NOT LIKE THE OTHER Girls
Drag queens kick off opening show tonight

BY ADAM FISH

If you are a student on Friday night you will be creating permanent indentations in a lovely little bar. Medicine is available. Quickly throw the first punch. "Smells like teen spirit go on the band." The Beach on Third and Main, and not in your dorm room, so unlike the bars downtown that will not require you to pay for band. A self-respecting show will feature Alotta Tabikat with a focusing system. The students in this month's issue have become as much as they want, as much to celebrate as they want, and not to celebrate as they want. It is an experiment. Here's the quote: "I'm not even sure I'm going to show it, but here it is!"

So, the show will feature Alotta Tabikat with a focusing system. The students in this month's issue have become as much as they want, as much to celebrate as they want, and not to celebrate as they want. It is an experiment. Here's the quote: "I'm not even sure I'm going to show it, but here it is!

Alotta personality for just one man

BY JENNIFER WARRICK

David is a drag queen. David is not a well-dressed, quiet and polite man—quite a switch from his habitual alter ego Alotta Tabikat — a B.O.D. and beauty of tonight's drag show. In fact, David becomes almost unconscious as does Arnaldo Vincenti, a former member of the KUOI FM staff and now an editor at the College Station (Texas) Eagle. David declared himself a "queer, slutty, transsexual (that's science, folks) with no limits."

Alotta Tabikat, on the other hand, is a more conservative person and is known for her outspoken views on drag culture and gender identity issues. She is a member of the Pan-Hellenic Council and is a member of the Lambda Legal Defense and Education Fund (LDF).

Drunk driving arrests

By SARA NAYES

The University of Idaho Police Department is looking into the possibility of establishing a new program to fight drunk driving. The program would involve the use of alcohol interlock devices in vehicles. The devices would be installed at the time of arrest and would be required to remain in place for a certain period of time, depending on the severity of the offense. The program would also involve the use of education and prevention programs to help prevent drunk driving in the future.

The program is currently being evaluated by the University of Idaho Police Department and other organizations. The evaluation is expected to take several months, and the results will be presented to the Idaho legislature for consideration.

The program is expected to be well-received by the public and to be effective in reducing drunk driving incidents. The University of Idaho Police Department is committed to promoting public safety and is dedicated to preventing drunk driving incidents from occurring in the future.
Carrie Louden

Potted flowers and plants may ease a patient's discom- fort when placed in the same room with those participating in research at Washington State University.

Virginia Lohr, professor of horticulture, and Caroline Poenier-Mins, research techni- cian in the Horticulture and Forest, recently conducted research in pain perception at WSU. Their findings were pub- lished in the full issue of the Journal of Pain Management Network.

Lohr said the hypothesis of the experiment was "... in the presence of plants, people would feel more comfortable." In the study, which was funded by the American Floral Endowment, research was con- ducted on 18 subjects who were given water or garden soil. Those who had contact with garden soil had lower levels of stress, according to the results.

Poenier-Mins said they were inspired by a study done in 1984 at the University of Delaware. The researcher discovered that patients recovering from gall bladder surgery used less pain medication if they could see from their hospital room windows.

Since the 1984 study, some hospitals have begun to use some plants, research indicates. In other hospitals, they have begun to use brochures and other written materials to help patients relax.

Lohr and Poenier-Mins said they tend to be subjects who participated in their research at their own will, without pay. Although the subjects were paid, Poenier-Mins said he learned the best procedure of recruiting people to participate.

Of the 18 subjects who participated in the experiment, 80 percent were analyzed for students. Atgonauf, associate professor of horticulture, "... put together a couple of the subjects' hands submerged for five minutes. All 80 percent of subjects told us that their hands kept their hands submerged for five minutes."

The research was published in the Journal of Pain Management Network.

"... we would be able to see the results..." said Lohr. "... we would be able to see the results..."

"We've been using students," said the researcher. "... we would be able to see the results..."
UI places in third tier of college ranking

BY LINDSEY REDFERN

U.S. News and World Report released its annual ranking of America’s colleges and universities for the third time last week, and the University of Idaho placed itself on the third out of four tiers of national universities.

The ranking reflects a combination of a top universities, the university’s students and faculty, and the University of Idaho placed itself on the third tier of national universities.

The ranking system is based on several factors, including:

1. Academic Reputation
2. Faculty Resources
3. Student Services and Facilities
4. Finances
5. Undergraduate Academic Environment

UI ranked in the second tier overall. Other universities in the top tier include the University of Oregon, Oregon State University, and the University of Colorado Boulder.

UI was also listed as having 63 percent of its classes with student-teacher ratios of 15:1 or less, and 69 percent of its classes with student-teacher ratios of 15:1 or less.

The publication also calculated the weighted sum of each school’s standardized test scores. The final scores were calculated by the top school assigned a value of 100, and the sums of the test scores for each of the schools were proportionate to that top score.

For more information on UI’s ranking, students can visit www.usnews.com.

Falling into ranks

ASUI considers reinstating lecture notes service

BY ANNETTE HENKE

The ASUI Senate is considering a bill that will use money from the ASUI General Reserve to support a lecture notes program at the University of Idaho.

The bill would allow $15,301 of the reserve to cover the cost of paying note- takers, the administration and engraving and supply fees. The Senate will be able to increase the percentage of the reserve to be used to pay the note-takers.

The charge for the notes would be six cents per page, which is the same as the current charge, Cochran said. The note-takers will be paid by the note-takers.

"We would be able to pay them with their labor going on," Cochran said. "We can pay them with the note-takers' own money to pay them.

Although Cochran helped start the bill, he said he was unsure if it would pass, and just wanted to let students give their ideas.

About half of the senators had commented on the living groups by Cochran, and said the resolution, they said, was more negative.

"They can't really do a lot," Cochran said. "They can't really do a lot.

Getting Involved

ASUI STUDENT LEADERSHIP DRIVE

Open positions include

Academics Board
Activities Board
Community Relations Board
Elections Board Chair
Elections Board
Safety Board
Idaho Commons and Union Board
ASUI Parking Council

ASUI Positions
Student Defender (Must be a 2nd year law student)
Attorney General (Must be a 2nd year law student)
ASUI Lobbyist (Must spend spring semester in Boise)

For more information, visit the ASUI Office on the 3rd floor of the Idaho Commons Building or at the info desk at either the SBU or the Idaho Commons Building.
Why is TIAA-CREF the #1 choice nationwide?

The TIAA-CREF Advantage.

- Available to employees at educational and research institutions nationwide
- Retirement options among a range of expense managed funds
- A solid history of performance and exceptional service
- A strong commitment to low expenses
- Plus, a full range of flexible retirement income options
- Pension and supplemental plans for over 3,000 campuses across the country in favor for...enjoy a successful retirement.

Choosing your retirement plan provider is simple. Go with the leader: TIAA-CREF.
ALOTTA
From Page 1

"I always knew I was attracted to men, and I always knew I wouldn’t marry someone," he said. In high school he would have a girlfriend every once in a while. "But, being gay was part of who I was," he said. "I guess I just wanted to be like everyone else."

By high school, it was clear he was different. "I knew I didn’t fit into that category," he said. "I just didn’t know how to be like everyone else."

When he came out, his mother was supportive. "She was really good, like trying to be a cool mom," he said. "She was really proud of me."

He found it difficult to try to be the same as everyone else. "I just couldn’t do it. I was too different," he said. "I just couldn’t be like everyone else."

He decided to try and be like everyone else. "But, it just wasn’t possible," he said. "I just couldn’t do it. I was too different."
Cafeteria lacks food, resources

As we move this semester, the Wallace cafeteria serves broccoli and gravy. Not a hugely popular item, there was undoubtedly gravy and broccoli left over.

As we move this semester, the Wallace cafeteria serves broccoli and gravy. Not a hugely popular item, there was undoubtedly gravy and broccoli left over.

This year, our diets have changed. Many students have avoided the cafeteria due to the high cost of meals. However, not all students are satisfied with this change. Some students have reported feeling hungry and frustrated with the lack of food options. Others have praised the new menu, saying it is healthier and more diverse.

One student, who prefers broccoli and gravy, commented, "I really miss those days. Now I feel like I'm eating healthy all the time."

Another student, who enjoys the new menu, stated, "I think it's a great improvement. The options are much better and I feel like I'm getting my money's worth.

While some students are disappointed with the change, others are grateful for the new menu. The Wallace cafeteria continues to serve broccoli and gravy, but with a variety of options to choose from. Students are encouraged to try the new menu and give their feedback. It's important to let them know what they like and don't like so they can continue to improve.
**Vandals volleyball 2020**

**Coach optimistic as lady vandals hit the road for the season**

**By CLAY ALLISON**

The Lady Vandal volleyball team will hit the road for the first time this season when they open the season tonight against Idaho State in Pocatello.

The Lady Vandyke will play Connecticut State at 1 p.m. on Saturday.

The Lady Vandals have been practicing hard for the first game.

Nelson named Big West Player of the Week

Freshman forward Emily Nelson was named Big West Player of the Week for last week's performances. She led the team in scoring each of the past two games played by the Vaqueros, including the season opener against the 6-0 Oregon State Beavers. Nelson scored an unassisted goal during the second half against the Beavers, pulling the Vaqueros within striking distance.

Despite her struggles, she has managed to find a niche on the field. Nelson started Bloominggton, High School North, played basketball and soccer before quitting to concentrate on soccer.

On her high school team, she set an all-time record for career goals and was named to Class A All-State first team and won All-Conference awards.

Although Brewer can see the bright side in her own struggles, she can have problems with her eyes. She has undergone LASIK surgery twice on the left eye during the past three years, which did not improve her vision.

She also has to make sure to take them out carefully, or she will end up scratching her eye. Brewer described how she feels once her eyes open.

"Most people wear minus-2 prescription glasses," Brewer said. "I wear a minus-2 1/2 prescription."

Wöbbelin's basketball program now earns national academic honor

University of Wöbbelin's women's basketball has made the grade for the 2006-07 season, being named to the WBCA Top Division II Academic Honor Roll.

The team was ranked 11th of the weekly academic Division I with an overall grade point average of 3.03. For the second year, the Vaqueros had a 3.0 or higher G.P.A. for their entire academic year. They joined Western New Mexico, Culver-Stockton College, Santa Clara as the only Western Athletic Conference Division II teams to be ranked in the top 25. Last season, UI finished 31st in NCAA Division II, making the Vaqueros the only team in the conference to make the cut on the list. This year, the Vaqueros had the list with a 3.470 GPA.

Grouse hunting season opens with a bang

BY ZAC KERSTON

September 1 marked the beginning of Idaho’s forest grouse season. The season continues until Dec. 31. The opening of this season means beautiful blue grouse, blue and spruce grouse are back.

Ruffed grouse live in open, forested areas and riparian habitats. At their best, they are small, brightly colored birds ranging in size from 8 to 10 inches long. They are also highly adaptable, living in almost any type of habitat from coniferous forests to brush-covered hillsides.

Spruce grouse are known for their distinctive coloring, with a bright red head, white face, and black wings. They are small, but highly visible in the forest. They prefer areas with plenty of cover, such as thickets and dense vegetation.

Common grouse are known for their size, with males often exceeding 2 feet in height. They are found in a variety of habitats, from open meadows to dense forests.

By contrast, spruce grouse are typically found in open, scattered areas, such as logging Clearwater, and along forest edges. They prefer areas with plenty of cover, such as thickets and dense vegetation.

Common grouse are known for their size, with males often exceeding 2 feet in height. They are found in a variety of habitats, from open meadows to dense forests.

By contrast, spruce grouse are typically found in open, scattered areas, such as logging Clearwater, and along forest edges. They prefer areas with plenty of cover, such as thickets and dense vegetation.

Off-Road Vandal do it in the dirt

BY STEPHEN KAMINSKY

If you live to ride a mountain bike but have no one to ride with, the University of Idaho's own mountain bike club could be your ticket to the ride of a lifetime. The club, founded at the University of Idaho in 1999, now has a strong presence on campus and in the surrounding community, with members coming from all over the Northwest.

The club consists of seven individuals, and they are currently ranked 10th in the National Collegiate Mountain Bike Championship held at the University of Idaho. The club is made up of riders from all walks of life, and the most important thing is the love of the sport. The club is also sponsored by several companies, including Azonic/Oneal, Mercury/Oneal, and SRAM/RockShox, which provide the necessary equipment for the riders.

The club is open to anyone who is interested in riding and competing in mountain bike races. If you are interested in joining, you can contact the club at their website, or by contacting the club president, Meredith, at her e-mail address.

The club has a strong base of supporters and is well-funded, which allows them to compete on a national level. The club is also well-organized and successful, with many members achieving top finishes in races.

The club is also involved in the local community, and they have a strong presence in the off-road racing community. They are always looking for new members, and anyone interested can contact the club president, Meredith, for more information.
