**Architecture Department may regain accreditation**

**The university challenged the NAAB accreditation ruling in Washington, D.C. and won.**

By Jennifer Warnick

News Editor

An appeals panel of the National Architectural Accrediting Board (NAAB) will most likely give the School of Art and Architecture back the five-year accreditation term that was revoked last spring.

The appeals panel, which was addressed by University of Idaho officials in Washington, D.C. in March, held a hearing to contest the ruling by the NAAB made last year. After sending a team to evaluate the program, the NAAB ruled that, because of inadequate financial resources and facilities, the school would need more frequent evaluations — every three years instead of the current five.

Our decision to appeal was based on two things: procedural irregularities in the visit and errors of fact in the report," said Bob Bean, Chair of the Department of Architecture.

The errors, Bean said, included the team's lack of understanding involving the school's curricular, program deficiencies, program operations and facility salaries.

Bean, who presented the final appeal in Washington, also flew President Byron Pichler and Dean Paul Weed, was pleased by how the university stepped up to help.

"We are very pleased with the assistance and leadership we've received from the president, Dr. Pichler and Dr. Weedley," he said. "Without their help we would not have been able to accomplish this."

After their presentation the appeals panel reversed the NAAB's decision and has recommended the school be restored to the full five-year accreditation criteria. This means that the school will not be under evaluation from the NAAB for another five years. Though the recommendation has been made, the decision will not be final until the board approves it. Bean expects them to approve the full accreditation at the NAAB meeting in July.

"The NAAB has come through and corrected a problem — and we're happy about that," said Bean.

**Flashing suspect at large**

By Lindsey Redfort

Argonaut Staff Writer

Eighth months ago, the first report of a man exposing himself to a young woman came to the Moscow police department. Since the first report, and more recently, two more reports of rapes been filed, all seemingly involving the same man. All three victims were female. The suspect has been described as a mid to late 20s or early 30s, 5'7" and 6' tall and has a medium build with brown eyes and brown hair. He has been seen wearing a baseball cap, glasses, a black sweatshirt and black sweat pants.

"Other than a computer sketch of the suspect described by the last victim, the police have no other leads. Anyone with more information or an incident to report needs to contact the Moscow Police Department at 852-2677.

**Internships on the Internet**

By Dr. Brian

Argonaut Staff Writer

Looking for internships has just become considerably easier for University of Idaho students. By using the Internship Information Network (IIN), students can search for opportunities and discover more about the programs that are available.

CLICK ON ►

www.sswg.unl.edu/iin

have the opportunity to use the Internet to attend an internship fair. The Virtual Internship Fair lasts all day this week, from Monday morning until 6 p.m. on Friday, and is open to 40 companies from nine states around the country. The address for the fair is www.wsse.unl.edu/iin.

Students will be able to visit company "booths" which are really links that take you to web pages specially designed for the company. At the booth's basic information will be available such as the company's web address, telephone numbers, and a description of the company. The booths will also list options that the

**Khruschev to speak at UI on capitalism**

By Merlina Lewis

Argonaut Staff Writer

The son of former Soviet Premier Nikita Khrushchev will visit the UI campus April 5 and 6.

Sergei Khrushchev, who was heavily involved in Soviet space and missile development in the 1950s, is now a fellow at the Thomas J. Watson, Jr. Institute for International Studies at Brown University.

Khrushchev will be visiting several classes on Wednesday, followed by a private reception, said Dr. Paul Lewis, Associate Director of the Martin Institute. On Thursday, Khrushchev will make a brief visit to Washington State University, and will later participate in an informal gathering with the UI International Affairs Club.

On Thursday evening, Khrushchev will present a lecture titled "The Russian Road to Capitalism," where he will discuss current Russian politics and economics and his research regarding the country's transition to a market economy and a more centralized society. The lecture will take place at 7:30 p.m. in the UI Law Building Courtroom, and will be free of charge and open to the public.

Lewis encourages everyone, especially students, to attend the talk. "This is an unbelievable opportunity for people in the Palouse to meet someone who has held such a high position in the Soviet Union," he said.

A new U.S. citizen, Khrushchev has been lecturing on topics such as Soviet space program, Russian economy and politics, and his father's career and reforms since 1969.

Khrushchev has authored 141 publications on computer science and engineering and several books on his father. His newest book is titled "Nikita Khrushchev: Creation of a Superpower," which will be published shortly.

**Graduate students display research**

By Jodie Sals

Argonaut Staff Writer

The 2003 University of Idaho Graduate Student Exhibit is now showing in the SUB ballroom. This multi-faceted exhibit of graduate efforts runs on Monday and Tuesday (April 3 and 4) from 10 a.m. to 4:30 p.m. and is sponsored by the Graduate Student Associates. On Wednesday, there is a banquet and awards ceremony in which various honorees will be presented to UI students and faculty. The public is invited to join the event that will be held in the Quiet Room in the Wallace Building from 5:30 to 8 p.m.

The graduate research exhibit features projects from categories of studies, which are engineering, art, architecture and basic sciences. There are 5-9 participants in each category. Three participants create various posters, diagrams and models that explain their research. Many of the students are available to explain their projects, which are evaluated by a panel of judges. The students are judged in the following categories: knowledge of subject matter, quality and oral presentation, quality of poster exhibit, and technical presentation.

There are a great variety of topics present in the exhibit, including the following:

- Art Architecture and Basic Sciences
- Adaptive Reuse
- Escape Velocity
- Eruptions at Erna Auzi, Galapagos Island
- Paleontology and Paleoecology of the Aaro Hills formations, South-Central Idaho
- Scene Design for "The Mincina's Dance"
- Biological Sciences
- Effects of Exposure to Asbestos on Growth of Mite Newton
- Phospholipid Properties of Phospholipase C (G-PLCE2 C.1 A.10)
- The Development of AMPA Receptors in the Brain of Drug Candidates for Neurological Disorders
- Steroid Receptors in the Control of Sexperimons in Phosphorus Overabundance Lizards
- Assessment of Ground Water- Exchange Mechanisms in the Mosaic-Polluted Basin Using Environmental Tracers
- Disposition Behaviors of Humain

"The best comedian alive!" - Ron’s Mom
This Cloud has a silver lining

By John S. Tait
Agoun Staff Writer

Dr. Cloud, this university’s best known biology professor, has been chosen as the 1st instructor to be featured in this new column aimed at bridging the gap between educators and students. As a teacher and researcher at the UI for 25 years, Dr. Cloud has become an integral part of this school’s science program. And any student who has taken his Biology 201 course will tell you, he is a professor that they will not soon forget. Most students find that if they can pass Bio 201, then they can pass any class in the University and in the end they appreciate how hard they had to work, because now they understand.

Educational background:
Ph.D. - University of Wisconsin

Post Doctorate - John Hopkins University

Employment history:
Although he has had several other positions, he has always taught here at the University of Idaho. He picked this school because of its rural location and size.

Class taught:
This spring was the 44th time that he taught Biology 201, and he will continue to teach it in the future until he gets a "just-right".

He also teaches developmental biology to freshmen and graduate students.

Current research:
Dr. Cloud and the University of Idaho can now lead the World Health and Climate change research back in the United States. He is currently experimenting with the transplanting of these monotomes between human identicals in rural Idaho and has run into a great deal of success. In the future he is planning to do similar work with farm fish. This is important because as the river populations of these species do eventually go extinct, we will all lose their genetic information. Several undergraduates and graduate students have obtained valuable and paid positions working on his research program and others like it. "This is a great opportunity to learn and help the scientific community.

Advice to students:
Don't be afraid to change majors (some-1) starting as a mechanical engineering major) because you will not succeed until you figure out what you want to do.

Growing up:
He was raised in New Mexico with six brothers and sisters.

World Headlines

- OPEC nations, except Iran, agree to increase oil production, but allowing prices to lower.
- Tomato strikes Fort Worth, Texas, killing four people and ravaging the central business district.
- Ugandan police discover 42 more bodies in another mass grave in the house of "Father" Dominic Kakaraba. They were part of a Doomsday cult, The House of the Federation of the Fan Commandments of God, suspected of having systematically killed hundreds of its members.
- 8,000 people evacuated from towns near a rumbling volcano on Japan’s northermost main Island of Hokkaido.
- 11 ski instructors and 2 snowboarders killed by avalanche in Australian Alps.
- Former Israeli Prime Minister Benjamin Netanyahu and his wife Sara, possibly to be put on trial for corruption, in a move to prevent them from a political comeback.

Homeless shelter builds on new funds

By Lindsey Rehfeld
Appointed Staff Writer

Marjorie Hutton works in a tiny office in a big blue house at the end of North Vanbrun Street. The office is on the second floor and crowded with papers, folders and postcards filled with information on where to send for Moscow's homeless.

Homelessness in Moscow is a prevalent yet understated problem. There is no one who lives on the streets who are not another resident or the line is not complete right outside of town. Due to a lack of resources, there is currently only one shelter for the homeless in Moscow. It is just below Hutton's office in a house called Sojourner's Truth.

Sojourner's Truth, a part of Sojourner's Alliance, is a shelter where women and children can come live, and also further their education and obtain skills. Sojourner's Alliance also includes the Moscow Food Bank and new Blue Boys Thrift Stores, where inhabitants of the house can volunteer. The house was formerly a part of the TWC.

Today the shelter is limited, but with more funding will be able to expand and house more families. Idaho Housing and Finance Association (IHFA) was recently awarded a grant that will directly affect Sojourner's Truth House.

A grant of $13,371 million will be divided amongst different social services in Idaho. According to Hutton, Sojourner's will use a prepared offer to obtain in much money as possible for its work.

"This will allow us to continue with our work,

Hutton explains.

UI students Chris Bush and Kevin Eddy, both members of the UI Environmental Club, are doing more than file paper to save a tree. Two Thursday's ago they began the for recycling program. Every other Thursday Chris and Kevin greet members and volunteers go through the UI Tower and Walker dorm community,

ASK SCOTT PERRIN

Mary Abshire / Editor / mary.abshire@ anunciare.com

Opinion

Tuesday Edition

April 4, 2000

ASK SCOTT PERRIN

Do you recall this girl of our class whom I loved, but I saw no hint of love from her? I did everything in my power to impress her, but she seemed much more interested in people who are not me. Sometimes I am so young and a bit of a fool, not really, but I can't see my way out of such a situation. I really suffer from the absence of love in my life. You must have noticed that many women don't see any value in my presence at all.

PATTY WILEN WITH PATRICK

Dear Pattie,

Ah, the age-old question of what constitutes a perfect gentleman. Most men are untrained in the ways of romance. Too many focus on the act of giving a gift rather than the giving itself. True gentlemen understand that beauty is found in both the giving and receiving.

Cordial greetings,

Bob

---

Sue Peterson

Don't try to imitate Christ's sacrifices, make no mistake. I am not saying that you should never try to imitate someone else's actions, for example, when you are doing something helpful for others. But you must always remember that Christ's sacrifices were made voluntarily, not out of a desire to be noticed. His love was unconditional, and His sacrifice was for the salvation of all humanity, not just a select few.

Sincerely,

The Editor

---

Bob, beer, and dating tips

Bob Phillips has done it again. He has taken his love for beer to a new level, and I must say...well, let's just say that his enthusiasm for beer is now at an all-time high.

Bob, I want to talk to you about your beer allowance. You know, I think it's time we had a conversation about this.

Sincerely,

Your friend,

Beth

McCoy's take: Ban homosexual marriage, prevent damnation and hellfire

By Matthew McCoy

Argonaut Mailbag

Macarole memorandum

This is the response to Wade Gordon's article on homosexual education.

Although undeniable, the solution to all America's social problems can be found at one site on the Internet: www.cfnweb.com/.. This site is truly remarkable and normally只见 one website might have the answers we seek.

To illustrate, I would like to give you an example: What if you were to find a site that could solve all of our problems? Would you trust it? Would you believe it?

In this case, we have a site that claims to be able to solve all of our problems, but it is not based on science or logic.

When it comes down to it, what do we have? A site that claims to be able to solve all of our problems, but it is not based on science or logic.

If you have a question, problem, or issue that you just can't seem to get over, please reach out for help. We are all human, and we all have struggles. But if you don't look for help, you may end up feeling lost on your own.

To sum up, this is not exactly what I wanted to say, but it is the best way to express what I mean. I urge you to look for help, and to reach out if you need someone to talk to.

Idaho Commons Plaza
Reception and building tours will follow

Come Celebrate!
In 1979, the Michigan State Spartans won the NCAA men's tournament on the shoulders of one of the greatest point guards in this game's history. Although Magic Johnson was at the NCAA in Indianapolis for the championship game between the Florida Gators and the Spartans, he wasn't watching from the stands. What he saw was the continuation of a career that records his as the most remarkable in Michigan State history. 

The Spartans scored enough points on seven-for-eight shooting and didn't force four assists as the Spartans' 76-74 victory over the Gators Monday night. More impressive than his performance in the opening column was Cleaver's floor leadership. Cleaver won 34-42 on the second half after making high average shots for the team, including a key rebound. The injury spared enough against the Florida college career, but the senior guard returned to the game four minutes after leaving. With limited mobility, Cleaver contributed to the MSU cause by carrying the tempo of the game when it appeared to stall. Offensively, the Spartans were built on one-point adjustments, perhaps more than he observed throughout his second half performance. 

Overlooked by Cleaver's play, Morris Peterson turned in a stellar performance with 31 points. A.J. Granger also played well, scoring a career-high 19 points in the contest while grappling nine rebounds. Michigan State never trailed in the first 13-point lead early in the game and the Gators could get only two points after that. 

Prior to the game, the Spartans ability to make key shots was of concern. However, the Spartans attacked the road and scored several fast-break layups to put the Gators on defense. Florida forward Udonis Haslem lost all 12 points, but his efforts were not enough to counter from the field. Florida's free throw shooting was still off, finishing 10-10. Today Dudley and Justin Hamilton were joined on the court on five-for-five from the three-point line. 

Michigan State's title run was the first for a Big Ten school since Michigan lost the NCAA title in 1989.

Connecticut dismantles Lady Vols for women's NCAA crown

By Jim Bieleberg
Argus Sport Editor

The University of Connecticut's women's basketball team completed their second national championship Saturday, defeating the University of Tennessee, 70-53.

Connecticut dominated the game with 13 steals, 15 rebounds, 28 points under their average coming into the game. UConn's stifling defense costed the Lady Volunteers shot, resulting in UTT's 37 percent shooting.

"Our defense was just spectacular tonight," said UConn coach Geno Auriemma.

The defensive performance of UConn center Kelly Schumacher was especially spectacular. The 6-foot-3 junior set a NCAA Women's Championship game record with nine blocks in the game. Offensively, the Huskies were solid but not spectacular. The Huskies shot 56.1 percent from the field, but missed all 8-of-20 three-point attempts.

UConn's big lead had been ear to nine and Tennessee's guard Karla Lawson drove to the basket for a shot that would have closed the Huskies lead to six. Instead, Lawson made what would be Tennessee's last threat by blocking the layup, then committing a technical foul during the penalty to prolong the lead, which grew to 13 at halftime.

UConn's performance during the entire NCAA Tournament was remarkable. The Huskies were not challenged during the entire tournament, winning their six games by an average of 29.5 points.

Their 10 double-figure scorers were national player of the year Sanaa Cashings, who finished with 16 points to lead all scorers. "It was an extremely disappointing by the performance of our basketball team," Volunteer head coach Pat Summitt said. "I don't think any of us expected anything less.

The Volunteers were vying for their sixth title in 12 final-four appearances.

---

Braves lead charge in National League East

By Cody M. Cahill
Argus Senior Staff Writer

One thing that has remained static in Major League Baseball for the last ten years has been the presence of the Atlanta Braves in the playoffs. However, looking forward to the 2000 season, the health, reliability and stability of the Brian's team remains a question, while other National League East teams seem to be more closely knit. The Braves have lost their hold on the NL East since the early 1990s.

If any team can weather the loss of a top-5 pitcher, it's the Braves, but the loss of John Smoltz to elbow surgery is certainly godt to the Braves' World Series chances. And for the team that has only one ring to show for five recent appearances in the Fall Classics, the divisional rivals Lance Johnson and Andre Gillion, the latter from knee surgery and the former from cancer, remain a huge question mark. tons in the potential domination caused by Schmidt's rehab pitcher John Rocker and on and off the field antics and there is enough to give hope to fans in New York or Philadelphia.

The 26-win may be made some improvements over the off-season that will more than make up for our players if they run into a series. They will be able to employ their top of the lineup by acquiring Omar Vizquel and Reggie Sanders from San Diego to fill the #1 and #2 holes, respectively, in the batting order. And even if it #7, Gardner isn't able to return to peak form, 4, and was a marginal improvement over Ryan Kinsow, who went to San Diego along with Bret Boone.

The New York Mets came painfully close to getting a crack at the World Series in last year's World Series and then added last year's Cy Young Award winner in Mike Hampton to the pitching staff. In Houston. In expectations of acc-

American League

The over-achiever John Grabarkiewicz is slowly getting back to Seattle from the Mets without one of the league's best at getting on base, leaving the Mets in second place again.

World-wide open mic: John’s Alley tonight

By Randol Blanton
Argonaut Staff Writer

Every other Tuesday at John’s Alley and every Thursday at the Spokane Avenue Neighborhood Center, people get to play music in front of a live audience. The shows are free and open to anyone. It’s a night of music taking place on a stage in the middle of the world.

Shakespeare said, “all the world’s a stage,” and every Tuesday at John’s Alley is most clandestine tavern, the stage is all the world.

This Friday, April 1st, 7:30 p.m., music will be performed at John’s Alley. John’s Alley is located at 215 W. Second Ave. and the admission is free. This is a monthly event. For more information, call 452-4882 or 882-7531.

Romp through the vineyards: The Wine Field play on campus

Jim Tooley, the boss man, performs at John’s Alley, 9:30 p.m.

STUDENTS still get free music despite universities’ software ban

Students still get free music despite universities’ software ban

By Haskell Barrowman

COLUMBUS, Ohio — Four of Ohio State’s five music schools have banned popular music software from being downloaded on computer systems connected to their network systems because it says it creates trouble with the network.

But students aren’t bothered by the ban. They say they’ve found ways to still get what they want from the Internet — just faster than before.

The popularity of the Napster Internet site and its free software that has resulted in traffic jams nationwide on universities’ network systems, which many students computers are tied into, has resulted in a slowdown of the Internet.

"It was getting out of hand," said Tim Bowers, a computer science major who has downloaded the Napster software. "It was getting out of hand."

The universities say Napster software has resulted in traffic jams, slow computer response, Internet slowdowns and worse.

"We don’t think it should be allowed," said an official at the University of Washington, in Seattle. "We don’t think it should be allowed."

"We don’t think it’s a good idea," said an official at the University of Virginia, in Charlottesville.

Sex, pop-rock and roll at Spring Fling

By Robert Wooton
Agoura Daily News

If you wanted fine music Sunday, silverback’s Spring Fling at the Paseo Recreation Park was the place to be. Spring Fling featured Lit, Foe-Fighters, and Joe 30 and put on a 6-hour-long music festival that invited annually thanks to a grant from the city. The band, consisting of Doug Powell, a 30-year-old local musician, helped sponsor the event and invited the band to play.

The band’s set was a hit, with the audience cheering and dancing. The band played a mix of pop and rock, and their performance was well-received by the crowd. They played a variety of songs, including popular hits and original compositions, and their energy was contagious.

The festival continued with more bands and performances throughout the day, attracting a large crowd of music lovers.

The festival was a great success, and the audience had a wonderful time. The organizers and sponsors should be congratulated for putting on such a great event.
