Students outsmart GRE questions

Helen Harshbarger

Some students who took the October Graduate Record Exam outsmarted the analytical part of the test using Kaplan's strategies, cutting their test-taking time in half, said the director of the GRE programs at Kaplan Educational Consultants.

Students who have been coached by Kaplan, correctly answered the pattern identification questions without using the math that the questions were designed to test, Director Jose Ferreira said.

Education Testing Service produces the GRE. Although ETS maintains questions are not flamed, the pattern identification question will not be on the December GRE, said Doreen Vanderbeck, ETS customer service representative at.

"They weren't here before we broke the code and published it, so we are removing the questions from the test," Vanderbeck said.

The questions were on an experimental section of the test and were not graded, Vanderbeck said. The October test was the first time they appeared.

"They were purely in the experimental section, so they were never going to be graded. If it wasn't going to be on the experimental section, then we would have to do something to compensate the students." Kaplan has a team of employes whose job it is to find easy ways to correctly answer questions on standardized tests such as the GRE and LSAT.

Ferreira discovered the strategy after reading the question type which would appear on the October test.

"I was sitting there trying to think of how I could get around this question and I came up with the anchors and arrows strategy," Ferreira said.

Kaplan publicized their discovery because it enabled students to answer so many questions without using any math at all, Ferreira said.

"We were trying to make sure that there were no underground strategies which only some students knew. They students who know the strategy and do not know the math could answer the questions easily, but the students who know the math and not the strategy might think the question is difficult even if they are bright," Ferreira said.

He also said they wanted ETS to know there was a totally non-mathematical way to answer these questions.

Usually, Kaplan teachers will teach the math for a particular question type and then teach the Kaplan shortcuts Ferreira said.

However, the mathematical method was a total waste of time. So they taught students not to bother with it, he said.

With the exception of the SAT, more Americans take the GRE each year than any other exam. Over 400,000 people will take the exam in the 1993-94 school year. It is used by M.A., M.S., M.A.S., and Ph.D. programs as a criterion for admission. It is also widely used by scholarship programs and by many universities as a basis for awards, scholarships and teaching assistantships.

Garbage prices pile up for new year

Helen Harshbarger

Starting Jan. 1, Moscow residents will pay more for their garbage service, but they may do more recycling to keep costs down.

Garbage bills will increase for all residents in the new year, but the new volume-based fee will encourage city-wide recycling.

The current rate for residential garbage collection is $9.56 per month. This rate will more than double for many Moscow households.

The rate increase is being coupled with a new volume-based billing system.

Under this system, each house will be billed for the number of monthly service-access fees plus an additional service rate depending on the number of trash cans set out per week.

Residents will be asked to select a one-, two-, three- or four-can-per-week service level.

The cost of each service level goes up in an increment of $4 per month. For example, one can per week will cost $4 added to the base $12 fee for a total of $16.

For each extra can above the selected service level, an additional charge of $2.25 will be posted to the monthly bill.

Volume-based billing spreads the cost of garbage collection more fairly among users of the service and provides an economic incentive to reduce waste, recycle, compost and develop other waste-wise disposal habits.

With this new system, residents pay only for the level of service they need and they can reduce their bill by reducing their volume of trash.

Educational Tech Fair offers new-age sights

Everyone interested in the future of classroom teaching is invited to the Educational Technology Fair sponsored by Washington State University's College of Education. The fair will begin at 3 p.m. Friday in the first floor lobby at Cleveland Hall at WSU.

The hour-long fair will feature examples of educational technology projects from several classes in the college, said Nils Peterson, coordinator of the Center for the Development of Educational Technologies and organizer of the fair.

"The exhibits and demonstrations at the fair illustrate what classroom teaching is becoming," WSU students will offer examples of materials and technologies that they will be able to use in their own classrooms when they graduate," Peterson said. "We invite the public, and especially teachers and other educational professionals, to come to this fair."

Among the College of Education projects on display are science education methods using digitized video clips of student teaching experiences and a health education teaching method using laser disk technology.

Students' multimedia projects, like early reading instruction for elementary school students using hypertext, an inexpensive computer-based writing tool, will also be at the fair.

Those who attend will see a demonstration of anchored instruction, with students studying classroom teaching methods and management issues using video technology.

Idaho unemployment on slide

The Idaho Department of Employment announced Friday the seasonally adjusted unemployment rate forecast for November 1993 at 5.5 percent. This number is two-tenths of a percentage point below the October 1993 rate of 5.7 percent.

November's rate is the lowest Idaho has experienced since March 1990 and places Idaho nine-tenths of a percentage below the national rate of 6.4 percent.

The number of employed workers in Idaho decreased from October 1993 by 500 but remained above the half-million mark (506,700).

The November count of unemployed workers in Idaho stood at 29,700, a decrease of 1,200 from October.

Normally, at this time of year, the unemployment rate rises or remains unchanged. The reduction in the number of unemployed is credited to the late harvest and beautiful weather which improved job opportunities.

Employment for the period remained strong in food processing, trucking, fresh pack warehouses and related sectors.

The driest November in 34 years bolstered construction and other outdoor activities. The scarcity of snow resulted in static conditions for ski resorts and related businesses.

Activity in retail was mixed as some merchants geared up from the holidays and others, such as garden and building suppliers, cut back employment levels.

Compared with last year, unemployment is down eight-tenths of a percent from the November 1992 level of 6.3 percent.

ATTENTION!!!

This Friday Night Is Designated Driver Night at Mingle's!

Groups of 3 or More With A Designated Driver Will Receive a Large Basket of Chips and Salsa. Plus The Designated Driver Will Receive Complimentary Non-Alcoholic Drinks!
Alternative traditions celebrated at Center

"African Holiday Traditions" is this week's Women's Center program which will begin at 12:30 p.m. in the Women's Center Lounge. A special guest will present a program that features the stories, games and rituals of this holiday season in Africa. Children are welcome.

"Festival of Light: a Chanukah Celebration" will be presented Wednesday at 12:30 p.m. in the Women's Center Lounge. Judy Wallins, Lynn Ugar and Ayelot Karu will present their versions of Chanukah festivities as celebrated in the American and Israeli traditions. Traditional recipes, food and games will be part of the program. Children are welcome.

Students receive highest FFA degree

Eight University of Idaho Students were awarded the 1993 American FFA Degree, the highest degree of membership awarded by the National FFA Organization. Along with R. J. Murphy, the other degree recipients, the members were honored at the 66th National FFA Convention in Kansas City, Mo., Nov. 11-13.

At the American FFA Degree ceremony, Kathy Cavenca, Allison Lindholm, Cody Reynolds, Steve Stroeschtes, Tracy Tewalt, Jason Tisdall, Todd Wells and Brian Wolf were each given a certificate and gold key.

The MCA FFA Degree is presented annually at the national convention to top FFA achievers. Awarding of the degree is based upon a members' Supervised Agricultural Experience program in agronomic or production agriculture and on leadership ability as demonstrated through involvement in FFA, school and community activities.

Parks and Recreation classes now open

Moscow Parks and Recreation's Winter Brochure is now available and registration is open. Classes include Dog Obedience, Recreational Volleyball, Tone & Stretch, Jazzercise, Stained Glass, Home Firearm Safety, Western Swing and Country Western Dance and Downhill Skiing Lessons. Registration is open for Youth Basketball (grades 3-6).

Brochures are available at many area businesses, including Jeff's Foods, Ernst and Tri-State, or at Parks and Recreation's Office, 1515 East D St. For more information or to register by phone using Visa or Mastercard, call 882-0240.

Tickets available for Seattle garden tour

Tickets are still available for the Northwest Flower and Garden Show Tour Feb. 12-13 in Seattle. Tour leader will be University of Idaho Arboretum Director Richard Niokish. The trip includes roundtrip bus travel to Seattle, one night's stay at the Camli Hotel and two tickets to the show (Saturday afternoon/evening and Sunday morning). Reservations must be made by Dec. 15. For information, call the Enrichment Program, 885-6486.

Henberg leaves post as Honors Director

A reception is planned for Professor Marvin Henberg, who will step down in January after 12 years as the founding director of the Honors Program. The reception will take place today from 1:30-3:30 p.m. in the SUB Galena Gold room. Students, faculty and staff are invited to attend the event and refreshments will be served. Henberg will continue to serve as chair of the Philosophy Department.

English 103/104 folders now available

Students who took English 103 or 104 in Spring or Summer 1993 can pick up their folders at Brink 200 during no-exam week and finals week.

Adult volleyball league starting up

Moscow Parks and Recreation will hold its Adult Volleyball League organizational meeting Wednesday at 6 p.m. at the Eggan Youth Center, 1515 East D St. A team manager or representative should be sure to attend this meeting in order to be prepared for the one-day team registration Jan. 5. Team fees are $150. For more information, contact Moscow Parks and Recreation, 802-0240.

Twelve Days of Chemistry ends tonight

"The Twelve Days of Chemistry," an entertaining and informative production of chemical demonstrations, will finish up tonight in Renfrew 111 at 6 p.m. and 7:30 p.m. Tickets cost $1 (children under five can attend for free) and tickets must be purchased in advance at Ticket Express in the SUB or in REN 116. The shows are presented by the University of Idaho Chemistry Department.

Fly Now, Die Later with Biological Colloquium

"Fly Now, Die Later: Birds, Flight, and the Evolution of Aging," is the title of the next Biological Sciences Colloquium which will take place Wednesday from 12:30 - 1:20 p.m. in Life Sciences 200. Donna Holmes, Ph.D., postdoctoral fellow of the Department of Biological Sciences, will present the lecture.

District 5 reps speak at Grain Growers

The Idaho Public Employees Association is sponsoring "Meet Your Representative Question/Answer Session" Thursday at 7 p.m. at the Latah Grain Growers. Guests will include Doc Lucas, Gary Schroeder and Maynard Miller.

Costa Rica subject of presentation

Mario Boza, founder and principle architect of the National Parks System in Costa Rica, will present "Protected Areas in Costa Rica and Central America: Achievements and Prospects" 5 p.m. Wednesday in Forestry 10.

Women voters brown-bag it Wednesday

The League of Women Voters of Moscow will have their regular brown bag meeting in the SUB EE-DA-40 room Wednesday from noon-1 p.m. Idaho 5th District legislators will answer questions from the public.
Icy accident prevented by taking time, care

Each winter a significant number of people in the University of Idaho community are injured due to slips and falls on icy or wet surfaces. Injuries last year ranged from bruised elbows and knees to broken arms and severely strained joints and muscles.

To minimize your risk of getting hurt both on and off the job, follow these guidelines offered by George Porter, occupational safety specialist, Environmental Health and Safety.

- **Recognize hazards**
  Be aware of what you're walking on. Many slips and falls occur at the point where the condition of the walking surface changes. Take care when stepping from surfaces that have been sanded onto icy or snow-covered surfaces, from entry mats or carpets onto wet tile floors, or onto slats that have become wet or icy.
  **Walk defensively**
  You can reduce your chances of injury by making an effort to develop good walking habits. When conditions are hazardous, take shorter steps and walking with your feet pointed slightly outward can give you better control of your center of gravity and balance.
  Walking with your hands in your pockets or carrying large, awkward loads increased the chances of losing your balance, and of suffering more serious injuries if you do fall. It also makes it more difficult for you to gain balance and avoid falls.
  Wear shoes such as tennis shoes and smooth-soled, high-heeled shoes that offer little friction under wet or icy conditions greatly increases your chance of becoming an accident victim, so make sure you wear slip-resistant shoes or overshoes when they're needed and change to more comfortable shoes once you get to your destination.
  **Act!**
  One of the most common statements made by accident victims is that they didn't know what precautions they could have taken to avoid injury, but that they neglected to do so because they were in a hurry. Don't take shortcuts — campus maintenance crews work hard throughout the winter shoveling, sanding and plowing for your safety, so stay on established and maintained pedestrian walkways. Take the time to promptly report to the appropriate person about patches of snow and ice that are causing problems, as well as slick floor or spills. This way, problems can be corrected.
  Maintain personal safety programs; and solve the problem, do what you can to alert others to the hazards by posting signs or similar warning.

Avoid risks with inside decorations

The folks at Risk Management wants you to follow these guidelines for the safe display of holiday decorations in University of Idaho buildings:

- **Natural trees and greens should be freshly cut and treated with fire retardant or placed in containers of water and the water level maintained during display.** They are not to be placed where they are exposed to direct heat or flame.
- **Artificial trees must be manufactured with fire retardant materials and if they are electrically wired, must carry U.L. labels. Do not add electric lights to metal trees; light them only by spotlighting.
- **Other electric decorations should be used only if they have U.L. labels and are in good condition. Do not use electric decorations on trees that are placed in areas of public assembly. Under no circumstances should open-flame decorations be used.

Sallie Mae offers lower interest rate

To make student loan repayment easier, Sallie Mae Corporation is offering the Direct Repay plan, a repayment benefit which allows student loan borrowers to authorize a transfer of money from their checking or savings account directly to Sallie Mae for their monthly payments.

Beginning May 1, 1994, borrowers who elect to use the Direct Repay Plan will receive a one-fourth percent interest rate reduction on their loan paid electronically for as long as they continue in the plan.

Direct Repay is simple, no on-time payment is guaranteed every month provided borrowers have sufficient funds in their account," said Leslie Marshall, Sallie Mae senior vice president. "This helps borrowers avoid missed payments, makes it easy for them to maintain a good credit rating and allows them to pay less on their student loans."

Marshall said Sallie Mae can offer the interest rate reduction because loans paid electronically are less costly to administer. Through Direct Repay, the cooperative will pass savings it realizes in servicing costs onto borrowers. The plan will be available initially to those Stafford Loan borrowers at one of its loan servicing centers and to PLUS and SLS borrowers in July 1994.

Eligible Stafford borrowers can reduce their rate further by qualifying for Sallie Mae's Great Rewards benefit — a rate reduction of an additional one-quarter percentage points for borrowers who make their first 48 scheduled payments on time.

Direct Repay and The Great Rewards interest rate reductions help students who borrowed each year as undergraduates under Stafford, save more than $1,500 over the life of the loans under both programs.

Sallie Mae, which buys education loans from originating lenders, is the nation's largest holder and servicer of such loans. Sallie Mae owns one in three guaranteed students outstanding today, representing finance for five million students and their parents.

Garbage

**From Page 1**

The increase is being driven by a federal mandate known as "Subtitle D" of the Resource Conservation and Recovery Act. This legislation sets strict new standards for landfill operations, requiring measures such as impermeable landfill liners, more extensive water monitoring technology and methane gas recovery systems.

With the deadlines for Subtitle D compliance looming on the horizon, landfills across the country are closing by the hundred, affecting communities such as Moscow, which will no longer have access to local disposal sites.

Latah County's only landfill will close by April 1994. After this date, Latah County's waste will be hauled out-of-county.

Increased garbage rates will pay for the closing the current landfill, long-distance waste transport and construction of a transfer station and a new recycling center capable of diverting 100 percent of recyclables.

More information will be mailed to residents later this month.

Looks like a Vivarin night.

It's 10 PM. You've crammed for finals all week. Took two today. And now you've got to pack an entire semester's worth of Philosophy into one take-home exam, in one night. But how do you stay awake when you're totally wiped? Revive with Vivarin. Safe as coffee, Vivarin helps keep you awake and mentally alert all night.

So when you have pen in hand, but sleep on the brain, make it a Vivarin night!
Lawsuit would shirk individual responsibility

Pointing fingers at someone else can do a lot to cloud your perspective. At least it seems to have really fogged up the view in the case of Rejena Coghlan. Coghlan, the sorority pledge who fell three stories while intoxicated, is being represented by attorney John Etter, who will possibly be filing suits against not only the University of Idaho, but Sigma Alpha Epsilon, Beta Theta Pi and Alpha Phi. On top of that, Gerry Spence, the attorney who successfully defended Randy Weaver on murder and conspiracy charges, will join forces with Etter.

All of this follows in the wake of Coghlan’s accident, when the university and individual Greek chapters immediately began reviewing the existing alcohol policies on campus. Then, Idaho Governor Cecil Andrus pushed for an investigation of the circumstances surrounding the Alpha Phi pledge’s accident, with help from the Moscow Police Department.

Less than a month later, the State Board of Education entered the spotlight, with a few members who proposed an alcohol ban on all Idaho campuses. One member, Secretary Joe Parkinson, went a step further by suggesting the Board work to bankrupt Greek Houses so the university could purchase the privately owned lands.

The situation has now escalated to the above mentioned possible lawsuits. These potential lawsuits seem to follow in the American tradition of “if they are the teeniest bit negligent, sue ‘em!” It is becoming a rapidly growing custom in this country to shirk all your responsibilities as a human being and chase others around for money they owe you for being at “fault.” And now this custom has been brought to the Palouse.

While no one certainly deserves the severity of such an accident, (Coghlan is now paralyzed), it is time people start taking responsibility for their own actions. No one strapped any of those students attending the parties into a chair and forced alcohol down their throats. When one consumes alcohol, he/she is voluntarily impairing the ability of others.

If Coghlan’s attorney wants to point fingers at the Greek houses and university for the availability of alcohol, maybe he should go beyond just suing UI entities. Why not sue the breweries and distilleries who produced the alcohol? How about the ad agencies who promote it and the stores who sell the beverages to college students?

Of course, they could be hoping for a nice tidy sum to act as a band-aid on the already healing wounds.

Even if Etter and his sidekick Spence win these probable cases, what will they accomplish? To Coghlan, the damage has been done and only a lot of physical therapy and determination will pull her through. If the attorney’s goal is to punish the individual houses, it is a little late, as the two fraternities have been put on probation and joined forces with other chapters to promote alcohol awareness.

There is one good thing which could come out of this on-going tragedy and battle. It will hopefully serve as a lesson to all students to be responsible for their own actions.

—Shari Iretion

Earth First?ers juveniles delinquents

The residents of Dixie have families to support. They’re trying to do their jobs and live and raise their kids. There must be some sort of palooza on the side of Earth First! The loggers and miners and farmers and ranchers have things. Many of them have nice things, like their own houses and property, cars and trucks, hubboards and wives and kids who for the most part turn out OK. What do Earth Firsters have? A trip thrown out in the middle of the woods, odd hippie buses, lots of stuff to smoke.

—SEE EARTH PAGE 9
Grabbing hold of nothing

I got a problem with nothing. That's right. I have a problem with something that doesn't exist. I challenge you, the rising young phonies of the 21st century, to imagine nothing. I bet you can't do it. I sure can't. Not that I claim to know anything, anyway. (I guess I just know nothing.)

So try to follow me into the realm of nothing.

"Zero" I'm fine with. Zero is just a lack of a number. Or a lack of a noun, as in "Zero Pencils." It could even be an example of an exam grade, as in "F."

Nothing's an entirely different matter though. Take my first statement. "I got a problem with nothing." It's expository and twines my grey matter in a way not conducive to final exam test taking skills. I don't need to slip out of question-answering mode to explore the meaning of nothing. (That may lead me to the zero experience.)

The definition of nothing is "something that does not exist." If I have a problem with nothing, it must exist, otherwise I couldn't have a problem with it. But since it doesn't exist, I can't have a problem with it. Sounds like some of the conversations I've had with ex-girlfriends.

Take nothing. Well, don't take it, try to imagine it. Nothing, that is, imagine nothing. Pretty difficult. All you have to do is remove all things and there you go.

Now describe it. Ha! You can't! Otherwise it is nothing anymore, it's some thing.

Consider the oft-asked question, "What's it?" And the answer. Nothing. Impossible. If you're not breathing oxygen you're at least taking up space. (Some do this better than others. Burning oxygen, that is, not taking up space.)

OK, let's examine the places where nothing is supposed to exist. (Has into a problem right there. Nothing can't exist. It's against the rules.) In an empty box. Wrong. There's air molecules in the emptiest of boxes. Between atoms, and better yet, between the parts make up atoms. The electrons and neutrons and quarks and protons and such. Now, see that part between the atoms. Imagine the absence of anything. I can't do it.

I can't grab hold of the idea that there is a place where there is not a single particle of matter, energy, thought or sound. After a trip to the beach, sand manages to work itself into every nook and cranny, multiplying in your car, your hair, shoes and shorts. There's got to be something there we can't see. Something smaller than any of the atoms we know. Enough with the small nothing, my eyes squint just trying to think about it and the little voice in my head strives to reach higher, squeaky octaves I associate with very small things. Zoom out to the big things. Space. The Final Frontier.

There's supposed to be a helix-a lot of nothing in space, including that something I can't see called gravity. They tell me that's why astronomers float. Big white here.

But how do you float in nothing? Or worse yet, try to imagine the end of the universe. If you follow the big bang theory, what surrounded that dense little micro-dust particle before it exploded? If there's an end to the universe, what's on that outer edge?

Could you step over the boundary and plummet into nothing? Columbus thought not. Maybe nothing is quantitative. You can have varying degrees of nothing. Some people have more nothing floating around in their craziness than others. Maybe I have a lot of nothing.

What the hell, it's better than something.

Letters to the Editor

Story plunders mining history

My name is Roger Walker. I am writing you in reference to an article that appeared in your newspaper, the Argonaut, on Dec. 12 that was titled, "There's tons of gold in them there hills.

Has Ms. Kate Lyons-Holstein, who narrated the article, been dining in North Idaho long? I am not in disrespect of the piece, but fail to write an historical information claimed in the "I reckon one could call it a story," hinted that the writer came from a land far away.

I do hope that Ms. Kate Lyons-Holstein is a strong, spirited soul, free of hallucinations and doesn't believe in spooks, ghosts and magical-myth characters that appear from out of the past. I am in belief that the lead sentence in her article, "Gangrel, little wrinkled men hunched over a stream," will serve to scare and for certain have awakened a multitude in figures of hard-won frontiersmen long dead, who came to seek and strike for hidden wealth that lay buried in North Idaho, beginning in the history of the 1860's.

The most important bunch of hogwash depicted in Ms. Kate Lyons-Holstein's article was the paragraph naming Charlie Bennis' celestial wife, Polly, being a resident of Dixie, Idaho. All of Polly Bennis's life in North Central Idaho is well documented. The best of that documentation can be read in Sister Alfreda Edmondson's biography, published and compiled in 1972. Polly lived and resided nearly her entire life in, or near, the now ghost town of Warre. Polly came to Warre in 1872. She died in 1933. And twice in all those years did Polly Bennis ever venture north of the Salmon River. The motion picture, A Thousand Pieces of Gold, was entirely fiction. I do believe that Ms. Kate Lyons-Holstein should have been more thorough with her research or consulted a historian of Idaho history before jumping of the dock with no water in the pond before she wrote her article. Any youngster of junior high school or writer who's awake and pays attention to his or her state's history could describe the story.

The northern section of our state map graphically displayed with the article is correctly depicted, except Ms. Kate Lyons-Holstein has inaccurately described the why and what for the reason the creek's derived their present names.

Moose Creek was named for the mining camp and mining district that was found and developed at the mouth of Moose Creek in the early spring of 1862. The area in and around Moose Creek was mined heavily up and into the 1930's.

There is a beauty in a tale about buried or hidden gold that is supposed to be concealed in or very near the old town site.

There were not any "moose" of the four-legged breed in Idaho until the 1860's. Elk and mule were brought into the state about the same time. Ruby Creek was named for the precious stones that have been found there. The Chinese working the Moose Creek drainage in the 1870's were the first Idaho miners to discover, along with hatched baskets full of garnets, that they sold or turned into jewels that sold for a dollar a pound. The stone, "Ruby or Rubies" is found throughout North and North Central Idaho. If Ms. Kate Lyons-Holstein had spent time on thought to research any state diagram published free of charge by both Idaho and the U.S. Department of the Interior, or precious stones to be found in a certain area of description. A Geology and One Deposit Report would have been sent.

Kelly Creek was named after John Kelly, a nearby Idaho fur trapper who without doubt searched for gold. Kelly was friends with many Idaho's early myth makers, Jerry Johnson, Tom Bente, Billy Craig, Billy Rhodes. Several authored historians believe it was John Kelly who found the original discovery that prompted E.D. Pierce to go directly to Canan Culpe in the early summer of 1860, the site that started it all. John Kelly was also involved with Biddy Rhodes and Jerry Johnson in the early 1860's in a silver load discovery that was made in the Moose Creek/Kelly Creek drainage that wound up being called the Rhodes Mine. A more thorough documentation of the naming of creeks and mining.

U.S. Social Security Net...

Social Security benefits are payable to the surviving spouse of a deceased worker. The surviving spouse and the worker must have been married for at least one year, the worker must have died while covered by Social Security, and the surviving spouse must be at least 62 years of age. The amount of the benefit is based on the worker's earnings record and the age at which the benefit is claimed.

Social Security benefits are payable to a dependent child of a deceased worker. The child must be unmarried and under age 18, or at least 18 and not married, or a disabled child under age 22. The amount of the benefit is based on the worker's earnings record and the age at which the benefit is claimed.

Social Security benefits are payable to a parent of a deceased worker. The parent must be the father or mother of a deceased worker. The parent must be at least 62 years of age. The amount of the benefit is based on the worker's earnings record and the age at which the benefit is claimed.

Social Security benefits are payable to a surviving spouse of a deceased worker who is not eligible for benefits under special rules. The surviving spouse must be at least 65 years of age. The amount of the benefit is based on the worker's earnings record and the age at which the benefit is claimed.

Social Security benefits are payable to a surviving spouse of a deceased worker who is not eligible for benefits under special rules. The surviving spouse must be at least 65 years of age. The amount of the benefit is based on the worker's earnings record and the age at which the benefit is claimed.

Gun education also needed to stop killing

For the past several months, opinions concerning gun control have been widely expressed by the readers and the staff of our community newspaper. On Oct. 8, Nick Brown commented on some of the myths passed on as "truths" about gun control.

One of the myths Mr. Brown listed, "The only purpose of a handgun is to kill people," is one I've heard many times. Of course it's a myth, gun owners by gun owners for several reasons such as recreational use and protection of families and businesses.

The funny thing about this is that Mr. Brown may be right about the misconception that a handgun's target is to kill people, but what he doesn't seem to know is the fact of why guns or firearms are designed. Dr. Paul Stephak, an epidemiologist with the Spokane County Health District states that, "The unique thing about firearms is that they are specifically designed for the purpose of killing."

In other words, guns are designed for the purpose of eliminating intruders in their lawful domain without causing fear to the animals for the sport of hunting or for the purpose of destruction or for the act of killing.

Now, let's talk about guns being kept at home by law-abiding citizens. Do gun owners protect homeowners and their children? According to the latest study by Dr. Arthur L. Kellerman, a researcher at Emory University in Atlanta, people who kept guns at home fail to protect themselves from intruders and limited nearly triple their chances of being murdered, usually by friends or relatives. The study was intended to see if handguns really do save their owner's life and their loved ones.

One of the greatest indicators as to why gun owners fail to protect themselves and their loved ones is because they fail to keep guns out of the reach of their children. As a result of this, the gunowner's child is at an alarming rate of becoming another statistic. When a child finds a gun under a parent's pillow or in a dresser, it's likely that the child thinks the gun is unloaded and may point it at a sibling, a friend or even to himself or herself.

Over the past decade, the incidence of these kinds of accidents have increased dramatically. Enough to force legislators of states such as California and Florida to impose penalties onto those gun owners who fail to protect themselves and their loved ones.

The banning of semiautomatic assault weapons, establishing a waiting period before a customer can have access to a firearm, and penalizing a parent for his or her mistakes are not the answers to our problem of gun control. These bills may have some or no effect concerning gun control, in my opinion, but what is the answer then?

Honestly, there is no exact answer to the problem, but I heavily believe that education can be an effective tool against violence. If society is very concerned about the safety of themselves, their loved ones and their friends, then we must educate each other.

This means parents and school teachers educating children and adults educating each other about guns. It's very important for a parent to sit down with their child or children and discuss it with them why there are firearms in the house, when they use it, what they use it for and who uses it.

Surprisingly, the NRA even has a cartoon videotape available for parents and children about guns.

For Erik Rockstrom and the other children injured or killed by guns in Aug. and Sept., it is too late for accident prevention. But for the rest of our children, a similar tragedy can be averted if parents and gun owners take the simple precautions to ensure that their firearms cannot be used by youngsters.

For less than $10, a trigger-lock can be put on the gun to make it impossible to squeeze the trigger. If the gun is stolen or found by a youngster, he or she will not be able to discharge the firearm. In a world where loaded guns are kept in homes, parents must take every precaution to prevent children from their own carelessness or else your child may become another statistic.

Please don't tell me I don't know what I'm talking about because I nearly became a number 11 years ago. This happened because a parent of a friend of mine carelessly left his .22 rifle loaded in the living room on the coffee table.

I treat gun owners, this was no fun for me since the discharged bullet struck me in the nose and caused blindness in one eye, numerous surgeries, and months in the hospital. I can't even explain the terror my family went through, especially my mother.

All I'm asking for you readers to do is, if you own a gun, please take necessary precautions to avoid a tragedy and if you are unsure how to do so, information on gun safety classes for children and adults is available from the Inland Northwest Firearms Council (509) 534-6550 or contact your local law enforcement agency.

I honestly believe education can be an effective instrument to control the violence this country, but if we don't have the courage to do so, the odds are that in one of every four deaths among ages 15 to 24 will result.

GUN CONTROL

Earth

FROM PAGE 6

a chip on their shoulder, and a desire to break the law. So their lifetime goal must be to bring the rest of the population down to their smelly, nasty, no plumbing level.

But radical environmentalists live only to punish loggers for having things. Now they want to punish entire states for having things.

If you've been reading the paper you'll know that there is a group afoot that is trying to establish free-roaming buffalo again. They say that there are some places people just shouldn't live—like North and South Dakota, Wyoming and eastern Montana. These people are a menace to the human race, because they don't understand sometimes things can't be undone.

We can't go back to the age of horses and buggies. We can't put millions of buffalo back on the plains, and we can't undo what's become known to the native Americans, which is what I personally believe is at the heart of this.

There are white people who think the Native Americans want to live like they did before the whites came. So I think if they can get the buffalo going the next thing they're going to try is to empty all the reservations in the country and put the people in the buffalo area, whether the tribes traditionally hunted buffalo or not.

I don't think that Native Americans will use their indoor plumbing and televisions. I think that they will strongly resist any effort to throw them back into the technological era they were in before the Europeans came.

Because if we are going to be really technical about it, we'd have to take their horses away from them too.

This whole spiel is trying to point out the utter nonsense of radical environmentalists.

We can't get control of native Americana and the buffalo back on the plains any more realistically than we can stop logging and mining and ranching.

Because the people on the radical environmental side need to realize that some things just can't be undone.

**UI Symphony will play on Thursday**

The University of Idaho Symphony Orchestra will present their third concert of the season with Dr. Robert Bilups, conductor. The concert, which is Thursday, Dec. 9 at 8 p.m. in the University Auditorium, features The Moldau by Bedrich Smetana, and four movements of The Planets by Gustav Holst.

The Moldau, which is enjoying its second performance by the orchestra, is one of six moving tone poems depicting Smetana's tumultuous homeland, Czechoslovakia. The Moldau is the second movement of the piece, giving musical life to the river Moldau of Czechoslovakia. The Planets, a suite for large orchestra, pushes the orchestra to its limits, employing harp, English horns, celesta and tenor tuba within the standard musical repertoire of the symphony orchestra. The expanded orchestra helps in fashioned the personalities of the planets Mars, Venus, Saturn and Jupiter. The concert, which is the last of the fall semester, is free of charge and open to all.

**Jazz Choir performs Christmas show**

The Jazz Choir will perform two performances at the University Auditorium. The first on Friday at 8 p.m. and the second on Saturday at 4 p.m.

**Books**

**Sudden fiction performed Thursday**

Sudden fiction readings will take place up stairs from Mike's Gyros at 527 Main Street Thursday at 7:30 p.m.

Sudden fiction are stories less than 1000 words. 15 students will be reading, including Poor Chinese Chris Parnsworth, Allen Jensen, Jacqueline Larson, Wendy Nett, Henry de Vrie, Bill Heap, Alexis Yost, Jasmine Myr Stephen, Richard Larry Farnam, Mike P. Johnson, Kim Kolesnik, Michelle Neuman, Jason White, Linda O'Donnell, Linda O’Donnell.

**Carpet plays last show Dec. 17**

Tim Schreiner
Staff Writer

A popular Moscow band, the Carpet, will be playing their last show at the Capricorn on Main Street Dec. 17. Joe Patterson, who plays keyboards and violin for the band, said, "This isn't a normal breakup, where everyone is pushed off at connection to last year's will graduate in the spring, and other members will be going in new directions.

Todd Sprague, drummer for the Carpet, and Mike Campbell, bassist and frequent "growler," will be staying on at the Capricorn to start a new band. Sprague said the new members will be "more of the down-and-dirty kind of sound ... still the same industrial strength rock-n-roll."

"Bryk is running off to climb mountains and play in dairy fields, which is a good way to go," said Sprague of Carpet lead guitarist Eryk Foss.

"We formed solely to play at the Capricorn," Sprague said. He then described the day he and Patterson carried the keyboards from the North 4-D directly across the street on their first day "when we had all the snow piled up down the center of Main."

Sprague said that the new members will be Zack Boyle on lead guitar, who is reportedly an experienced player working at Kinco's, "but plays guitar better" and Rob Lindeman will play rhythm guitar. Lindeman has been familiar as a classical gui- nes player at the UI and Alex's Restaurants in Pullman. Patterson and Sprague wanted to especially thank their fans on behalf of the Carpet. "We just want to thank them for their sup- port. When they graduate their band graduates too," Patterson said, but urged people to keep coming to the "Cap." He will play during happy hour for the Mark IV between 5 and 7 p.m., probably travel to Europe once he gets his composition degree this spring.

Sprague said Dec. 17 is prob- ably going to be the biggest part of the whole Carpet career. The spirit is still alive."

The public is invited to offer names for the new band. Suggestions have included "Full Body Bag," "The Gone Pool" and "Electric Fence." Patterson quipped that another idea is "Unterflowers, but that will only be good for another year."

**ASUI Production wraps up semester**

Halo DeWitt
Staff Writer

We had songs, we had fun, we had concerts in the SUB, but now the full semester of 1993 has come to a virtual end. The ASUI Productions calendar is dormant until January 1994 when all of the students return from getting themselves on yet another holiday feast and making great deals from Santa's red bag.

Unlike the calendar, the staff of ASUI Productions is busy getting ready for next semester's lineup of fun. They are keeping busy all year making plans and booking performers to fill the entertainment hours of students with laughs, music and films.

According to Bill Weppner, coordinator for the concerts section of ASUI Productions, this semester has been successful overall. There have been a few events that were disappointing, but he said he learned something from all of them. According to Weppner, attendance at some of the concerts was low, but all of the people in attendance had enough fun for a full crowd.

Weppner said, "We are trying to maintain a certain amount of contin- uity in the line up of entertainment from seasons, as well as the booking of World Music presents the Nahui Ollin, and networking with local events. Several of the program's board positions are permanent and some

Zappa's Universe, still alive despite death

Russ Woolsey
Libretto Editor

For over 25 years Frank Zappa mesmerized music audiences with his zany combinations of jazz, rock and metal, improvisation and philosophy. At the age of 52 Zappa left behind a legacy of music that has filled a modern niche in society, when he died in his Los Angeles home Saturday evening.

Celebrating this music legacy in a timely fashion is Zappa's Universe, a score of works written by Frank but not performed by him. Recorded on Zappa's 50th birthday at the Ritz Theater in New York City in 1991, and released in June of this year, Zappa's Universe is a tribute performed by a symphony orchestra, a rock group and a host of other artists.

The program kicks off with "Elvis Has Just Left the Building" which features the orchestra and then moves into some of Zappa's first work, such as "Brown Shoes Don't Make It" from Absolutely Free recorded first in 1967.

The album takes the listener from these early days of Zappa masterpieces to the long jazz-influenced road that Zappa traveled with the songs "The Man from Discharge Party Hats" and "Echidna's Arise (of you)," both of which touch on sanity briefly, and takes jazz to new improvised heights.

The cut "The Meek Shall Inherit Nothing" from Thing Fish, recorded in 1963, are examples of how politically-esthetic-oriented Zappa could get with his angry cry for economic justice in the lyrics: "Tax the churches! Can we get a witness? Tax the fucking churches!

Zappa's Universe was arranged and conducted, with permission of course from the gurus, himself, by Joel Thome. Zappa released around 50 albums in his life time and won a Grammy Award in 1988. His classical compositions have been performed by major orchestras all over the world. Most recently Zappa took on Tippin Gure in a battle about censorship in the music industry.

Steelhead fishing throughout the winter doldrums

Outdoors With...
Nick Brown

Steelheading has slowed to one fish every 50 hours, there isn't enough snow to justify a late steelheading trip for all, and the pleasures are wild as wolves.

This is usually the time of year to put the rifle up and concentrate on the outsized run steelhead slicking in the deep, slow pools below Orofino. When the water temperature is less than 25 degrees, the fish can often be found in the "frog water" — slow moving water found in such holes as lower McGill, and the upper reach of Black Rock.

Problem is, the fish aren't moving. Lower Granite fish counts show only a handful of metalheads crossing the dam each day. Considering that there are only half as many of the beauties returning as compared to banner runs in recent years, it looks like more screaming, frozen toes than screaming, smoking reaks. So in nutshell: steelheading seeks, at least until the fish decide to cross that last concrete plug in the Snake and head for Idaho waters. If watching a hoover float by two solid days before it goes under ain't your bag, consider a late season bow hunt. An unshotted deer tag and an archery stump will allow you to chase deer on the South Fork of the Clearwater in Unit 15. This hunt offers a better than average chance of avoiding a meatless winter. When the snow piles up and then freezes, creating a tough crust, deer migrate on mazes to the South Fork corridor, where they'll spend the winter. Deep snow alone will not make the deer migrate. But when it melts a little, then freezes again, big game won't spend much time trying to paw through the tough crust for their grins. Witnessing a femalized, all-out big game migration is something you won't soon forget whether you bring home some backstraps or not. Speaking of venison, you might want to share some steaks with someone who tried to fill the feeder via Maxi-ball this year. The number of mule-deer hunters seems to have tripled this year, but more importantly, the elk population seems to be down. This is a good recipe for grumbling, unhappy hunters. A local resident told...

**SEE FISHING PAGE 12**
Fishing

From Page 11

are that this was his worst year ever, and speculated that local elk numbers may be down as much as a third. From Sandpoint to Spald Springs, the same story occurs: the winter of '92 was not kind to big game. In southern Idaho's Magic Valley, sportmen are calling for Jerry Conley's head on a pike, claiming that the Fish and Game has mismanaged deer herds. No doubt, Idaho sportmen have enjoyed winter days afield. The thing to remember, especially in a "bad" year like '93, is that game populations go through up and down cycles. A review of the past decade's steelhead runs can be likened to monitoring a failing heart patient's screen monitor: a couple of strong "beeps" followed by a short, yet frightening, weak beep. Weak beep - strong beep - weak beep (can it be that direct?), strong beep. (Fish! Alkali, Idaho's hunting and fishing scene, etc.).

Pleasants and chukars get hammered by a wet, cold spring but they always bounce back. Elk string together a couple of mild winters and hens begging at the seams. Ancient, toothless bulls that in a normal winter would die and become coyote bait make it through the winter. Enough bastards see them to make everyone think everything is okay.

Over time, retaining quality habitat is key for healthy populations. An "off" year shouldn't distract sportmen from fighting for quality habitat by working with proven conservation organizations like Ducks Unlimited, the Rocky Mountain Elk Foundation, or the Frank Walton League.

This fall won't be traversed around future campfires as "The Year" for anything. About all you can do is roll in, be thankful for the memories, continue working for better habitat and wait for better times.
The Nutcracker performs tomorrow

The Festival Dance and Vocating Arts will bring the famous ballet production of "The Nutcracker" tomorrow and Friday to Lewiston and Pullman. This year will be the 23rd season the Festival Dance has sponsored this popular holiday attraction in the Palouse region. From 1970 to 1978 the ballet was performed by local professional dancers of the Ballet Folk of Moscow. Later the American Festival Ballet, now based out of Boise, presented the ballet.

This will be the third year the Eugene Ballet will perform. Eugene Ballet is under the direction of Billy Gorman and Toni Pimble. The ballet is touring the west, taking "The Nutcracker" to audiences from Canada to Arizona while they are on the road for four weeks.

The ballet takes the audience into a realm of fantasy and magic where an enchanted Nutcracker battles giant mice and a young girl named Clara journeys to the Kingdom of Snow and the Kingdom of Sweets where she is entertained by the Snow Queen and King, the Sugarplum Fairy and a court of dancers from throughout the world. Popular dances from "The Nutcracker" include the Waltz of the Flowers, the Dance of the Sugar-plum Fairy, the Russian Trepak, the Arabian Dance, and the Grand Pas de Deux danced by the Sugarplum Fairy and the Prince.

Tickets for the Lewiston performances, which will be Wednesday through Friday, are $4 for adults and $2 for children. The Pullman performances are $5 for adults and $3 for children. Tickets are available at the Select-A-Seat outlets and at all G&J Ticket Express outlets, and at all Idaho Ticket Express outlets.

Tickets are $10 for adults and $5 for children. In connection with "The Nutcracker" performances, Festival Dance is conducting a holiday food drive. Audience members are asked to bring a donation of canned food to the performances for area food banks.

Don't Miss It!
Terriers ousted from playoffs

Katé Lyons-Halestine

Sports Editor

The Boston University Terriers took the last-minute comeback to the extreme Saturday as they scored two touchdowns in the final 51 seconds of the game.

"The game was not over until the last tick," Boston head coach Dan Altice said. "As a football team we gave it one heck of a ride."

The University of Idaho Vandals claimed a 21-14 NCAA I-AA quarterfinal playoff victory over Boston, eliminating the Terriers from further post-season action. The Vandals are now one victory away from playing in the NCAA I-AA championship game.

"With only two minutes left they refused to die," Idaho head coach John L. Smith said. "It was a little hectic there, wasn't it? It was pandemonium."

Third string quarterback Chris Pincince connected with Chris Walker from the five-yard line for the Terriers' first score of the game. Boston then needed to gain control of the ball again quickly. When they kicked off, the onside kick paid off as Boston recovered the ball on their own 44-yard line.

Pincince found Jay Hobbs downfield and connected for a 43-yard gain. The Pincince-Walker connection resulted in another Boston touchdown.

"(Idaho's) defense didn't do anything special," Boston quarterback Dougerty said. "As an offense we didn't execute, a lot of that was my fault. I took some sacks and we got hurt by that."

But the last-minute effort was a little too late. Idaho had already built what appeared to be an insurmountable lead. With only 1:23 left in the game Idaho held a 21-0 advantage. It seemed Boston was facing a shut-out.

Boston had not been held scoreless in the first half all season. They hadn't been held completely scoreless since their meeting with Temple Sept. 5, 1992 when Temple triumphed the Terriers 35-0. Colgate was the last I-AA team to hold Boston to zero points. Colgate downed the Terriers 36-0 in 1987.

The Terriers lost first and second string quarterbacks to shoulder injuries. Robert Dougerty, who started for the Terriers, suffered a separated shoulder in the third quarter. Second string quarterback Greg Moore received a similar injury.

The Vandals exploded on the field, seemingly overpowering the Terriers during their first possession of the game. Doug Nussmeier and Alex Alies open for a 34-yard pass to set Idaho up the Boston 21-yard line. Sherridene D. May and Joel Thomas marched the ball to the one-yard line. May finally broke the plane of the goal line to score.

Midway through the second quarter Paul Laudano sacked Nussmeier for a four-yard loss on a third and nine play. Idaho was forced to punt.

"Our defense has been playing well all year," Allen said. "They make the big play and we just didn't capitalize on it."

Pablo Rodriguez recorded an interception early in the game and Chris Helon, who leads the country in all divisions in interceptions, picked off another Nussmeier pass late in the fourth quarter. It was Helon's 12th and final interception of the year.

Boston had one sure touchdown pass dropped in the first quarter and missed two field goals. Hobbs was open in the corner of the end zone and the pass hit his chest and bounced off.

Photo by Anne Drobish

Boston's Zach Burwell doesn't manage to get Idaho's defense on this carry. Burwell rushed for 79 yards for the Terriers, but failed to score a touchdown. Idaho's defense foiled the Terriers, totaling 25 sacks and five quarterback sacks.

"With only two minutes left they refused to die. It was a little hectic there, wasn't it? It was pandemonium."

—John L. Smith

Vandal head coach

BOSTON'S Zach Burwell doesn't manage to get Idaho's defense on this carry. Burwell rushed for 79 yards for the Terriers, but failed to score a touchdown. Idaho's defense foiled the Terriers, totaling 25 sacks and five quarterback sacks.

"With only two minutes left they refused to die. It was a little hectic there, wasn't it? It was pandemonium."

—John L. Smith

Vandal head coach

The Vandals were awarded the win against Northern Illinois University a week ago. Idaho and NIU met earlier this season at UConn's annual "Tournament of Champions." Idaho originally won, but NIU's coach protested a decision by the officials. Tom Hilbert filed an official appeal and it was decided Idaho's victory would stand.

Tuesday, December 7, 1993
Boston's Pablo Rodriguez tries to pull down Joel Thomas as Thomas rushes for the end zone. Thomas led the Vandals with 99 yards rushing on 15 carries. Rodriguez managed six tackles against the Idaho offense, one for a loss of six yards. Thomas has emerged as the No. 2 running back for Idaho behind Sherrod May.

OUSTED

FROM PAGE 14

Gilroy led Idaho's receiving corps with an 83-yard touchdown reception. It was the only catch of the game. Boston's Todd Farrell was playing about 3 yards in front of Gilroy, gambling Nussmeier's lob would fall short. It didn't.

Boston held a 21-0 lead at the opening of the fourth quarter. "It was a great catch by Andy and a great block by Kyle downfield," Nussmeier said. "I thought it was incomplete and I turned around and he had it." Farrell said, "If I had intercepted it it would have been a different game."

The Vandals turned in a conservative first-half performance, but turned the action up a notch in the second half.

Nussmeier totaled 188 passing yards for the game. Thomas, May and Nussmeier were the only Vandals with rushing yards. Thomas led Idaho with 102 yards, May had 72 and Nussmeier followed with 61 yards.

Boston retires for the season with a 12-1 overall record. Thomas led Idaho with 112 yards, May had 72 and Nussmeier followed with 61 yards.

Boston takes the No. 2 ranking in the nation. "I wish Idaho the best of luck and when they're champions we can say we were beaten by the best," Allen said.

Idaho continues in the NCAA I-AA playoffs and advances to the semi-finals.

Idaho takes on Youngstown State University at 9 a.m. PST. The game will be broadcast live on Prime Sports Northwest, cable channel 40.
Ohio State cruises to victory after first game defeat

Andrew Longeieig
Staff Writer

COLUMBUS, Ohio — The greatest volleyball season ever to University of Idaho history, and probably Big Sky history, ended Sunday.

Idaho took control in the first set, winning 15-7. Unfortunately, Big Ten runner-up Ohio State was victorious in the next three, 15-6, 16-14, 15-2.

The loss ended the Vandals’ season and left them with a 23-4 record.

After trouncing Appalachian State in straight sets in Memorial Gym Saturday, the Vandals became the first Big Sky school to ever win an NCAA match.

According to Vandals head coach Tom Hilbert, the Buckeyes were even better than they expected. They were led by Gabrielle Jobst who remarkably recorded 31 kills.

“She was really the difference in the match. She was hard to stop,” commented Hilbert.

Idaho began the match with four straight points, three of them service aces.

The Vandals went on a six-point scoring streak with Leah Smith serving in the second game. Smith retired with the score in Idaho’s favor 10-5.

The Vandals were up 3-1 in the second game. However, the Buckeyes scored 11 consecutive points and eventually won the game. Jobst recorded a kill off a Vandals block set up by Smith and Van Haverbeke to ice the game.

Hilbert stated, “We played exceptionally well in the first and third games. We just didn’t get the breaks at the time we needed them. The third game was the key in the match. After we lost that, it kind of took the wind out of our sails and we were blown out in the last game.”

In the final game OSU went up 5-1, but Idaho didn’t give up. The Vandals and Ohio traded possession through a series of seven side-outs before Idaho’s Nancy Wicks managed a kill and Idaho closed the lead.

We just didn’t get the breaks at the time we needed them. The third game was the key to the match. After we lost that, it kind of took the wind out of our sails and we were blown out in the last game.

—Tom Hilbert
Idaho head volleyball coach

Idaho wouldn’t score again, but did manage to stop OSU on scoring spurs.

Tricia Stragliotto served three consecutive points before Van Haverbeke managed a kill to give Idaho possession.

OSU was leading 8-0 and Jobst placed a tip over a three-person Idaho block for a kill.

Sara Daniel was the final OSU server. Carrie Leonard recorded a kill to bring Ohio to match point and an Idaho hitting error gave Ohio State the game.

Jessica Puckett led the Vandals with 19 kills, with Mindy Rice and Wicks adding 13 apiece. Puckett also recorded a game high 20 digs.

Dee Porter added four kills and 47 assists for Idaho.

“She (Puckett) played very consistently and was very competitive. She played neck and neck with every...”

Clary turns in outstanding game, but not enough

Josset Draper
Sports Writer

Some classic women's basketball was played last weekend before Brigham Young University was named champion of the Metro Atlantic Classic.

Four teams (BYU, Nebraska, Pacific, Idaho) were trying to chart their way to the tournament. After BYU and Nebraska tipped things off, the Lady Vandals took the court to face the University of Pacific Tigers.

Idaho came out to play as they got the initial tip. Pacific wasn't then just to par through, and they took early command of the game.

Undefeated Jennifer Clary's shooting display, the Lady Vandals kept the game close.

Down 3-17 midway through the first half, the Vandals were able to close it 40-38 before the buzzer signaled the end of the half.

The second half began just as the first ended, with Pacific maintaining control but Idaho not letting go.

Down 63-54 with a little more than six minutes left, Cathy Payne nailed three more pointers to the scoreboard hitting a 3-pointer from the left side.

The Lady Vandals then began to slow away opportunities to tie the lead as they committed a foul and quick turnovers.

Pacific didn't waste any more time as they regained control with a seven point lead and four minutes, 48 seconds remaining on the clock.

Clary led Idaho's charge back as she hit from downtown, cutting the Tigers' lead to four.

With a little over two minutes left, Clary drained a jumper, slicing Pacific's advantage to one which forced the Tigers to take a timeout.

An overabundance of fouls killed Idaho as Pacific quickly went back up 79-73. Time expired as Pacific sent Idaho to the consolation game by the score 86-76.

Clary led all Idaho scorers with 30 points. Any Detrading added 15 for the Vandals.

Nebraska, still smarting from their loss to BYU, looked as if they were going to take it out on the Lady Vandals as they quickly jumped ahead 4-0.

Clary stepped up again for the Vandals as she quickly went to work outside. She popped in a 16-footer, and one from nine feet out, giving her team the 7-5 lead with a 3-pointer.

Keri Wyrko added two more before the Lady Cornhuskers plowed back to regain a 6-point lead.

Detrading ended the Vandals' drought with a four-foot jumper and Clary shot and scored from long range to put Idaho up by three.

Tina McClain's lay-up gave the Cornhuskers a lead they would never relinquish.

Nebraska continued to go on a shooting spree, going up by 12.

Idaho did finish the first half on a high note as Clary hit two of her first half 16 points with six seconds left to pull the Lady Vandals to within 10 points.

Lady Vandals fans were hoping for a comeback were blazed by a Nebraska team which obviously liked scoring points more than hustling over.

Nebraska came out shooting as Nafeshah Brown quickly got a lay-up which was followed by a Lisa Brenden long ball for three.

Clary then stayed downtown to score a 3-pointer to put Nebraska up by 15 points.

But, Clary would answer with a jumper. She then would be contained for over nine minutes without another point.

Down 86-62 with a little over six

In our loss we never gave ourselves a chance to win. I thought that we got better this weekend.

—Joe Cravens

OSU player on their team," said Hilbert. After the Vandals front attack line set a U.S. record for hitting percentage versus Appalachian State at .506 last week, the Vandals dropped dramatically to .290 Sunday.

Wicks, however, hit .250 to lead Idaho.

Brittany Van Haverbeke led Idaho in blocks with six. The Vandals outblocked the Buckeyes 11-9.

Joe's, besides her 31 kills, led all players with a .551 hitting percentage. OSU finished overall at a .429 mark.

"We would like to take the next step and go to a higher level," said Hilbert. "But we'll do that in the future."

With the Vandals' impressive improvements each season, you can bet the farm, the cow, and even your favorite dog that the Vandals will progress — maybe to a national title.

Safeco/University Inn Classic

No, they let Nebraska go on a 6-0 run and the Cougars, led by Brown's 27 points, kept running away as they finished Idaho off 107-74.

Clary finished the night with 26 points, which helped her win a spot on the All-Tournament Team.

The BYU Cougars surfed over Pacific 56-74 to win the Safeco/University Inn Classic.
