**transfer options**

**ALL BECK**

Transfer students to the UI may pick one of two options when transferring credits toward core curriculum. The State of Education and the UI Regents provided UI advisors with the new policy manual.

Transfer students, regardless of who they first transferred to UI, are eligible for the new option although according to UI or of Admissions and Registrar Telin, most of the older students probably completed core requirements already.

Transfer students may choose either of two options, fulfilling Alternative I, the UI general-education requirements as outlined in part of the UI General Catalog "for the student transferring from a two-year college," or fulfilling Alternative II, the new state General-education Requirements for 36 credits.

**Alternative I**

The courses are evaluated on a course-by-course equivalency basis. The student's major requirements are evaluated for transfer. The student may choose the courses fulfilled by the 36-credit requirement.

**Alternative II**

The student must complete 12 credits in each of the following areas: Social Sciences, Fine Arts, Humanities, Fine Arts and Foreign Languages, and Social Sciences.

**Finance:**

Kleffner fills VP spot

**R. LAUGHLIN**

To "Flip" Kleffner, director of alumni relations since 1980, has named acting Vice-President and Provost Telin. Telin, who is also acting President, will assume the position of the UI Director of Alumni Relations and will be responsible for the up-coming centennial celebration.

Telin's responsibilities include alumni relations, development, public relations, and the president's office.

"We are looking to the '80s and '90s as the future of the university," said Telin. "We have great possibilities in the '80s and '90s."

Kleffner anticipates a continued increase in the number of students. With this increase, the university will need to increase its facilities and provide more opportunities for students.

Kleffner said that he is looking forward to the "incredible" opportunities and the "incredible" academic environment.

Kleffner added that the university "is committed to making the best possible students feel that this is their home."
Tutoring changes its image

BY ALAN SOLAN

Not all tutoring provided by the Learning Resource Center has significantly improved the grades of those being tutored according to the Learning Resource Center Director Judy Wallins.

"So we decided to change the image of tutoring as a Safeway checkout line," Wallins said. She said students had been streaming in the doors, asking for a tutor, and a few minutes later leaving with an appointment.

"There are students, particularly freshmen, whose problem is with their study habits, not with a particular course," said Wallins. The purpose of tutors is to help with a specific course, Wallins said, not for students who can't study right. However, with a reading and study skills test which is now available, the Center is better able to determine those students who really need a tutor and those who really need help in improving study skills. All freshmen and those upperclassmen with low grades who request a tutor are required to take a one-hour reading and study skills assessment test, Wallins said.

Those students found to have problems with studying are encouraged to attend LRC workshops or receive individual counseling in reading and studying skills. If there is a problem with a particular course, tutoring will then be arranged.

There are two options to get a tutor at the LRC. The first is where a student sees the same tutor for an hour each week. The second is a new service started just this semester called drop-in tutoring. This service is available for some high demand courses. Students can participate in these group question and answer sessions, students pick up a schedule at the LRC to find out what the tutoring session for the course they are interested in will be held.

Wallins said the drop-in service is intended for students who find they only need help in a particular course from time to time, not on a regular basis. Other services available at the LRC include handouts on subjects such as note-taking, concentration and stress reduction as well as speed reading sessions.

UI students injured in fire escape collapse

BY SHELLEY WATSON

Three University of Idaho students were seriously injured after falling sixty feet when a fire escape at the Moscow Hotel collapsed Friday.

Students Gus Hernandez and Bob Neary were standing on the fire escape outside of the third story window when the accident occurred.

"And when Chris (McCoy) stepped through the window to join them, the whole structure pulled up and away without warning," said McCoy.

"It was like watching a movie," Spencer said. "I watched them fall and heard them hit the ground."

Spencer said he alerted the people in the room, as well as the bartender at the bar below. Police and ambulances were on the scene within five minutes.

Student fireman David Linken said, "(Fire escape) are notorious for collapsing all over the place."

"They're not repaired, not maintained, not inspected and subject to all types of weather," he said.

It's difficult to check the fire escapes for safety, according to Don Strong, the Moscow Fire In-INSPECTOR, who said they look solid, we go there."

Strong said that fire escapes are not only escape routes; they enable the fire department to have access to potential victims inside.

McCoy was rushed to Grizman Hospital where he was treated for a broken lower back and shattered pelvis. He was released from intensive care Saturday afternoon, and placed in a private room.

Nearby remains in intensive care at Grizman with a shattered femur, broken hips and wrists, as well as burns on her face.

Hernandez was rushed to St. Joseph's Hospital in Lewiston where he was treated for a severely fractured femur.

According to Spencer, it is too early to discuss any lawsuits that may be filed in connection with the incident.

SEPTEMBER CALENDAR OF EVENTS

1 Greek scholarship workshop 7-9 p.m. SUB

1 College of Agriculture Ex- ecutive Council meets. Agricultural Science Building

2 UI vs Lewis-Clark State College, Yoga, Volleyball. 7:30 p.m. Memorial Gym. Admission charged

3 District Cooperative Extension Service directors meet. Agricultural Science Building

3 Student Advisory Services is hosting a Scholarship-Fedge Educate Workshop. 6:30 p.m. Appaloosa Room, SUB

3-4 Merrigan Memorial Tennis Tournament. All UI tennis courts. For information, call (208) 885-6200

4 UI vs Whitworth College, Volleyball. 7:30 p.m. Memorial Gym

5 Volleyball. 7:30 p.m. Memorial Gym.

5 Vandal Shootout vs Whitworth and Whitworth hosts. 3-4 p.m., and 7-9 p.m.

5-6 Volleyball. 7-9 p.m. Memorial Gym

7 UI vs. Mankato State, Soccer. 7 p.m. Kibble Dome. Admission charged

Tuition changes its image

BY ALAN SOLAN

Not all tutoring provided by the Learning Resource Center has significantly improved the grades of those being tutored according to the Learning Resource Center Director Judy Wallins.

"So we decided to change the image of tutoring as a Safeway checkout line," Wallins said. She said students had been streaming in the doors, asking for a tutor, and a few minutes later leaving with an appointment.

"There are students, particularly freshmen, whose problem is with their study habits, not with a particular course," said Wallins. The purpose of tutors is to help with a specific course, Wallins said, not for students who can't study right. However, with a reading and study skills test which is now available, the Center is better able to determine those students who really need a tutor and those who really need help in improving study skills. All freshmen and those upperclassmen with low grades who request a tutor are required to take a one-hour reading and study skills assessment test, Wallins said.

Those students found to have problems with studying are encouraged to attend LRC workshops or receive individual counseling in reading and studying skills. If there is a problem with a particular course, tutoring will then be arranged.

There are two options to get a tutor at the LRC. The first is where a student sees the same tutor for an hour each week. The second is a new service started just this semester called drop-in tutoring. This service is available for some high demand courses. Students can participate in these group question and answer sessions, students pick up a schedule at the LRC to find out what the tutoring session for the course they are interested in will be held.

Wallins said the drop-in service is intended for students who find they only need help in a particular course from time to time, not on a regular basis. Other services available at the LRC include handouts on subjects such as note-taking, concentration and stress reduction as well as speed reading sessions.
Hinman sets goals

Dan Hinman, director of the UI College of Agriculture in southwestern Idaho, has been named acting head of the UI Department of Animal Science.

Hinman joined the UI faculty in 1974. He has worked in animal nutrition from Oklahoma State University. Since 1976, he has been stationed in southeastern Idaho Research and Extension Center in Caldwell. He has supervised the UI research and extension programs in southwestern Idaho for the past six years.

As the acting head of the Department of Animal Science, Hinman will be drawing on his experience in teaching research and extension.

"I look forward to helping the faculty and staff achieve the goals they have set in regard to teaching, research, and extension. I am evaluating the program we have made so far, and I will try to set directions for continuing the program in future," Hinman said.

Hinman is a member of the American Society of Animal Science and other professional associations.

Dunn named manager

Walter Dunn has been named program manager for the UI College of Forestry, Wildlife, and Range Sciences Field Camp at McCall.

Dunn comes to McCall from Tuscon, Ariz., where he was a graduate student at the University of Arizona. He will oversee the field camp maintenance and schedule, curriculum and help develop programs offered there.

John Hendee, dean of the colleges, said selecting the right person for the field campus led to the need for an on-site manager.

"For many years, the McCall Field Campus was used almost exclusively for the college's summer camp—a 10-week course required of all students between their sophomore and junior years. Over the past few years, we've gradually stepped up the use of the field campus. In addition to summer camp, we've offered continuing education courses, enrichment programs and summer courses.

"Everybody wants an answer to earthquake prediction. Scientists are cautious about saying, 'I know how to predict earthquakes.' Then you get into this dividing line there between being able to predict earthquakes and being labelled a quack," Hinman said.

Attempts at earthquake prediction must be based on historic seismic events, he noted. Even with that information available, earthquake scientists presently can only make educated guesses about the times when the earth trembles, rocks break, and the earth moves. "We don't have a scientific explanation to that," Hinman said.

In 1964, the National Earthquake Hazard Reduction Act authorized the U.S. Geological Survey to provide information to the public on the earthquake threat to the U.S. The act also authorized the survey to include, among other things, the U.S. Geological Survey, the National Science Foundation, the National Bureau of Standards and the Federal Emergency Management Agency.

"The survey may be damaged to the point where it can't be used again, but its occupancy continues to be the same," Hinman said.

Hinman said seismographers detect many very small earthquakes. Some of those have been traced in changes to underground rocks and in the surrounding area.

"We determine the severity of events, and catch them in the cradle, so to speak," Breckenridge said.

North Idaho Seismic Ar

Bob Hammond

tman, UI's master's degree in geophysics, will study data from the historic stacks and location of seismographs in Idaho. The information is needed to prepare standards for building codes in areas prone to earthquakes.

"If the seismograph is near a school or hospital, that's important," Hammond said. "If it's near a school or hospital, that's important," Hammond said.

The National Earthquake Hazard Reduction Act authorizes the survey to provide information to the public on the earthquake threat to the U.S. The act also authorized the survey to include, among other things, the U.S. Geological Survey, the National Science Foundation, the National Bureau of Standards and the Federal Emergency Management Agency.

"The survey may be damaged to the point where it can't be used again, but its occupancy continues to be the same," Hinman said.

Hinman said seismographers detect many very small earthquakes. Some of those have been traced in changes to underground rocks and in the surrounding area.

"We determine the severity of events, and catch them in the cradle, so to speak," Breckenridge said.

"We determine the severity of events, and catch them in the cradle, so to speak," Breckenridge said.
**Open That Library**

Students have this strange, love-hate relationship with the university Library.

Just ask any of them. They love almost everything the Library offers — from the maps to Ada County — but find the library itself cramped and chaotic. "People are just too cramped in here, and there's only so much we can do to improve it," says Library Director Edward Peper.

But there is something about the Library that students really like — the fact that sometimes often keeps them up late nights in their rooms.

They hate the Library's hours. Or perhaps more accurately, they hate the fact that the building isn't open enough hours.

During regular school weeks, the Library is open 8 a.m.-11 p.m., Monday through Friday. Weekend hours are 9 a.m.-11 p.m. Saturdays; 1 p.m.-11 p.m. Sundays.

But unlike the days of Annette Funicello and Frankie Avalon, students of the '80s don't go to bed at 11 p.m.

And a growing number who have part-time jobs on weekend evenings need to have access to Library materials before the noon whistle blows on Sunday.

If university administrators want to stress academics, they're going to have to put their money where their books are. They need to rearrange the Library budget so that the building is open Sunday mornings, and stays open until midnight.

Students love the library. But they would love to get into it when they need it most — late nights and Sunday mornings.

**Free Personals!**

**PERSONALS POLICY:** The personals section is free to all University of Idaho students. Personals which contain advertising, surreptitious phone numbers or addresses will not be printed. Publication of all personals is subject to the discretion of the staff and space limitations. Used and unused personals will be discarded after publication. Personals may be submitted to the personals box at the Idaho Argonaut, SUB third floor, 620 S. Deakin St., Moscow, Idaho, 83843. Personals are randomly selected for publication.

**LETTERS TO THE EDITOR:** The Idaho Argonaut will accept letters to the editor usually noon on the day prior to publication. All letters should be typed in double spaced, 12-point Times font, with a maximum of 200 words. The Argonaut reserves the right to edit letters for length, content, and clarity.

**EDITORIALS:** The Idaho Argonaut reserves the right to publish editorials on political, social, and campus issues.

**THE IDAHO ARGONAUT**

The Idaho Argonaut is published, as required by state law, on Thursday and Fridays. Letters on campus and in Idaho, 10th Avenue and W. Mullan, Penticton 94-211. The Idaho Argonaut is owned by the Idaho University, 207 South Avenue, Penticton, Idaho, 83843. Phone circulation: (885) 7847. Printed in the U.S.A. by the Republic Printers, Inc. of Penticton, Idaho. The Idaho Argonaut is distributed in 90 locations on campus. It is mailed by advertising sales and a portion of each purchase covers the costs of printing and mailing.

**AIDS and immorality**

BRUCE SKAGGS COMMENTARY

Today, approximately 3 million Americans are carriers of the AIDS virus and 30,000 have died from it. In 1990, 64 million Americans will be AIDS carriers and 18,000 will die from the homosexual disease. That will be more deaths in one year than the total of American fatalities during the entire Vietnam conflict. The number of AIDS-related deaths is expected to double each year.

Who were the 30,000 people who have already died of AIDS in the United States? A small percentage were regular homosexuals just like you and me. However, 76 percent were homosexuals or bisexuals, and 17 percent were intravenous drug abusers. Your reaction to those statistics is probably not unlike my own: "The AIDS virus is pitting the world of perverts and dope fiends and I don't fit into any of those categories, so I'm safe."

True, the virus is killing mostly perverts and drug addicts, but should AIDS continue at its present contamination rate, you are not safe.

AIDS has spread quickly among the homosexuals, since they have multiple sex partners and because their physical acts upon each other usually cause bleeding.

I apologize for the language in the following information. According to the Institute for the Scientific Investigation of Sexuality, 98 percent of homosexuals engage in oral sex, 90 percent admit anal intercourse, 90 percent admit oral-anal activities, 40 percent admit to "fluting" where the hand or arm is inserted into the rectum, 20 percent report urinating and/or defecating on their 'lovers', and 25 percent practice sadomasochism which involves torture or beating as a part of sex. These activities occur on an average of 30 to 100 times a year for each homosexual.

It is easy to see that the sexual practices of the adulterer or fornicator could not spread AIDS with near the rapidity of a homosexual. However, in a short time, the promiscuous heterosexual community will feel the impact of AIDS.

The same government and media that made the above mentioned acts socially acceptable are now taking steps to halt the spread of AIDS. What are they?

1. Legislation which protects homosexuals and AIDS carriers from discrimination guarantees their right to pass on their filthy disease.
2. Passing out needles to drug addicts.
3. Passing out condoms to everyone.
4. Sex education classes which teach children how to have safe sex.
5. Warning society not to panic because AIDS is only a "Plague of Fear".
6. As to a vaccine for AIDS, Dr. Michael Gottlieb, a UCLA immunologist, said, "The word "cure" is not even in the vocabulary." AIDS is not a plague or fear. It is a disease of death. It influences Romantic Phases like 25 million people in a few years. AIDS will make the issue in history seem like the god of days.

Children are not supposed to have sex. Also, the only sin is that in a faithful marriage. Condoms do not prevent AIDS. According to the Journal of the American Medical Association, a person who uses doms 100 percent of the time during sex with an AIDS carrier, still has a 33 percent chance of getting the virus in sexual contact. Giving one use doms is waste of effort. A man who enjoys being unfaithful probably will not take precautions of basic cleanliness.

AIDS will not be stopped or attacking the symptoms. It will only be stopped by putting an end to the acts which propagate the pandemic. Homosexuals should act in a realistic attack on the human body of the human race. AIDS is one symptom of a total bankruptcy society. If our Country continues in its current homosexual immorality — homosexual and dope fiends and as the rest of society, we will see an unimaginable number.

If our Nation will turn against its wicked ways, take action against homosexuality, and return to God and His morals, AIDS will cease to continue.
Opinion

Blakely undermines Robertson's beliefs

Editor:
Not only is (David Blakely) a commentator's failure to show a clear understanding toward Robertson's beliefs, but also proven financial accountability, it undercuts the plan and purpose of the 700 Club.

For you to portray the beliefs of a large percentage of Christians much of what Robertson believes as ludicrous, is insulting and brings into question the objectivity of your reasoning. Give it up if you are going to watch the 700 Club and actually relate to the views given.

The 700 Club exists to edify Christians and to lead people into the Kingdom of God by sharing what Jesus can do in your life if you make Him Lord and Savior. It is not a forum to debate the issues like Crossfire (which is often more anti-Christ than "equivalent," although I love the show).

Dave, you really aren't one to decide what the 700 Club should be. Then that be left to the owner-founder. You ought to spend more time trying to find out what you exactly want your opinion to be considered and if you truly care one iota. Granted, that would be a bit less glorious than blindly slamming Robertson before the A-ra's readership.

Greg Kolar

Activity money well spent

Editor:
I write this letter in response to the statements published in the article, "An ASUI pat on the back." This article brought up several points about the Activities Board that I contend are grossly incorrect.

First, the cheerleaders were granted the large dollar amount based on the need of the team. We amended a provision by unanimous consent to implement this allocation because of our belief that the cheerleaders are an integral part of our university's athletic events.

Secondly, the allegation that a "preferred" living group was allotted monies for an event is wholly incorrect. The living group in question, Phi Delta Theta fraternity, has held the Turtle Derby for 30 years. The Turtle Derby is a philanthropy and part of their traditional agenda is to host the Flicks. All the campus is invited to this event. It is not to benefit the living group but only to bring the campus together to spin off the Turtle Derby. The Activities Board has funded this event for many years, so why should it be in question now? It is also important to note that the costs of the Flicks was over $1,800, and that the $900 allotted was hardly 100 percent of costs incurred as the said article stated.

The Activities Board members should not be labeled frivolous but, instead, should be commended for their efforts to best serve the needs of student organizations that represent our university. It is particularly disturbing to note that the Activities Board is questioned when their actions were genuinely beneficial to the student body and also fell solidly within guidelines.

The bill Sen. Allen plans to present to the Senate is an unnecessary waste of time. The Activities Board was formed to make allocations to student organizations. Why should the Senate be burdened with additional responsibilities especially when the Activities Board has the very capable ASUI President and Budget Director to oversee and guide it.

In short, I rebuke the allegations that the Activities Board performed any questionable allocations or practiced anything but good judgement. I suggest to the Senate to reject Senator Allen's bill. For I've always held the opinion that something that is not broken need not be fixed. I also suggest that the next time Senator Allen mounts a crusade he gets his facts straight.

John Lofregnich
Former Chairman
ASUI Activities Board

Choices for the faithful

ROBERT KUZOFF COMMENTARY

The University of Idaho offers wide range of opportunities for students seeking to fellowship in their faith or simply investigating this area of life. There are many organizations represented on the campus, all encouraging interested individuals to utilize them. Here are a few:

Baptist Student Ministries
BIM is wonderful and Jesus will not be tolerated as an enemy Mary Jane Meleod. Bob Kennedy is the new director of "Serenity," the meeting's official title, the opportunity for fun fellowship and singing. For information contact Royal at 882-2356 or 882-8599.

Campus Christian Fellowship
Enjoy Bible teaching and a group of singing, sharing and fellowship in the presence of the Word. Weekly meetings are held Thursday, p.m. in the Appalachia Room in the SUB. CCP is an organization that offers many opportunities throughout the week through their main church in Pullman.

If you are interested contact 332-354-3541.

Campus Crusade for Christ
Campus Crusade for Christ is an organization that challenges students to take an intelligent book and present it to others. Chris Christ and those that have a relationship with Jesus Christ to take a stand that they know," stated Robert Weis in his summation of "It's Time!" the weekly meeting held at 9 p.m. at the campus Christian Center. The campus Christian Center is located at 316 S. Uley Street. The center holds daily prayer in accordance with the five pillars. Written information is available through the center. Their number is 882-9979.

The Latter Day Saint Institute of Religion
Information on classes offered through the institute are available Monday-Friday during normal business hours. Friday night gatherings begin at 7:30 p.m. and are open to everyone. Bishop E. Clark Lemmons is director of the campus center and he can be reached on 882-8570.

The Marble
The Marble is a nationwide Christian organization that is loosely organized through the church in Pullman, which can be reached at 332-2142. The student leader this year is Greg Kolar from UI and can be reached at 882-2345.

The Navigators
The Navigators are another nationwide organization. This group is fairly new at the UI campus. Steve Magoon is the campus director.

St. Augustine's Catholic Center
St. Augustine's Catholic Center will hold mass at 8:00 a.m., 10:30 a.m. and 7 p.m. on Sundays. Father Jim Worsley can be reached at 882-4613. A seminar on life in the spirit will be offered this semester for interested students.

All of these organizations are ready and willing to serve those interested in investigating their beliefs or fellowshipping with them.

Hollywood lost in ‘Shuffle’

REVIEW BY BRYAN CLARK

Bobby Taylor has some problems. He’s an aspiring actor and works as a place called "Winky Dink Dog." He can’t get any but the smallest roles in Hollywood and when he finally does get his opportunity, it’s in a B-grade exploitation film.

The story of Bobby Taylor (Robert Townsend), a black actor in white Tinseltown, is the serious subject of the comedy "Hollywood Shuffle." The movie picks apart the social-industrial complex that is Hollywood in a manner almost as efficient as that in "BlacKkKlansman."

Harley lost in ‘Shuffle’

Bobbie (Robert Townsend) is going through the agonizing process of auditioning and subsequently trying to find a low-budget movie by white people for white people. The roles are for the most part, hoods and street punks. In the course of Bobbie’s trials, Townsend’s script lets him take pet shots at the film community, the same film community, probably, whose prejudice Townsend and his fellow actors in this film have undoubtedly felt in the course of their careers. Many of the scenes in “Hollywood Shuffle” are hilarious and tragic at the same time, as we watch Bobby and his fellow aspirants try out for roles which are the stereotypical beliefs of the white writers and producers. They have to go out of character, actually, to become the hip blacks that the fictional film has been written for. Bobby is faced with the choice of refusing his first real work, or to be exploited as another stereotypical black in film.

Sunday night, this film had a good showing at the Micro theater, a trend that will hopefully continue through the end of its run tomorrow night, as this movie is a great blend of social commentary and humor.

**Alison Moyet - Raindancing (Columbia)**

While this album is technically better than her last one, there is still something sad about the way Alison Moyet's power and excitement is slowly dissipating from the album to the album. If you know anything about her at all, and even if you don't, you're bound to feel a little let down by this record.

Let me explain. Alison Moyet is the best female singer to come out of England in years. Better than Annie Lennox, miles ahead of the miserable T'Pau, Swing Out Sister, etc. In fact, paired with former Depeche Mode leader Vince Clarke, the shine brightest than most male singers could dream of, and she also proved herself a capable and sensitive songwriter. When she left Clarke and went solo, critics and fans salivated at the thought of the music she could make.

Well, she hasn't made it yet. Her first solo LP, "Alf," was produced by Tony Visconti and Steve Jolley (Bananarama, Spank- diss, Bird), and Alison had to screen to beard over the foxy diva they created. But still, on that record, there were a couple of killer tracks, like "Love Resurrection." When it was announced that Jimmy Lovine (Tom Petty, Lone Justice) would serve as pointman for her new record, fans and critics salivated all over again. To no avail.

It's not that "Raindancing" is a bad record, it's just bland. My girlfriend, a big Yaz fan, says "it's because she had a baby and feels all soft and domestic. Happiness isn't a healthy attitude for a rock singer." Maybe she's right, but that doesn't seem to be the only problem. In fact, real happiness, true unadulterated joy, is what's missing from this record. It's no-where as intimate as Yaz was (nor as danceable), nor does it have the frenzied power of Lone Justice's "Sweet Sweet Baby," produced by Lovine, upon which Moyet sings backup. Instead, it walks a thin line between the genres, mellow yet remote.

Tellingly, the single, "Is That Love?" is dying on the hot bit and modest rock stations but it is all the rage on VH-1 and on AC radio. It truly would be ironic if our generation missed out on the glories of Alison Moyet's voice, while our parents hear every note she sings. Oh well. This is not to say that the record is wrong. Enough of the tracks are danceable enough that you'll want it for your own personal indulgence. But, don't worry, the slower tracks are make-out music par excellence. If you have the right partner and the right sur- roundings. The tranquility of the record make it best suited for dreary-looking days spent indoors with someone you truly love. I could think of worse fates.

**APPLICATIONS DUE AT 5:00 PM**

Thursday Sept. 10. Pick one up at the SUB Information Desk.
For the second straight season the University of Nevada-Reno football team has been selected as the "pre-season favorite" by both the coaches and media respectively to win the 1987 Big Sky Conference football title with the University of Idaho a close second.

Both Polls were conducted earlier this summer at the Seventh Annual Big Sky Conference Football Kickoff held at the Elkhorn Resort at Sun Valley.

Under the direction of veterans head coach Chris Ault, the polls placed each team in exactly the same order and left little doubt that Nevada-Reno would be the team to top in the scramble for the Big Sky's 21st silver anniversary title in 1987.

The Wolf Pack is also attempting to become the first team since Boise State won three straight Big Sky titles in 1973, 1974 and 1975, to successfully defend its league crown of a year ago.

The league's nine head football coaches unanimously chose Nevada-Reno in their poll. No coaches were allowed to vote for their own teams.

The Wolf Pack received eight first place tickets for a perfect total of 72 points. The Vandals lost the first place spot by nine points; one first place vote, five second place ballots and one third place.

Following the Vandals were Northern Arizona University with 35 points, the University of Montana with 47, Boise State University with 44, Eastern Washington University earning 36, Weber State beat out Idaho state by two points with 25 votes and Montana State settled into a ninth place with 21 points.

Twenty-six sportscasters and sportswriters who cover the Big Sky cast their ballots for the media poll. The results were much the same as the coaches poll as Nevada-Reno came within one vote of capturing every first place ballot with 25 of 26 and earning 233 points.

The Vandals grabbed 199 points for second leading Northern Arizona by 32 points. The University of Montana beat out Boise State for fourth place by four points with 136. The newest addition to the Big Sky, Eastern Washington, nailed down the sixth place position with 99 points followed by Weber state with 89, Idaho State with 61 and Montana State with 54 for last place once again.

Sports threatened

Despite being much safer today than 10 years ago, organized amateur sports are in danger of being legislated out of existence, said Sam Adams, a WSU physical education professor.

"To me, the situation is bitter-sweet," Adams said. "Programs are better because there is more attention to safety. But because the athletes are bigger, faster and stronger they are also more dangerous, with more potential for catastrophic injury," said the former head coach and professional football player.

Adams, who directed a highly successful football program at Spokane's Whitworth College in the early 1960s, has always been interested in protecting young athletes and began to concentrate on the issue of athletic risk management in the early 1980s.

Today Adams is recognized as a national authority. His risk management program which he developed with former faculty member Kenneth Pennan, has been adopted by nearly 80 small and medium size school districts in the state, including Pullman High School and several eastern Washington colleges AA schools.

Program implementation has saved one school district insurance group more than $180,000 in premiums.
I'm telling you: camping is fun

LAURIE DISTLEDFORD

Tuesday, you and I were camping in the dark, no? We had a good time. And didn't you have fun, too? It was a great adventure, wasn't it?

But now, back to Iceland. It was a beautiful day, didn't you say? And the view from the mountain... It was breathtaking, wasn't it?

Now, let's talk about the fire. Didn't you say you couldn't sleep because you were too cold? I tried to keep you warm, but you wouldn't listen. You kept saying you wanted to be out in the cold, didn't you?

And the camping gear. Didn't you say you were too hot in the tent? You kept fanning yourself, didn't you?

The best part of the trip was the view of the mountains. Didn't you agree?

Now, let's talk about the food. Didn't you say you were too hungry to eat?

And the stars. Didn't you say you could see the Milky Way?

Now, let's talk about the animals. Didn't you see the deer?

And the birds. Didn't you hear the owls?

And the bears. Didn't you see the grizzly?

Now, let's talk about the fun we had. Didn't you say you had a great time?

And the memories. Didn't you say you would remember this trip for the rest of your life?

And the adventure. Didn't you say you would do it again?

Now, let's talk about the future. Didn't you say you would go camping again?

And the opportunities. Didn't you say you would take advantage of them?

Now, let's talk about the risks. Didn't you say you were willing to take them?

And the dangers. Didn't you say you were ready for them?

And the joy. Didn't you say you were happy?

And the feeling of freedom. Didn't you say you were free?

Now, let's talk about the fun we had. Didn't you say you had a great time?

And the memories. Didn't you say you would remember this trip for the rest of your life?

And the adventure. Didn't you say you would do it again?

Now, let's talk about the future. Didn't you say you would go camping again?

**Studio put on hold**

BY KIRK LAUGHAN

The construction of an artist-in-residence studio in the vacant room at the Frick Arthur Gallery has been put on hold. According to George Roberts, Chairman of the Gallery Committee, the plan was to build an art studio in the old Frick Art Center. According to Roberts, all that has been done so far has been the clearing of the area by workers. There is no starting date set for building.

"We need to have drawings done and we need to get work permits," said Roberts.

It was originally estimated by Paul Blanton, dean of the UI College of Architecture, that the studio area would be completed by the end of the summer. In order to save money, though, the living area was deleted from the plans.

"We've revised the whole program," said Blanton. "I have no idea when it will be finished."

Visiting artists will be housed in on-campus living areas, according to Blanton.

The design now includes a small kitchen and a bathroom in addition to the working area. The original design was created by Gary Ard, an UI architecture student, at his thesis project. He had also started to direct the construction of the facility. Ard made plans to leave the area after his original design was altered.

According to Roberts, the studio will be a "versatile, multi-purpose room," conducive to many visual arts including painting, sculpting, and pottery work. "It will also be possible to darken the room for the showing of slides," said Roberts. "It is a problem to show slides only at night."

**Simmons receives Kellogg Fellowship**

George Simmons, assistant vice president for academic affairs and research at the UI, is one of 45 American professionals named to the Kellogg National Fellowship Program.

According to the W.K. Kellogg Foundation, the program seeks to expand the nation's number of capable leaders by allowing them to pursue learning outside their fields of practice and areas of expertise.

Simmons and each of the fellows will receive a three-year grant totaling $30,000 to fund their self-designed plan of study. The foundation also supports 12.5 percent of their salary (to a $20,000 total) to enable their institution or agency to give the fellows 25 percent releases to take part in program activities.

Commenting on Simmons' selection, Thomas Bell, UI vice president for academic affairs and research, said, "We are pleased and honored that Dr. Simmons has been selected as a Kellogg fellow."

Simmons, who joined the UI in 1973, implemented an early warning advising system for the institution, which monitors students for the first four weeks of the semester to identify and give special attention to those who are not performing well.

He also helped develop a coordinated course schedule with WSU for the chemical engineering graduate program, which expanded the doctoral program on both campuses.

Additionally, Simmons created a digital control course and laboratory for students in electrical engineering and chemical engineering.

The Boise native earned bachelor's and master's degrees in chemical engineering from the UI, and his doctorate in that discipline from Stanford University.

Simmons and the other selections were chosen from among 776 applicants based on professional and personal accomplishments, and goals, including a self-designed plan to expand their knowledge.

Applications were from faculty and administrators at colleges, universities and academic health centers, and from candidates representing business, educational organizations, and secondary education.

The UI is willing to make $20,000 available for the renovations but, said Rogers, all funds used must be paid back.

The goal in building the facility is an important one, said Rogers. "When you live in a relatively isolated area as we do (at the UI), it is important to make every effort to bring in outside ideas," he said. The studio should help "expand our exposure in visual arts," Rogers said.

"(The UI) has a grant which we share with WSU and Eastern Washington University which is used to bring in artists," said Rogers. The change in design is not expected to have any affect on that grant.

Despite the fact that the bureaucratic wheels are slow in turning, "we hope to have the construction started this year," said Rogers.

Established in 1930 to help people help themselves, the W.K. Kellogg Foundation has distributed nearly $324 million to support programs in agriculture, education and health.

**WOULD A CHANGE LIKE THIS IMPROVE YOUR SOCIAL LIFE?**

Chardy Holston reached her weight loss goal on the New NUTRI/SYSTEM Flavor Set-Point Weight Loss Program.

The comprehensive program includes:

- Nutritional, easy-to-prepare meals rich in flavor and texture
- NUTRI/SYSTEM Flavor Sprays
- Behavioral Counseling
- Mild Exercise
- New NUTRI/SYSTEM Flavor Chews
- Weight Maintenance
