Frozen pipe bursts, swamps Kibbie Dome

Michael Stetson
Staff

A flood of people—a flood of talent—a flood of track stars—just a flood. Saturday at the UNI Dome, the home of the Kibbie Dome, flood became a very frequent and unfriendly word as a frozen pipe in the west end of the Dome burst in the early morning hours before Idaho’s annual McDonald’s Open Track and Field meet.

When the Kibbie staff arrived at 6:30 a.m. they found two inches of water covering the Dome floor and water gushing from a pipe in the west wall. The Dome, set up for a Saturday’s track meet, turned into a large swimming pool with Kibbie staff, track and field coaches and athletic department personnel worked to drain the Dome’s floor.

Terry Rivers, assistant manager of the Kibbie Dome, said the pipe must have been a few hours before any one arrived at the Dome at 6:30 a.m.

“It looked like Niagara Falls,” said Rivers. “It’s one of those freak things.”

The flood forced the cancellation of the McDonald’s Open Track, leaving hundreds of athletes disappointed. One group of high school students from Ogden, Utah, began their drive to Moscow at 3:30 a.m. and showed their disgust when they learned the meet had been canceled, saying that they might not come to this meet again.

Other athletes, like Patrick Williams, a Vandal student and former Idaho track star, said getting along with some current track team members despite being disappointment.

“I really wanted to run. I’ve got my gear here, I’m ready to run,” Tim Taylor, Vandal shot put and discuss coach, described the problem many athletes felt, saying that several schools either arrived Friday night or left early Saturday morning. No one was able to contact these.

Beeper system used to deter attackers on campus

Christopher Glancy
Staff

Would attackers beware—the ASUI Safety Task Force is deterring assault on campus at over 130 locations with a program that uses a system of “beepers” that scream for the victim in the event of attack.

The devices can be worn in clothing or medical band, and when activated emit a high pitched S.O.S. that can be heard for blocks. The “beepers” are available as a security precaution to deter assaults against students walking from the library to parking late at night, said Task Force Co-chair Angela Rauch. Beepers are available at the library reserve desk and can be checked out for 24 hours free of charge.

The program is intended to complement efforts by the group to overall safety such as improved lighting, tree trimming and increased visibility of security offices.

“This is a very safe campus but everyone should use some common senses,” said Rauch. “Don’t walk alone and stay in well lit areas... you still need to take every precaution.”

An escort service, proposed last year, didn’t work out because of budget restrictions, said Rauch. The service would have provided security personnel and a van to ferry students from the library to parking at late hours. The beepers have been tried as an extra and less expensive escort service, said Rauch.

While some debate surrounds what measures should be taken to improve safety, beepers are one of the least expensive and relatively easy to get, said Rauch. Other options, such as installing “blue lights,” “emergency phones that would have a flashing blue light and could be used to call for help, turned out to be too expensive and raised doubts about their effectiveness.

“If we can’t afford to spend more money for lighting, why spend more money for the phones?” said Rauch.

While she approves of a “legitimate” campus security escort service at UI, Rauch said she opposes escort services on a volunteer basis, because of incidences at other universities.

Weather
Highs around 35 today with clouds and a chance of snow. Highs should continue to climb to 40 by Friday with more sun.

Gov't puts burden on charity umbrella

BOISE—In a conservative era, granting and collecting government programs means charities bear the burden of stockpiling food banks, sheltering the homeless and providing medical care for the poor.

Until recently, the local traditional umbrella organization for a long list of charities was the United Way. But since United Ways across the nation are autonomous, the health of the local economy often dictates whether each office hits or misses its individual fund-raising target.

United Way of Ada County is blessed with several major corporations in the Boise area and plenty of individual contributions. It collected a record $3.4 million in the latest annual fund-raising drive, a 5.1 percent increase from the previous year.

Executive director at the local Hewlett-Packard Co. plant topped the list with $631,600 in donations, followed by Alberson's with $522,000, Boise Cascade Corp., with $320,000, and West One Bank at $144,200. Corporate boards of directors chip in to their local United Ways.

The allure of lakes and mountains is attracting more people to the Coeur d'Alene area. But with them also come the need for services, especially for low-income families. And while corporations don't have their own United Way programs, the companies are contributing to the charities for the social services the charity sponsors.

The United Way of Southeast Idaho in Pocatello attracted 93 percent of its goal this year, but $500,700 raised during the past year was down from $522,000 the year before.

The United Way in Idaho Falls
raised $774,700, or about threequarters of its $1 million goal during the 1989 fund-raising drive. It was trying to cope with hundreds of layoffs at the Idaho National Engineering and Environmental Laboratory. The United Way of Magic Valley finished its campaign with $265,000, nearly $10,000 more than in 1994 but $10,000 shy of its goal.

The Idaho Food Bank Warehouse and several other charities in Canyon County than any other charity in the state and local battered-women's shelter is the busiest in Idaho.

Associated Press

Idaho seniors back salmon project

LEWISTON—Idaho's U.S. senators want the Army Corps of Engineers to reconsider its plan to defuel a project aimed at learning more about migrating salmon.

The Corps, in a June 9 letter, said it was discontinuing the program on Friday, the Idaho Statesman reported. The Corps was moving it to Shoshoni Falls Dam east of Twin Falls this year after its budget fell short.

The project, using 160 salmon, was to monitor the fish as they try to pay for salmon recovery. Then Corps tested on more project to the Corps' worklist nationwide the threat of erosion and sediment cover. That led the Corps to impulse as an 8 percent budget cut to its ocean engineering program.

The Corps recommended focusing the portion of the reduction involving Columbia River salmon projects on a proposed system at the Bonneville Dam. The Corps would monitor migrating fish equipped with tiny electronic tags.

A team of biologists from tribes, scientists and federal agencies agreed that if the loss to take place, the John Day River work should be continued.

But Republican Sens. Larry Craig and Dirk Kempthorne, along with Idaho Gov. Phil Batt, asked the Corps on Friday to find the money to keep the John Day River project. The Corps was asked to equip it with PIT tags, tiny microchips enclosed in a glass bulb. Politicians said they would be trying to drum up millions of dollars even as shrimp already works.

Associated Press

State wants program restrictions lifted

BOISE—A bill that would impose the 31-year-old law limiting Idaho State University's engineering school would lose its teeth if the engineer's earnings met a federal credit to extracts the same credit that a state University education.

Idaho State University President Thomas Bell said his bill sought to protect the UI's programs from the state's higher education.

Bell said the UI offered graduate programs in engineering in few states. Bell said Idaho State would replace the UI's programs as along as the UI's graduates.

Bell said the Idaho Board of Education Executive Director Rayburn Barton told the Senates Education Committee June 9 that limitations on Idaho State's engineering school's ability to meet the needs of people was a specific engineering program.

Barton said the Board of Education would be considering one engineering program at the UI during the past year.

Last month, Idaho State University Engineering.

Leadership for Life

The Order of Omega will be holding its annual leadership confere

The Order of Omega will be holding its annual leadership conference, May 10 and 11 at the Student Union Ballroom. This conference will feature Marilyn Fordham, an accomplished national speaker. The "Leadership for Life: TSU's Impact on the Community," will include many issues including time management, leadership's role in increasing opportunities and alcohol awareness on campus. All workshops are free, but pre-registration is required. For more information, student union and student service Center's office is located at 883-2642.

The Many Faces of Beecher Stowe

"The Many Faces of Beecher Stowe" is the nurse project. Point of View Center, Feb. 9 at 12:30 p.m. Guest speaker Barbara Meldrum, UI English professor, is currently writing a book on Harriet Beecher Stowe.

Career Center helps you land a job

The UI Career Center Services is holding a session of workshops to begin Feb. 7 at 11:00 p.m. with a session titled "The Internet and Your Job Search." Another workshop in the Career Center Services will be held on Feb. 7 at 5:30 p.m., and a workhop titled "Careers in Marketing" with a resume and cover letter" will be held Feb. 9 at 11:00 a.m.

All workshops are free, but pre-registration is required. For more information, contact the Career Center Services at 883-6512.

Natural Resource Career Fair, today

The College of Forestry, Wildlife, and Range Sciences is holding a Natural Resource Career Fair today, from 10 a.m. to 3 p.m. in the College of Forestry, Wildlife, and Range Sciences Building.

Announcements

The Coop-Ed holds orientation today

Cooperative Education is holding its orientation this morning, from 10 to 11:30 a.m. in the Education Building. Discover how you can find good work opportunities which provide practical experience related to your major, for free. For information, contact Cooperative Education at 885-5622.

The Students of Social Sciences

The Students of Social Sciences will be holding their monthly meeting at 4:30 p.m. in Phinney Hall, 200. All students of social science are encouraged to attend.

An affordable PC-based radar

Dr. Ken Spenke, of the department of geophysics at UI, is holding an open house this Thursday, from 3 to 5:30 p.m. in Room 203 of the Engineering Building. The system is called an Affordable PC-Based Geo-Radar: Applications in U. geophysics, Paleontology, and Mineral Exploration, is referred to as current radar being used to help locate mammoth bones in lake beds, such as the one found at Fish Lake near Ogden, Idaho.

Workers rush to help victims of China quake

Beijing—Medics and soldiers were rushing on Thursday to evacuate thousands of injured and homeless people scattered under rubble in northwestern China on Sunday to help survivors of a powerful earthquake that killed at least 1,500 people.

China's state television said thousands of injured and homeless people were being scattered under rubble in northwestern China on Sunday to help survivors of a powerful earthquake that killed at least 1,500 people.

President field narrows to seven candidates

Janet Birdsell and Shawn Vidmar
Staff

The Idaho state Board of Education has decided to narrow the field of candidates for university president down from 10 prospective candidates to seven before conducting extensive background checks.

Bill Hargrove, ISDEB public affairs said the first elimination round will be conducted by reference checks and resume standing. "They decided to narrow the field to approximately seven without interviews," said Hargrove.

The Board met in a telephone conference call Monday to determine the process and schedule for selecting a new president. They plan to review candidate resumes and narrow the field Friday, then conduct background checks on the remaining candidates, Hargrove said.

The remaining candidates will be invited to UI for a meeting with students, faculty and the university board later this spring. From the information gathered, a selection will be made.

Hargrove said, "There are usually a variety of opportunities for people to meet face to face with candidates."

Last week, the UI Presidential Screening Committee trimmed the list of candidates to 10, and presented that list to the Board Thursday. The 25-member committee was composed of representatives of the Alumni Foundation, board members, faculty, the Board and Board said Sean Wilson, committee member and former ASUI president.

One thing is for certain—the next president won't be a woman. The 10 candidates the committee selected are:

Dr. Larry Beaven, professor, department of food science and technology, UI.

Dr. Nicholas L. Henry, president of Georgia Southern University in Statesboro since 1987.

Dr. Robert A. Hoover, vice president for academic affairs and political science professor at the University of Nevada, Reno.

Dr. J. Charles Jennott, provost and vice president for academic affairs and professor of engineering at Clemson University, Clemson, South Carolina.

Dr. Scott G. Mccall, provost and vice president for academic affairs, California State University, Chico.

Dr. Leon J. Radziemski, dean of College of Sciences and professor of physics, Washington State University.

Dr. M. Roy Schwarz, an American Falls, Idaho, native, University of Washington alumnus and group vice president for Professional Standards for the American Medical Association.

Dr. J. Kirk Sullivan, vice president for government and environmental affairs, Boise Cascade Corp.

Dr. Steedman Upham, vice provost for research and dean of the graduate school at the University of Oregon.

Dr. Bryan H. Wildenhalt, provost since 1994 and vice president since 1992 for academic affairs at the University of Texas, Dallas. As the student representative on the screening committee, Wilson picked a few favorites from a student perspective.

Candidate Schwartz was a founder of the Washington-Alaska-Montana-Ide (WAMI) Medical Education Program and was keynote speaker at spring graduation ceremonies. "I was thoroughly impressed with the man. He related very well to me as a student," Wilson said. "Some people have a hard time relating to students."

Wilson also favored Hoover, Sullivan and Brann. "I think the biggest thing is to know that they listen to you," he said.

PCEI stays busy with variety of local projects

Zachary Smith
Staff

The Palouse Clearwater Environmental Institute is staying busy and around Moscow.

Some projects are underway and running smoothly and many others are soon to begin.

One popular new program has been the Van Pool program which opened for service Oct. 31.

The Van Pool consists of three vans purchased by PCEI to transport commuters to Moscow from Lewiston, Genesee, Potlatch and Troy.

A main goal of the program is to "reduce the impact on air quality due to traffic congestion," said Fritz Knoer, transportation program coordinator for PCEI. Knoer said, "Driving your car is the biggest impact on the environment."

Of the three vans, only the one transporting commuters from Lewiston and Genesee has been in operation. The other two vans have been "parked" or sitting in the parking lot. Knoer said PCEI is confident that the other two vans will be bringing commuters in from the Potlatch and Troy area sometime this month. PCEI is also hopeful the service will be as popular and convenient for the new commuters as it has been for passengers south of Moscow, said Knoer.

The program is successful so far and it is already practically paying for itself, said Knoer. "Seats on the vans may be purchased monthly or half-monthly. Prices range from $30 for a monthly ticket to $75 for a six-month ticket.

Another van operating in and around Moscow is the Paradise Creek Restoration Project, headed by Adam Thorndorough. PCEI hired Thorndorough to be the Project's quality program coordinator. The program is aimed at restoring the creek's stream bed and channel to its natural state.

Work on this program began last summer and "Phase II" of the project will begin this summer. Thorndorough outlined the next steps for the program in PCEI's Fall 1995 issue of Environmental News.

"Phase II," the Paradise Creek Wetlands Project, will be "on an 8-acre site at the U of I near the Idaho/Washington border," said Thorndorough. The conceptual design for the second phase was submitted by Elizabeth Brackney, who will serve as a consultant to PCEI for the wetlands project.

Two wetlands treatment systems will be analyzed for their efficiency in treating certain pollutants in the creek, including effluent from the Moscow Wastewater Treatment Plant. More information on this project can be found in this issue of the Environmental News. The newsletter is free and will be distributed in December.

FLOOD  FROM PAGE 1

people whom had to come all the way to Moscow to find out the meet was canceled.

Despite unfortunate nature of the cancellation, some coaches still showed some frustration with Vandal coach Mike Keller. Taylor said that one coach demanded to talk to Keller who said, "What does he wants do-go swimming?"

Although Coach Keller remained in good spirits through the ordeal, he did recognize the tragedy of the day. "A lot of people came a long way, plus we didn't get any qualified times."

Keller then continued to describe the scene pointing out the electrical pit had been at a high point in the floor, saving it from flooding. The sand pits and the carpet proved not as lucky. "They'll have to roll the carpet out and clean it, it'll take a week, and the sand pits are flooded, they'll take a year to dry out."

Despite the amount of water on the floor, the damage proved very limited with several electrical lines were covered by water at the west end of the Dome, under the rolled turf. However, the new basketball court managed to stay dry, and the water stopped before flooding the training rooms on the east end of the Dome.

Saturday's flood is the second time the Dome has suffered a broken pipe. Keller said, "A pipe broke 12 or 13 years ago during Christmas break. There was water way back in the training rooms."

For the 20 people working to clean up the flood, spirits remained high as one worker said, "You here to cover the swim meet?" Some workers swept the water into floor drains while others ran wet-vacuums and still others pumped water from the flooded sand pits. By 9 a.m. a crew had already begun to remove the basketball court to allow the area to dry, preventing the surface from warping. As for the Vandal track team, they will try again on Feb. 17, when they host the second part of the McDonald's Open and weather inside and outside the Dome cooperates.

BEEPERS  FROM PAGE 1

verbalities where the escort actually became the attacker. While "beepers" aren't necessarily a substitute for a reliable escort service, it will provide a deterrent, said Rauch.

Rauch encourages students to use the devices, but warned against adopting a false sense of security. Partycrasher need to take special precautions. "If your going to a party don't drink. If you drink have someone with you, like a designated driver, who doesn't drink, and never walk home from a party alone," said Rauch.

STUDENT UNION BALLROOM
Sensense deaths a sign of the times

The honeymoon is over. In Moses Lake a 14-year-old boy shot and killed two schoolmates and his teacher. Another student was also badly injured in the rampage. This is a reflection of tumultuous times.

The families and friends of the victims deserve our mourning—so does the small town character of the Northwest. The Idaho Spokesman-Review reported the alleged gunman—gunchild—was arrested Friday. The paper reported that Barry Loukaitas was identified by students as the child arrested.

Granted, the attack happened during an algebra class which is enough to drive anyone insane, but mind-numbing boredom and lack of control. Now Loukaitas may have been1 retaliating against more popular, athletic students who picked on him. But this is not an acceptable defense either.

Needless to say, his recent filing for divorce.

The fact that his grades were slipping and he had to attend a parent teacher conference shouldn't have been reason either.

The reported breakup between Loukaitas and his girlfriend is another example of the love that could be found on the Northwest.

The whole thing is probably not the fault of society—it just happened, as bad things sometimes do. Whenever population density rises the chance of bizarre behavior increases. For too long the Inland Northwest has had its head in the sand. Too long the warning signs have been ignored. Violence and insanity have instantly shattered our misconceptions.

As the Northwest becomes increasingly urbanized there are a few facts we will have to face. Growing pains are in the early stages of expression, Northwesterners can realize growth is inevitable and plan for it. For example, schools could require conflict resolution classes as do many larger schools do and attempt to circumvent the problem. Schools and teachers are not trusted, yet they are entrusted with raising children.

Changes occur within any relationship, hard work and dedication are needed to prepare for the future or be over run by it; as the Inland Northwest learned last Friday.

—Dennis Sasse

Spring fever strikes early

It's nice to know the weather is warming up. But snow is still the great, the sub-zero weather. It's been so cold that when folks walk outside and the temperature is above zero they think it's summer.

Students from around campus can face the top 10 problems expected from the weather next week:

1) The car battery is officially dead.
2) Doors and hands so cold that you can't reach for your car keys, or Student Health Services to get them from your pocket.
3) Lakes County snowplow drivers are out of control.
4) Parking tickets, not necessarily related to cold weather since sadly this is usually a normal occurrence.
5) Days too cold to get to class but class is still held.
6) The damn car battery is dead again.
7) KUOY playing Vanilla Ice.
8) Lakes County snowplow drivers may need a pay raise.
9) Students slipping and falling on slick walkways around campus.
10) Parking tickets, not necessarily related to cold weather since sadly this is usually a normal occurrence.

And even more problems to the weather.

1) The big problem with the cold temperatures on the Palouse is where was the greek-residence hall snowball fight and the MFD in riot gear.
2) I found it interesting that while people were walking the grey tarmac was turning colder and colder. I hope this isn't a sign from the upstairs saying it's time for an audit.
3) As accounting students say, "In God we trust, all others we must audit." On a serious side, the cold weather has caused many problems. The sub-zero weather has caused many problems. The sub-zero weather has caused many problems. The sub-zero weather has caused many problems.

The Galapagos Islands are home to giant tortoises which are among the oldest living things on earth, and now the Galapagos are also home to some groups. The Galapagos Islands have never been home to man, native or immigrant, which should indicate that they were never meant to be.

These are only a few examples of problems that have reached global proportions.

Rather than a rapes of the environment, which wealthy Americans and Europeans used to partake in, we now have a new, politically correct rape of the nose which occurs within the pseudo-preservation of the environment.

From an ecological perspective claim that in spite of the damage done by through of tourists, the benefits to endangered species far outweigh the costs. Of course, the benefits seem to be going straight into the pockets of California-based tourism companies and the costs are weighing heavily upon the locals.

It's nice to think that the ugly American can redeem himself or herself by saving the swiftly vanishing furry animals, but ecotourism is a money making ploy just like every other multi-million dollar capitalist venture out there.

One ecotourism company took in $4.7 million in a single year, yet only $33,000 went to local business and salaries. The rest, of course, went to the CEO.

In the wake of this bad publicity, companies and governments are trying to reform ecotourism; however, they still maintain that the animals are better off now than they were several years ago when they were turned into soup or lamp oil. I'm not so sure I agree.

When native peoples hunt animals they often recognize the ecological impacts of their actions, and expect the need for animals to reproduce, or their livelihoods be endangered. The problem with ecotourism is that people are under the false impression they're doing good when in fact they're doing irreparable harm.

Furthermore, people who once had dignified means of employment, such as fishing, are now expected to give up their careers their families and grandparents had and carry someone's luggage. Perhaps fishing is ecologically unwise, and perhaps these individuals should pursue other means of sales productive to the preservation of habitats. But hillbopping just doesn't cut it, particularly when you're hillbopping for a group of foreigners who are actively destroying or sifting away some of the world's most precious natural resources.

In lieu of these issues, tourism companies are employing naturalists to regulate the tourists' behavior. It's not to see the and educate them regarding the needs and behavior of the animals they view.

It's all well and good to see the efforts seem to be more shadows to obscure. The only connection of tourism with endangered species is not a very good idea, in

Letters to the Editor

D.C. debate not about budget

A serious attempt is being made to hoodwink the American people. The current debate in Washington, D.C., has very little to do with balancing the budget. The Republicans wouldn't be proposing a large tax cut out for the wealthy if it did.

What is occurring here is what once was called class warfare before the media made it a dirty phrase. It is about an upward redistribution of wealth from the poor and middle class to the rich. This is the reverse Robin Hood strategy—steal from children, old people, the disabled and anyone who can't fight back and give to the rich.

Notice that the Republicans are not talking about cutting the military budget (now at Cold War levels) to balance the budget, nor are they talking about cutting the numerous corporate welfare programs, which amount to hundreds of billions of dollars.

In addition, if the old corporate tax rate of 70 percent was still in existence (former president Ronald Reagan cut it to 30 percent, and it was increased only slightly by president Clinton), there would be no budget deficit. It would disappear completely.

This war on the poor is a world-wide phenomenon. The policies of the IMF and World Bank have caused a great increase in inequality, poverty, starvation and diseases in Third World nations, resulting in tragedies like Somalia and Rwanda.

Right-wing parties in Europe are even attempting to impose this corporate agenda here. However, the French are fighting back against the Contract with France. Evidently, they realize if France has money to conduct nuclear tests in the Pacific, they, also, have money for their budget deficit without cutting social programs.

It is past time for the American people to protest. Otherwise, there will be even more homeless children on our streets.

—Gary Sudborough

The times never change

The () are put to show where I have altered the quote from the original...

"...Woe unto those who think that the (Generation X) means crime, delinquency, immorality, amorality...woe unto those who attack it on the grounds that they simply don't understand history and the yearnings of human souls."

—Jack Kerouac, 1959

Nothing has changed. Jack.

**Naskali passionate about Arboretum**

Tricia Francle  
As director of the University of Idaho Arboretum, Richard Naskali can best be described as passionate about his work. His job is to oversee and care for what he hopes will someday be known as “the premier documented reference collection in the Inland Pacific Northwest.” Part of that means protecting the plants from all sorts of potential damage. The Arboretum is a living museum, constantly being added to and improved upon. With multiple renditions, Naskali envisions in continually expanding and changing, as “something that neither you, nor I, nor our kids will ever see finished.”  

The Arboretum is on 63 acres of UI land. Much of the land was UI property set aside by Frank E. Arboretum, and in 1960 the land at the southern end was donated by Amil and May Fleicher, including the barn. That barn is the oldest barn owned by UI. Since 1978 nearly $400,000 has been privately donated to the Arboretum. The Arboretum is on school land, and the budget does include some general education funds. This gives a few people the impression the Arboretum is theirs to use as they wish. Naskali emphasizes that “the arboretum is a living museum, not a park or a playground.”  

The funds from the budget go to maintaining the grounds, and purchases such as a new tractor. All of the plaques, benches and plants are purchased with private money. Some of the shrubaceous cost up to $75 each. Some individuals have donated $500 for a commemorative tree. A great deal of private money has been contributed to plant the trees and flowers in the area. Hundreds of dollars out of the budget each year are spent on feeding skiers during the winter to keep skiers and sledgers out. The peony bushes are currently buried under the snow, so even though you can’t see them, sledging over them could cause extensive damage, requiring replacement of the bushes.  

Two of the additions that were to be an opportunity to study aquatic plant life were the ponds located in the Arboretum. In addition, the ponds are a potentially suitable habitat for a number of wild creatures. Naskali, like others, feels “it would be delightful to think of wild things coming to live here.” The Arboretum is a fragile ecosystem that is carefully maintained. Often visitors who don’t understand the delicate balance that has been achieved inadvertently cause major problems. At one time Canadian geese were being fed corn on the grounds. Numbers of geese increased to about 150 one fall. This large number of geese destroy the plants, and their winter migration can be disrupted from legcy starts near artificial food sources. 

Dogs running around or swimming in the ponds aggravates the problem further. Last year was the first time in many years that any of the waterfowl which used the pond successfully raised their young. Dogs and mountain bike riders

**Spring brings fishing, hunting**  

Jerri Lake  
Now that January is gone and we are set into our routines, we can think about fish'n and hunt'n fun along with school. Before you can get involved with all this outdoor activity, don’t forget to buy your 1996 fishing and hunting license and tags. The ones you used last year are dead. Going to get your live 1996 license and tags will be like playing the lottery. The new-fangled electronic machines don’t always work. After hearing stories about machine problems at vending, I decided to try the one at the Lewiston Fish and Game office. It was broke. Three days later it was working well enough to issue my license and tags. The machines are made by the same company that makes the green kito machines. However, your chance of getting your license and tags is about 20 percent. That is better than the lotto.  

Free permits are available at the Idaho Fish and Game office for blind resident, good during any open season. Senior residents, 70 or older and lived in Idaho for the past five years, may also receive a free hunting and fishing license. Resident military personnel on furlough may also receive a free hunting and fishing license during open seasons. Free Sturgeon permits are available for anyone with a current fishing license. A disabled resident, certified by a medical doctor as totally and permanently disabled, is entitled to a free hunting and fishing license for open seasons only. The certification must be on an official Department of Fish and Game application form. All license holders must purchase regular tags and permits related to the species desired.  

A person with a permanent disability with one or both arms can apply for a permit to hunt during archery season with a crossbow. A doctor must certify the disability on the Department of Fish and Game’s official Application for Handicapped Persons Archery Permit. The doctor must certify the applicant is capable of holding and firing a crossbow without assistance from another person. Non-resident and non-resident physicians must have their signatures notarized. For additional details, contact the Idaho Department of Fish and Game. If this cold weather holds up, we will be able to get in some ice fishing. So far, the only ice I have been able to catch has been in my glass. I never could figure out why anyone would want fish for ice any bow. I will let you know when it gets thick enough to fish on. The general spring Steelhead trout season opened Jan. 1, and runs to April 30. There are exceptions in some areas, so check your regs. You must have a steelhead tag to be legal. The excitement of playing a trout 20 inches or longer will pump up much adrenaline 

Turkeys usually stay in a general area. Where you find their tracks in winter, they will most likely be in that general area in the spring. We have the snow, so get to looking and practicing your gobblin’ calls for spring. 

through you, it will help you to keep warm. Between times, dress WARM.  

*SEE FISHING PAGE 10*
FISHING  FROM PAGE 9

Lakes, ponds and reservoirs, the Snake River and the Clearwater River from its mouth to Clear Creek, with the exception of the shoreline along the Dworshak Fish Hatchery, is open all year. Check your regs for any area and species you might want, just to be on the safe side.

Mountain lion seasons in our general area unite-close in February and March. Spring seasons for bear and turkey open during April. Turkeys can be hunted in the spring only and the seasons are short. I have been told the best time to find turkeys is while there is snow on the ground. Turkeys usually stay in a general area. Where you find their tracks in winter, they will most likely be in that general area in the spring. We have the snow, so get to looking and practicing your gobble’s calls for spring.

If you want to hunt spring bear with a bow, and are not certified for an archery stamp, you need to complete the class before the season. If you are interested in taking the archery class, contact the Idaho Fish and Game for class dates, times and locations.

April is also the month to apply for controlled hunts for moose, bighorn sheep and mountain goats. Controlled hunts for deer and elk are in June.

THE ARBORETUM FROM PAGE 9

who leave the trolls are the primary factors which diminish breeding birds or destroy nest sites.

Unfortunately, goldfish were introduced by someone visiting the Arboretum. As a foreign species, they have very successfully populated and the ponds are no longer a suitable habitat for study and research purposes. At one point more than 400 pounds of goldfish were removed from the ponds.

Soon there will be some new benches in the Arboretum, benches that private donors contributed thousands of dollars each for.

Naskali believes people donate because they want “to do nice things in a nice way to build our collection.”

The Arboretum is a beautiful place to go for a peaceful walk in the evenings. Many people, including Naskali, have given time and money to create these wonderfully diverse gardens for all the people in the community to enjoy. Signs are posted limiting certain activities not to ruin anyone’s fun, but to protect the many varieties of flora represented.

Naskali’s plans for the Arboretum include meeting the “long, long, long term goal is to get accredited by the American Association of Museums.” There are only 15 accredited arboreums in North America.

Mr. Naskali doesn’t “like confrontation, but if I’m not going to tolerate trash, I am. If your out in the Arboretum, and a man comes up and stops you from “having your fun”, it’s probably Richard Naskali, working hard to make the Arboretum a better place for everyone to enjoy. He can explain to you why the rules are the way they are, and all the intricacies of nurturing such a large collection of plants. You might even enjoy taking a moment to stop and say hello.

McDaniel emerges as quiet star for Vandals

Damon Barddull

When trying to think of the Grandview, Idaho, native who helps lead her Idaho Vandals basketball team to victory, of course Mindy Rice comes to mind.

However, another Grandview native is quickly and quietly becoming a star among the Idaho starters.

Sophomore Melissa McDaniel may not put 20 points up on the scoreboard or may not pull in 15 rebounds a game but at 5-foot-7 inches tall, this Vandal has a knack to produce on defense rather than offense. McDaniel's role is crucial for Idaho to be successful.

"My role on this team is to come out and try to play great defense," McDaniel said. "I'm there for offense when they need me, you know when they need me I'll come through. But I'm there more to play defense and try to spark something to happen." 

However, that doesn't mean that McDaniel can't put points on the board. Against Eastern Washington this season, the Grandview native scored a career-high 13 points and played all 40 minutes of the game.

"It was exciting 'cause I came out the first half and scored 8 points right off the bat and I thought that was really neat to be able to come out and play defense and be able to play offense all at the same time," McDaniel said while smiling. "That was a great game. I like to look back on that one."

Although some players may feel a bit disappointed with not being in the limelight or not being the go-to player when crunch time comes around, McDaniel feels that as long as she's contributing to the team, she's proud of her efforts.

"I feel that if I know I'm getting the job done, I don't care what others think or if I get a lot of press," McDaniel said. "I just as long as I know I played well and that I know I'm doing my job I'm happy with how it comes out." 

Averaging 6.4 points per game and with 38 assists on the year, McDaniel's offensive effort doesn't look too shabby. But McDaniel's work ethic is what keeps her in the starting five line-up. A work ethic that McDaniel credits her father with.

"If I had a bad game in high school my dad would take me out as soon as we got home and we'd go work on my shot or work on my defense," McDaniel said. "Basically my dad was the one who made me do that. He's the one who kept pushing me and telling me to do it. My mom, she was there doing the same thing. They weren't gonna' raise a quitter so they kept me going." 

McDaniel's work ethic obviously showed through with her high school achievements. At Rimrock High, McDaniel was named the State of Idaho 4-A Player of the Year in 1993 and 1994. Besides being a standout high school basketball player, McDaniel was named team MVP as a volleyball player.

At 5-foot-7 inches tall, McDaniel knew a college volleyball career would be a long road, so the soon to be Vandal ultimately decided that basketball was the sport for her.

"I always loved basketball," McDaniel said. "Basketball was more my thing and I just felt I could excel more there than anywhere else."

As a freshmen at Idaho, McDaniel got the starting nod in five of the final seven games of last season. From there, McDaniel proved that her hustle and consistency would earn her a starting spot on this year Vandals roster.

McDaniel now knows of her potential and can't wait to get the experience she needs to be even better.

"I'm kind of excited," McDaniel said. "I know I have a lot of work to do and I want to be able to play a lot of minutes this season.

With the 1-100-10-72 win, Idaho stuns Montana State 80-72

Idaho gathers together near the end of Saturday night's win over MSU.
Mike Stetson

There's no place like home, there's no place like home. For the Idaho Vandals Men's Basketball team there is no place like home, as Joe Craven's squad dropped two more games on the road Friday and Saturday against Big Sky rival Montana and Montana State.

The Vandals hit the road Friday, following a four game home winning streak and a tie in third for the Big Sky, looking to continue their success ways in Missoula against the Grizzlies.

Two runs by Montana in the first half put Idaho away early, despite a late run by the Vandals before half time. Montana jumped to an early lead, but Idaho closed to within two at the 13:20 mark in the first before the Grizzlies ran off seven points in just over a minute and a half. With 7:26 left in the first and the Vandals down 3-5, Montana got hot again, running out to a 21-29 lead with 5:30 left in the half. Idaho then closed the first with a 3-2 run of their own.

In the second half though, Montana put the game away when at 13:40 the half they went on one last run. The Grizzlies outscored Idaho 15-3 during the 4:40 stretch, putting the game out of reach at 52-56 with only nine minutes left. The Grizzlies then coasted to a 94-68 victory, moving them to 14-5 overall, 4-2 in conference play. "We are no longer in it at half-time, but they came out in the second half and did what they did in the first, and we didn't shoot the ball very well," Craven said.

The Vandals hit only 20 of 61 shots from the floor in the game, 33 percent, and 7 of 21 from outside the three point arch. Despite a poor percentage from the floor, the Vandals hung close at the free throw line, hitting 21 of 27 compared to Montana's dismal 10 of 22. Montana managed 39 of 62 from the floor, 63 percent, and hit 6 of 12 three pointers in the game.

For Idaho, guard Reggie Rose led the way hitting for 21 points, including three of four from three point land in the first half. Vandals forward Jason Eckman also added 10 points for Idaho, the only other Vandals in double digits.

On Saturday, Idaho faced Montana State, looking to salvage a game from the road trip against the first place team in the Big Sky. The Bobcats entered the conference with a 13-3, 5 in the conference, tied with Boise State. Idaho started slowly against the Bobcats, trailing most of the first half until Jackman sparked the Vandals with a shot off the glass with 3:45 left. The Vandals closed the first with a 9-0 run to take the lead 36-32 into the break.

The Vandals fortunes changed about five minutes into the second half when Montana State center Quadre Lollis stemmed home two points, tying the game at 44-44. Lollis followed his own dunk with two more points 35 seconds later. Thirty-three seconds later Lance Fay, off the bench, hit a three for Montana State, putting them in front by six, 50-44. Idaho trailed the rest of the way, never getting closer than six points as the Bobcats recorded their six Big Sky win, 78-50, moving them to 14-6 overall and 6-1 in the Big Sky.

"It was a tough trip, we played good against Montana State, but not good enough to win on the road," Craven said about the loss to the Bobcats. "We don't have the mind set for winning on the road."

Craven blamed himself for the Vandals' lack of road trip savvy that has caused Idaho to thrive at home but struggle on the road. Idaho benefited from a balanced attack against the Bobcats; getting 14 points from Jackman, 11 from Rose, 10 from forward Harry Harrison, nine from guard Shawn Dilton, and eight from both forward Eddie Turner and Kris Baumann off the bench. On the other side, the Idaho defense managed to quite one-third of Montana States offense in forward Adam Leachman who hit for six points. However, Montana State's other big men picked up the slack. Lollis pumped in 16 of Montana State but forward Nico Harrison was the game's high scorer, accounting for 29 of the Bobcats 78 points.

The Vandals drop to 3-3 in the conference following the tough Montana swing, 9-9 overall. The Vandals still have a good chance at moving up in the conference with seven conference games remaining. Five of those games including conference leaders Boise State on Feb. 9, and Montana State on Feb. 29. If Idaho captures their remaining home games and can pick up a win or two on the road against either Weber State or Northern Arizona they could finish 9-5 or 8-6 in the conference, easily qualifying for the Big Sky Tournament.

As for the team's future chances with home conference games ahead, Craven says optimistic. "I still think we are a good team, a very good team. We can still have a successful season. We can be real competitive at the end of the season for the conference tournament."
Mindy Rice plays a little defence against Montana.

McDaniel  • FROM PAGE 11

to do and I have a lot of improvement to make, so when I’m a senior, hopefully I can put it all together and be able to be an outstanding player.”

The same excitement that keeps McDaniel focused on the court has transferred over into her performance as a student, maintaining a cumulative GPA of 3.2. The physical education major wants to pursue a career in teaching or coaching and plans to do so in a small town in Southern Idaho. When McDaniel finds time to break away from her rigorous schedule, the sophomore likes to spend time in the outdoors. In fact, McDaniel has taken up a new sport – golf.

Whether the challenge be hiking a whole in one, stealing a pass with only seconds left on the game clock or getting an A on an exam, you can bet that McDaniel will try to be the best that she can be. In addition, Mom and Dad can be proud of themselves for not raising a quitter.

MONTANA

Montana came into Memorial Gym Friday night and proved why they are undefeated in the Big Sky Conference, handing Idaho a 79-51 loss in a bitterly cold Memorial Gym.

Idaho kept the game in check for the first half, before falling helplessly behind at the intermission. Trailing by only five with a little under 4:50 to play in the first half, Montana used a 13-0 run to put them up by 18 at intermission, 41-23.

Idaho got no closer than 15 throughout the second half before finally falling 79-51. The Vandals shot a miserable 33 percent from the floor, and only 53 percent from the foul line. Montana on the other hand shot a torrid 44 percent from the floor for the game, and nearly 50 percent in the second half.

The Grizzlies got double figure scoring from five players, three of them coming off the bench. Skirya Sisco led the attack with 17, followed by Laura Beattie’s 14 and Greta Koss’ 12. Cottie McElmurry and Allison Turner both came off the bench to score 10.

Idaho was led by Natalie Hawks 16, with Skipyk and Rice each pitching in 11, for a Vandals team that received only 13 more points from the remainder of the team. Montana used in match-up zone to counter the Vandals outside threat, as Idaho hit only 4-15 from beyond the arc. Idaho attempted 16 less shots than the Grizzlies, and made only 19 fouls for the game, as compared to Montana’s 32.

Idaho 1-21 1-6 3-2. Koss 5-10 2-2 1-2, Kipp 0-6 0-0 0, Bieber 1-3 0-0 2, Brown 6-5 0-0 1+ Brooks 1-2 0-0 0, Beattie 2-2 0-0 0, Orner 2-2 2-2 0, McElmurry 4-5 2-3 10, Turner 5-6 0-0 10, Rasmussen 1-3 0-1 2, Sather 0-0 0-0, Sackman 1-5 0-4 3. Totals 32-73 8-15 79.

This Valentine’s Day, give the gift that will last.

A Valentine Message in The Argonaut’s
Love by the Gram Section.

We know what you’re thinking. Pay your $2, compose your sweet, poetic 25 words or less, and then the love of your life doesn’t read The Argonaut on Tuesday, February 13. It’s happened to us all. But don’t worry! Your message is guaranteed to be a success. You see, those crafty intellectuals down at The Argonaut will send the object of your affection a postcard to make sure he or she picks up our special Love by the Gram section. It’s that easy.

YES, it’s that easy. Compose your message below, using 25 words or less. Next, clip this out, scrounge up $2.00, and get it to The Argonaut by mail or by foot. The deadline for guaranteed reception (if you want to be sure a postcard is delivered) is February 9. The absolute final deadline is February 12 at noon.

BY M!AL: THE ARGONAUT, 301 STUDENT UNION, MOSCOW, ID 83844
