**Campus events entertain for Halloween**

Lisa Lamplag

Staff

Little ghosts and goblins ran through the Idaho Tower last Saturday, while the residents of Targhee Hall gave their house guests a real scare.

For the past 10 years Targhee has been raising money for the Wishing Star Foundation by holding a haunted house. Vena Ross, president of Targhee Hall said the event went pretty well. "We had about 200 people come through," Ross said.

The hall charged a few dollars for people to walk through a maze, past a graveyard and on a tour of the different rooms decorated by the residents. "We took the showers and turned them into a swamp," Ross said. "It's just something to do to get the hall to do one big thing together," Ross said.

The haunted house brought in about $300. Money left over after expenses will go toward the Wishing Star Foundation.

Residents of the Theophilus Tower held their own Halloween event. The annual Tower Trick-or-Treat gave kids from the community a chance to gather treats in a safe environment.

"I think it's a great idea," Neely Hall resident Michelle Bulaudeau said. "It gives the kids some place inside to trick-or-treat. It's not so cold and it's safer.

Volunteers escorted the children through the hall to gather candy from the residents. Parents treated themselves to refreshments in the lobby. Afterward, the children had the chance to participate in game downstairs.

Residents of McCoy Hall set up a small haunted house of their own. "Spook Alley" led children through the 10th floor lounge.

Christy Hijmans from McCoy Hall said many of the little children didn't want to go through. "A few came out crying, but a lot liked it."

McCoy resident Jenny Rountree said, "It was geared more for the bigger kids.

The day after the event McCoy hall was filled with leaves and debris from Spook Alley. "Our vacuum cleaner doesn't work," Hijmans said.

**Bogus news release names Sullivan as UI president**

Mike McNulty

Staff

A "news release" sent to Idaho news media on Thursday claiming the Idaho State Board of Education has chosen a new university president in Texas.

The bogus release said the board had taken an "unanimous vote" after its meeting last week and named J. Kirk Sullivan, vice president at Boise Cascade Corp., as the new UI president.

"It's to be announced presently a prank," State Board Public Affairs Director Bill Hargrove said Monday. "The release was not from us."

Applications for the position are being accepted until Nov. 13. So far 70 people have applied said Vicki Burur, assistant to the board's executive director.

The release gave board executive director to Reynolds Barron as the media contact and described in detail Sullivan's salary, corporate perks, involvement with the UI and his extensive efforts for the position.

"Board members agreed that Sullivan was selected byUI president," the release stated. "His keen negotiating skills have enabled him to retain his $21,000-per-month salary while the company continues to close Idaho mills, reduce its employees and initiate business in China and Brazil."

Boise Cascade last week announced it was laying off 250 workers at mills in eastern Oregon and Southern Idaho.

The Lewiston Morning Tribune reported Saturday, that Boise Cascade officials have confirmed Sullivan's running for the UI position, but are unsure of the motive behind the fraudulent release.

"I don't know if this is high jinx or dirty tricks. Whatever it is, it's really unfortunate," Bob Hayes, director of corporate communications at Boise Cascade, told the Tribune. "Kirk's been around for a long time. He's a very visible, pub-

tic persona, so any number of peo-
ple could have access to that kind of information."

A related business, Dave McNulty, financial vice president of the University of New Mexico and former UI vice president for finance and development has also been nominated for the UI president's position. He is believed not to have applied for the position.

After the applications are collect-
ed in mid November, the president's search committee, headed by former Senator James McClure, will narrow the list of candidates down to 20 to 25 by Dec. 14. Five to 10 finalists will be selected in January and an appointment will be made in February.

Many people around the country will go hungry at some point this year. With the closure of one local food bank this summer and the depletion of its supply of canned goods, the men of the Epsilon Gamma chapter of Lambda Chi Alpha at the University of Idaho are trying to do something to help.

Boise State's local Lambda Chi chapter, in conjunction with Ronald McDonald House, is sponsoring the food drive here in Moscow.

It's not just occurring in Moscow, but internationally wherever a chapter of Lambda Chi is located.

Throughout this week, the men of Lambda Chi will be distributing grocery bags to Moscow residents' doorsteps asking them to donate non-perishable food if they can. On Nov. 4, the men will collect the

Old murder case revisited after skull found this week

COEUR D’ALENE—Kootenai County Sheriff’s Detectives are revisiting the county’s oldest open murder case.

But the book is finally being closed for one woman who had wondered the disappearance of Ron and Rita Marcussen for more than two decades.

The Marcussen’s, a Rathdrum couple in their first year of marriage, vanished on Nov. 19, 1973. Rita’s skull, clothes and a few bone fragments were found within a year.

Former prosecutor Gary Humm tried George Strossm of Post Falls for Rita’s murder, back in 1976. Strossm was acquitted, largely due to unanswered questions about Ron’s whereabouts.

Those questions were answered Thursday when a skull found the previous day was identified as Ron’s.

Ron, who is now a district judge, said the defense raised the possibility that Ron was a victim, not a perpetrator of Rita’s death.

Now that Ron is a confirmed homicide victim, it destroys that theory.

A forensic dietitian who examined the skull confirmed Ron was shot twice in the head.

That may add credence to a jailhouse witness who testified that Strossm once admitted he shot Ron and strangled Rita.

Wister set in the night the Marcussen’s vanished, so massive searches in the weeks following their disappearance turned up little physical evidence.

Wolfinger said a Search and Rescue team of volunteers help investigators conduct an evidence search over the area where Ron’s skull was found.

Ron’s skull was discovered with that of a four-year-old girl southeast of Athol where Rita’s skull was found 21 years ago.

Two wanted in Washington arrested after van over-turns

JONESBORO, Ark.—Two people wanted for armed robbery in Spokane, Wash., were arrested on a van Sunday after running through a roadblock and being fired upon by the Arkansas State Police, an agency spokesman said.

Traveled at a local hospital after the wreck were Gene E. Young, 29, the van driver, and 27-year-old Karen Bernard, a passenger.

Both were to be taken to the Regional Medical Center following treatment for minor injuries, state police spokesman Wayne Jordan said.

Sunday evening, Jordan said, the van driver and a female passenger committed suicide in a hospital in satisfactory condition.

He said they were under guard.

The incident began at 8:06 a.m. Sunday when Cpl. Charles Harper pulled over the driver of a state prison van near the maximum security prison in Cypress.

The driver stopped the vehicle on U.S. 63, east of Hope, for following too closely. When the officer asked the driver for his license, he noticed the van was stolen and that it had been involved in a serious accident.

Young’s license had been suspended, Harper said. Young apparently got his hands free and sped away.

Young fired 13 shots from his .40-caliber semiautomatic handgun during the ensuing chase, which ended on a four-lane section of U.S. 63, in the Jonesboro city limits.

When Young went through the roadblock, Harper caught up with the van within a half-mile, pulled parallel on the four-lane, and fired three shots into the van driver.

He said Young lost control and the van veered off the road. The two occupants were pulled from the vehicle by police officers trailing the chase, both with slight fire and burns, Jordan said.

Faculty representative competing for university helm

MOSCOW—University of Idaho Faculty Council Chairman Larry Barnes has confirmed he is applying for the school’s presidential position, but he will not relinquish his faculty representative post during the search for a new leader.

About 70 people have applied for the president’s post following the resignation of Printing Presser John Zinser became chancellor at the University of Washington.

Zinser is from Canada, one is a military general and at least five are military in rank and six applications are not described.

Barnes said he believes he can still effectively represent the faculty while under consideration for the chancellorship.

The search committee will narrow the list of candidates down to three to five finalists will be selected in January.

Associated Press

Americans don’t count on balanced budget

NEW YORK—Most Americans do not believe Congressional Republicans will balance the budget by 2002, and that the government of the GOP’s proposed tax cuts by a nearly 3-to-1 margin, according to a recent Times/CBS News poll released today.

Those polled also rejected by a 2-to-1 margin GDP plans to cut Medicare, while Republican leaders do not know much about it.

On Wednesday, debate on the budget opened in both houses, Democrats denounced the tax cut proposal and President Clinton reiterated his threat to veto the GOP plan.

He also announced the third consecutive drop in the deficit.

The poll was based on random telephone interviews conducted Sunday through Tuesday with 1,077 adults throughout the country.

The margin of error is plus or minus 3 percent.

Eighty-one percent of those polled said even if the Republican spending plan was enacted, the federal budget wouldn’t be balanced by 2002, according to the Congressional Budget Office.

On the section of Medicare cuts, 75 percent of those polled said they would affect描h patients, while 14 percent were of those who would not.

Cooperative Ed orientation held today

Cooperative Education will be holding an orientation today from 12:15 to 1:15 p.m. in the Education Building room 106. Discovery week work opportunities are available for information call 885-5821.

Internship Search and Networking Strategies

"Internship search and Networking Strategies," is the focus of the Cooperative Education’s internship search and Networking Strategies. The event is from 12:30-1:15 p.m. in the Education Building room 106. Students who have completed their filed with Cooperative Education or the second level of internship search for more information call 885-5282.

Crossfire discussion held at WSU

"Operations and Problems," is the topic of a Crossfire discussion held at WSU on Nov. 15 at 5:30 p.m. in the CUB Ballroom Political analysis for the Washington Post Juan Williams and guest will discuss affirmative action with Rush Limbaugh's guest host Tony Snow.

Alternatives holds open house

"The Alternatives to Violence is having an open house on Nov. 15 from 11 a.m. to 2 p.m. at their Pullman office, W. 10th Main Pullman. Everyone is encouraged to attend this event that would be a perfect gift for a friend or a neighbor. Please come and be a part of this movement," according to the event ticket. There will be door prizes and refreshments.

Student spouse workshop

"There will be a workshop held Thursday at 6, from 7 to 9 p.m. in the Silver Room in the Student Union. The workshop will be part of several financial problems of married students, psychological stresses of being a spouse of a student and how to cope. The workshop will be instructed by Dr. Jamie D. Morris, Director of Student Services, and Don't Can Four Candles, Center and Dr. Roger Williams, Adjunct Professor, College of Graduate Studies.

Circuitian rhythms and winter blues

Circuitian rhythms are associating with the fractal patterns of the earth’s rotation. The movement from day to night provides physiological responses, negotiable for some, notable for others.

With the approach of winter, Jessica Lappin, will examine the effects of light on our health, mood, and behavior at the Women’s Center Program at 12:30 p.m. in the Women’s Center.

Artwork for sale

Custom-made masks are among many items for art interest. The event will be held in the sale of artwork by the Women’s Center. The art will be sold at 10 a.m. at the Women’s Center.

On the section of Medicare cuts, 75 percent of those polled said they would affect描h patients, while 14 percent were of those who would not.

PCEI inaugurates Palouse commuter van pool

Justin Oliver Ruen

The Palouse-Clearwater Environmental Institute opened its “van pool” for service Monday. The van pool is a service enabling people from outlying areas to ride in special vans to and from Moscow and the University of Idaho.

The project began in 1992, when PCEI became aware of funding available from the National Transportation Department's Congestion Mitigation and Air Quality program which allocates money for such projects, said Fritz Knorr, transportation program coordinator for PCEI.

“The van pool is aimed at reducing the impact on air quality due to traffic congestion,” Knorr said.

 Riders purchase monthly tickets for a seat on one of three vans, which come from north, east and south of Moscow. The north van will serve Potlatch, Viola and Princeton, the east van will serve Troy and Deary and the south van will serve Lewiston and Genesee. The monthly tickets range in price from $30 for Viola riders to $75 for Lewiston commuters.

“Two of the vehicles are 15 passenger converted vans, with airline style seats and a center aisle seating arrangement,” said Knorr.

“The other van is similar but it’s fully ADA handicapped accessible.”

Knorr said public response to the project has been good. "As a matter of fact, the vehicle running up from Lewiston already has 12 riders subscribed, so it’s almost full," Knorr said. Knorr encourages people to keep calling even if the van is full. "I can still get you in touch with other people who are calling up to get a seat, and you could put together a car pool," Knorr said.

"People will also drop out of the pool periodically."

The response from Deary and Potlatch has been less enthusiastic, with plenty of seats open.

The schedule is determined by the riders, with nearly everyone working from 8 a.m. to 5 p.m. To accommodate these riders, the vans leave in order to arrive in Moscow around 8 a.m., Knorr said.

The project is open to expansion, depending on the future availability of funding as well as the community response, Knorr explained.

For more information regarding the van pool, call PCEI at (208) 882-1444.

Fritz Knorr and Pam Palmer prepare to cut the ribbon during the opening ceremony celebrating PCEI's new van pool service.

Business students earn big return on investment

Janet Birdsell

“They did a good job. The kids worked hard, and it all came together,” Linderman said.

The original $50,000 was provided by the college's regional brokerage firm. The D.A. Davidson Student Investment Fund was created to provide an opportunity for students to apply modern finance theory to investment decisions involving actual market transactions. The program is offered at five colleges: University of Idaho, Washington State University, Montana State University, University of Montana and Carroll College.

The program is beginning its third year this fall, and UI students have made the largest returns each year so far, Linderman said. If the students' portfolio loses money, D.A. Davidson absorbs the losses. If it makes money, the college gets to keep half of the total return after the first 5 percent.

"Each student selected two stocks and made presentations to the class,” Linderman said. The class as a committee then made decisions on which stocks to select. They limited their purchases to 10 stocks, which included Micron, Microsoft, Intel, Merck, and Gillette.

The class is offered in the fall, so after the students made their selections the portfolio was not changed during the spring or summer, Linderman said. It was left to grow or shrink depending on the stocks.

Last year's class had 10 students. This fall, the enrollment is at 22 or 23 students, Linderman said. "We got some positive word-of-mouth and got some more students in there."

The class made $13,234, which will be used by the college's Dean's Student Advisory Board.

The money is completely under the students control, said Cheryl Wallace, assistant to the dean.

"I know they've met to discuss what to do with the money, but I don't think they've decided yet. Last year they only had $65," Wallace said.

Lisa Bromman, president of the board, said "I doubt we'll use the entire amount this year because we really can't expect this kind of return every year and should plan for the future."
Demand for industrial technology grades exceeds 100 percent

Sean Tetton

The University of Idaho Industrial Technology Education Department reports 100 percent placement for its graduates.

"There are 2,000 industrial technology teaching jobs in the United States going unfilled," said James M. Cassetto, assistant professor of Industrial Technology Education at UI. "We have people in the Boise school district offering jobs to juniors."

Some perceive industrial technology education as college for future high school "shop" teachers. While department curriculum still supports shop teaching, Cassetto said little shop work is done at UI. "Students learn computer work, electronics, applied physics, operating systems... it is not like it used to be."

Chuck Schoeffler, assistant professor of Industrial Technology Education at UI, said, "Twenty years ago there were shop and trades classes. However, we don't do much cabinet making, fine carpentry, (and similar trades) anymore because so much is manufactured. Now we need a higher-level of skill, and that is what we are giving our people."

UI offers a B.S. in Education degree, with a major in technology education, and a Bachelor of Technology degree, with a major in industrial technology. Students who complete the latter degree usually become "field engineers."

A field engineer is an intermediary between traditional engineers and manual laborers. Field engineers must be mathematically astute, and "keep things running smoothly."

Schoeffler said there are plenty of engineers creating things conceptually, but not enough people. • SEE GRADS PAGE 6

Technology club looking for projects

Sean Tetton

"Anyone channel surfing on TV lately has seen numerous television shows portraying master crane-operators making easy work of lifting impossible projects. While many of us would have to extend limits of credit just to get proper tools for such projects, we would still lack the experience."

The University of Idaho Industrial Technology Education Club is looking for projects, big and small, in woodworking, metalworking, engraving, and miscellaneous industrial projects.

"The club will do projects for individuals and organizations, on and off campus. They charge for project material costs, and a "small labor fee." Money earned from projects help fund field trips and new equipment for the Industrial Technology Building."

"We build a lot of research equipment," said James M. Cassetto, club advisor and assistant professor of Industrial Technology Education at UI. "We do electronics, computer work, woodworking, metalworking, plastics—a wide variety of things."

Cassetto, and fellow Assistant Professor of Industrial Technology Education Chuck Schoeffler, take turns advising the club at least once weekly.

The club recently mounted a world map on large frame for the College of Education. They are now working on "D.A.R.E." signs for the Moscow Police Department, and work has begun on a chemical entrusted for UI's Safety Department.

"We like to get involved in the community," said Lisa Sneathen, club president, "and show them what industrial technology is all about."

A variety of projects were undertaken throughout the club's four-plus years at UI. Projects have included... • SEE CLUB PAGE 6

University of Utah trying to dispel anti-Mormon reputation

I watched my own kids come here and they looked at their own values, but they looked at other people's values, too...they were able to discuss their religion with people of other origins.

Norm Gibbons U of Utah special assistant over enrollment management

University of South Carolina, where fundamentalist Christian religions predominate. He sees little difference at the U.

With a campus population of 40,000 people, including 27,000 students, 15,000 faculty and staff members, you are going to have people from all walks of life with different prejudices and viewpoints," Smith said.

"And I think that's good because the university represents the real world. Young people have to come grips with their own beliefs and deal with the diversity they find."

Some 65 percent of the student body at Utah is Mormon, a figure that is bound to be affected by the growing numbers of LDS applicants being turned away at BYU because of an enrollment cap of 27,000 set in the mid-1970s.

Jeffery Tanner, BYU associate dean of admissions, said the school was forced to reject 1,660 qualified students last fall, a direct result of the cap and the 9.1 million-member church's explosive growth.

It's impossible to determine how many of the students are coming to the University of Utah. But Smith and Assistant Dean of Student Affairs Kay Harvard said it makes sense the BYU cap is affecting the U's enrollment.

"We certainly welcome students of any faith and we really do want to promote cultural ethnic and religious diversity," Harvard said.

"We hope students who don't go to BYU would seek enrollment here."
Latah county lawmakers protect board’s decision

Associated Press

MOSCOW—Three Republican lawmakers from Latah County say in the next legislative session, they intend to bring up the state Board of Education’s decision on engineering education.

The board voted 5-3 earlier this month to move toward Boise State University administration of a joint engineering education program in Boise. It’s now operated by the University of Idaho.

Representatives Maynard Miller and James “Doc” Lucas and Sen. Gary Schroeder held a news conference in Moscow on Friday to object to the move. They said in a year when budgets promise to be tight, the decision will hurt other areas of state spending.

“We want to bring this to the attention of the constituents so when the Legislature addresses it, the public will be ready to make comments,” said Miller.

The Republicans said the decision and debate about engineering in Idaho has crossed party lines and, according to Miller, has caused a separation in the state that is “no less than tragic.” He said in the end, the few thousand dollars promised by businesses in Boise to help the program will cost Idaho citizens millions.

Miller called it “a sad time of political regionalism coupled with fiscal blindness” which could damage higher education and hurt financial support for public schools.

Miller said if the state board doesn’t demand a cost analysis lawmakers will.

“We have to see some data and hard facts,” said Schroeder, who is chairman of the Senate Education Committee. “A cost analysis should have been done before (a decision was made). Why are we spending very valuable resources to duplicate efforts? It is not the direction we should go.”

Lucas said the concern has to be students and taxpayers but that the state board has considered “anything but that.”

“Legislators are going to have to rob everything in the state to meet this obligation,” Lucas said. “The state board has chosen to ignore serious budget questions.”

He said the faculty has been muzzled on the issue and students are ignored.

“It’s not cost oriented, it’s big shot oriented,” he said.

GRADS *FROM PAGE 4

who can put them together. “Engineers do not normally go out to the shops,” he said.

“Everybody you have to translate their ideas. We are ambassadors between engineering and the real world.”

Industrial technology graduates are represented in the Iowa program. The head of marketing for Motorola is one of our graduates,” Cassetto said. “Another graduate designed and supervised the building of the experimental space shuttle. Graduates find their own niches.”

Cassetto said there is a waiting list for available graduates who complete the industrial technology teaching program. “I don’t have a soul right now,” he said.

“Everybody is out working. I have a graduate teaching assistantship and can’t fill it.”

CLUB *FROM PAGE 4

ranges from casting fruits and vegetables in aluminum, and refurbishing furniture, to creating a tree-seeding machine, and building a day-care center; and virtually everything in between.

Smathers said the club is trying to get funding from ASU to start a regional weather station, and establish a corresponding World Wide Web page on the Internet.

Club members work in groups on each project. “Everybody works together,” Smathers said. “It is a team-work atmosphere.”

Anyone can join, and there are no club fees. Students may register into the club for a one credit class.

The club meets 6 to 9 p.m. every Monday. For more information about joining ITEC, or to submit a project proposal, call 885-6972.

Panel votes to subpoena documents, question first lady's aide

Associated Press
WASHINGTON — The Senate Whitewater Committee unanimously agreed Thursday to issue 49 subpoenas demanding documents from President and Mrs. Clinton, the White House and potential witnesses.

In preparation for upcoming hearings, committee lawyers questioned former Associate Attorney General Webster Hubbell, who was the No. 3 official at the Justice Department during criminal investigations touching on Whitewater.

The subpoena initiative was led by the committee chairman, Sen. Alfonse D'Amato, R-N.Y., who contends the White House has withheld documents in the continuation of the Whitewater probe. The panel recently obtained phone records including calls by Hillary Rodham Clinton the night of Vince Foster's death.

Mrs. Clinton's chief of staff, Margaret Williams, and longtime friend Susan Hiltz, were questioned Thursday for questioning about their phone calls with the first lady hours before a restricted search of Foster's office. Police were kept from the search of the office, where some financial records of the Clintons were kept.

Committee investigators questioned Hubbell under oath in private to prepare for the committee's future of hearings, which will deal with the role the White House played in various inquiries dealing with Whitewater.

Among the inquiries federal regulators' investigations into the failed savings and loan owned by the Clintons' Whitewater partner, the Justice Department's handling of criminal investigative matters on the S&L and an Office of Government Ethics review of Whitewater-related contacts between White House and Treasury Department officials.

The meeting with Hubbell, who is serving a prison term for fraud and tax evasion, was confirmed by several sources on Capitol Hill. A committee spokeswoman and Hubbell's lawyer, John Nields, declined to comment and refused to confirm the questioning had taken place.

Hubbell was formerly a partner of Mrs. Clinton at the Rose Law Firm in Little Rock.

After lengthy negotiations among staff lawyers, Whitewater Committee Democrats agreed to the subpoenas, saying they represented a substantial narrowing of sweeping document requests that the panel made months ago.

The subpoenas to the White House "cuts short the fishing expedition," said White House spokesman Mark Fabiani.

The committee had requested all records in the custody of numerous White House officials and had asked for material that the White House used to prepare for two earlier rounds of Senate Whitewater hearings. Both requests "are gone from the subpoenas," said Fabiani.

The Republicans also dropped plans to subpoena transcripts of Whitewater prosecutors' interviews of the president and Mrs. Clinton. They also shelved plans to subpoena the notes that lawyers took in the interviews. D'Amato said that most of those subpoenas were already turned over material. But he said the subpoenas would reinforce the importance of turning over all relevant documents.

"The subpoenas are much ado about nothing," said David Kendall, the Clintons' lawyer. "We've fully cooperated without regard to a subpoena and will continue to do so."

National Democratic chairman says party will make comeback

Associated Press
Boise — Harold Klassen of Idaho is being indicted on charges of mail fraud, distribution of controlled substances and unlawful controlling substances which had been distributed.

United States Attorney Betty Richardson said Klassen is accused in counts 23 with mail fraud for improperly mailing insurance companies for a diagnostic procedure which it is in the research stage. In counts 34 through 39, he is charged with the illegal distribution of a substance containing valium. In counts 40 through 45, Klassen is charged with improperly labelling the substance containing valium.

Klassen is a naturopathic physician who operates the Bio-Mechanics Clinic, Inc., in Aberdeen. It is alleged that as part of his practice, Klassen conducted a blood test for patients which is not approved or accepted in the United States. Medical Services Bureau, Blue Shield of Idaho and Blue Cross of Idaho were mailed bills for these tests under the name of Wade Davis, a licensed chiropractor who was working for Klassen. Neither Blue Cross nor Blue Shield provides benefits for services provided by naturopaths.

The indictment also alleges that on four occasions between Nov. 9, 1994 and Feb. 1, 1995, Klassen illegally distributed valium. On Feb. 2, 1995, Klassen possessed the same substance with the intent to distribute.

It is further alleged that Klassen delivered the substances containing valium into interstate commerce, and that the labeling failed to bear adequate directions for use and warnings against use under conditions where they may be dangerous to the health of the user.

"I CAN TELL YOU ALL YOU NEED TO KNOW"
E-mail becomes gateway for unwanted communications

WASHINGTON—Lawmakers seeking to reach out to constituents along the information superhighway also are opening themselves to electronic lobbying, hate mail, crank messages and other unwanted communications.

Many House and Senate offices that have established electronic mail capability to better communicate with the public are finding as little as 10 percent of the computer-based messages coming from their constituents.

The rest come from outside the district, often in the form of mass mailings sent to several members at once. The burden is expected to grow as more people hook up their home and office computers onto the expanding network of computer networks known as the Internet.

"If we have to deal with 1,000 messages a day, thinking going to be a nuisance," said Ray Landis, who handles electronic communications for Rep. John Murtha, D-Pa.

Among the 100 messages his office may get on a heavy day are letters offering theories on the 1993 suicide of deputy White House counsel Vince Foster and threats of a revolt by a dissatisfied public.

Alice Weise, computer systems manager for Rep. Bob Portman, R-Ohio, said the congressman's electronic mail occasionally includes profane tirades insulting all members of Congress. She doesn't print those out for Portman to see.

Other mass mailings seek to influence a member's vote on pending issues like Medicare and student loans. Offices also get electronic newsletters, academic research papers and other "junk" mailings.

Most offices already get stacks of letters sent via postal mail from outside the district. But someone who wants to contact every member of Congress has to address 535 separate envelopes or postcards and lick 535 stamps, or make 535 separate telephone calls.

"A computer, however, allows such a person to automatically route electronic messages, or e-mail, to every member at once—without leaving the home or office."

"It gets us a little closer to the popular form of democracy they talked about back in the wag days," said Ron Bel Bruno, senior editor with NetGuide, a computer magazine based in Mahasset, N.Y.

Bel Bruno said members are as susceptible to "throwaway and superficial comments" with e-mail as they are with the telephone or postal mail. But deleting an electronic message is much easier than hanging up on a call or wading through a bag of postal mail, he said.

"Certainly there are some disadvantages, but as balance these kinds of technological advances do improve the ability of the constituent to communicate their views," said Rep. Paul McHale, D-Pa.

McHale gets four or five messages a week from people convinced the government had planted microchips in their brains and was monitoring them through satellite transmissions.

So far, organized lobbying through electronic mail isn't widespread, partly because less than one-third of House members and two-thirds of senators have publicized their e-mail addresses.

But many offices report being flooded with informal lobbying conducted at the initiative of an individual or group of individuals from the same town or college campus.

Howard Marlowe, president of the lobbying firm Marlowe & Co., said electronic lobbying was an emerging segment of the industry and soon would become an important component in successful grassroots campaigns.

Democratic...from page 7

the Democrats are stirring up more support among college students with the party's claim that the GOP tax cut will add greatly to the cost of college loans.

A few months after the November election debacle, Mask went on the Boise State University campus to get up support among students. Only four attended.

This week Mask and Fowler held a similar event at BSU. More than 30 students turned out, despite competition down the hall from the Frank Church Symposium on Global Affairs.

"Nobody can compete in the 21st century unless they are well-educated," said Fowler, who has a doctorate in political science and for more than 30 years has taught at the University of South Carolina.

But he got the students' attention most by talking about GOP plans to change student loans. He said that would cost them an average of $3,000 over four years in additional interest.

When a GOP sympathizer tried to heckle him by asking where President Clinton's balanced budget was, Fowler said the huge national deficits came under 12 years of GOP rule.

"Where was Ronald Reagan? Where was George Bush? Where was Ronald Reagan?" he asked.

Mask said all he needs are more good candidates, and Democrats will stage a comeback in 1996.

And Fowler is confident.

"You will see very different results in 1996 than you saw in 1994," he said.
Senate not living up to its name

This senate will be forever memorialized as the senate that accomplished... Virtually nothing.

On Oct. 25, 1995 the ASU senate proved to me that they will accomplish nothing of substance. ASU elections are near and the senate is behind schedule. They will push petition deadlines ahead, this means the elections will be rushed. I wonder if that's what happened last year?

I have been personally involved this semester and only two last made more than 20 minutes. It is no wonder they are behind schedule. There is a obvious lack of planning and leadership in our governing body.

Last year's whole election had to be held twice because of a book keeping error. And if I understand correctly, the rush this year will limit the number of candidates by default.

Let me explain: senators have an advantage running for reelection. Anyone who wants to be on the ballot needs to have 75 student signatures on a petition. The senators visit their living groups anyway—how much trouble is it to have a petition handy? In discussion Senator Manis said, "I'm sure enough, but I don't know when to hand them out," continuing on to say potential candidates may be put off by this.

The doors slammed shut with a "THUD" on potential senatorial candidates Wednesday. Senator Manis was the only vote of dissent—the only vote I felt represented students.

Senator Hsiel said he was against having the election before Thanksgiving but voted to push elections ahead anyway.

The senate sent a message to the student body. The message is we are self perpetuating and doing everything possible to keep their two-year-old position in power.

I hear the rhetoric, "We represent students," or "We are here to serve students." But when it hits the fan... "nuff said.

And who is the ASU leader? UI lost a quality president and control of our engineering program with so much as a whimper. Now they have lost control of their own election process. I don't want the senate to think I am singling them out for scrutiny. I do not want them to think I am trying to make them look foolish. They do it all by themselves.

ASU Senator Jeremy Winters has said students often do not make their wishes known to the senate. We of the media are here to help.

The senate has and will accomplish little of substance. They spew the verbal vomit of politics as usual, have petty little personal squabbles and count on an apathetic student body not to care. Send the senate a message and let them know you expect leadership. UI has a one voter turnout of under 20 percent. Come Nov. 15 please do one thing... Vote.

—Dennis Sasse

Male bonding rituals ridiculous

T he male bonding phenomenon... It's perplexing and confusing. It's really stupid.

Corinne Flowers

The male bonding phenomenon: The two punks who sit behind me in design class. We'll call them Bruce and John. They have a sadistic pleasure in annulling the bell before me. My retorts are often useless. My dry, humorless replies are saliently appreciated. My thinly veiled threats to kick their collective butts go entirely undetected.

The truly remarkable thing about Bruce and John is that one of these two guys without the other, they're pretty nice. However, get the two of them together and they definitely do the dirty to the returns.

They promise to be nice to me if I do favors for their little underdog selves, like, say, buy them some whiskey.

I figure they're still young and maybe there's hope for them.

Scenario Two: There are these two guys who sit beside me in art class—it's a weird coincidenee. Like the design boys, the art boys are mean. And like the design boys, it's only when they're together.

The art boys, we'll call them Steven and Brian, are just frat boys, which is akin adding to injury. You see, frat boys specialize in whatever some of which are drink beer, drink whiskey, spurt, talk about girls, talk about parties and bond. The whole premise of fraternal life is, in fact, bonding.

For the most part I try to keep my mouth shut, because I know how frat boys本质 intelligent women who care little for their own and don't have ample bosoms, long wavy hair and a coquettish giggle. But when I do feel the need to interject a comment or two, they are there to tease and ridicule me.

Stony and Art are virtually identically to Bruce and John in that one of them is alone he will have a pleasant conversation with me. (Stony even gave me some pizza crusts once, the big sweeter!), but if the two volatile components come together there is a random, chaotic explosion of insults. Me, not so thinly veiled threats to work a little better on them, although they also tend to laugh them off.

I have discovered neither the art boys nor the design boys are the ones in the least respect for women. I believe this could be cured by a few hours alone with me, some vinyl and a pair of handcuffs. My theory is, there's no amount of bonding that a little bondage can't cure.

Scenario Three: A week or so ago, I was hanging out with friends. The two male children, at this point I would like to add the "two" male children were over 25 years of age, who were part of the Electorate decided to drink whiskey—again, a strange cosmic coindicenral threat seen mainly among male bonders. They decided to drink a lot of whiskey. They, in fact, decided to much of whiskey for their shot for.

After sufficiently toasted, the little ones—we'll call them Bruce and John—decided to go beer out some local boys to let off some steam. The big ones—one we'll call Vinny—decided to pick on me. No, quite literally, physically picked on me.

After yelling and screaming and threatening didn't work, I returned to the old standby. "I'm going to have to kick your ass," I said. As in previous mucho encounters, my threat went unheeded.

So I did it. I kicked his six foot tall 250 pound ass all over the place.

The moral of the story? You art and design boys, because I don't want to have to kick your obvious little butts too.

In fact, I might not have to, I know that foot linebacker with a newfound respect for women who will do it for me.

-—Brian Davidson
Budget deficits need to be taken care of now

D o you see the glass as being half full or as being half empty? If you see it being half full, you're positive. If you see it being half empty, you're negative. This is the way our country, and the Federal government, is seeing the deficit. How can it be seen both ways? Because it can. The Federal government has two different viewpoints: one is to see the deficit as a problem that needs to be solved, and the other is to see the deficit as a result of economic conditions that could be positive in the long run.

The Federal government is currently trying to balance the budget, but the deficit is still a significant problem. The government is considering various options, including increasing taxes and cutting spending, to address the deficit. It is important for the government to take action to prevent the deficit from growing, as this could lead to higher interest rates and slower economic growth.

Guest Commentary

Heather Lamm

just ledger entries on the government books. They have real world consequences. In order to pay for annual deficits the government borrows from the nation's pool of savings, leaving less money available for private investment. Lower private investment in new equipment, technology, and worker training—i.e., less investment in the future—means American industries are not as productive and competitive as they used to be. As America's competitive edge slips away, we as a nation earn less money. As a result, wages don't climb, standards of living stagnate, and jobs become worse and harder to find—especially for young people just entering the workforce.

For our parents, the American dream was owning a house on one income, sending kids to college, and retiring comfortably. But for our generation, homes that mortgage payments are often simply too expensive, even with two incomes. And college?

Congressional Budget Office, by 2023. The whole concept of Social Security itself has to be rethought.

What has caused our annual deficits and future projections? Hourly, the lion's share of our skyrocketing federal spending does not go to national defense, but goes to programs for education, crime prevention, the environment, and other non-defense programs. Rather, the majority of federal funds go to interest on the national debt and entitlement programs.

Letters to the Editor

Vote for LeClaire

Last year, we remember a lot of bitter debate about how Moscow City Council doesn't appreciate the community of Idaho students who live in this city. Well, here's your chance to support a candidate who understands and appreciates students and their concerns.

Tom LeClaire was student body president last year. Now we know many of us were pretty young back then, but have our issues really changed? LeClaire defeated an opponent in the Idaho Legislature to define fees in-state tuition, worked out an agreement with the GIBB administration for better campus lighting and security, defeated a university proposal to eliminate study areas in the Student Union, and organized the first ever joint session of the ASUI and AUBSU Senates. This is a good track record—even by today's standards.

Today, LeClaire is still keenly aware of UI issues. He is an active alumni of TKE Fraternity. He is the youngest member of the College of Letters and Science Advisory Council. At a breakfast honoring past ASUI Presidents during Homecoming, LeClaire and others founded the ASUI President's Scholarship. As chairman of the Moscow Chamber of Commerce Government Affairs Committee, he gave ASUI leaders an opportunity to present their views alongside Moscow's business community at last year's Legislative Tour. At this event, LeClaire led a delegation of Moscow business leaders on a trip to Boise to meet with Governor Bact, Superintendent of Public Instruction Anne Fox, and Department of Commerce Director Jim Hawkins. Thanks to Tom, our ASUI Lobbyist, Shawn Sticker, was a full participant in these meetings.

LeClaire supports opening a polling place on campus for students and faculty during off-year elections. But if we don't go across town to the Lapach County Pro-gam, don't vote for him on November 7, it may never happen! Please join me in voting for Tom LeClaire for Moscow City Council.

—Sean Wilson, ASUI president
—Damon Darby, ASUI vice president

Homecoming was a success

Homecoming weekend and also this past week, the University of Idaho students were in great evidence to former students—our alumni. Participation surrounding these weekends was outstanding. Katie Jolley, homecoming chair, was ubiquitous appearing at every meeting and alumni association. Angela Sawyer, Royalty Chair, Laci Shone, Homecoming Queen, Largest, Parade Co-Chair, and Tia Crampton and Donovan Dayley, Breakfast Co-Chair, were remarkable in all of their many undertakings. The SAFs members were magnifi-

Dead deer photo objectionable

Hunting is an activity that many people in Idaho participate in. I understand this and while I do not engage in hunting or understand the reasoning behind it—it is legal, and I do think that people have the right to do what they want, as long as it's legal. In fact, I believe that due to the large number of hunters we have here, we should be aware of the potential problems that could arise. However, photographs are an entirely different matter. The only possible reason for a photo of a dead deer posted on social media is to mock or insult the hunter who killed it.

The Argonaut welcomes reader letters and guest columns. Letters must be one page or less typed, double spaced, be signed and include the phone number and address of each writer. CENTURY COMMUNICATIONS CORPORATION
Student Union food court lacking

The food court is a failure. The food court serves a limited variety of food, and the service is not part of their vocabulary. Service implies making a customer feel welcome, making sure they get what they ordered and most importantly, not wasting the customer’s time with discovery, insufficiency and mistakes. Today was the last straw for me. I went to Burger King with my roommates, and we ordered three burgers. We were rudely told that we would have to wait. We had plenty of time and wouldn’t have minded waiting the two or three minutes. But, the coke, the cut, was curt, sarcastic, and to top it all off, when we got our food home, it was all wrong.

We live right across the street from the Student Union, and I decided to take my cheeseburger back. I had wanted only ketchup on it and it came with everything, even though Blake asked us three times what we wanted it on. On my way in, I saw Blake and walked up to him. He said, ‘Sorry, dude, we ran out of ketchup. Blake had already apologized to me and I didn’t want to see him get yelled at. If Alex felt that his employee deserved a reprimand, then he should have done it in private, where the customers couldn’t see it. It was a degrading spectacle, one I felt guilty for causing and at the same time, angered by its poor timing.

Alex did give me a $10 credit for the next time I came back, which was very nice, but I don’t think I’ll be going back after I use that credit. The convenience of the food court is its proximity to campus and my home is not a substitute for this inferior treatment and flat out bad manners. Instead, I will continue to go over to T.J. Maxx, because their food is always hot, always done the way you order it and more importantly the employees are always happy to see you. They treat you with respect, not more importantly, they treat you with simple common courtesy. They want to know if every thing is all right with your food and whether or not you enjoyed it. They always wish you well on your way out the door. This is what service is all about. The food court has nothing to offer besides arrogance, and it doesn’t even offer that because of long lines, incorrect orders and rudeness. I won’t spend my money in a place where it is not valued.

ROLLE • FROM PAGE 9

like Social Security, Medicare, farm subsidies, and veterans’ ben efits have been important sources of support for many Americans. But the phenomenal growth of these programs, fueled by our rapidly aging society, makes them unsustainable in their current form.

Entitlement spending and interest on the national debt together con-

some more than 60 percent of fed- eral spending today, double the per-
centage of just 25 years ago and are projected to exceed 70 percent of total federal spending by 2020. By 2030 projected spending for Medicare, Social Security, and federal employee retirement programs alone will con- sume all tax revenues collected by the federal government, leaving no one to pay for other programs for young people traditionally care about: student aid, the environment and crime prevention.

Many people blame the national debt and deficit on “waste, fraud, and abuse” in discretionary programs. While waste, fraud, and abuse are serious problems they are not the source of our long-term financial problems. Even if the fed- eral government eliminated discretionary spending—close down Congress, the White House, and the Pentagon, stops spending on educa tion, job training, and NASA, it would barely have enough money by 2012 to meet entitlement pay- ments and interest on the national debt.

What this means is that just as we are reaching the height of our careers, every federal tax dollar would have to literally double or there will be no money available for any dis-

cretionary program. Fifty years ago America was able to fight a world war, build an interstate highway program and sustain a just level of federal benefits. But we were able to achieve this by living within our current fiscal path we will sacrifice our ability to do any one of the above.

Reducing the deficit and getting a handle on entitlement programs will not be easy. But it can, and must be done—this year. If the nation fails to act it will be our gen eration who will be facing a world of crumbling entitlement programs, a burgeoning national debt, decreased national savings, skyrocketing taxes and interest rates, and an increasing number of retirees who expect to be generously supported. As citizens and parents of the next generation, today’s young people have an obligation to offer solutions, to have a voice, and to demand action.

Heather Lamm, a 1993 graduate of Brown University, is director of The Concord Coalition’s project on federal entitlement reform. The research and organizing organization founded in 1992 by former Senators Paul Tsongas (D-Mass.) and Warren Rudman (R-N.H), is dedicated to ending budget deficits and building a sound economy for future generations.
**Frostbite prevention important**

Winter injuries that could be prevented can often prove serious without proper precautions, treatment

**Jerri Lake**

Leaves are swirling in the cold Autumn air as they descend to the ground. Day and night time temperatures are falling even faster than the leaves. The bitter cold of winter is almost here.

With the bitter cold comes the chance for the unexpected to get frostbite. Frostbite happens when skin or body tissues become frozen and damaged as water is wicked from them by ice crystals forming in the fluids and underlying skin tissues. The areas most commonly affected are feet, hands, ears and nose, in that order.

Frost nip is the first degree stage of frostbite. First, the area will become numb and feel colder than usual. This is a warning sign that you need to get out of the frozen area. If you don’t see any warning signs and then numb, at this point the skin will begin to turn white, and turn a yellow or gray color.

During this early stage, warming the affected area with other body parts is recommended. Try placing hands over affected ears, or placing affected hands in arm pits or between thighs. DO NOT RUB FRONT BUTTEN AREA, AND PREVENT FROM REFREEZING. Do not warm affected tissue masses, clothing or foot gear.

Second degree superficial frostbite will look waxy and form blisters. As you warm the area, its color will change from white, to blue, to pearly and then red. Swelling will most likely occur. Treatment is the same as third and fourth degree frostbite.

Deep frostbite is the third and fourth degree stages of frostbite, and may be very hard to detect. A few minutes after entry into the frozen area, they will become white or black. The area will be frozen, very hard, and will affect deeper layers than superficial, tendon or bone. Extreme hardness is the most severe symptom.

While treating second, third and fourth degree frostbite, WARNING MUST be done correctly or permanent damage will occur. Do not thaw areas if you cannot guarantee it will not refreeze. Get the person to a permanent shelter before starting treatment.

The injured area must be warmed at room temperature, approximately 70-74 degrees F. Do not allow the person to get any colder. Keep them warm by using blankets or a sleeping bag. Do not place person in front of a fireplace or heater. Treat for the possibility of shock. Do not rub the area or break the blisters.

Rewarm the frozen area, such as hands or feet, by immersing it in 104-108 degree water. This temperature is approximately what you would run for a bath. To try to maintain the same temperature. When the water cools, remove the body part, rewarm the water, and immerse the limb or affected area again.

If a tub or container large enough is not available, wrap towels around affected area after soaking them in the warmed water. Although the treatment will hurt, continue for about 30 to 45 minutes, or until part becomes flesh.

After the area is thawed, attempt to gently exercise the area to remove circulation without walking or putting weight on it. Give aspirin for pain if needed.

Give person some hot liquids and keep them warm. Do not give them alcohol or tobacco and get them to a doctor as soon as possible. To prevent frostbite, stay warm and dry by dressing for the weather you’re in. Do not smoke, alcohol, drink or touch freezing items, use your hands and feet periodically.

Learn about wind chill and temperature, wind speeds, the effect of the wind chill factor on exposed body parts can be quickly disastrously.

For example, air temperature at 10 degrees F and a wind speed of 15 miles per hour, gives a wind chill factor of -45 degrees F. Exposed flesh can freeze in 60 seconds at -45 degrees F. You can get a combination thermometer and wind chill chart at the nearest outdoor store. They are inexpensive and can go on a key ring or your jacket zipper. Your time this winter can be enjoyable, just don’t let Jack Frost bite you.

---

**Gearing up for winter season**

Erlie Marone

Often times, the difference between an enjoyable outing and a complete disaster is your equipment. The colder the weather gets, the more important it is your gear be suited for the conditions you will be in.

Shelter is often the first thing to consider. Mike Beiser, the UI Outdoor Program coordinator, says the biggest factor in choosing a tent is price. People will spend four or five hundred dollars for a tent that is really just a status symbol.

Since 10 to 20 percent of the adventure population will need that capability.

A four season tent is usually needed on an extended trip. They usually have stronger fabric, higher quality poles and a vestibule to accommodate high winds and blowing snow. However, you will find a synthetic section in most four season tents, which results in heavy condensation. They are also heavier, weighing around eight pounds, which makes them bulky for packing.

Generally, a three season tent will be fine for most fall and winter camping around the Palouse. Beiser suggests snow shelters as an alternative to tents. Igloos and other snow shelters provide protection from the elements in and most cases, warmer temperatures to sleep in.

It’s better than packing in a seven to nine pound tent, but you have to have the skills and have the confidence to rely on them.

Beiser says, “The ambient temperatures inside a tent is going to be pretty much the same temperature outside the tent, but if in igloos, you can bring the temperature up to almost 32 degrees, which is pretty warm when it’s 70 degree average outside.”

Sleeping bags are the next thing to consider. “When you lay a bag down, it should have about eight to 10 inches of loft, and that will get you through almost any winter condition,” Beiser says. “I have always taken care of buying a bag based on its temperature rating. ‘I know people who have 10 below bags and they still get cold, it’s all personal variation. The best thing to do is know yourself, you know whether you sleep cold or you sleep warm.”

Beiser recommends a layered system for the best heat retention. Sleeping in the nude will make the best use of your bag’s insulation. Beiser states a ten-bag, a down liner, a vapor barrier liner and bivy cover in different combinations, depending on the conditions.

“If you have a single 30 below bag, you might get too hot. If your bag is a ten below, it might not be enough, but if you have a combination system, you always have a little extra bag to boost its capabilities,” Beiser said.

You may want to consider most importantly, you need to modify your diet to keep up with the demands the environment will put on your body. Beiser recommends a 4000 calorie program for the average adult, producing more heat as the temperature drops. “It’s hard for people to understand that they’re going to start producing heat less, the longer they stay out in the cold.”

Mike’s emphasis is a weight loss program, you will burn more calories and produce less heat. “That’s how we teach people to avoid cold weather, you lose weight if you keep your intake up. That’s how we teach people to avoid cold weather, you lose weight if you keep your intake up.”

For more information, contact the outdoor develops, and the base ment of the Student Union or call them at 885-6481.

To use the chart, find the estimated or actual wind speed in the left-hand column and the actual temperature in degrees Fahrenheit in the top row. The equivalent temperature is found where two intersect. For example, with a wind speed of 10 mph and a temperature of -10°F, the equivalent temperature is -29°F.

Outdoor Equipment and Flea Market
The UI Outdoor Program is holding its annual outdoor equipment Swap Nov. 7 from 7 p.m. to 9:30 p.m. at the Student Union Building. The program will be selling big and used equipment and people are welcome to bring their own equipment to sell. There will be $2 fee to individually selling equipment and table spaces will be provided. The fee goes to support the UI Vandal Ski Team. The sale will also include equipment for sale from major liquor retail, Follett’s Mt. Sports, Northwest River Supplies, Hypnoped Sports, Northwest Mt. Sports, Apple Designs, Car’s & Bikes and Skis. There will also be promotional booths from Silver Mt., Ski Bluewood, Brundage Mt., Red Mt. and Schweitzer Mt. for equipment that includes skis, rackets, work sets, tents, inflatables, sleeping bags, snow shoes, causes, dry bags, climbing equipment, bikes and many other items. Some will be new and some used. Check your gear and see what needs replacing, there should be some great deals.

Endless Winter to be Shown
The UI Vandal Ski Team, Niseen, Pathfinder and Follett Mt. Ski Sports are presenting Warren Miller’s latest ski film, Enertia Winter 95 for the Agriculture Science building room 106 at 7 p.m. Tickets are $5 and available at the door from my ski team member, Door prizes will be given away at intermission, including a brand new snowboard courtesy of Follett’s Mt. Sports. Ski areas around Idaho, Washington and even Canada will be on hand with promotional booths and to answer any questions you might have concerning the upcoming season. There will also be a couple of local ski shops displaying their latest equipment.

Who owns the earth anyway?

I t seems we as a species have forgotten the importance of so many living things on this planet. No one talks more about another story about an oil spill, toxic waste being dumped in Idaho or exploitation of animals. I found a story about how scientists are making artificial ears for people born without the benefit of a place to call home. First of all, I am angry that we even live in a society that finds someone without an ear somehow unacceptable. Second, these scientists make these ears on the back of shaved rats. Can you imagine how pathetic those poor things must feel, losing an ear growing off their back? We also need to look at the environment, it is all here to make our lives better and use as we please. I don’t see that way. We, meaning plants, animals, insects and humans are all made up of the same material, stones and all these other particles. We have forgotten that we are connected to everything on this planet and treat our surroundings as if we have a right to destroy them. There are people who only have the right idea, but find persecution and indifference by our government. It is our right to protest, but somehow that has been forgotten. The group of people subscribing to the philosophy of Earth First! have the right idea, protect the planet from further damage. I never condone actions that could cause injury, but I also believe that it takes guts to tell a logging road and to arrest someone for something you truly believe in. How many of us are willing to fight to save anything but our selves or our property? How many of us would put our safety and freedom on the line to protect something that cannot speak or itself, namely the planet? I shudder to think of a future without old growth forest, Steelhead and other wildlife. Can you picture a country where the only trees around are those planted in a person’s front yard? It sounds like something out of a science fiction book, but it isn’t impossible, especially at the rate we are going. We need to explore alternatives to

This year Hisaw hopes to break 150. How does the intramural program deal with so many events? Simple, it uses games on 15 attempts as the Vandals only gained 154 total yards on the ground. The Vandals did start off the game on a good note when kicker Ryan Woolverton connected on a 25-yard field goal midway through the first quarter. WSU’s Cook then went to work on the Idaho defense, eventually helping his Wildcats to a 7-3 lead after hitting Tauris McGhee on a 68-yard touchdown pass early in the second quarter. Again, Hisaw went to work, and found McKinzie in the endzone on a deep 38-yard post pattern and more importantly, re-taking the lead, although Woolverton missed the extra point and Idaho had the 9-7 advantage. Idaho did however manage to get within field goal range in the begin- ning of the second quarter, as Woolverton connected on a career high 23-yard field goal. Cook looked to his five wide-receivers to break the game open. Cook connected on a 24-yard touchdown pass to receiver Pocket Eckford early in the third quarter and WSU’s Scott Shields boomed a 30-yard field goal in the fourth quarter to finally give the Wildcats revenge for the 79-30 thrashing they took by the Vandals last year in the Kibbie Dome. The lone star on the Vandal defense included linebacker Jason Shelb with 14 tackles on the day and defensive linemen Barry Mitchell and Das Zeaun who each had one sack respectively. Hisaw, finished the day 15 for 28 for 241 yards and one touchdown. Idaho travels to Flagstaff, Ariz. Saturday to face the Northern Arizona Lumberjacks.

UI intramural numbers up across board

Michael Stetson

“Get Into The Game!” For Idaho’s student body that slogan means more than just attending UI athletic events as students have been hitting the courts and fields in force through the intramural program this year. An excited Greg Morrison, the director of Intramural Sports for the University of Idaho, reflects on the early success of the intramural program this season, noting that almost every sport boasted more teams than ever this year so far.

“Participation is up and things have definitely been positive. Three-On-3 basketball is up 19 teams, football is up 26 teams, soccer is up seven teams, and volleyball is up six teams,” Morrison said. “We weren’t sure how popular co-rec hockey would be, but we are very surprised, we have 50 teams. The second-year director attributes a lot of that to a new attitude running through the program. The sportsmanship rating helps according to Morrison, but has not affected the level of competition. People still want to win and the games have remained competitive, but the refs get less abuse and the attitude of players changed.

“I’ve only had to eject one person this year, normally we eject three or four by this time,” Morrison said.

The level of participation and competition should continue throughout the year in Morrison’s opinion.

“Things tend to build on themselves, so people get more excited about what’s happening, they start to find out about other sports.”

Keeping the positive attitude the program developed this year will only help the program grow according to Morrison, who notes the goal of the program is to keep the participants happy. A few sports that have created a lot of excitement are co-rec floor hockey, 3-on-3 basketball and basketball. Morrison points out many people have been having a blast playing floor hockey, but they are finding out the game is a lot more fun then they expected.

On the court, 3-on-3 brought out 19 more teams than last year. The championship game on Nov. 11 will not only crown a cam- pus champion, but will qualify a team for a regional tournament sponsored by Schick. Idaho’s 3-on-3 program is a member of the national tournament sponsored by Schick. The Idaho cham- pions may decide to compete for the regional crown and prizes from sponsors like Nike, following in the footsteps of Delta Sigma Phi which won the regional tournament a few years ago.

Also on the basketball court, Morrison looks for more excite- ment. Last year 142 teams signed up to play in four divisions of basketball, men’s and women’s competitive and recreational. This year Morrison hopes to break 150. How does the intramural program deal with so many events? Simple, it uses games.
Idaho triumphs, stays atop Sky

The Eastern Washington Eagles were overmatched, outplayed and out of order Friday night. Ranked 24th in the nation and bound to jump higher in the polls, the Idaho Vandals volleyball squad squashed EWU 15-3, 15-10, 15-2 at Reese Court in Cheney, Wash.

Idaho continued its Big Sky dominance with help from Tzvetelina Yanchulova's 19 kills and .371 hitting percentage. The senior all-America candidate from Sofia, Bulgaria, leads the Big Sky in kills with 5.9 per game.

EWU has lost to the Vandals eight straight times. UI's defense also held the Eagles to a pitiful .051 team hitting percentage and outdueled EWU 48-25. Comparatively, Idaho hit .348 as a team including .526 in the last game.

The Vandals are now 9-1 in the Big Sky and 21-4 overall. However, the Eagles remain at the bottom of the pack with a 1-9 Big Sky mark and 6-17 overall record.

Injury bug bites Niners, Cowboys should benefit

The much anticipated NFC duel between the Widget Niners and the Cowboys will likely play out as a no-hitter, with the Niners coming out on top. This is due to the injury bug that has been affecting both teams. The Niners have lost several key players to injuries in recent weeks, including their starting quarterback. The Cowboys have also been dealing with injuries, including a sprained ankle for one of their star players. This has left both teams with limited options on the field.

Friday marks the start of the last game of the season for the Niners. They will be playing against their biggest rivals, the Cowboys. The Niners are currently on a five-game winning streak and are looking to keep their momentum going into the post-season. Meanwhile, the Cowboys are looking to end their losing streak and prove their worth on the field.

Mark Vanderwall

INTRAMURALS FROM PAGE 15

starting at 6:30 p.m. to the late game starting at 10:15 p.m. on three courts at Memorial Gym. Morrison said some teams prefer playing late so the schedule works out well. He also reflects on other school programs where teams often have games scheduled for after midnight due to facility restrictions. In that case, Morrison believes a cap on teams would be needed, but he doesn’t see a problem arising. For teams competing currently or those preparing for the start of a new season, Morrison offers a few reminders. Ultimate Frisbee play starts the week.

VANDALS FROM PAGE 16

“Offensively, we’re really better than we’ve ever been,” UI coach Tom Hilbert said. “We might not have the athleticism of previous years, but when we pass the ball we can run more stuff because of Lyon (Hyland).”

The junior setter’s 40 assists Friday vaulted her above 3,000 for her career — only the second Vandal to achieve the feat. Hyland’s 2098 career assists are second in UI history to Kelly Neely’s 4,744, record-
ed from 1982-85, Hilbert, in his seventh year as Vandal head coach, was obviously impressed. “Lynne is really one of the players who has shown an incredible amount of improvement over the last three weeks,” he said. Neely’s record mark, Hilbert said, was accomplished when teams played 30-60 matches per year, instead of the usual 30-30. He said Hyland could realistically break the record next season, which in Hilbert described as “an incredible accomplishment.”

Hilbert also praised the play of 5-11-inch sophomore outside hitter Jerena Yocum. The Ellensburg, Wash. native had five kills and hit .571 in two games.

Arguably the Eagles best player, senior middle blocker Kellie Claus, had a team-high nine kills but only hit .095 for the match.

This weekend the VANDALS host second-place Northern Arizona (7-4 Big Sky, 1-8 overall) Friday and Weber State (4-7, 1-10 Saturday in Memorial Gym. Idaho’s only Big Sky loss was to Weber State in a five-game thriller in Ogden. UI has won seven straight since the WSU match.

Hilbert said the weekend matches will be longer and more competitive. “NAU’s hot right now,” he said.

Idaho’s home court win-streak is also in jeopardy. Since 1992, the VANDALS have won 42 consecutive matches in Memorial Gym — tied with Penn State for the fifth longest streak in NCAA history. The record is 58 set by Florida from 1990-93.

1995 Hardee's Food Systems Inc.
**Braves’ pitching proves big**

ATLANTA (AP) — The Atlanta Braves always had the best pitching in baseball. Now they’ve got the World Series trophy to prove it.

Tom Glavine’s name was a forgotten man on a staff that included Greg Maddux, finished off the quest that began five seasons ago, becoming the Series MVP by shutting down the Chicago Indians 1-0 in the clincher Saturday night.

"A one-hitter in the sixth game of the World Series has got to be the best," Braves pitching coach Leo Mazzone said. One pitch, one blood single.

"What Tommy did was put the stamp on five years of great pitching."

Actually, the entire Atlanta staff shocked the power-hitting Indians throughout the Series. Former NL playoff MVPs Steve Avery and John Smoltz, relief ace Mark Wohlers, closer-turned-setup man Alejandro Pena, Greg McMichael, Pedro Botten — all of them.

Facing the team that led the majors in hitting, scoring and home runs, the Braves held the Indians to a paltry .179 batting average. Shut out only three times all year, Cleveland managed just a solo single by Tony Pena against Glavine and Wohlers in Game 6.

"It’s as good as it gets," said Glavine, who went the first eight innings. "It’s been a long time coming for all of us. I wanted to win this as badly as anything I wanted to win in my life."

Glavine leads the majors in wins during the last five years with 91, one more than Maddux, and has one Cy Young to show for it. But it’s been Maddux, sure to win his fourth straight Cy Young this season, who’s gotten most of the credit on the staff that annually leads the majors in ERA.

"He’s the best pitcher I’ve ever seen," Glavine said.

Maddux was masterful in Game 1, limiting Albert Belle, Carlos Baerga and the rest of those Indians to two hits. Glavine did him even better in the closer’s third, two days after Maddux failed to close it out at Cleveland.

"He was outstanding," Maddux said. "That’s the best game I’ve ever seen him pitch."

"He went through a lot, especially early in the season. One thing about him is he’s got a huge heart and he showed it tonight. I’m real happy for him."

Glavine began the season as a target of boos because of his out-spoken word during the strike as the Braves’ player representative. But he had the home fan cheering at the end, as did David Justice, who removed in the sixth inning.

After the eighth, Glavine went to manager Bobby Cox and said he done. That left it to Wohlers, who retired Kenny Lofton, Omar Vizquel and Baerga in order for his second save of the Series.

While the consistency of the rotation has been the backbone of the staff for years, the bullpen was the biggest problem in postseason past. Jeff Reardon, Jim Clancy, Charlie Leibrandt and others were among those who could not hold late leads, a major reason why the Braves lost the World Series in 1991 and 1992 and fell in the 1993 NL playoffs.

But Wohlers, with his 100 mph fastball enhanced by a newfound confidence, became the closer Atlanta needed.

When Wohlers walked in the bullpen for the last time this season, he passed best in right field. Justice, having seen Wohlers come through during the stretch, shouted encouragement.

"I know he said something like, ‘C’mon, Woo-Daddy, go do something,’" Wohlers said.

A few minutes later, when Bertie’s fly ball was caught by center fielder Marquis Grissom, the Series was over and the Braves were champions.

Under Mazzone’s tutelage, plus his summer and winter work programs, Atlanta had accomplished its elusive goal. Known by outsiders for his constant rocking in the dugout, Mazzone is regarded by insiders as one of the best in the business, even through his name never is brought up as a possible managerial candidate. "That’s the key to their offense." The Cardinals (9-0, 4-0) are coming off an emotional win at Colorado, where they righted the ship bailed out with noise. It will be important to keep an even keel for Samuels. "After a tough game like Colorado, it is important to forget about the game by Monday," he said.

"I’m not going to feel the pressure," he added. "The credit goes to Bobby Cox and Lee Mazzone,” general manager John Schuerholz said. "We’ve had the best pitching for five years, and this put a crown on it."

Huskies hurdle Nolles in polls

OMAHA, Neb. (AP) — No. 1 Nebraska does not want to look beyond Saturday’s game against Iowa State, a team boosting the nation’s ranking leader that three years ago defeated the Cornhuskers.

The Cyphers also stand alone in being the only team to hand Nebraska quarterback Tommy Frazier a playoff-season defeat. Frazier is 28-1 as a starter, 29-3 counting bowl games.

"We’re only as good as our next opponent," outside linebackers coach Tony Samuel said. "You never know who will have the best competition."

Nebraska vaulted one place over Florida State in the polls Sunday, claiming the No. 1 spot after a convincing 4-21 win over then No. 7 Colorado at Boulder. The Buffaloes dropped off No. 10.

National ranking leader Troy Davis leads Iowa State’s offense with 1,526 yards this season, a school record. He has topped 200 yards four times this year and last week ran for 202 yards in a 38-14 Cyclones win over Oklahoma.

"We’re going to study him now," Samuel said. **"He has the key to their offense."**

The Cornhuskers (9-0, 4-0) are coming off an emotional win at Colorado, where they righted the ship bailed out with noise. It will be important to keep an even keel for Samuels. "After a tough game like Colorado, it is important to forget about the game by Monday," he said.

"I’m not going to feel the pressure," he added. The credit goes to Bobby Cox and Lee Mazzone,” general manager John Schuerholz said. "We’ve had the best pitching for five years, and this put a crown on it."
