ASUI plans incorporation

The movement to incorporate the ASUI, a campaign issue of ASUI President David Warnick, is moving forward.

In a memorandum to Vice President for Student Services Tom Richardson, Warnick enumerated thirteen articles that he felt necessary for consideration if incorporation is to become a reality.

Warnick indicated that the administration is "cautious" in its response, and that he felt that the Hill is "not yet convinced that this is the way to go."

Richardson said that the administration has already discussed the plan in general terms, but that he will have to sit down with Sherman Carter, financial vice president, and Jon Warren, university attorney.

"We have to determine what we can buy, and be ready to point out to the students what we think that the regents will buy," Richardson said.

Warnick said that the incorporation would benefit the "overall status" of the students. He pointed out that the students would have their rights and responsibilities written down. "This would also benefit the Board of Regents," he said.

"At this time the ASUI remains amorphous," Warnick said. "Our responsibilities are vague, and our duties are vague."

The plan as presented will probably be altered through negotiation. Richardson said that it is something that will have to be worked at continuously, but that there won't be any delay.

The plan calls for ASUI, Inc., to take over the operations of the SUB and the ASUI golf course on a $1 per year payment in a ten year lease. The ASUI will also be reimbursed by the University in accordance with services rendered to staff and faculty.

In return, the regents will collect the present fees assessed students for SUB and ASUI operations. This would presently amount to $29.75 ($15.75 for ASUI, $14 for SUB). The money collected would not include any bond payments, building levies, etc.

Warnick said, "I felt that inclusion of the other fees assessed would not be appropriate as they are a question still to be determined by the Committee for Student Rights."

The Committee for Student Rights (CSR) is the group of students that last spring mounted a challenge against the present fees levied in state students. They have not yet met this term.

Some of the responsibilities that the ASUI would undertake would include being the sole representative for the students in "negotiations, observations, or ratifications of contracts involving faculty employment" at the U of I.

The Board of Directors would be elected by the students, which would be the same as the Senate. Business would be conducted in the same manner, with the present ASUI Constitution being the governing document.

Warnick finished the memo with the notation that "this is still a very rough draft," and he said that he welcomed comments and suggestions.

Fire destroys apartment

A fire gutted a second story apartment late Tuesday night at 613 Taylor Street at Linda Lane in a blaze that sent flames soaring into the sky. The fire, which was discovered by Mike Mickes, a student living in the apartment beneath, apparently began shortly before 11 p.m. Mickes, sleeping in bed directly under the blaze, was awoken by the smell of smoke and the sound of breaking glass as the fire burst a picture window in the second story.

"I looked outside," Mickes said, "and saw ashes and burning wood falling to the ground in front of me. I just grabbed my clothes and ran."

The Moscow Fire Department arrived approximately a minute after Mickes made his hurried exit from Apartment Five, and began pumping water into the burning Apt. Six upstairs. Within minutes the fire was under control, and crews began rolling up their hoses at 11:30 p.m.

Country store opens with porno thefts

Suffering from thefts two days before opening, the new SUB country store opened yesterday morning.

The store will be open from 10 in the morning till 10 at night, according to Lois Cutting, store manager. She said weekend hours were not yet clearly established.

The store lost about $15 worth of Playboy and Penthouse magazines in thefts Monday. Cutting said separate steel screen has been installed outside the grilling in front of the magazine section.

The store is selling jar candies from Penny Lane candies, student artwork, books and magazines.

SUB Manager Dean Vettrus said the artwork was bought from students "for a small markup," and then resold. Such artwork now in evidence at the store includes small knives and chain work.

Business has been moderate so far, with many of the sales being magazines and candies. "The candies are very good," said Cutter. This reporter sampled some candies and found her judgement accurate.
Art and Theater courses offered

The following courses require advanced registration and fees are $20 per semester credit for Idaho residents and $25 for non-residents, unless otherwise quoted in the class description. Contact the Continuing Education Office for registration material.

The Spokane Review in Spokane is offering a two credit class entitled “American Society in the Making,” Soc 404 starting in early September. The spring semester course will be titled “The Molding of American Values.” Two visits to campus will meet Dr. Ronald Lee of the Sociology department for discussion and the quiz sessions are tentatively scheduled for October 31 and January 23; however, Lee indicates a willingness to change these dates if they create major conflicts.

This is not a repeat of the series offered last year and those enrolled last year can again receive credit for this same course. Dr. Hobart Jenkins of Continuing Education said it is not too late to register for this course.

Two semester hours credit may be earned by viewing the "Ascent of Man," on Public Television and attending two three-hour sessions on campus, the first on November 7 and the second on December 18. With IS B broadcasts, the series may be viewed on the following stations: KUGD, Channel 12, starting Tuesday, September 23 at 8:00 p.m.; KWSU, Channel 18, starting Tuesday, September 23 at 9:30 p.m. and repeated on Sunday, September 28 at 10:00 p.m. Credit will be given in Soc 404, Ascent of Man—Lee will be the instructor. This is a repeat of the series last spring. Texts and study materials will be available at the University of Idaho Bookstore.

Two credits in THA 404 Classic Theatre - The Humanities in Drama can be earned by watching a series of 13 plays with 1/2 hour preview discussions. The series may be viewed on the following stations: Channel 12, Thursday on September 25, 7:30 p.m., followed by the plays at 8:00 p.m.; Channel 10, KWSU, reviews Saturday at 7:30 starting September 27 followed immediately by the plays with the program repeated with the preview of Monday, September 29 immediately following the play; Channel 7, KSPS, Spokane reviews Thursday 8:30 p.m. starting September 25 followed immediately by the plays.

The series consists of plays such as "Macbeth" by Shakespeare, "Edward II" by Marlowe, "Paradise Restored" by Taylor, "She Stoops to Conquer" and a variety of other famous plays that are considered classics. The play run is between 1/2 to 3 hours in addition to the 30 minute preview.

Freshmen above average

University of Idaho freshmen are average or above average in all but verbal ability, according to results on Scholastic Aptitude Tests given to students across the nation.

Dr. Donald J. Kees, director of the U of I Student Counseling Center, says that some verbal scores have been kept for about 20 years. Most recent results measure U of I student performance on the SAT, part of the College Entrance Examination Board, which measures verbal and mathematical ability, and performance in the American College Testing (ACT) program, which measures achievement in four basic subject areas.

The relatively strong performance in mathematics and natural science may be related to the fact that the technical divisions of the University are strongly represented and the tendency to draw students with those particular aptitudes and achievement," Kees said. "The strength scores of the total class seem to be fairly stable from year to year."

Field hockey sign up due

Anyone interested in men's field hockey? According to U of I Student Fred Mau at this time there may soon be a fledging field hockey team on the University's campus.

Field hockey is similar to soccer. Instead of using your feet to score a goal, mallets are used. It is an exciting game. The exercise is beneficial.

Anyone interested should contact Fred Mau at 882-9138 or at the location of Blake Ridge, 918.
Remodeling underway on Main Street

Downtown Moscow will be subject to the loud sounds of construction throughout this year, beginning in early September, as Main Street is receiving a new water main.

According to Larry Grupp, director of Moscow's Chamber of Commerce, the previous water main, a sixty-year-old steel pipe, had begun to rust and leak, causing maintenance problems.

Contractors bids for the project were received August 27. The City Council will have approved the lowest bid by Sept. 2.

The project will cost roughly $300,000. Two-thirds of this is funded by Housing and Urban Development, the other one-third must be provided by the City of Moscow.

The new cast-iron water main will be installed, one city block at a time, tested, and then sealed into Main Street, along the stretch from A Street to the Rathskeller Inn. The project will terminate when cold weather sets in, and resume again in the spring. It is expected to end in August of 1976.

Stereo lounge needs your help

The ASUI Stereo Lounge in the Student Union Building needs people to operate the facility. Students are urged to attend interviews for the position from 1 to 7 p.m. tomorrow and Friday. The location for interviews will be posted at the information desk of the SUB.

In Rochester, New York, it's been happening for years. The youth is a member of TOPs. Teens on Patrol. A group of boys and girls from the inner city who work with police each summer to help keep city recreation areas safe and orderly.

TOPs was conceived by Eastman Kodak Company and Rochester Jobs, Inc. in 1967. It has brought about a greater understanding and mutual respect between police and young people from the surrounding community.

TOPs don't have the power to make arrests, but they do learn about police work. They wear special jackets and T-shirts, they ride in squad cars. Walk the beat. Monitor calls at the station. Supervise kids at pools and playgrounds. For which they're paid a salary.

Police come into the neighborhood as participants, not observers. When they get to know the people they're sworn to protect, they learn how their interests can be better served.

Why does Kodak provide financial support to TOPs? Because helping the people of Rochester communicate with one another helps build a better community in which the company can operate and grow. In short, it's good business. And we're in business to make a profit. But it's also good for society. The same society our business depends on.

If a company that makes pictures can't help people see more clearly, who can?
A scarce story

Adequate housing for University of Idaho students has been scarce the last several years and this school year has been no exception. Students are forced to crowd into unsuitable living quarters located off campus that even the Saturday night winds have seen fit to bypass.

Dormitories and Greek residents on campus are filled to capacity with people still waiting in line in hopes that students with reserved rooms will be classified as no-shows.

This is due in part to the University's increase in enrollment and the administration's lack of expanding campus living quarters. The reason for this is that University heads and civic developers feel this high student enrollment is simply a trend that will soon taper off and return to normal.

If these anti-expansionists would take a look at the job opportunities, they would realize that jobs are not available and that students are forced to attend college for lack of anything better to do. What jobs there are open, a person must have an education to even be considered.

Sherman Carter, financial vice president, has made it his pasttime to try and expand the college in every area but that of housing. Instead of renting idle University land to shopping or investors, Carter should have built a U of I owned and operated apartment complex. It could be constructed with student funds which would enable students to pay lower rent. Proponents of student living groups might see a catalyst in forcing local realtors to lower their rent which has shown a steady increase the past few years, thus, draining students of much needed money.

The millions of dollars wasted on the building of Kibbie Dome should have been diverted to this type of undertaking. Although the stadium will enable students to attend athletic contests in comfort, it will have little effect on those people spending cold, winter evenings shivering in a canvas tent on the outskirts of Moscow Mountain.

Kibbie Dome has a seating capacity of over 20,000 people, but only when a "sleeping capacity" has been determined will students without a home be satisfied.

Schladern

Searching for ethics

To the Editor

This is my first time to move to the Moscow area, I am left with few contacts for meeting persons of similar political and climatic. Therefore, I would like to take this opportunity to request a list of configurations of libertarians and even members of YAF please contact me.

It would be rather disappointing to think that I am the only individual on campus dispensing toward libertarianism. I have news of the movement, so I hope for other reason see me about that.

Senate elections are seemingly months away, but with the present office vacancy offered by Ann Munday in the Student Senate's job, the running of the board, and the possible opening left by Britt Nichols in his attempt to make it big in the bar and grill business, an underlying contest for senate office is now in the offering.

So, who will be the next member of the pro-Republican or the pro-Republican and approved by both GOA and himself. From there, with senate approval, the nominee will be duly installed.

A single crucial situation are always tossed about with something comparable to great abandon. To some it is a compliment and to others it is the highest form of insult. As always, there are those who actually seek the esteemed office of US senataor themselves.

High on the list of applicants is Dave Ruden, president and rush chairman of Delta Chi fraternity.

Gary Kidwell is seeking office, and his greatest asset may be his connection with our very own Kibbie Dome, their candidate. Tim Sampson, also in contention, claims notoriety through a close friendship with the largest alumni.

Half the sky

Few of us see anything terribly strange or frightening as we look at the students on campus this first week in classes. We simply see men and women hurrying to class together, some of them in ties and coats, others in jeans and sneakers. Some of us are reminded of the assurance that comes from being here before, others with that confused look that says—"I wonder what this is all about?"

But if you felt just a presence as a student on campus at one time was considered extremely strange and potentially dangerous.

In the late 1800s, the anthropology of Jean Jacques Rousseau as to the education of women was widely accepted. He stated: "The education of women should have a set role in our society. It should be concerned with teaching the women of one's time important to be useful to us, to make us love and esteem them, to educate us when young, to take care of us when old. It is a job for all of us," he advised us, "to render our lives easy and agreeable; these are the duties of women at all times and what they should enjoy together.

This philosophy was attacked by early feminists. Mary Wollstonecraft published the "Vindication of the Rights of Women" in 1792. She argued that time would be better spent developing women's minds rather than their charms.

Later feminism made for a struggle for the freedom of women to be educated. In 1899, Emma Willard tried to persuade the New York State Legislature to provide for the education of young women. She failed in her attempt and set up a private school for women in Troy, New York. Her pioneering efforts resulted in a series of schools that offered serious intellectual training for young women.

Other women involved in this struggle included: Mary Lyon who opened Mt. Holyoke in 1837; Sarah Grimke published "Letters on the Equality of the Sexes" in 1838 which stated that "women could have the same share of the world's work until they were educated to do more than amuse and take care of men," and Lucretia Mott stressed the need for education to assist women out of their inferior position in the mid 1800s.

The Civil War, Vassar College, Smith, Wellesley, Bryn Mawr and the Harvard Annex (Radcliffe College) gave women the opportunity to receive an education that was once denied. By World War II, women were admitting, women and men were doing well in academia, popular beliefs still persisted that women and education was a dangerous mixture.

Some of the more common reasons for these feelings of danger are discussed in "American Woman, Who Was She?" edited by Anne Firor Scott. Reasons given include: Education was physically detrimental to women. They were taught progressive subjects and genteel teaching; there was the danger that college women would not marry and therefore their education could lead nowhere.

In 1904, G. Stanley Hall, a leading psychologist published "Adolescence," which included a statement that if the education of women was not executed with great care, her capacity for motherhood could be damaged.

"Another principle should be to broaden by retarding; to keep the purely mental back and by every means do bring to the fore the fact and taste and should be incessant. A purely intellectual man is no doubt a biologically a deformity, but a purely intellectual woman is probably a bad sign in a woman, it suggests artificiality, pedantry, the lugging of dead knowledge. More learning is not necessarily to carry a sign of scholarship are always morbid. The rule should be to keep nothing that is not to become practical; to keep the tone higher for the daily traffic and conduct. Not to overburden the soul with the impediments of libraries and reading, and always to follow truly the guidance of normal and spontaneous interests wisely interpreted.

And her assumption could be made that the above ideas have been eliminated from society. One can view students on this campus and see that women are receiving degrees.

But myths of women and education still remain. Feminists today are still struggling with the fear that as women receive degrees and dealing with in 1792. One would be harder pressed to find current literature cautioning women to expect higher education in the dangers of brain-fever. But as women receive degrees and pursue careers they often encounter a subtle message that they don't take it seriously—your real function is to become a wife and mother. These messages become less subtle as educators themselves become preoccupied on teaching and research and more so on services and facets with the philosophy that they won't be steady employees since they will probably get married and start teaching the populace of the University of Idaho, Latan County, and the City of Moscow is it so amazing that the center remains.

Linda Pall, a Moscow resident, became the first candidate to announce her November 8, 1973 candidates for Moscow City Council elections. Pall said in announcing her candidacy, "I want to run in the next four years of Moscow's future. My name will be on the ballot because I believe I can bring the integrity of our community and to plan for its future. I believe I can be more effective in the council's deliberations and decisions...and I believe Moscow needs me."

Paul said: "I want this extra time to talk with as many people as I can, to hear their concerns and their ideas about Moscow issues, and to make a better understanding of our city."

Pall also intends to give three specific proposals which I want to emphasize:

1. A downtown plan. Moscow should devise a plan for keeping the city's heart vital and alive, despite the personal outlooks of shopping centers and strip development. Functional beautification, off-street parking, better traffic control, space for attractive retail development, and a park within the reach of Moscow's downtown.

2. Accessibility and accountability. Council members should be accessible to the people of Moscow and accountable to them for decisions made on the council. I will promise regular office hours so that people can call or come in at his/her convenience to discuss city issues. I also want to propose to the council a short "Question Time", every month when the council could discuss questions to council members to which they would receive an answer at the next regular meeting.

3. I intend to press for development of city goals and policies, a citywide comprehensive plan review that is due and in connection with the city's most recent defined set of goals and policies, updated at regular intervals and reviewed regularly. Viable neighborhoods. I want to help the council reverse the trend to decay in older neighborhoods. I want to make a statement in the valley of each and every house in Moscow. If one house is poorly maintained, it affects the image of our town. Encouraging improvement of homes and residential areas is a definite step for the council.

I support endorsement of neighborhood organizations to create better communication links between city hall and the neighborhoods. Neighbors could then get together, if they desired, and discuss the needs of the neighborhood and the resources available to meet those needs.

4. Full examination of transportation options in Moscow. I will evaluate the possible exploration of the possibility of small scale public transportation. With fuel costs rising and local weather conditions, public transportation look better and better, for young and old alike.

### There will always be garbage

The Moscow Recycling Center is a non-profit corporation which collects and recycles tin, glass, aluminum and newsprint. Blue barrels labeled Moscow Recycling Center are located in all of the dorms, generally near the garbage chute. The center requests that only tin cans labels removed and cans rinsed out; glass, and clean aluminum cans be placed in the barrels. Newsprint should be stacked next to the barrels.

At the present time, there is no market for magazines or cardboard. So, please don't place those in the barrels.

Anyone interested in helping at the Moscow Recycling Center may volunteer at 290 N. Jackson St.

---

**Life of a recycler**

*By Ron Hanson*

The morning is cool and gray. Just like I feel. Time to go to work. Time to smash. Time to crush. Time to dig through dorm barrels full of every disposable horror man could conceive. Ugh. It's too early for thoughts like these, a whole day is ahead of me. A day in my life and that of the Moscow Recycling Center.

I know what they think.

"That righteous bunch of commie environmentalists trying to capitalize on my garbage. I'll show them I'll throw my recyclables away. They are all hippies anyway and do you think I'll give my garbage to a herd of hippies. Wait! I get it. I'll still throw away the recyclables and give the recycling center the worst, smelliest horrible junk I can and maybe it will turn into garbage monster that will eat the center. I'll show them. I'll get even with them for putting my garbage to good use."

Nothing like a case of early morning paranoia to set the pace for the coming day. I always feel like this on dorm route day. That is the two days a week when loyal recyclers cautiously lurk through the halls of the University of Idaho residence dorms and rattle barrels to urk the residents. I can hear the insults now.

"Don't you know I'm studying, you slovenly horrible creature that delves in bluk'piles."

"I saw two of them on the elevator. They work and they get dirty."

"OK, it's a bet, you actually touch one of them and the five dollars is yours."

"I heard the only way to destroy them is to throw water on them."

Water. Dorm people have weird fetishes for water and enjoy with all the honored anxiety of a child sloshing it on others.

Not that I haven't plotted revenge. A year's supply of empty aerosol cans in the incinerator and bang, there goes the complex. As for the rest of the dorms, I'll save all the awful things they save for us to sort through and combine it into a stew and sneak it into their cafeterias. My only concern is that they may enjoy it and have trouble discerning it from the regular fare.

I actually enjoy the dorm route. It makes me very humble. I'm sure it is humility that makes me grovel through the unspeakable things in those dorm barrels.

Somebody last spring put in a weekly issue of Kitty litter. Such great minds abound in those hallowed halls. It does my heart good to find such clever and dedicated warriors of resource recovery. Let's see, maybe I could wash it in my washing machine and put it in my sandbox.

There is, however, one thing much more frightening than the dorm route, that is the annual spring dorm clean-up. The dormites really pull out the stops for this festivity.

"Does it fit in the dorm barrel. Well bend the barrel. Ya, it fits."

"My poor frog Ralph passed away during the excitement of finals week. I think it would be a fitting remembrance if I recycled Ralph."

"Hey Tom, I got so drunk last night I got sick in one of those blue barrels in the incinerator room. What do they do with those for anyway."

"I know, I'm so excited about starting next semester off right that I'll stick something in the barrel that will be there when I get back."

"Maybe the recycling center will hold a free dinner for the underprivileged with all the moldy food I fondly bequeathed to them."

So it goes... and goes... and goes. It is not so bad. When I get done with the route I can go back to the center and CRUSH some glass, and SMASH some cans.
We can help you even before you come into our store.

Selecting a stereo.
Selecting a stereo system is more than just a matter of taste. It is the process of finding the most (quantifiable) performance for your dollar. How much sound will a system produce, and how cleanly? How much of the full musical range does it reproduce?
Because we at STEREOCRAFT spend a great deal of time listening to, and evaluating, all kinds of audio equipment, we can supply a helpful summary of what performance characteristics can be had at what price; what you will gain if you spend more; and what you will lose if it is necessary to spend less.

What your dollar buys.
With a limited budget ($200-$300), you can get a system of reasonable accuracy, but it is necessary to sacrifice response at both ends of the musical range to get a satisfactory acoustic output (loudness). A system in this price range is most appropriate in a small listening area.

With a moderate budget ($400-$500), you can get a system which provides accurate musical reproduction in every respect, with sufficient output for a medium-sized room. If you like music very loud and have a very large room, you can select a different kind of system that gives up some musical accuracy (bass response, usually) in order to get higher sound output level.

With somewhat more to spend ($600-$1000), you will be able to get a system that combines completely satisfying accuracy with ample output for the largest of listening rooms. A system in this price range will include features that add to the ease of operation and which help to preserve your records.

Examples.
We have selected a system from each category that will offer the best possible value for your particular number of dollars. When you come in to talk to us we are confident that we can convince you of one thing: we can probably furnish you with a better music system for less money and better service than you are likely to get elsewhere.
Thank you.

Pioneer Sound Project 300 AM/FM Receiver, Garrard 440M Automatic Turntable with base/dust cover. Pickering V15/ATE4 elliptical diamond. Two Audioanalyst A5280 speaker systems. Total Retail $455.00
STEREOCRAFT system price. $299.00

HERE ARE A FEW GOOD REASONS FOR DOING BUSINESS WITH STEREOCRAFT:
1. (PRICE PROTECTION)
If you buy a system from us and see it advertised for less within 30 days, bring us the ad; and we'll refund the difference.

2. (100% SPEAKER EXCHANGE)
If you want to trade your speakers towards new ones costing at least twice as much, we will allow you FULL PURCHASE PRICE within one year.

3. (7 DAY MONEY BACK GUARANTEE)

4. (45 DAY EXCHANGE)
If you wish to trade up to a different model of equal or greater value, you get 100% back within 45 days.

5. (FREE DELIVERY AND INSTALLATION)

6. (CONVENIENT FINANCING)

Students attempt to break metropolitan duties

By JOHN HECHT
of the Argonaut staff

Rocked by a federal district court decision in Boise in July, UJS students—represented by the Student Bar Association (SBA)—have requested to be separated from the ASUI and from their own student government.

Citing the court decision, which declared the law students to be a part of a "unique professional department within the university," a bill and a supporting information support were submitted to the Senate this summer, requesting an establishment of a negotiations board to lay groundwork for the separation.

The law students challenged a University assessment of $800 per semester, which was dedicated toward payment of the new law building. Their basic argument was that the assessment violated "equal protection" clauses of the U.S. Constitution—other students were not assessed the fee.

With the rule that the students were in a "professional school," the University, under its state constitution and corporate charter, can charge them tuition.

Spokespersons from the SBA, contacted in Boise this summer, said that the language of the decision was issued orally and was expected to be released soon, giving them grounds to request separation.

David Warnick, ASUI President, said that he had been contacted by a law student who is also an SBA member, seeking support for the resolution. "He wanted to keep the language of student rates at the SBA level because so many law students play golf," she said.

At the senate meeting Wednesday night, the law students presented their case. The three law students who are senators rejected the "law student bills" and voted to move the bill from the "table," that is to consider action on the bill.

The debate was hostile, and the underlying of discussion was that if the law students did not care enough to participate in student government, even enough to support their own measures, they would receive equivocally courtesy from their peers.

The bill to establish a negotiation's party was voted down, amidst comments that the senators could see no reason to negotiate with a subcommittee of the ASUI, especially when the Senate benefits to themselves. The resolution left on the table that when no one seconded a motion to bring it out for discussion.

In the meanwhile, SBA representatives seemed to have lost interest in the separation movement, and were concerned with a possible loss of accreditation facing the school. They received persuasion from the regents a few weeks ago to establish a committee to examine possible funding alternatives for the school, designed to keep it above minimum American Bar Association standards. Such one possibility is that the committee will suggest that an increased tuition be charged, with the monies raised to be used to hire instructors.

Students may still enroll in a new course in which they are making decisions affecting a metropolitan area of 250,000 people over a nine month time span.

"Metro-Apex is a computer simulated game designed to give students experience dealing with a range of problems confronting moderate-size urban areas," said Dr. Don Haber, professor of civil engineering and coordinator for the course.

The course is being offered in two sessions this fall. The first session of ten classes will begin Sept. 16 and the second session will begin Oct. 21. Classes will be held Tuesday and Thursday from 4:57 to 10 p.m. Both sessions will be held in the Education Building.

Students may enroll under either Interdisciplinary Studies 402 or in a bill, "MRO-Apex." Metro-Apex was developed by the University of Southern California with the sponsorship of the Environmental Protection Agency, said Haber. Cost of the program was $2 million. It was originally intended to show the effects of pollution and human activities on different aspects of city life.

The game is modeled after Lansing, Michigan and includes the central city, suburb and two townships totaling 320 square miles, he said.

Attempt made to make foreign students at home in Moscow

"It's always hard to adjust to campus life, but for about 150 foreign students on the University of Idaho campus, it's even harder to adjust to a new language, new customs and new lifestyle.

A "buddy system" is being offered by the University to help foreign students feel at home and have positive experiences while studying in Idaho, says Phyllis van Horn, foreign student advisor.

In the "Experience in International Friendships," students get together with international counterparts from 45 countries for weekly talks and for a seminar in learning English and discussing cross-cultural communication.

By attending the seminar and meeting weekly with a foreign student, U.S. students can get to know one student. Or, they can meet with their foreign counterpart just for fun.

The seminar is Tuesday at 8:30 a.m. in Room 334 of the Administration building.

Many students studying foreign languages meet with counterparts who speak that particular language, such as Spanish students who meet with people from Latin America.

A foreign student is getting to know foreign students and helping them relax. Mrs. Van Horn says the thing that makes the difference for international students is that it's great to have the support of people who have been here for a long time and feel at home.

She says ideologically, foreign students feel at home with U.S. students and have positive experiences while studying in Idaho, says Phyllis van Horn, foreign student advisor.

There is a big need for foreign students. There are about 300 international students who are away from home for the first time and need help and advice.

She says the group will have 20 members this year. The group will meet weekly, and the foreign students are trying to reacquaint the University with the traditions of the school, an international one.

Another program for intertional students is "Friendship Families." Moscowl families invite students on outings, to activities, and to their homes to help them adjust to life in an American college.

This program has been going on for 15 years, and it's a big success. It's a great way to adjust to life in an American college. Van Horn said there is also a big demand for friendship families from international students this year.

This is the fifth year the international student program has operated, said Van Horn.
Performing Theater series returns for second year

Two separate theater series— the University Theater and the Guest Artists—are back for the second year of performing entertainment for the University community.

Two dramas, one musical, and one opera are being presented this year, with an added bonus: "Prices have been lowered or remain stable in an effort to encourage greater community participation," said Edmund Chavez, U of I theater arts head.

Season tickets remain at $8, with single admission at $2.50 for non-student, and $1.50 for children under 12 years. ASU Students with activity cards, with an additional charge of $1 for the musical and $0 for the opera.

The University Theater series opens in October with "Guys and Dolls," the Lerner-Loewe musical, set in the 1950's about the colorful Broadway characters of Damon Runyon. One of the classic American musicals, the plot revolves around the efforts of gambler Nathan Detroit's attempts to find a new location for the "oldest established permanent floating crap-game in New York."

The powerful Greek tragedy, "Antigone," a depiction of the clash between the daughter of Oedipus and Creon, the ruler of Thebes, is scheduled for November. The eternal question of man-made law versus the course of fate is brought forth when Antigone and Creon must determine proper burial for her brother.

Next semester a Sean O'Casey ironic tragedy, "The Plough and the Stars," will open in February. The setting is Dublin, and the period is 1916, which was the year of the abortive Irish Republican Army (IRA) uprising of Easter. It contrasts the idealism of Irish visionaries and members of the volunteer Army with the harsh realities of human poverty and misery.

The uncompro mising ones.

The calculations you face require no less.

Today, even so-called "non-technical" courses (psych, soc, bus ad, to name 3) require a variety of technical calculations—complicated calculations that become a whole lot easier when you have a powerful pocket calculator.

Not surprisingly, there are quite a few such calculators around, but ours stand apart, and ahead. We started it all when we introduced the world's first scientific pocket calculator back in 1972, and we've shown the way ever since.

The calculators you see here are our newest, the first of our second generation. Both offer you technology you probably won't find in competitive calculators for some time to come, if ever.

Our HP-21 performs all arithmetic, log and trig calculations, including rectangular/polar conversions and common antilog evaluations. It's display is fully formatted, so you can choose between fixed decimal and scientific notation.

Both the HP-21 and HP-25 are almost certainly on display at your bookstore. If not, call us toll-free, at 800-538-7922 (in Calif., 800-662-9862) for the name of an HP dealer near you.

In a recent interview with the Argonaut, Dr. John G. Bond, dean of the College of Mines, explained why the college has been taken off probation.

It was placed on probation last December by the Board of Regents. According to Dr. Bond the probation was not academic but rather an attention drawing classification.

Making their evaluation of the College of Mines in December the board was upset. It was determined that the college had too low an enrollment for the relative costs involved.

It was moved and seconded that the College of Mines at the University of Idaho be placed on probation for two years period and that the enrollment figures and industrial financial support be re-evaluated each year, with the understanding that the College will be eliminated or merged with the College of Engineering if the present high costs and low enrollment continue.

In dealing with the problem the administration considered five options:

- Eliminate the College of Mines—It would be cheaper to send Mining and Metallurgy students to another out-of-state university than to maintain the curricula here. (Geology and Geography would go to the College of Letters and Science) and eliminate the College of Mines.
- Merge the College of Mines and the College of Engineering Overall, the engineering aspects could be improved by mutual association. (Again Geology and Geography would go to the College of Letters and Science).
- Keep the College of Mines and the College of Engineering as separate entities but have a common Dean—This could improve the exchange of ideas, increase flexibility and slightly lower cost factors for the Engineering aspects.
- Leave the College as it is—The College would continue to function but at a very stringent level.
- Expand the College of Mines—Support it to the recommended level so that instruction and research combine to make a strong professional college. This would involve a determined commitment to resist pressures from other institutions.

When Dr. Bond was questioned as to how the college came into such a situation he replied that it was mainly Metallurgy and Mining Engineering which drew most attention. Enrollment was low. Too much money was being spent. The amount of money being spent was, in part, due to the fact that adequate state funding to sustain all university curricula was low. It was felt too much was being spent on what the University was turning out.

In defense of the College of Mines, Dr. Bond explained that students in Mining Engineering and Metallurgy are Juniors and Seniors. Thus enrollment is course lower. Also technical courses take closer student faculty relationship with more professional equipment involved.

Explaining why the college was taken off probation, "We had an intense recruiting effort last spring and this summer. We also had internal staff adjustments and program realignments," Dr. Bond replied.

"I feel we're out of it," Dr. Bond said. "The staff is broader; industries have helped us and I'm satisfied that we have a solid college."

As of now it appears the College of Mines is out of the dog house. Whether it will remain as solid in four years when it is again re-evaluated is anyone's guess.

A Friendly Face Far From Home.

Away from home. For the first time or the fiftieth time. You can always use a friend.

If you're from one of 120 cities in the Intermountain Area, chances are First Security is your hometown bank.

When you come to school in a strange town, as far as we're concerned, we're still your hometown bank. Just as friendly, just as anxious and willing to help you as the bank you grew up with. We call it person-to-person banking. But it means we just want to be friends.

Come in and see us.

You have a long way to go. We want to help along the way.

First Security Bank
of Idaho, N.A.

The University of Idaho has approved the contract for the next phase of work on the Palouse Empire Mall, according to Dr. Sherman Carter, financial vice-president.

The contract is expected to be signed by mall developer Earl McCarthy of Spokane, Wash., in August and work begun in early September, Carter said. He indicated that this work includes bringing electricity, sewer and water lines to the area as well as curling the section of Farm Road that runs through the shopping center acreage.

The cost for these improvements to the university property is expected to be about $325,000, Carter said.

Sat. Sept. 6th
7 & 9 p.m.
SUB BALLROOM
anyone returning to the U of I this fall probably recalls their first impres sion of the altered horizon. My God, it's FANTASTIC! I DON'T LIKE IT. STILL DON'T LIKE IT!

All this just to hide our loosey goosey ball team?

Events

Argonaut

*Anyone interested in debate should contact Tom Jenness at 885-8459 to join the U of I debate team.

*College Republicans meet at 7 p.m. Thursday in the SUB. The room will be posted. Business includes appointment of convention committee and convention.

*The fall chapter of the John Birch society will meet Wednesday at 7 p.m. in the SUB - room to be posted.

*The UI veterans will have a meeting Thursday evening at 7:30 p.m. Division will cover membership, current information and a possible resident fee waiver.

*KUO-FM album preview will be broadcast at 10:00 p.m. every night. A newly released album will be played at that time uninterrupted and in its entirety.

*Campus problems committee will meet today at noon in the Sawtooth room in the SUB.

Parking problems raised

Discontinuation of student car registration decals and a raise in some penalties for violations are the major changes in the 1975 campus parking regulations.

According to Mr. F. L. Perryman, vehicle registration administrator, the student decals were dropped to save student funds which paid for the decals. He also said opinions had been voiced that the stickers were not needed in the student perimeter parking areas.

The penalties, which were raised from two dollars to five dollars, are for students parking in staff parking lots and for anyone parking in the staff areas without registering their vehicles, Perryman said.

"The fine increases were apparent in order to make some regulations more effective," he said.

The action for changing the rules came from the Traffic Committee which is composed of four student members, three students and one representative from the Division of Institutional Services.

"I realize that the parking here is inadequate," Perryman said, but added that the only new parking facilities tentatively planned will be east and west of the Kibbie dome for events there. He said little could be done to ease the parking problems around the central campus area.

To help ease parking problems this year, Perryman encouraged student drivers to read the regulations, which can be picked up at the SUB, the Information Center or the Ad Annex and to police the student parking areas themselves.

Student unions grow in force

The idea of "student unions" is being promoted by ASUI officers in a letter circulated to Idaho student newspapers and student body presidents.

The letter suggests that a presentation be given to the Idaho Student Association by Professor Alan Rose, the national representative for the American Federation of Teachers union in Idaho.

The letter describes Rose as being "solidly behind the idea of student unions." An essay on the topic of student organization was included in the letter, written by Doug Phelps of the University of Massachusetts. The essay discusses the formation of student unions which would have the power to bargain collectively with the University.

In his essay Phelps suggests that many of the feelings which contributed to campus unrest of the late '60s are still present in students today. The apparent "calm" on today's campuses, according to Phelps, is the result of growing realization on the part of the students, and tightening economic realities.

"Today the polls show that underneath this calm, alienation from cultural values and future life prospects in the society remain high among students," Phelps said.

He noted that the decline of the "in loco parentis" theory, the rise of faculty unions have made it hard to argue against student unions.

At the U of I at Amhestr, according to Phelps, the student government has funded an "Organizing Project" to seek recognition for a student union.

He added that the initial response from students has been "overwhelmingly positive."
