Renaissance Fair on tap for this weekend

Annual rite of spring features music, art, food and free admission

Janet Birdsall

A
tits, musicians and chefs from around the Northwest will be in
Moscow this weekend for the 32nd Annual Renaissance Fair.
The fair will be held at East City Park from
10:30 a.m. until dusk Saturday and 10:30 a.m.
to 5:30 p.m. Sunday.

The fair has 150 booths designated for the
artists, said Michael Bartley, director
of publicity. To get a booth, the artists had
also to send applications to the fair committee. The
committee then decided which applicants
would work best for the fair.

Over 160 applicants applied for booths this
year, Bartley said.

Those hoping to set up a food booth at
the fair had to go through a similar process. A food
rating was held to determine who
would be one of the 57 food booths.

"Only interesting and tasty food is allowed
into the fair," Bartley said.

Bands will be playing until close each
day. Naked to the World, Reggie Garrett and
Snake Oil Peddler and Suzy Ban are
among the groups scheduled to appear.

"All of the bands are free," Bartley said.
Admission to the fair is free, as well, but no
pets are allowed.

Children's activities will be a big part
of the fair. Youngsters can enjoy storytelling
and face painting. They can also take part
in painting a 30-foot mural. A jester will be on
hand to make balloon animals, Bartley said.

The fair king and queen are Frank and Sue
Pelley of Moscow.

"Frank and Sue will completely embody
and represent everything that the fair is
about," Fair President Sam Obermeyer said.

A prepared statement. "Throughout the
years they have contributed to making our
community whole.

Booths have been a spring in the
king Frank and Queen Sue sue claim their royal territory at East City Park.

Palouse Clearwater Environmental Institute
and are active in environmental causes. Sue
Pelley was pleased to represent the fair.

"I think it is incredibly satisfying and it cele-
brates spring, the community and renewal," she
told.

Rain does not deter Arbor Day dedication

Shawn Vildmar

A
rbor day was particularly special
this year. The University of Idaho
received a grove of 11 historic
trees from the nursery of Stan Lestander
and Theodore Klein.

Lemaster and Klein collect seed and
cuttings from trees associated with
significant events and famous people. The trees
often bear the names of famous people
and what they stood for. For example the
Moon Sycamore was taken to the moon
in the pockers of astronaut Stuart Roosa on the
Apollo 14 mission. This tree was dedi-
cated to the College of Mines and Earth
Resources because of its interest in explo-
ration, geology, geography, mining and
metallurgical engineering.

In 1943 Lemaster was a resident of
Wills Sweet Hall at UI. He stl the kind-
ness he and his fellow sailors received
from the residents of the town during their
radio training here.

Moscow has been awarded the "Tree
City USA" award by the National Arbor
Day Foundation, for the third year in a
row, according to the Moscow Tree
Bulletin. Mayor Paul Agidius gave a
proclamation over the seedlings, which
was supposed to take place near the Helio
Walk on the northeast corner of the
Administration Building Lawn, but was
moved indoors because of the rain.

Agidius' proclamation urged all citizens
to "plant trees to gladden the hearts and
promote the well-being of present and
future generations." He also reminded the
attendants "trees can reduce the erosion of

Communication students discuss future over pizza

Andrea Lucero

A
dvertising, journalism, pho-
tography, public relations
and other communication
students crowded into the School
of Communications Building confer-
ence room to devote their time to
cutting up flying ideas on how to
give the new Communication Students Association a healthy start.

CSA is a new organization of all
communication students. The group
will have regular monthly meetings
to discuss communication students'
interests and concerns, to improve
communication with faculty and to
revive a forum for helping students
further their professional and acad-
emical goals.

Faculty from the School of
Communication began the meeting
by explaining the importance of
developing an organization which
includes students from all branches
of communication.

"Many people think communica-
tion is irrelevant," explained
Professor Michael Nitz. "An asso-
ciation such as this is important
because comm students will be
given the opportunity to show their
importance in all areas of commu-
nication."

Ray Atwood, director of the School
of Communication also
explained, "Comm students are a
string group with more than 350
members all together. The develop-
ment of this association would give
the students a voice to express their
interests as a body."

Faculty also emphasized the need
to sustain CSA in order to accom-
plish its goals. They believe student
recruitment is of the utmost impor-
tance and fresh ideas are needed to
get students involved with CSA.

"Students need to know they can
accomplish things through the
organization," explained advertis-
ing major Kathryn M. Fues. "They
want things that would look great
in a resume, something to exchange
for the time they put in."

Other student ideas on how to get
CSA off the ground included send-
ing out information about the com-
munication department, having a
communication student barbecue
at the beginning of next year and
forming a newsletter to send to stu-
dents during the summer.

Students also said CSA needs
to develop project ideas for the
future to keep those involved interested.

"Having goals to work toward is
very important. Without them an
organization doesn't mean any-
thing," Fues said.

Project ideas consisted of hosting
a communication student alumni
reunion, video production for
homecoming and moon's weekend
and possibly becoming directly
involved with the Argonaut and
other communication student orga-
nizations.

"CSA has possibilities," said
Professor Sandra Haasager.

"Having an organization for the
communication students will as a
whole will provide a much greater
critical mass to accomplish things."

All communication students from
any major are invited to attend
those meetings. Members of Ad
Club, the comm. school's only other
active student organization, are expected.

The next meeting is planned for
the fall.
Mural charges dropped, prosecutor plans to refile

TWIN FALLS, Idaho—Mural charges were terrorism charged against a man accused of shooting two teens, but the prosecutor said he plans to retry him.

Eric Ferrier, 18, was charged with murder in the March 30 deaths of Jesse Ellion and Jafra Sumaya. Twin Falls County Prosecutoe Michael Bevan dropped the charge on Friday after hearing the defense request to delay the preliminary hearing.

Bevan said he needs more time to prepare the case because detectives have a lot of information that needs to be checked out.

Ferrier is also being held under $100,000 bond in Barid’s Mini-Cassia jail. He is charged in Cassia County with aggravating battery in connection with the stabbing of a 15-year-old.

Twin Falls Police claim Ferrier killed Ellion and Sumaya, both age 19, over an argument about gang nicknames. A friend discovered the young couple attacked and found the bodies in Sumaya’s apartment, dead from multiple gunshot wounds.

Texas police said Ferrier killed in Twin Falls for the past two years, and that he is wanted in Nevada and California, family members said.

The two victims also are not to send her to prison. Eismann said he will sentence him on Monday.

Elvis "religion" followers hold weekly services

BETHLEHEM, Pa.—Eat peanut-butter-and-banana sandwiches, make a pilgrimage to Graceland, turn toward Las Vegas and gyrate your hips. It’s the hot way to fend off the Anti-Elvis, Michael Jackson.

There are the basics of the Pussy-terism, a new "any" that holds wednesday service

or cyber space and encourages its members to emulate the King by eating six meals a day, with frequent snacking.

About 200 people have joined the organization, and all of them celebrated when Lisa Marie Presley filled for divorce from Michael Jackson.

A velvet painting of Presley was sold at an auction in Christ Church on a $15,000, destroyed in a fire, and a $15,000, destroyed in a fire, and a $15,000, destroyed in a fire.

The 31 Commandments are actual items that Presley already kept around the house. His own, due, over-the-counter cold medicine, ground round, cheap cigars, Little Debbie fudge brownies, taxis and gun and, of course, peanut butter and bananas were laid out on a table in the front of the church.

The organization teaches that the relationship between men and women should be based on the movie "Las Vegas," starring Ann Margaret and Presley.

Christians to gather on capitol steps at rally

WASHINGTON—Christians from around the country will gather on the steps of the Capitol on Monday for a rally organizers hope will point America’s young people in a different direction.

U.S. Park Police are preparing for about 250,000 people at the Washington for Jesus rally, though organizers hope for more at the non-denominational two-day event.

It will feature Christian musicians and youth speakers Monday and a mock trial of society’s problems on Tuesday.

Monday’s youth rally, starting at noon and lasting until about daybreak Tuesday, will feature about 20 musical groups and two dozen speakers targeted primarily at people in their teens and twenties.

Tuesday’s events will be more of an all-day event conceived on an all-day mock trial about society’s problems. Heart said, Speakers will include evangelist Jerry Falwell, the Rev. Pat Robertson and Rev. Benny Hinn, host of a Christian TV show.

Organizers wanted to avoid a dispute with Maryland's policy of not scheduling speakers and musicians that would tie together, "like Woodstock," said organizer Mindy Gimmel, a youth pastor in Virginia.

Bus bombing kills at least 40

ISLAMABAD, Pakistan—Blasting terrorist for a savage attack, the Pakistani government said Monday that 40 people were killed in central Punjab province when an explosive bomb was placed under a bus on Monday declared war against terrorism.

During an emotional visit to Rawalpindi, a city village 25 kilometers (15 miles) east of Lahore, Ms. Bhutto called the culprits behind Saturday’s slaughter "cowards" and urged the nation "to forge complete unity to crush them."

On Monday morning the marketplace of Bhal Pheru was the scene of a horrific explosion and fire that engulfed a bakked packed with Muslims heading home to celebrate Islam’s most revered holiday.

WWW site focuses on Northwest environment

Zachary Smith

A new World Wide Web site has been developed to provide a meeting place for people interested and involved in environmentally related activities in the Northwest.

"The Northwest Environmental News (NEN) is a new online publication that filters environmentally related information for Washington, Oregon and Idaho," said Ernie Marquez, publisher of NEN. "Previously, our news stories are developed from news releases obtained from government agencies and other organizations," he added.

More than just news stories, the Seattle-based web site also focuses on connecting government and industry on environmental issues.

The WWW site features opinion columns discussing the issues and letters to the editor from NEN readers. It also highlights "environmentally related tools as they are introduced and make their way towards legislation," Marquez said.

The site is free for all Internet users, but environmental groups and businesses are being solicited for advertising.

"We are about to begin promoting NEN as a marketing tool and sell web page development for the Northwest environmental industry," Marquez said. "Currently, our news stories are submitted to NEN's editor via email, but Marquez would like to have that information available in the future.

NEN will not subscribe to any news sources such as the Associated Press. Rather, we will rely upon in-house developed news stories and reprints for our news content," Marquez said. Once the NEN site is better established, we may be able to offer our payment-for-reprints deal," he added.

NEN is located on the Internet at http://www.halcyon.com/nen

Peer educators wrap up semester

Jennifer Eng-

They came in timid and shy and left informed and serious about their role as peer educators. Health and Safety 406/504 lock on the role this semester of educating other University of Idaho students about HIV and AIDS.

"I think it's the start of something really, really wonderful," Andria Scanlan, the instructor for the course said. "The first part of protecting people and preventing the spread of disease is by talking about it, finding out about it and that's what we're doing here."

The group of 24 students from a variety of majors spent 26 weeks training for their roles as educators on campus and in the community.

Scanlan said, "We have 24 students in the class that have become experts in current information, in protection and in the continuum of risk behaviors. One of our main goals in the class is to help students personally assess their risk. If you don't think you're at risk, then you're not going to change your behavior, you're not going to get tested and you're not going to take consideration you may be putting others at risk."

The peer educators have reached over 300 UI students with their message about HIV and AIDS. By the end of the semester they hope to have reached 500.

Not only are the students reaching out to inform their peers, but also their future peers. Since the peer educators started doing outreach after spring break the class has talked to fraternity men and women, residence hall students, university classes and high school kids.

"One of our objectives as a class was to participate in the community as well. So we've done about six programs in the high schools and we've hit about 150 high school kids," Scanlan said.

The evaluation Scanlan and her class have received from both the college age group and high school have all been good.

"Our evaluations coming back are saying they really enjoyed it and that it was very powerful as a peer experience. It wasn't like being taught by a teacher," Scanlan said.

"The response we've had to the outreach has been unbelievable." The outreach program talks to students about abstinence, how to make sex safer, teaches negotiation skills and talks about the statistics of HIV/AIDS.

Scanlan said their introduction is: "Your faces are going to get red and your faces are going to get red, but it's time we all talked about this."

Scanlan said every 11 minutes somebody in this country dies of an AIDS related disease; every six minutes one more person contracts full blown AIDS.

During the one hour program, the peer educators set up and let an alarm clock ring every six minutes. At the end of the outreach the peer educators leave students with the thought that 10 more people had contracted the virus while they were speaking.

The outreach program also discusses correct condom use. In the college outreach, each person gets a condom, they open the condom and have a discussion about the correct usage. The peer educators hold up cards and have the class or group put them into the correct order of how to put it on and use it.

Scanlan said in most cases even if you use a condom, if you don't it correctly it makes no difference the chance of getting an infection is still there.

"We don't have a cure and our only weapon against this disease is education," Scanlan said.

With Latash's high incidence of STD's Scanlan said the behavior to spread a disease like AIDS is here.

"We really need to be talking about this stuff and learning," *SEE PEER PAGE 7*
UI Cooperative Ed gets assistance

Christopher Clancy

Director of Cooperative Education Alice Pope Barbut is asking for and receiving letters of support from alumni, faculty and community as the federal government prepares to eliminate on-going grants that could force layoffs and cut services within the office.

A move by the federal government that could eliminate personnel at Cooperative Education, could also decrease the number of student internships in Moscow and bring an end to outreach services currently available in Boise, Barbut said.

The cut-backs enacted by Congress last fall will discontinue an ongoing grant received by the department in 1994. The grant, previously scheduled to run through 1999, was intended as a way of expanding services for the university, but has also increased employment within the department.

Because of the cuts, services may have to be scaled back and three staff members could lose their jobs, including the university's outreach coordinator in Boise. Without the outreach coordinator, UI could lose much of its visibility and support for UI students living in that part of the state, Barbut said.

Since the grant began two years ago, the department has expanded its internship program to include 120 employers in the Boise area and has increased other services to the UI campus in Moscow, such as on-line job listings and free resume critiquing.

While Congress probably won't restate aid on the basis of a letter writing campaign, Barbut said she hopes to garner enough support to find alternative means of funding from the university or elsewhere.

In the future, funding will be available from the federal government, she said. Alternative funding would only be used primarily as a way to "bridge the gap and maintain the current level of services," Barbut said.

Alumni and students, past recipients of internships and the companies that provided them have shown a great deal of support. Cooperative Education Program Coordinator Diane Holick said.

"Responses to the letter writing campaign has been very positive. We've had lots of amazing letters of support. We were quite touched. You never really know how much you have done, until you get a response like this," Holick said.

While no solutions to the downsizing have been found as of yet, should the department fail to receive funding, Cooperative Education will still continue to function as a department on campus, but to what extent is still not certain, Holick said.

"Whatever conclusions are drawn, we will still be able to operate in some manner. Services will exist, but may be put on hold without funding," she said.

Bush Houston

The set for the theatre department's next production, "Incident at Vichy," is currently under construction at the Hartung Theatre. "Vichy" runs May 7-12.

UI Advertising Team takes first place at district competition

Tammy Mills

Led by adviser Mark Secrist, Paradise Creek Advertising, the School of Communications students advertising team, not only defeated eight other colleges but defended their district title as well at the American Advertising Federation District XI student competition in Yakima, Wash.

Earlier this year the Red Cross presented college teams across the nation with the theme "Help Can't Wait." The teams were then let alone to come up with ideas that would inspire "twentysomethings" to get involved with the Red Cross.

What made a Paradise Creek's tagline was "Volunteer Your Time." One of the competition judges Leslie Hill-Powers, an advertising associate for the American Red Cross in Washington, D.C., said her first impression was, "Oh, how creative "Volunteer Your Time." Hill-Powers soon realized the impact of the "Volunteer Your Time" campaign.

President gives videotaped testimony in Whitewater trial

WASHINGTON--From the confines of the White House, President Clinton gave 4 1/2 hours of videotaped testimony Sunday as a defense witness in the criminal trial of his former Whitewater business partners.

The president again categorically denied—as he has publicly in the past—that he pressured an Arkansas business deal into gaining an illegal loan, according to a source close with the day's events.

After months of seeking to stay in the background of the Whitewater case, the president took center stage as prosecutors and defense lawyers questioned him behind closed doors throughout the afternoon.

After testifying for the defense for 45 minutes, Clinton said, the president faced more than three hours of cross-examination by the prosecution team. No details of a testimony could be learned as participants were under a court-imposed gag order.

The White House emphasized that Clinton is not a defendant in the trial and has not been accused of any criminal wrongdoing.

"The president has consistently stated that he will provide the court whatever information he can offer, and any other deposition to that end," a White House statement said. It noted that other presidents, including Gerald Ford and Ronald Reagan, have provided testimony in criminal trials.

The taped deposition has been sealed by the court pending its showing to the jury bearing the case in Little Rock.

Clinton's testimony was sought by defendants James and Susan McDougal, the president's two partners in the Whitewater land deal in the 1980s, to rebut claims by a key prosecution witness about allegedly improper government-secured loans.

Hill-Powers was impressed with the team's level of knowledge. Hill-Powers referred to Paradise Creek as "her little team." Hill-Powers spoke of the presenters' professionalism. "Making me believe you believe in what you are talking about, you respect your organization.

Bruce Bomsan, senior art director, and one of the competitions five judges told Paradise Creek, "I'd work with people who had that passion my life would be so easy." Paradise Creek worked hard from the beginning. Judge Larry Benson, senior adviser and new business consultant of VDI/Broadcast One in Hollywood, said, "it's somebody's story." Paradise Creek Advertising consists of Katie Fuess, Shana Vaughan, John Drake, Angela Sawyer, Tyron Hart, Jill Pittman, Jim Corman, Arlen McCauley, Brandon Brown, Greg Kummer, Matt Mason, Mike Kreby, Jenny Jordan, Jill Clark, Laurie Friedman, Karl Belliston, Dustin Lee and adviser Mark Secrist.

Hill-Powers is impressed with the team's level of knowledge. Hill-Powers referred to Paradise Creek as "her little team." Hill-Powers spoke of the presenters' professionalism. "Making me believe you believe in what you are talking about, you respect your organization.

Bruce Bomsan, senior art director, and one of the competitions five judges told Paradise Creek, "I'd work with people who had that passion my life would be so easy." Paradise Creek worked hard from the beginning. Judge Larry Benson, senior adviser and new business consultant of VDI/Broadcast One in Hollywood, said, "it's somebody's story." Paradise Creek Advertising consists of Katie Fuess, Shana Vaughan, John Drake, Angela Sawyer, Tyron Hart, Jill Pittman, Jim Corman, Arlen McCauley, Brandon Brown, Greg Kummer, Matt Mason, Mike Kreby, Jenny Jordan, Jill Clark, Laurie Friedman, Karl Belliston, Dustin Lee and adviser Mark Secrist.

© Associated Press
our precious topsoil by wind and water, cut heating and cooling costs, make it easier to clean the air, produce oxygen and provide habitat for wildlife."

Each piece of the College of Agriculture, each department for them are all "rooted in common history with the colleges that comprise the University of Idaho," according to the plaque which will be placed at the entrance to the grove. Lemaster enjoys assembling the seedlings into a "true mosaic" to be planted at schools, parks and other public places, "It's the story and the tree here is no different."

All of the trees will have a plaque placed beneath them explaining their dedication and the story it tells. For example the College of Letters and Science will have a Sir Isaac Newton Apple tree because the college is the oldest division of the university, and the association of Sir Isaac Newton, apples and knowledge all go hand in hand.

The College of Agriculture will have a Johnny Appleseed Apple since the college is dedicated to the improvement of crops of all kinds. The College of Education is represented by a Laura Ingalls Wilder Cottonwood because many children begin reading with her "Little House" books. This is dedicated to this tree, grown from cuttings of a cottonwood planted by Pa Ingalls on the old homestead.

The College of Art and Architecture will have a Buckingham Palace London Plane Tree because Buckingham Palace is an international icon. The college also brings together indoor and outdoor design, so this beautiful tree signifies that dedication to beautifying our own physical environment.

A.J. Sterling Morton Bur Oak holds meaning for the College of Forestry. Sir John was the founder of Arbor Day. According to a press release, he "was a forceful spokesman for the planned and wise use of trees." The wise use of trees is one facet of the goal of forestry.

The College of Engineering will have a Wright Brother's Walnut tree growing in honor of the Wright's. This seedling came from the airfield in Dayton, Ohio, where the famous brothers flew. Since engineering promotes discovery and the embracing of new ideas, this tree is well suited for the task of representation.

Business and Economics is depicted by a George Washington Carver Green Ash, for Carver was the inventor of many commercial products. He was the son of slaves and found a way to put himself through college. The cutting came from Carver's birthplace in Diamond Grove, Mo. It symbolizes his exuberance toward achievement and open-mindedness acquired as an inventor.

The Law school has an Abraham Lincoln Overcup Oak because of Lincoln's association with law, and the University of Washington's law school is the only law school in Idaho. The George Washington Tulip Poplar stands for the College of Graduate Studies.

Finally, the UI Library is donned with the John James Audubon Goldmedal Tree because some of the original prints from Audubon's famous Birds of America are on display therein.

Since selling his international commercial open business last year, Baxter has kept busy breeding Limousin and Murray Grey cattle, attempting to develop a beef operation that we could make into something that would develop a quality of beef that was not available.

But Baxter wasn't getting the results he wanted. "When I sold (Baxter Manufacturing) and I got out a year and a half ago, I couldn't sit still," Baxter said. "I saw a need for something to be done about what was on the market being sold for beef."

"I'm bringing and I don't give a damn, I never have been known to build a product that wasn't the best that anybody could buy," said Baxter, who founded a small restaurant furniture business in the late 1950's and saw it grow into one of the leading suppliers of commercial street furniture in the United States. Baxter Manufacturing, based in Idaho Falls, was sold to a conglomerate last year.

"Somebody got me interested in Limousin beef because it was very lean. I honestly thought that the way the public was going to go, he's needed it," Baxter said, "I turned it around, the only thing I wanted quality with taste. That comes right up my alley."

"I realized that to attain what I set out to do was not attainable during my lifetime," Baxter said. "Rather than follow it down the tube and see it sold for taxes, I started thinking 'What can we do that will help us at least attain the solution to the beef problem we set out to solve?'"

In November, the man with two quarters of cattle to feed a normal connection with WSU called Baxter animal scientist Jerry Carver after reading about Reeves' work with Wagyu cattle. Baxter had previously attended a WSU workshop in Pullman.

"We came out of the blue," said Reeves, who, with WSU animal geneticist Charles Gaskin, will lead research efforts at the Flying T. Baxter sold Reeves what he wanted to leave WSU the ranch when he died.

A day later, Baxter called back. "He said, 'No, I changed my mind. I want to give it to you this year before January 1st.' That was December 22nd," Reeves recalled.

The call set off a flurry of activity in the offices of the WSU Foundation, which needed to complete appraisals and environmental reviews before accepting the gift.

Baxter's herd of cattle has tripled the number of animals WSU researchers have to work with. The College of Agriculture has been conducting some genetic research since 1990, when it began working with Wagyu. But the college's work has been focused more on how to find the desired marbling and on convincing beef producers to try raising Wagyu, Reeves said.

The college "has never had enough years of a long enough period of time to get..."

**Rancher's gift boosts WSU program to build better steak**

Associated Press

Pullman, Wash. — Max Baxter, who turned 81 on April 16, wanted to be sure someone would continue his work since he has consumed the last five years of his life. Developing quality, gourmet meat that's tender and very, very tasty, Baxter's gift to Washington State University of his 360-acre ranch near Centrailia, with 400 head of cattle, gives the university the opportunity to create one of the top beef genetics programs in the world, according to WSU professors working on the project. The December gift is valued by the university at nearly $1.8 million.

So committed is Baxter to developing a better cut of steak that will compete in the lucrative Japanese market, he will continue to finance day-to-day operations on the Flying T Ranch, named for his wife Thelma. The College of Agriculture can't currently afford to maintain the ranch.

The Baxter's will continue to live on the ranch, 3 miles northwest of Centrailia along the banks of the Chehalis River. Baxter, who drives his tractor each day around the Flying T, is teaching WSU professors on research projects at the ranch.

The ranch has been renamed the Flying T-WSU Research and Learning Center by the Board of Teaching undergraduate students. It will become the focus of a WSU beef genetics program that will breed Baxter's Limousin cattle and, from there, to the Japanese market and to the DNA of their progeny.

Write a letter to the editor

Let your fellow students know what you think. Write a letter to the editor.
RICHMOND, Calif.—He’s a poster boy for three strikes laws burglary, theft, assault and finally the murderous beating of a tiny infant, prosecutors say.

But he’s only 6 years old, his legs too short to reach the floor from a chair in a juvenile courtroom.

The youngest child in the nation ever charged with attempted murder has confounded juvenile authorities debating whether to punish or help the boy—and how.

He listened impassively Friday to a juvenile prosecutor’s chilling account of how he beat a neighbor’s month-old baby with his fists, feet and an inch-thick stick.

The attack left tiny Ignacio Bermudez Jr.’s skull fractured in two places, his brain damaged, his survival chances slim.

Prosecutors say the boy recruited two 8-year-old boys to break into the house days after he went to the Bermudez house and was thrown out.

“He entered the house with the idea of doing something,” says Ignacio Bermudez Sr. “He had a large stick. I threw him out. I’d never seen him before that.”

The boy apparently took deep offense. Prosecutors say he told others he planned to get back at the Bermudez family.

The 6-year-old, a first-grade special education student, already had a reputation as a bully and a thief who liked to hit other kids with sticks. He would roam the “Iron Triangle” neighborhood in this San Francisco suburb while his mother worked—ironically, in a day care center.

“He was always sneaking out of the house on his motor,” says Lola Ponce, and routine-ly stole toys from her yard. “When his moth-er would arrive home late, she would come to our house and ask for him. I would just point down the street the way he went.”

The boy would travel the streets with stick in hand, threatening other children, trying to knock them off bicycles, pointing at them like a gun, she said. In school, he couldn’t keep still, tripping other children in the aisle. Many families wouldn’t allow their children to play with him. Those who did often regretted it.

“He was always getting into trouble,” said neighbor Sara Rammert. “He liked to sneak into neighbors’ homes. He’d steal whatever wasn’t fixed down—sometimes even tires.”

On Monday, April 22, the day of the beating, he hooked up with 8-year-old twin brothers from his elementary school, who have good grades and no history of discipline problems. “Model citizen,” said their prin-cipal and teacher.

The twins’ mother is slowly dying of can- cer. Their young aunt and other relatives try to take care of them, and say they rarely go out unescorted. Expectation.

The 6-year-old told them he had a plan to steal a Big Wheel bicycle from the Bermudez home. They went along.

On Monday, the Bermudez family bor-rowed a friend’s car to take the family good shopping. Ignacio Jr. had a cough, to his parents left him with his 18-year-old half-sis- ter, Maria Bermudez.

While the baby slept in the bassinet, the sis-ter went to the bathroom. At that moment the three boys slipped in, apparently through an unlocked back door.

They found the Big Wheel. But the 6-year-old had another agenda as well, authorities say. He found the baby in the bassinet and went on a rampage.

“He beat this baby in the head with his feet, his fists and ultimately with a stick,” Deputy District Attorney Harold Jewett said. A piece of broken stick was found in the bassinet.

“They didn’t really make any noise, the baby didn’t even cry,” Maria Bermudez says. “They must have hit him so hard in the head he was in shock.”

One of the boys picked the baby up and put him on a nearby bed before leaving with the Big Wheel. Police wouldn’t say whether the boys felt remorse or were childishly trying to hide their crime. They left with the Big Wheel.

Maria Bermudez found Ignacio Jr. on the bed and, bewildered, began to pick him up. She realized something was wrong and screamed, loud enough for neighbor Kammer to hear.

The boys were spotted trying to hide the Big Wheel in the bushes. When a girl who found out about the attack said she was going to the police, the 6-year-old threatened her.

Now the boy sits in Contra Costa Juvenile Hall—the youngest child ever confined in the building—while the courts and society grapple for an answer.

Prosecutors also sent him to a juvenile youth facility for years if a judge decides at a hearing last month to commit him to a preliminary hearing on Friday. His two 8-year-old friends were released to their par- ents, charged only with preliminary offenses.

Dan Macallair, associate director of the Center on Juvenile and Criminal Justice in San Francisco, calls the idea of locking up a 6-year-old ludicrous. The boy should be sent home unless his family has the problem in the household, he said.

“If I was going to have a child, I wanted to do what we do with teen-agers,” Macallair said. “Send them off to the movies. After a few years, to be wanting in a violent environment so he’ll come out worse.”

A range of interventions are possible from family counseling to specialized in-home care to a temporary foster home or even a long-term group home arrangement, Macallair said.

His public defender, Leslie Blakat, wants the boy given to Child Protective Services, where he would be treated like a child and a criminal. The boy needs counseling that a detention facility can’t provide, she says.

Prosecutors doubt the social work agency is equipped to deal with a boy as dangerous as the 6-year-old.

U.S. pledges help to Israel on missile defense

WASHINGTON—The Clinton administration vowed Sunday to step up U.S. efforts to improve Israel’s defenses against missile attack, including providing more timely intelligence warnings of missile launches in the Middle East.

"Israel will have not only the advantage it needs today, but will be able to defeat threats of to-morrow," President Clinton said in an evening address to the American-Israel Public Affairs Committee, the main pro-Israel lobby group.

Clinton noted that earlier Sunday, Prime Minister Shimon Peres and Defense Secretary William Perry signed agreements to bolster Israel’s future missile defenses, both with advanced anti-missile defenses and more reliable launch warning systems.

"It should reduce any incentive for any country to launch a missile because they would see it would be ineffective," Perry told reporters after meeting with Peres, who also is Israel’s defense minister.

Clintom also said the U.S. Air Force was on schedule to deliver F-15 fighters to Israel starting next year.

Peres met later Sunday with Clinton in the Oval Office. In 35 minutes of talks, they reviewed U.S.-Israel defense cooperation and last week’s accord to stop the attacks and counterattacks on the Israeli-Lebanon border, according to a White House official. Peres is in Washington to visit Clinton again on Tuesday.

At a joint news conference with Perry at the Pentagon, Peres said he was "surprised in a very wel-come way" by the amount of American help offered to combat what both countries see as moun-taining ballistic missile threat in the Middle East.

Perry also spoke optimistically of the prospects for a continuedhalt of the fighting and attacks in the northern Israel and southern Lebanon.

"I think we will move the truce will last," he said, referring to the cease-fire announced Friday.

strong (genetics) program with animals going," Gaskins said.

The gift should enable WSU to become one of the top beef genetics programs in the world. Currently, only the Japanese government, the U.S. Department of Agriculture and a couple of U.S. universities are pursuing gene mapping in cattle.

Bayer's Limousin Fit well with WSU's plans to develop cattle with a high degree of marbling fat sprinkled throughout muscle tissue prized in Japan. The more marble in the beef, the more "juicy and tender," explains Baxter. The Japanese government is currently mating Limousin, a breed with almost no fat, and Wagyu, which has a high degree of marbling.

Identifying the genes responsible for marbling is one of the most important traits required using two very different breeds. Beginning in May, the WSU project will mate Limousin and Wagyu to create a half-bred. Second generation half-brothers and half-sisters will then be mated, so most of the genes of their progeny are the same and the genes causing marbling can be more easily identified.

Eventually, in 20 years or so, Gaskins said, the work at WSU could change the operations of beef producers. Animals would be bought and sold based on a genetic fingerprint instead of appearance.

"You don't waste time and energy on animals that aren't going to perform in the way you want them to," Gaskins said.

ISRAEL •FROM PAGE 8

Peres cited two reasons for expecting the talks to hold: Lebanon's interest in protecting its civilians, and what he called Syria's track record for honoring agreements. Syria, which controls the flow of supplies to the Hezbollah guerrillas who were firing Katyusha rockets into northern Israel, is not a formal party to the deal, although it was a central player in the negotiations.

Later Peres attended a ceremony at Arlington National Cemetery honoring British Maj. Gen. Orde Charles Wingate for his contributions to training the Israeli Army in the 1940s. Peres called Wingate a "growing const and military asset devoted to Israel." He lauded a wreath of purple and white carnations at Wingate's grave.

Perry and Peres signed a "statement of intent" that reaffirms the United States' support for Israel's efforts to develop ways to shoot down ballistic missiles such as the Scud missiles that Iraq fired on Israel during the 1991 Gulf War. The "statement of intent" had three key provisions:

1. The U.S. military is to begin making arrangements to improve early warning to Israel when missiles are fired in the region. This amounts to sharing with Israel in a more systematic way the "real-time" missile launch warnings that American spy satellites pick up. Perry said details would be worked out later.

2. The Defense Department, in a departure from previous plans, will ask Congress to provide $25 million in the 1997 budget to continue and possibly accelerate a joint U.S.-Israeli project to build a laser weapon to shoot down short-range projectiles like the Katyusha rockets that injured more than 100 Israelis this month. The 1997 budget request originally had eliminated the project.

3. A high-level working group is established to explore other ways the United States can assist in bolstering Israel's missile defenses. Perry said the anti-rocket laser weapon, called the Nautilus, should be available in prototype form for testing in Israel by the end of next year. He said a group of U.S. specialists would go to Israel this week to jump-start the effort.

Perry said the Pentagon also is looking for ways to provide Israel with better protection against Katyusha-type rocket attacks in the Galilee region. Perry said the missile's 'strong technology was adapting for Israel's use the Phalanx 20mm gun, which U.S. Navy ships use as a last-resort defense against anti-ship cruise missiles and hostile aircraft at close range.

THE NEW VANDAL ID CARDS ARE HERE!
Who needs the new Vandal ID Card?
All UI students who are returning for the fall 1996 term need to get the new Vandal ID Card.

When can I get my new Vandal ID Card?
Get your new Vandal ID Card at the Vandal ID Card Office in the Student Union Building. Our office hours are 8:00am to 4:30pm.

What do I need to bring?
Bring your old Vandal ID Card with you to exchange for your new Vandal ID Card. You will be charged the regular lost ID Card fee for your new card if you do not turn in your old card. If you do not have your old card for identification, please bring your driver's license or passport with you.

Where can I get my new Vandal ID Card?

Wildlife refuges under siege

Theodore Roosevelt established the first wildlife sanctuary in 1903 to protect shore birds that were being market hunted for their plumage. There are now over 500 refuges in all 50 states. They are some of the last shelters for many vanishing bird, plant and animal species.

And the U.S. Congress is doing away with the whole idea of a wildlife refuge.

The legislators of Roosevelt's time realized that refuge for species was of paramount importance and that recreation and other uses could be allowed if it didn't interfere with the habitat requirements of wildlife.

The U.S. House of Representatives Wednesday disposed of The American Heritage Dictionary when they passed "The Wildlife Refuge Improvement Act." According to my dictionary wildlife is defined as, "Wild animals and vegetation, esp. in a natural state." And refuge is defined as "1. Protection or shelter, as from danger or hardship. 2.) A place providing protection or shelter; sanctuary."

"The Wildlife Refuge Improvement Act," spiffy name. Who in their right mind could be against this?

Let me tell you about the "improvements."

Recent uses have now been raised to the level of wildlife protection. This will make refuges allocate scarce resources to promote tourism and build accommodations for visitors.

Fundamentally the idea of developing a wildlife refuge for use is counter-intuitive. No species protected on any of these refuges is going to do better with more interaction.

Another possible improvement is now it is possible for the military to perform maneuvers on refuge lands—bombing ranges, tank and troop exercises are now as legitimate a use of a wildlife refuge as is species and habitat protection.

States can be given refuge land to manage also. Can you imagine Larry Craig or Helen Chenoweth managing a wildlife refuge?

The only wildlife that could possibly survive in habitat protected by these two would be the redneck male. They only attempt to breed on Friday nights and have the mating call, "Hon! I just got me a paycheck, let's get drunk and screw."

"The Wildlife Refuge Improvement Act" is a farce, there is no improvement here. Only clever rhetoric to disguise a plan to dismantle wilderness and wildlife protection.

It is ironic that countries like Argentina are today using U.S. environmental protection laws as templates for their own at the same time that we are actively dismantling our own environmental protections.

—Dennis Sasse

Argonaut Letters & Guest Columns Policy

The Argonaut welcomes reader letters and guest columns. Letters must be one page or less typed, double spaced, be signed and include the phone number and address of each writer. Letters may also be submitted by e-mail to argonaut@uidaho.edu or by fax to (208) 885-3223. The Argonaut reserves the right to refuse or edit letters. Only one letter per month will be accepted from a single author. Guest columns must go through the same editing and approval process as our staff columns.

Vandal souls go for wholesale

The 1997 university promotional package is almost done. Behind the scenes look reveals that the slick new promotion package will feature the new "Wildlife Refuge Improvement Act." In this case we all got beat over, ridden hard and put away wet with nothing to show for it but another bloated snow out of touch unresponsive level of bureaucracy. The administration and Vandal Card Office will try and tell you that's not the case. They try and tell you that's not the case. They try and tell you that's not the case. Yes, they're crooked.

The truth is that this office has three full time employees and two part time employees. A total of five. Four too many.

There is a $3 fee built into your student fees that is suppose to cover the cost of a Vandal Card. Where is all this money going? I find it hard to believe that a student ID can't be produced for $30,000 plus whatever state fund for the gross profit the program.

The reason for this departmental bloating is simple bureaucracy. If the Vandal Card Office didn't spend as much time and effort counting AT&T, they wouldn't desperately need the income provided by selling out the university name and the students' collective soul.

Another totally unrelated point, we are already bombarded with advertising from phone giants, I get calls from AT&T, all the time. I see them on TV, hear them on the radio and now we feel their presence everywhere on campus.

In correspondence Taylor and I have debated the merits/horror of having a calling card option. Taylor commented to me it seems there the Vandal Card to selling space in the phone book.

I have to say that you don't have to have anArgonaut to cash a check, use the library, enter the Kibbie Dome, register, etc.

Taylor responded to my concerns about the ad appearing on the ID card in the following way, "I can understand your concerns about being a walking advertisement. However, since the card is not pinned to your shirt with the logo showing, I fail to see how you would be doing any advertising for AT&T." Later Taylor said that since the logo is on the back so you can't see it. A hint, where is the magnetic strip used to read the card?

"Many other universities across the United States have card options on their cards."

My trip to the whorehouse

A paranoid senior's scathing look at America

I've been working base of term paper hell, job rejection and financial-mental exhaustion, I've been asked, demanded, to lash together some insightful words for my loyal readers. So in the spirit of cooperative, reader-friendly journalism—and because I simply don't have a specific topic—if I had a week a spacious look at life in America and a place into my goggy thoughts of a paranoid freak wondering where in the world we lost our way.

Once again I have used my trade-mark candy headline to draw you in for a closer look. I didn't really visit a brothel but in many ways, I suppose, we could compare America to a whorehouse.

Both are filled with people who try to hide the fact that they are doing to corrupt or unwholesome purposes. The difference is, America manifests and offers a social rather than sexual form of prostitution for not only money but power, class separation and selfish desires beyond reason. This is not to say there are no good Americans to the evil characteristics of this country.

There lies my topic: The disease to be a yin-yang relationship of good and evil keeping the United States from becoming Com- plete with its position in the world. This dichotomy is seen throughout our society: in politics, the conserva- tives vs. the liberals; in our populace, the wisdom of seniors vs. the energy of youth, the consumption of the have-not's vs. the reluctance of the have's to carry them; and the many religious-political factions that run away at every issue of morality and prejudice.

All are equally necessary. Without one or the other of each of these examples, we would fall into the tug-of-war mud-pit of mediocrity and apathy that would surely destroy us. The pull each exerts upon us at any point in our life is in the same force that keeps us alive, and enjoying that life. Without the horrific Jeffrey Dahmers of the world to give us an example of what we are capable of, we would not nearly so much respect the civility of our day and dawdle existence.

Without the unequivocal failure of the John Wayne's we would never strive to build something better. And the perfect world we build our society, the greater the failings must be in order to justify the physical, emotional, and monetary cost neces- sary to maintain it. What hope is there? Are we de- tined to have a world where the yin and yang are so out of balance? Is it to room for any moderation? A society of only lawful good and chaotic-evil? The fact is, the more strongly we react to those imperfections that are aligned against our beliefs, the more
Tips to get better service from the university

Editors note: This is a column that outlines ways for students to get more out of their education here at UI. Due to the length of the original article submitted it has been broken into two parts.

As two marketing professors who regularly discuss customer satisfaction in the classroom, Shawn has prompted us to respond to some of the issues she raises.

We agree there are situations that occur in the university setting that are less than ideal. Some situations, like long lines, may seem unavoidable. Others, such as "silly" attitudes, "abuse," rudeness or impoliteness, are behaviors that are unacceptable in any service industry. We agree that such behavior is not acceptable in any setting, including the university. In fact, as "internal customers" of many of the departments within the university, we sometimes experience situations that leave us dissatisfied.

What should students do if they are dissatisfied? Often it seems there is nothing the student can do. Shawn's column conveys the feelings of frustration, anger, and helplessness which can result from inferior, indifferent and uncooperative customer service, and in turn, can lead us to feel there is nothing we can do. But students do have options. Shawn is to be congratulated for exercising one of these and giving her dissatisfaction voice.

We would like to expand on Shawn's column to offer some suggestions that students can utilize to address their dissatisfaction. As we are not familiar with the specific situation in Shawn's column, we cannot offer specific advice. However, we would like to offer the benefit of our 24 years of experience as students of higher education. (Yes, it may be hard to believe your instructors were ever students, too.) As professors we will focus our comments on the efforts students can take to improve the quality of their classroom experience.

Guest Commentary
Mike McCollough
Dwayne Gremler
assistant professors of marketing

Complain. Register your complaint and concern with the instructor. If dissatisfied with the instructor's response, you should visit with the department head and college dean. Such actions can and often do result in action. These individuals are charged with evaluating the performance of instructors, and most will welcome your comments. If you truly believe you have a valid complaint, go as far up the ladder as necessary until you receive satisfaction.

Reward. Reward the good. Just like students, professors respond positive to as well as negative feedback. Note good instructors for department, college and university teaching awards. Write an unclouded letter of recommendation/appreciation to the professor's dean. If you find a class particularly interesting or enjoyable, let the instructor know. The last time you said "Good class" to the instructor on your way out of the room? Many of us for all the very rare student compliments.

Complete the end of term Student Teacher Evaluation. Take the end of term student teacher evaluations seriously. Give careful thought to the questions and answer them honestly as is possible. If you skip a day or leave without filling out your STRE, your opinion isn't heard. As the current STRE is rather brief, add your own comments to address areas of concern. STREs are read by not just the instructor but often by the department chair, dean, and others charged with promotion and tenure decisions. They are a very important factor.

Participate. Understand your role in the "co- operation" factor of university education. Make the class happen. Ask questions, volunteer comments, open your mind attend every day ready to learn with your eyes wide open. The student's performance is inseparable from the performance of the instructor just as the instructor's performance is inseparable from the efforts of his/her students. For instance, if a student does poorly on an exam it may be because the student didn't study or is it because the instructor did not prepare the course properly and assigns too difficult a dicussion. Motivated students will learn despite the worst instructors. Unmotivated students will not learn even from the most gifted of instructors. Your role in your education is always more important than ours.

Investigate. Look up the STREs when deciding on what class to take. STRE summary scores are available for review in Administration 104 (see Tenas). Your education is important; treat the decision of what courses and instructors to take as such. Visit with professors before deciding on your schedule to determine that instructor's teaching philosophy. Base your schedule on putting together the best group of faculty possible, not on the time of the day the classes are offered or how easy you think the class will be.

Demand More. Insist to be bought off with easy grades and light workloads. A few instructors have learned that they can neglect their classroom duties as long as they do not work the students too hard and are generous with their grading. From the student's perspective this is a life/health situation. Instructors who cancel numerous classes and effortlessly lenient the class go early do not do the work, lecture or lab, are cheating them.

Tell Other Students. Engage in word of mouth, if instructors are good, recommend them. If they are less than effective, discourage others from taking classes from them.

Ultimately, we do respond to market pressure. Many of the courses we do not teach are elective. These courses cannot be justified without adequate enrollment. If the course is a required course and the instructor is poor, recommend (or demand) a different instructor.

TRIP - FROM PAGE 10

we feel drawn to action with likeminded people. The more we care about what we perceive as injustices, the greater the gnaw of the yin and yang.

For me, the first step is to seek out some group or organization that is dedicated to the cause of women's rights, to get involved with, to learn more about, to voice my concerns about their beliefs? How long do we have to wait?

This dichotomy of good and evil may not be as clear cut as we would like it to be. Some people may feel that we still are not much more sophisticated. Human failings are only natural. It is said that we are, I hope, for our society, for it tells us that we still have much more to accomplish. Human failings are only natural. It is said that we are, I hope, relatively sophisticated.

We should react to what we perceive as failures, as well as successes, with increased mindfulness. At the very least, respect, with thought and consideration. Allow those without free will to provide us with political factions, for we need them as well. They provide us with an entertaining side of the story we call life. They will keep us on our toes, keep us sharp, keep us healthy, keep us healthy, keep us healthy. Everyone utilizes the paranoid individuals, but few can ever truly control it. People can only be caught off guard by love birds or the occasional someone one can feel better about and look after. Everyone utilizes the paranoid individuals, but few can ever truly control it. People can only be caught off guard by love birds or the occasional someone one can feel better about and look after.

Tactful, thoughtful decisive-ness, (or the lack thereof...), is the only path. Throw in a dose of mixed emotions and a touch of spring break and you've got a winner.

The problem with being a true paranoid is that the world is an ugly place, filled with ugly little people who always seem ready and unwilling to open their minds. The problem with being a true paranoid is that the world is an ugly place, filled with ugly little people who always seem ready and unwilling to open their minds. The problem with being a true paranoid is that the world is an ugly place, filled with ugly little people who always seem ready and unwilling to open their minds.

I am shedding my skin, aspiring to become a true paranoid. I'm no longer holding on to any shred of a heart and soul, the hope that I will, throughout the journey of my life, cross paths occasionally with people of similar spirit, willing to open their eyes to the beauty of the world, to the beauty of the beauty of this existence, the beauty of this existence, the beauty of this existence on Earth, and laugh out loud at the absurdity of it all.

ATT & T - FROM PAGE 10

their respective ID cards," said Tim Ball, an upperclassman who was selling out the school. Frankly, this type of flawed logic is the same type I used on my mom when I got caught with cigarettes—"Mom, all those kids are doing it, and it's not sounding for investment of limited resources. This a venture that is a benefit for me, plus at least 20% more than it earns.

To all those who are still residing, if I could advise advocating boycotting the new Vandal Card being circulated and making any university or ASUI policies I would. Instead, I will encourage you to define the other logic in any way you feel appropriate, scrutinize it, alter it or create a video rental ID sticker over it.

"The Student Veterans Office tracks you down and demands you get a new card, tell them you've been sold one and they'll lower your fees since you are working for ATV.

You know, a few years back Buckeye sold off all of our stock at a pile of money to paint the Kibbie Dome like a beer can, why didn't we say no? We can coat the inside of an alcoholic if you like and paint it like a soda can since our toasts are being sold wholesale anyway.

Geographic Information System Seminar Series continues tomorrow when Fred Gifford of Montana's Natural Resource Planning and Assessment will discuss "Access to GIS Data." The lecture is at 1:30 p.m. in McClure Hall Room 209. The series is sponsored by the College of Forestry, Wildlife and Range Management, USU Extension Service, the Architectures and Mines and Earth Resources.

ASU OUTDOOR PROGRAM ACTIVITIES

Fishing is the activity is sponsored by the USU Outdoor Program at 885-6810. Paddle Raft Trip

This two day trip will be on the Washington Fan Bar Section of the Lower Salmon River. For those interested in getting a taste of whitewater and the thrill of rafting, this trip will give beginners some good experience. This trip encompasses a wilderness area, so a camp will be made for Saturday night.

Ask the Idaho Department of Fish and Game.

Question: Would I like to apply for an antlered controlled hunt this year? Are there any special restrictions?

Answer: The 1996 big game controlled hunt permit has a wide array of antlered hunts throughout the state. Applicants about who they were successful in drawing an antlered only, hunt permit last season, they cannot apply for antlered and/or either sex controlled hunts. This rule is required regardless of whether or not they have been able to harvest their antlered game.

This enables you to the opportunity to apply and be drawn for these popular hunts. After waiting out a year, the applicant is again eligible to apply for an antlered only controlled hunt next season.

Hunter should note that if successful in the draw of any controlled hunt period, this is the only hunt for that species in which they can participate. Acceptance of the controlled hunt period for any any hunt during the general season or for any sex other than that specified on the permit.

This year, hunters can apply for big game controlled hunts from May 1 to May 30. Applications will be accepted by mail, drop off or by telephone.

For more information on rules concerning big game hunting, contact the 1996 big game rules booklet or contact the nearest Fish and Game office.

Snake River Rock Rodeo

The fifth annual Snake River Rock Rodeo at Granite Point, Wash., will be held Saturday. A climbing competition, it will feature some of the best in the competition in the Pacific Northwest, and a clean-up of the area is also scheduled. Pre-registration is required to cash the Outdoor Program at 885-6810.

Bill Hindman chalks up as he prepares to ascend "Rotten Crack." The route is just one of many

Conservation important for spring weather

Many of us go to the hills to relax and enjoy the scenery and wild life. However, one of the main problems is that we do not like to bring trash back with them.

As you walk through the woods or down streams and around lakes litter is everywhere. Many people go out to enjoy the outdoors, please pack out your empty wrappers and containers.

If you have any extra in room you should keep your environment by bringing out more than you picked up.

When you go to the lake or river to party, fish, or other kinds of recreation, be careful of the type of trash on the beach or in the water. Broken glass bottles and sharp pieces of metal have sent many to the emergency room for stitches in their feet.

Memorial weekend will be here in about a month. It is the opening of general fishing season for most species not already open. The different state Fish and Game departments, one of the main streams, lakes and some ponds.

This weekend will bring out a lot of people to fish and to party. Sadly, it will also bring out the litterbugs. If someone picked up their trash and maybe a little of someone else's, our area would stay cleaner.

If you are a fishing person, after you have a great catch from your stringer please do not leave fish heads and guts where others walk or sit. Be responsible and place the leftovers in a trash can or clean the fish at home. Leaving the guts and heads gives fishermen and women a bad name.

For those of you that are waiting for the trout to be stocked, most are put into the streams and lakes approximately one to two weeks prior to Memorial Day weekend.

This includes lures that are open all year, like Spring Valley Reservoir, or Lewis Lake in Lewiston, or any others in our area.

The hunters that want to put in for controlled hunts for deer, elk or antelope have to wait until June 30. The new hunting regulations are available now and they list all the new information.

If you need to take a hunter education class to get your hunting license, sign up now or you may not get it completed in time to put in your controlled hunt.

If you were born on or after Jan. 1, 1975, and never have taken a class, you need to take the class. If you want to hunt with archery equipment, you need to take an additional special class for archery.

Floodings has caused some problems for fish and fishing around the river. The river is muddy, yet fishing with bait will still produce some nice salmon and bass.

Angler buyers are doing some advertising is most of the newspapers. Prices this year are very good depending upon the buyer and the condition of the anl.

While you are out in the hills looking for water and getting some great exercise, you might consider picking up any trash and litter someone else left. You will be doing the environment a terrific service.

Snake River rock rodeo set for Saturday

Jeremy Chase
Outdoor Entertainment Editor

Climbing, camaraderie, competition and cleaning up are all important things people can expect to find at this week-end's fourth annual Snake River Rock Rodeo at Granite Point, Wash.

With competitions for beginners all the way to advanced and expert, the rodeo will feature 20 different climbs and competitors across the Northwest.

Mike Beiser, US Outdoor Program director, said the combination of climbing and competition are relatively new, which makes this weekend's rodeo a unique event.

"Climbing traditionally has been considered a non-competitive sport," he said. "It's developed with sport climbing and indoor climbing gyms. In the past, it was more the idea of competing with yourself to challenge and improve yourself."

Incorporating competition into a traditionally "laid-back" event is also interesting. Judging won't be done by a panel of skilled climbers, observers or high paid sport celebrities. Instead, the climbers themselves have the power of the scorecard and critique themselves on their performance. "Each climb has its own point value, and climbers score themselves on the honor system," Beiser said.

With that in mind, individual climbers get to choose up to nine of the 20 climbs available to challenge. The score of a climber's attempt are taken and scored. Beiser said strategies are limited because of the varying point totals associated with each climb.

With names like "chainsaw," "steroids to heaven," "kill or be killed" and even "ballute," climbers have to anticipate a legitimate climbing challenge for Saturday's "rodeo." "Each of the climbs are named, most are derived from 25 years of climbing at Granite Point," Beiser said.

After putting up3,000 feet of climbing names and level competition, Beiser encourages climbers to come and compete. "It's all about a love of climbing," he said.

"This is a formal competition but we encourage everyone to participate—even beginning climbers."

In the spirit of competition, climbers will also be available to competitors.

However, instead of awarding a large prize to the winner of each category, a prize drawing will be held to distribute the approximate $200 prizes in categories. Winners, though, will have multiple chances in the final drawing. Other participants will only be allowed one entry.

Among the prizes in this year's competition are everything from climbing ropes to harnesses. Tickets for the drawing are given upon a $3 donation at registration time.

Another important aspect to Saturday's rodeo is the conservation of Granite Point. "Granite Point is the focal point for a lot of parties," Beiser said. "It's cleaning up after somebody else's mess."

To maintain the area's beauty, everyone competing in the event is given a garbage sack when they register. Their goal—to fill the garbage sack or else they can't compete.

"Beiser said this kind of incentive has kept the Granite Point area looking good, but the trash still accumulates from year to year. Whether or not you see the garbage while you're there, when you see it getting cleaned up it makes you feel good," he said.

Because of the cleaning effort associated with it, the event has been featured in Climbing Magazine for cleaning up over 50 garbage bags of trash.

The clean-up is also associated with the Access Fund, a conservation group whose aim is to preserve climbing areas across the nation.

Beiser said part of the $15 donation will go to the Access Fund in hopes of furthering the cleaning efforts at Granite Point.

Beiser hopes everyone interested will come to the rodeo to just observe the competition, if not to sign up. "We're a university community, and we strongly encourage people to participate," he said. "It's all about learning."
Will the real rainbow trout please rise?

by Rod Nichols

Telling the difference between a rainbow trout and a chinook salmon sounds like a no-brainer—about as difficult as distinguishing a house cat from a Scottish Fold. But while an Idaho house cat might look like a big 0-pound-plus-and-a-rainbow trout fits three-to-the-trout pan is another issue. This is a different story with young salmon.

In spring, chinook smolts get ready to leave the river’s small stream and head down to the Pacific Ocean. And for this life stage they could easily pass for rainbow trout. Salmon smolts run about 4 inches in length and are strikingly similar in shape and color to their trout cousins.

For a rainbow knowing the difference is crucial. This time of year, the fishing season is more limited for salmon than for rainbow trout, but there is no open Idaho season at any time for this rainbow chinook salmon. Snake River salmon are classified as endangered species. The runs have declined nearly to the point of extinction, primarily due to high mortality of juvenile salmon during migration and river passage.

The tail provides a quick identifier. The tailfin of a rainbow trout is squared off with only a moderate fork, while the tailfin of a chinook smolt is deeply forked. If you catch a young chinook salmon, carefully remove the hook to avoid injury. If the fish is deep-hooked, do not try to remove the hook; instead, cut the line and let it go. Research shows this method doubles the survival of a deep-hooked rainbow trout.

Other identifiers include parr marks and anal fin rays. Located on the underside of the fish near the tail, the anal fin of a young chinook has 14 or more rays. The anal fin of a rainbow trout has 12 or fewer rays. Parr marks (the large spots on the sides of the fish) are oblong-shaped on a chinook, while the parr marks on a rainbow trout are almost circular and are eight smaller. If you are unsure of the species of a fish, release it.

Offense shines in Silver and Gold Game

UCLA transfer Fien goes 21-26 for 318 yards in final scrimmage

Mark Vanderwall photo

For so many years, Idaho's Silver and Gold Scrimmage has filtered out several surprises, and this year was no different as the Gold beat the Silver 27-14. In all actually, the true score was 27-0, as the Silver was granted a 14-point lead to start the game. The days of the Erickson Air Express, the ghosts of Hobart and Friesz, and the more than 1,250 people on hand, were all reliving the past, as a transfer from UCLA named Ryan Fien stole the show. Fien compiled an astonishing 21-26 pass attempts for 318 yards. Although his targets varied, two receivers emerged as favorites for Fien, who threw the ball with efficiency, distance and zip. "We don't take any bragging rights away from this game," Fien said. "It's over now and it's time to begin prepping for Wyoming." Andy Gilroy and JC transfer Antonio Wilson showed they could play a good game of pass and catch, as they grabbed seven and six Fien offerings respectively to set the tone. Wilson most likely secured a starting position for next season, as he gained 153 yards along with catching two touchdowns to lead the Gold attack. Passes weren't the only things Wilson was receiving, as he received a loud applause from the crowd after two acrobatic catches that resulted in touchdowns. Gilroy on the other hand was more like a boxer who takes body shots, as his catches came across the middle for between 8 and 10 yards, with the exception of a 32-yard reception to set up the Gold's first score. "We have got a lot of big play receivers and the talent is there on either side of the ball, but everyone has to come ready to play," Fien said.

The Gold went deep into its bag of tricks early, possibly trying to "Overall we can take a lot of things away from this game," said Idaho Head Coach Chris Tormey, "We've got a lot of weapons. We just have to refine our skills and come through as a team."

Vandals finish sixth in final BSC tourney

Mike Stetson photo

Looking to repeat its run of last year through the Big Sky Tournament, the Vandals men's tennis team headed for Boise and its final Big Sky Championship on Friday.

Idaho used fast starts and a perfect weekend by Danny Willman to jump on top in all of its matches, but the Vandals found heart-break in several close matches, dooming Idaho to another sixth place finish. The Vandals opened Friday against Weber State, a team Idaho beat in January at a tournament hosted by the Air Force Academy. The Wildcats took the victory 5-2, in a close match.

Idaho started on the right foot when Vandals Ace Willman beat Weber's number 1 seed, Milan Pavlik, 6-1, 4-6. Idaho also got a win from the streaking Jorge Aldrete as the number 4 seed, Aldrete beat David Pack of WSU, 7-5, 6-2.

The Vandals shortstop came in two singles matches and the doubles. The Vandals' Keith Brodr郁 dropped the number 2 seed match in a tough three-setter to Weber's Chris Williams, 3-6, 6-1, 6-2. The other Vandals heart-break came in the number 5 seed match pitting Doug Anderson of Idaho against Idaho's Steve L. Weber. Weber, at the match in two sets, both of which went to a tie-breaker, 7-6, 7-6.

In the team doubles match, Idaho took the first set in a close, 8-6 contest as Aldrete and Willman held off Weber's Pack and Pavlik, Idaho's opportunity to win the doubles slipped away in the second set when Weber State's John Galyean and Chris Williams outlasted Idaho's Bradbury and Chris Daniel to take the set 5-7.

Montana's win against the Vandals, as the Gold team held to the Silver to 60 yards of total offense, Barry Mitchell led the way with two Stee. Ryan Phillips had one as well for the Gold, as both teams combined for nine tackles altogether. Tom Rayner, Yoshit Tanaka and Arnold Coom had an interception on the evening as well.

"Overall we can take a lot of things away from this game," said Idaho Head Coach Chris Tormey, "We've got a lot of weapons. We just have to refine our skills and come through as a team."

The Vandals return to action on Aug. 6, when they start preparation for the season opener on Aug. 31, against Wyoming.

Nic Tucker
Volunteer helps Idaho throwers

Byron Jarnagin

An athlete's success is not made overnight, all of the preparation he or she goes through to be prepared for the day of performance is not without a coach's input of rights and wrongs of techniques and styles during practice. Sometimes having a past athlete's experience can be a bonus.

Tim Taylor, a 1985 Vandal track athlete, has been putting his talents to work as a volunteer coach for the track team's throwing events chapter, put, hammer and discus. Back in the mid-80's, Taylor threw the shot put for the Vandals for two years after transferring from North Idaho College. In '85 his senior year, he won the Big Sky title in the event.

After his college athletic career, Taylor tried to become a member of the 1988 United States Olympic Team, but fell a few feet short of the automatic qualifying distance of 200 feet, throwing 196 feet.

"For out of college track guys you're still amateurs, there really is no semi-professional league," Taylor said. "I was right at the level where I could not quite make it to the big show, but good enough that I wanted to keep with it and after 1988 I was not able to devote my full time into the throwing because I was starting a family."

His throw of 196 feet during qualifying heats for the Trials good Taylor with the 28th best mark in the nation that year as far as throwers of the discus are concerned. But unlike the professional level only the top three athletes are showcased at the national level.

"Of course if I would have been one of the 28 best football or basketball players I would be a rich man right now," Taylor said.

Taylor enjoys his involvement with the team now, and considers it a privilege to help out the young athletes. "It's nice to be able to share some of your experiences and your knowledge and stuff with the young athletes because there are a lot of things I understand, having gone through them myself as an athlete here," Taylor said. "Hopefully I can help them not experience the same problems that I did. It doesn't always work but it's nice to have that little extra help."

Taylor said most college track athletes don't reach the level he did, at least while they are in college, but he believes his abilities to pursue the sport after school adds a little to their coaching credibility.

He began to dabble a bit in coaching between 1987 and 1989. This year he is a desired volunteer for the track team, and in the past has been an on and off volunteer based on the number of coaches UI coach Mike Hamilton has on staff. He currently writes up a workout program for the throwers every week, including weights, fitness and technique work.

I've found that there are not a vast amount of experienced high school throwing coaches in the country, but the system has been improving at the high school level to better prepare young athletes." Taylor said there are a lot of things the novice or high school throwers have an improper perception of concerning success. Once they get to college there are a lot of technical modifications that need to be made.

"I've found that there are not a vast amount of experienced high school throwing coaches in the country, but the system has been improving at the high school level to better prepare young athletes," Taylor said. "Now coaches are able to attend camps that teach them proper technique and style and how they can relate it to their athletes in an effective way."

Taylor's involvement with the track team as a volunteer coach is more of an experimental activity or hobby he enjoys secondary to his job as the manager of the Vandal Card operations.

As a former athlete who performed under coach Keller, Taylor believes the strong values of the past efficient program still exist.

"Coach Keller expects the athletes he has, to put out a good amount of effort and expects everyone to get better, but he also stresses academics which he has always done," Taylor said.

Even though Taylor's help is voluntary, he still shares a large goal of all coaches which is to place high at the conference meet. He said whether you are a volunteer or a head coach you want your athletes to perform to a peak level in the Big Sky Conference and next year in the Big West. His personal goals include getting at least three of the eight throwers to qualify for Conference finals in the hammer, two guys in the discus and at least one in the shot. As far as the Big West translate, Taylor feels the track competition is not as strong as the Big Sky.

"The way things look on the surface UI and Boise State, who is coming over with us, should be among the top three teams in the Big West next year outdoors," Taylor said. "There are a lot of other schools in the Big West, but based on what we are seeing on the throwing marks right now we are going to be pretty competitive."

Thompson comes up big provisionally makes NCAAs

Idaho's Paul Thompson did a solo act last weekend in Provo, Utah. The senior ran a 400 meter hurdle preliminary heat in 51.01 seconds Friday at the Clarence Robinson Invitational hosted by Brigham Young University. The mark was good enough to provisionally qualify the Littlefield, England native for the NCAA Track and Field Championships in Eugene, Ore., June 1-4. The NCAA has automatic qualifying marks and provisional marks. If enough competitors do not qualify, the top provisional qualifiers are invited to compete. Thompson was the only UI athlete to compete at BYU.

The rest of the Idaho squad made the trek up US Highway 195 to Cheney for the Pellier Invitational hosted by Eastern Washington.

The only other Idaho trackster to post a season best mark good enough to qualify for a post-season meet was Jared Hughes. The junior posted a 1:48.46 400m dash in the hammer throw to qualify for the Big Sky Championships in Tempe, Ariz., May 17-18.

The Vandals were not without fine performances at Friday's meet, which also included Eastern's Washington, Washington State, Montana and Gonzaga.

Scott Whalen won the 400m hurdles for Idaho with a time of 52.87 seconds. Idaho's Nels Krueger was the 100m champion, running to a time of 11.12 seconds.

Towards Chelwa set a new stadium record in winning the 400m for the Vandals. Chelwa ran the event in 47.50 seconds, beating Pat Holcomb's 1980 mark of 47.66 seconds. The effort was not his best though as the freshman ran the event in 46.99 seconds a week earlier.

The Vandals' 4x100m relay team also set a new stadium record, outpacing the field with a time of 40.76 seconds. Idaho held the old record of 40.89 set in 1988.

Frank Bruder was two seconds better than Eastern's Jon Murray in the 1,500m. Bruder won the event with a time of 4:03.86 while Murray finished in 4:02.13.

In women's action Idaho's Kerri Fife was the only UI competitor to take home an event title. Fife posted the 400m in 58.13 seconds, beating out Montana's Katie Conway.

Idaho's Tere Gehrke was second in the 400m hurdles in 1:04.10. Katherine Hough also finished second for the Vandals, in the 200m, finishing in 25.6 seconds.

**Uniforms get overhaul**

For the first time since 1979, the University of Idaho football uniform will undergo a major overhaul.

The Vandals helmet will sport a new color in 1996. The old "Green Bay Gold" will be replaced with "Vegas Gold." The home uniform pants will be the same color. The home tops will remain black with silver stripes and the road uniforms which have been white with black numbers and gold trim.

The new look has been implemented for several reasons according to both UI football coach Carl Torney and UI Athletic Director Frank Pigg.

"New league, new look," Torney said. "It's more of a traditional gold and it mixes well with our black and silver." No change in the color of our school colors (silver and gold) and we wanted to get our real school colors incorporated into our uniform," Liske said.

The University of Idaho's last uniform underwent a major change in 1979 when the school finally signed a football scholarship. Dave Dich held not only were the old uniforms physically worn out, but that a new look was needed for Idaho football.

Daveich, son of a coal miner in Johnstown, Penn., wanted a Pittsburgh Steelers look for his team.

"We've always had people asking about our school colors (silver and gold) and we wanted to get our real school colors incorporated into our uniform," Liske said.

So in Dich's second season at the helm, out went the silver pants, silver helmets and the gold shirts with silver numbers and in came the black shirts and "Green Bay Gold" helmets. Idaho has worn for the past 10 seasons. The silver helmet had been worn since it last featured a block "I," the Joe Vandungan logo and a script Idaho on the side of the helmet. The only other change occurring since Dich arrived in 1982 was when former UI coach Dennis Erickson added the script "Vandals" to the helmet. When Idaho went to the "S" in 1978, the helmet featured just a pair of black stripes the length of the helmet in the middle. In 1980 the team all wore the number 32 on one side of its helmets to honor Glenn White who died in August of that year of a ruptured aorta.

The school colors are officially listed as silver and gold, leaving one to wonder how the school ever ended up with black.

"It's Old Idaho that we can wear black, because it's not a color," former UI Sports Information Director and current Air Force SID Dave Kellogg said. "He told it to theboosters and the school that it was a neutral color that would go well with silver and gold." Vandals fans can get a peek at the new uniforms and helmet by looking up the UI Athletics home page on the World Wide Web. The address for the UI Athletics home page on the World Wide Web is http://www.uidaho.edu/athletics. Courtesy UI Sports Information.

**One lingering refrain from the Sonics' fans was "That's not our team." Seattle's basketball experience was not a surprise or an upset, it was consistency. Consistency is setting down its fans. Continually in looking down, right finger in the first round of the National Basketball Association playoffs. The 17,072 fans who packed the newly built Key Arena in Seattle didn't feel the win get knocked out of them like in past years. Why? Simply, Seattleites have built an immunity to the choke artist like act. Only this year fans were top ing the new cheery uniforms might bring good Karma.

Sonics fans demonstrate all the key tell-tale signs of being an alcohol. The green and yellow get used to winning in the regular seasons (the party). Sonics fans like watching their team win. The Western Conference regular season title (drinking heavily every day). Sonics fans get used to seeing their team bow out in the first round of the playoffs to the lowest seed (drinking cheap beer with a low alcohol percentage with the realization that you must definitely will get a hangover). After losing in the first round, fingers get pointed in every direction and Sonics coach George Karl meets with his players and gives a self analysis (Alcoholics Anonymous meetings).

Really, we've got to wonder what went wrong.

In the first game, Seattle demolished the under-powered Kings. Even without All-Star forward Shawn Kemp, the Sonics were surpised for the first game of the playoffs for fighting in the regular session finale, came back for Sunday's game and was expected to help the Sonics that much more. Although Kemp added 21 points, he also reg istered a career high nine turnovers. Instead the Kings landed their first playoff victory since 1981, when they were located in Kansas City and coached by Cotton Fitzsimmons. Sacramento now owns home court advantage and will have the Sonics playing scared and desperate.

It has got to be de ja vu. This year we're sitting in the same worn out chair, eating the same bed popcorn and drinking the same cheap beer. And above all, I'll be watching my favorite team, the Seattle Sonics lose out in the first round to a really bad team. Then, the hecklers will find a way past my locked door and tease me all night till I violently beat them on the head with a blunt object.

In essence, I'm asking fellow Sonics fan to prepare yourself for the worst. Sure, I'm still confident that Kemp, Gary Payton and the rest of the crew will pull through but you must always be prepared.

**Sonic's fans show signs of alcoholism**

The only team with a better reg ular season record than the Sonics is performing a clinic on how to take care of an 8th seeded team.

The Miami Heat don't have any answers for the Chicago Bulls' many weapons (i.e. Jordan, Pippen, Kukoc and Rodman). After a hard fought first game between these two teams, the Bulls came out on fire in a game two 106-75 victory over the Heat, proving that the dis ference in playoff seeding is no fluke.

Heat center Alonzo Mourning will have to do more than cry baby and stake players down if he's to keep his team from getting swept in the best of five series which may possibly end with a Bulls' win Wednesday night in Miami.

PEB ROOM 113 • HUMAN PERFORMANCE LAB

For everyone whose daddy isn’t buying them a Porsche for graduation.

So what are you getting in the gift department? Pinstripes? Briefcase? Day planner? Bummer, when what you really want is a new set of wheels. As luck would have it, there’s a program called, “The Ford College Graduate Purchase Plan.” Simply put, if you’re a new grad you could get a $400 cash rebate when you buy or lease any new Ford — like an all-new ‘97 Escort or any other model that shifts your gears. See your local Ford Dealer for full details. Because if you have to enter the real world, it might as well be in a really nice car.

Standard dual airbags*
Available 4-wheel ABS
100,000 mile tune-up**
CFC-free air
77% recyclable
100% cool

The all-new ‘97 Escort

*Always wear your safety belt. **Under normal driving conditions with regular fluid/filter changes.
