federal regulation, it just would be in the hands of lawmakers from every state. Nevada's gambling is street tough. There were hard times when the mobsters sat in back rooms skimming profits and stuffing wads of cash in the police commissioner's pocket. But the industry persevered, grew, and became the backbone of state economies.

If any states want advice on gaming, they know where to find us. But it's absolutely ridiculous for a senator from Virginia or Illinois to expect us to let them tell us how to run the business.

Manchini, Tokyo, on French nuclear tests:

France did it again, this time detonating a nuclear test in the South Pacific more than five times stronger than last month's explosion. Paris's arrogance is sickening.

The French government is insisting on securing for France nuclear deterrence, calling on its people to "get used to" loud explosions from French Polynesia.

Japan needs to take a tougher stance. Foreign Minister Yohai Kono's mild argument, made (Oct. 2) to the French ambassador, that "nuclear powers have the obligation to contribute to disarmament in response to the trust given by non-nuclear countries" was far from enough. It does not take a haggler Frenchman to dismiss ashamed Japanese protesters who are always prefaced by a pledge to "maintain good bilateral relations."

It is time that Tokyo sought more effective leverage toward nuclear disarmament. In this respect, the record of our government is anything but satisfactory.
Hypothermia can kill enthusiasts

Jerry Lake

A mong outdoor recreationists hypothermia is a major cause of death. Often people said to have died of exposure actually died of hypothermia. Hypothermia occurs when a person's core body temperature of 98.6 degrees Fahrenheit drops to 90 degrees Fahrenheit or below. This loss of body heat can happen when exposed to wind, cold water or severe weather. Accidentally falling into cold water can drop your body temperature quickly.

According to the Idaho Emergency Physicians Association, improper or inadequate clothing and alcohol consumption are the most common causes of hypothermia. Without proper clothing perspiration and wind can create a loss of body heat. A person can get hypothermia any time of the year. However, it is more prevalent in the fall and winter.

Fall, the prelude to winter, a time when trees leaves changes to shades of orange, red and yellow and rain drops moisten the dry ground and clothing you are wearing. A cool breeze causes trees to sway, and you to shiver. Shivering or rigid muscles, to face正规及 numbness, are the first signs of hypothermia. This is when your body temperature has dropped to 98.6 degrees Fahrenheit or lower. Degrees Fahrenheit you have a lack of coordination, your speech is slow and you start to slurr. You may also be nauseous, have impaired memory and a loss of awareness.

When you observe anyone with any of the above symptoms and you are able to help, take charge of the situation. Do not let them talk you out of helping them. If you are by yourself, STOP. WHERE ARE YOU? In both cases, you must stop further heat loss. Get out of the wind and weather. Where possible, remove the wet clothing and replace with dry. Build a fire to heat the air around you. Insulate the person or yourself from the ground. Insulate the head and facial areas.

If you or the other person can drink and eat, give warm drinks of tea, soup, warm sweetened lemon waters or other liquids. DO NOT GIVE ALCOHOL! Eat foods containing simple sugars like candy bars.

If the person is in a more severe stage and not breathing, CPR should be performed. Watching a person for one minute is required to verify they're not breathing. Check their pulse during this minute. It can be very difficult to feel a pulse in a hypothermic patient.

Prevention of hypothermia requires some planning before going to the field. Plan how to keep warm and dry. Avoid over-exertion, take rest breaks. Carry wind protection gear and don't forget face and ears from wind and cold.

An old drink of hypothermia conditions exist. Carry a supply of high energy, simple sugar food and drink items like candy and hot chocolate. Carry a survival first aid kit and know how to use everything in it. When your hands arenumb and shakings not the time to learn how to build a fire. "Include some first aid, survival and hypothermic information with your gear. You may be able to read how to save your life if your memory starts to fail you," said Dan Papp. Papp is the State Hunter Education Supervisor for the Idaho Fish and Game.

The Idaho Fish and Game furnish two free information packets: First Aid Procedures and Lifesaving Techniques, and Outback Skills and Survival Techniques, to any person completing a hunter education class. Classes cover first aid, hypothermia, survival, habit manage- ment, animal identification, landowner-hunter relationships, safety, firearms and more. Cost for the 3-hour class is $2. For more information, contact the Idaho Fish and Game in Lewiston at (208) 745-4381.

Be prepared even on campus or around town and dress according to the weather conditions. If you are hypothermic, you may not be able to make sure you have a warm ride home. Hypothermia can strike anywhere.

Fall bike preparation important

Erik Marone

Fall has finally arrived on the Palouse and winter's right around the corner, but that doesn't mean you have to put your bike away until spring. With a little extra care your bike can be year-round transportation. Here are a few suggestions for fall bike maintenance and riding.

- Have your bike tuned up. Having your bearings repacked will help keep water out of your hubs and crank. Keep your brakes properly adjusted, when rims get wet, your stopping power is greatly decreased. Your shifting mechanism should be tuned as well. It's a lot easier to get around in mud and snow if your bike shifts smoothly.
- Keep your chain well lubed. A high-grade chain lubricant will repel water longer and prevent rusting.
- Put a set of fenders on your bike. Most bike fenders cost less than $25 and are well worth the investment. Not only do fenders keep mud and water from spraying all over you, they help keep your bike's components drier, reducing the chance of rust and other water damage. Unfortunately, most suspension forks do not allow for fender installation, but there are a number of clip-on splash guards available that accommodate this. They don't keep as much water off as a fender, but they are better than nothing.
- Make sure your tires are in good shape, with plenty of tread left. Riding in snow and rain reduces traction enough only increase the chance your tires will slip.
- When riding in rain or snow, keep your speed down. Cars and pedestrians also lose traction handling and traction in fall and winter conditions. Visibility is also decreased, which increases the change the someone won't see you, or you won't see them.

A good tune up is important for your bike's winter health.

- Use a headlight at all times. Night is failing a lot earlier now, and you are required by law to use a headlight after dark, but using a light during daytime hours increases your visibility. A number of manufacturers make flashing tail-lights that help drivers to see you when they approach from behind.
- Wear a helmet. This should be common sense for any bicycle commuter, but it is especially important during adverse weather. Keep your brain where it belongs: in your head.
- Your clothing should be warm but loose.

Anything with Gorex in it works great; it allows your skin to breathe but keeps heat in. A good pair of gloves are a necessity in winter months. Polar fleece with a Gorex outer shell makes for a warm and wind-proof ride.

Tips can be a source of transportation year-round, but require you take extra attention while riding. Following this handful of suggestions and using common sense, your bike will continue to provide you with cheap, class comming.
Indoor climbing great for training

Jennifer Swift
Outdoors Editor

Climbing the walls is not only a great stress reliever but it is also a fantastic workout.

This past Tuesday I was given the opportunity, along with six other people, to take Introduction to Rock Climbing through the Outdoor Program. This class was held at the Adventure Facility Climbing Wall in Memorial Gym and was taught by Heidi Kloos.

None of us in the class had much climbing experience and some had never put a harness on before. Kloos discussed the Yosemite rating system, which is how climbs are rated, and the meaning of each number. Climbs range from 1, working on level ground, to 5, where harnesses and ropes are necessary to climb safely. Climbs can also be rated with an A, B, C or D to specify difficulty more precisely. The highest confirmed sand climb is a 5.14d, which is sheer cliff with few holds. In other words, you couldn’t pay me enough to go there. Basic safety and proper equipment was also discussed.

The most important aspect of safety is not to climb something you are not capable of and don’t climb with someone you cannot trust with your life, because that is exactly what you are doing.

Kloos also covered ropes. There isn’t a reliable way to tell if a rope is safe so climbers replace their ropes after two years or three falls. Ropes are made of fibers covered with a cloth weave. It is easy to get dirt inside the cloth and this rubs against the fibers inside, causing the rope to weaken. It is bad etiquette and also bad for the rope to step on it; this can get dirt ground into the weave.

Kloos also showed us her assortment of equipment, called a rack. The variety of anchor and devices used can be mind boggling and also expensive, but each adds to the safety of the climb.

After the lecture all six of us donned our harnesses, some with more difficulty than others. We went over basic commands that are used between the belay and the climber. Knowledge of these commands is essential to climb safely. If your belay says they are “on belay” they are confirming that they checked your harness to make sure all your’s are doubled back on the buckle and your carabiner is locked. This is also your chance to check your equipment and make sure they are paying attention. It is common courtesy in the climbing world to check your partner’s equipment because it is easy to forget to double back ends on a harness or tighten a locking carabiner. These commands are equivalent to a verbal contract and those who enter into it trust the other knows their stuff. If someone belays you and doesn’t pay attention it could cost you a broken bone or worse, your life.

Rock climbing takes a lot of coordination and muscle. After the lecture we all had the opportunity to climb and experience indoor gym climbing first hand. Indoor climbing provides conditioning and practice of technique for when you get onto real rock.

On the way home I noticed my swollen hands and raw fingertips, and the next day brought sore shoulders and arms. Despite that, I felt a sense of accomplishment in being certified to use the wall and met some interesting people along the way too.
Hisaw leads Idaho to first Big Sky victory

The Vandals defense punished EWU quarterback Brian Sherrick, giving him little time to throw the ball accurately and sacking him six times for a loss of 41 yards. Defensive tackle Ryan Smith and Dan Zeamer finished the game with two sacks each. Several times during the course of the game, Idaho defensive backs batted passes and played tight coverage on EWU's wide receivers. Sherrick went 11 for 27 with 183 yards and no touchdown completions.

"I think you really have to credit their defensive front," Kramer said. "For us, I think you really have to credit their defensive front. We lost confidence in our offensives ability to protect the quarterback in fact we only throw one drop back pass." Idaho controlled the game from the first quarter.

On Idaho's second series of the game, Hisaw bolted for the end zone on a 33-yard QB draw in the first quarter, putting the Vandals up by seven. "I lined up and there was no one in the middle," Hisaw said. "I was going crazy." Inspired by Hisaw, the Vandals defense erupted, knocking Sherrick to the ground on nearly every pass attempt and crushing any hopes of the Eagles running the ball.

The Eagles pointed and Hisaw and the Vandals surgical like offense once again went to work, when Hisaw connected on a 45-yard pump-fake pass to wide receiver Dwight McKenzie. Unfortunately, Hisaw wasn't perfect and a short, dropped pass on the 13 yard line was intercepted and returned 91 yards for a touchdown by EWU's Derek Strey early in the second quarter.

After a 59-yard kick return by Idaho's Montrell Williams and a personnel foul called on the Eagles, the Vandals found themselves on the EWU 22 yard line. Hisaw then connected on a 17-yard pass completion to McKenzie to go ahead of the Eagles 14-7 at 12:50 left in the game.

The Idaho defense again shut down the Eagles offense and once again EWU punter Eric Smith kicked the ball away and gave the hot handed Hisaw the ball. Hisaw went to work right away, converting on a 66-yard pass to go-to-man McKenzie. Running back Lavoni Kidd brought the Vandals within scoring distance before Hisaw could stumble into the endzone on a 6-yard run. Kidd finished the game with 22 rushes for 97 yards.

EWU hoped to get back into the game in the second half, although their hopes were immediately crushed. On the opening second half kickoff, Idaho's Montrell Williams returned the ball 93 yards and furthered the Vandals lead to 27-10.

"He goes by us on the sideline and I felt like I was going to be the 12th man," Kramer said. "I mean, I had a clear shot at him and a momentary bout of sanity saved me because he was going down the field and he just made a big play and it put us in a whole." From there, it was a matter of Idaho's defense keeping the lead safe. Battled down balls and incomplete passes kept Sherrick from rallying his Eagles.

In the fourth quarter, Idaho's Ryan Woolverton kicked a 28-yard field goal and Dave Longoria caught a Hisaw 1-yard touchdown pass to damage the Eagles chances of winning even further and eventually Idaho players and coaches would be able to enjoy the homecoming win.

"I'm happy. It was a good win," McKenzie said. "But just a win. We like the way this feels." The Vandals will next face the Montans Grizzlies on Saturday.

Midnight Madness invades Memorial Gym

Joe Craven and the 1,000 or so fans at Memorial Gym Saturday night and Sunday morning got what they expected—sloppy basketball. At least the Vandals were.

The UI basketball team was divided into two teams for the annual Midnight Madness as the Black squad beat the White team 44-42 in a sudden-death overtime.

"It was very sloppily played," Craven, the UI head coach said. "But our guys were competitive and played hard."

Two missed free throws by New Plymouth, Idaho native Kris Baumann forced the sudden-death overtime.

With the score deadlocked at 42, Marvin Thomas a slender sophomore transfer from Otter JC, nailed an 18-foot jumper in the comeback victory.

"I'm not putting a lot of stock in this game," Cravens said about its importance.

The White team was comprised of UI veterans in the Black team included newer, less experienced players.

The Black team, down 25-11 at halftime, tied the score at 35 with 5:25 remaining in the second half due to the hot shooting of newcomers Eddie Turner and Thomas, both guards.

Turner, a 6-foot-3 inch junior college transfer from North Idaho College, scored most of his team-high 12 points in the second half.

Saturday, Oct. 15 marked the first day NCAA basketball players could hold an official practice. Besides UI, most teams across the country got a similar jump on the 1995-96 season. The game featured two 20-minute halves with a running clock.

James Jones of the White team led all scorers with 16 points. The 6-foot-6-inch forward is one of only three seniors on the Vandals.

The first 7-foot-6-inch in UI history, Dave Stirling, made his debut so well. The 7-foot, 193-pound freshman from Kirkland, Wash. scored two points and recorded one blocked shot.

Dino IC transfer Jason Jackson also had a strong showing. After a slow start, the 6-foot-7-inch junior scored nine points for the Black team.

Senior starting guard Sharron Dirden scored 11 points for the White team and senior center Nate Gardner added 10.

"I always play to the strength of the team," Cravens said. "In my first year (1993-94), we were big and strong. This year, we're deeper and have more athletic ability."

Immediately following the game was the slam-dunk contest, won by 6-foot-7-inch senior forward Harry Harrison.

Idaho plays an exhibition against a Hungarian club team Nov. 13 Memorial Gym.

The stems officially begin Nov. 25 when the Vandals host St. Martin's in the Kibbie Dome. All home starting times will be at 7:05.
UI extends winning streak to 41

Dan Eclesk

Sports Editor

The Idaho Vandals didn’t miss out on the first week of hunting season.

Unlike most area hunters who had to go looking for their prey, the big game came right to the Vandals’ home as the UI squad killed off the Montana Grizzlies and the Montana State Bobcats with relative ease in NCAA Big Sky volleyball action over the weekend.

Friday

The Grizzlies managed to take a game from the three-time defending Big Sky Champion Vandals, but it wasn’t enough to mount any real threat in the 15-8, 15-4, 15-11 UI triumph.

Just over 1,200 fans turned out to watch Idaho’s Bulgarian-American candidate Trvetelina Yanchulova pound 23 kills despite a UM gameplan aimed at blocking the outside hitters. The Griz usually outblocked Idaho 17-13 in the four-game match.

“I felt like Lisa played very well considering Montana’s whole approach was to stop her,” Idaho coach Tom Hilbert said.

Freshman Beth Craig came up big for the Vandals with a career high 20 kills against only five hitting errors. The Vandals outhit the Grizzlies 62-56.

Saturday

Idaho took a shutout at the Bobcats in game one of a 15-0, 15-10, 15-8 win. The game one dugout was the first by Idaho since 1986 and played off all offensive efforts by Simon Fraser in 1992 and the first by an Idaho club against a Big Sky opponent since 1987 in UI shut down Northern Arizona.

“The game was almost flawless. We had a couple little setting errors but it was nearly perfect,” Hilbert said.

Yanchulova was on fire once again for the Vandals, providing a game-high 26 kills. She also chipped in 10 digs.

Montana State, which made 28 hitting errors and hit just .203 on the night, was led by the 12 kills of true freshman Brandy Anderson.

Idaho, on the other hand, hit a solid .270 as a team, outblocked the Bobcats 9-6 and outdug MSU 46-35. Idaho noted off six service aces and help out Hilbert.

“We played very aggressive game out there,” Hilbert said. “I’m glad to see that because we’ve struggled with the last few matches.”

On the win, coupled with Idaho’s victory over Montana, extended the Vandals winning streak to 41 matches, one short of fifth place on the all-time list.

“It felt like we improved ourselves over the weekend and made ourselves a better team,” Hilbert said. “It’s great to play in Memorial Gym because the kids are so much more relaxed.”

The Vandals get a midweek treaton tonight when they host NAIA member Lewis-Clark State (23-1). The Warriors, who are currently second in nationwide NAIA standings, lost their first match to second-ranked Puget Sound Saturday.

Baseball card collecting

Tuesday, October 17, 1995

Mark Vanderwall

The days when bubble gum and collecting your favorite player were far more important than the value of the cards has now become a thing of the past.

In 1951 there was one baseball card company, Topps, on the market staying that way until 1954 when there were two. After Bowman stopped production, Topps became the sole card producer until the 1970s.

With the days of kickball and freeze tag lost on playgrounds across America in exchange for knives and guns, so too are the days of collecting for the fun of it.

When I was a kid we would spend Friday and Saturday nights burning the midnight oil trading cards, no matter what their value, so that we could complete the roster of our favorite teams, including bench players. We then proceeded to put our starting line-ups together so that we could start the Cardboard World Series.

After the field was ready in the blanket fort, all flashlights were strategically placed for perfect lighting. We would then steal the dice from the Yatzee game to determine who would be the home team as well as for their use later in the game.

Doused in your favorite team’s pajamas and baseball cap it was ready for play to begin. After home field advantage was determined and it was decided who would roll the die, the extra dice became your line-up to your buddy and placed your line-ups cards on the field.

Play was now ready to begin with the visiting team batting first. The visitor would roll the dice first and hits were determined as follows: If you had a double you were an out and runners didn’t advance. If you rolled a two it was a double, a three was a triple, and if you rolled a four the bases were cleared. Rolling a five gave you the all the bases loaded and runners advanced.

For today’s youth such a game would be nearly impossible due to all the different cards produced. Along with raising the cost of cards, the increase in companies has also made it more of a business.

I started collecting in the late 70s early 80s, when there were still some major companies. In 1989 the demise of card collecting started with the introduction of Upper Deck trading cards to the market. By 1993 there were over 10 companies and rising, and all the stars had over a handful of cards each from one brand. The greatest downfall for me was the introduc-

ions of bases. These cards are ran- domly found all over the place and are more worth their rarity than normally found cards. There is no problem if you get one, but by the time you spend the money searching it really isn’t worth the money.

I realize that everything has to change, but this one area that should have been left alone.

I can remember putting my favorite players’ cards in the spokes of my bicycle to get to it where my mom could have seen, the coming home all the way from my friends house three blocks away, and it was no big deal because you knew that one of your other bud- dies had a collection, and probably in a shoe box somewhere when it wore out.

I will always hold a burning fire in my heart for the memories that baseball card collecting brought me, but I know when I have kids that they won’t be able to play the Cardboard World Series without having hard cases on the players and a calculator near by.

Liske to hold open forum on Idaho’s move to Big West

There will be an informational meeting about the UI University of Idaho’s move to the Big West on Wednesday, Oct. 18th in the Law School courtyard.

UI Athletic Director Pete Liske will speak during the forum meeting, followed by an open forum for discussion controlled by a moderator. Everyone is invited to come and voice their concerns or support for the move.

If you have any questions you can contact UI SID at 883-1713 or Chad Hansen at 885-1961.
Mariners could stay in Seattle after all

OLYMPIA, Washington (AP)—Washington lawmakers, hoping to keep the Seattle Mariners from leaving the state, approved a financing plan to build a $320 million ballpark.

The state Senate approved the measure without a vote to span, 25-16, and the House followed suit, 66-24, a few minutes later. Saturday's action capped a three-day emergency session called by Gov. Mike Lowry after the Mariners gave the state an Oct. 30 deadline to commit to building a new stadium.

The Mariners are playing the Cleveland Indians with the chance of gaining entry to their first World Series. The team has lost an estimated $67 million in the last four years to its current home, the concrete-domed, multipurpose Kingdome.

Mariners spokesman Paul Iaski and Lowry expressed the organization's thanks to lawmakers.

Bond lawyers still need to study the plan, and the King County Council still must take a vote to raise local taxes, they noted.

Council members have complained that it will be difficult to boost the taxes, since the final bill did not also include funding for repairs and renovations of the Kingdome.

The dome's other prime tenant, the Seattle Seahawks, has made noises about leaving if changes are not made to make the venue more profitable.

But legislative leaders from both parties and the governor predicted the council will go along and clear the way for construction of the new ballpark, complete with a retractable roof and grass turf.

"I feel great," a jubilant Lowry said in an interview after he watched the debate from the wings of the House and Senate chambers.

"They did what they needed to do and I'm very proud of them."

Dome expands hours

The Kibbie-ASUI Dome Activity Center expanded weight room hours recently. The hours listed in Friday's edition were incorrect.

A full slate of weekly hours follows Monday through Thursday 6-8 a.m., 11:30 a.m. to 2:30 p.m. and 6-10 p.m. Thursday 6 a.m. to 10 p.m. and 6-10 p.m. Friday 6 a.m. to 10 p.m. and 6-10 p.m. Saturday 6 a.m. to 2 p.m. and Sunday 5-10 p.m.

The Kibbie Dome will also offer a 24-hour running/walking service for tennis and racquetball players. Racquets can be dropped off at the Kibbie Attendant Office.

Kibbie Dome passes for non-USI students are now available in one-month, three-month or year-long installations. Passes can be purchased at the attendant's office during school hours. For more information on restocking services or user passes call 3-694.

IM deadlines coming up

Students interested in playing intramural volleyball must have team rosters turned in to campus recreation by 5 p.m. Tuesday. Play will begin Oct. 23.

In addition, UI intramurals will offer a new sport this fall in the form of co-rec floor hockey. The roster deadline is set for Wednesday with play kicking off Oct. 24.

The captain's meeting for volleyball will be set for 4 p.m. Thursday while the co-rec floor hockey captain's meeting will follow immediately at 4:30.

The deadline for the annual rifle target shoot is also nearing as signups are due Friday. The event will take place Saturday.

The long list of intramural activities includes the start of flag football playoffs Sunday. Playoffs schedules will be available Friday afternoon at the campus recreation office in Memorial Gym.

Flying high

Delta Ohl's Brian Cox makes a nice catch during intramural action Monday night.
