**FEES likely to increase 12 percent**

BY LISA ANDREW

S tudent fees will likely increase by 12 percent next year and that's a good deal for the University of Idaho, according to ASUI President Leah Clark-Thomas.

"We were anticipating that the state board would come back with 15 percent or in excess of that," Clark-Thomas said. "It's a good deal for UI and all our campuses." Clark-Thomas said this would allow the university to continue to train students in the most current fields and it is a good thing for the future.

The State Board of Education agreed to let the universities ask for increases up to 12 percent next year. The board met in Lewiston just before the Thanksgiving break.

Clark-Thomas said the additional money the state will receive from the increased fees will be around $27 million per year. Students currently pay $536 per semester.

University presidents had asked to let them increase fees at least 15 percent, according to University of Idaho President Don Staley.

Clark-Thomas said the university system's total revenue for 2002-2003 will be about $138,000 per semester. Students currently pay $536 per semester.

Retired UI professor enjoys rewards of volunteering

Don Harter speaks from experience when he says students will reap rewards by volunteering in and outside the classroom.

"You will get a return on your investment and encouragement in professional growth that you will get no other way," said Harter, 61, a retired agricultural economics extension professor at the University of Idaho.

When 1971, Harter has traveled all over the world to share his expertise, especially in marketing, and taught. He retired in 1996 and has volunteered full time since then. He uses his personal computer and all-outdoor activity interest in different opportunities.

In February, he headed to the state of Georgia to set it in a capital murder trial with the hopes of helping the accused, convicted, to be sentenced to life in prison and not to death. "When you give something and get nothing in return, it is a special satisfaction," Harter noted.

"I think the reason so many students who are in the classroom, they should try to be on your belt at a professional level, and they are. I think it's a very satisfying experience," Harter added.

The personal growth achieved through volunteering will give a person greater on an edge than putting in extra hours, Harter noted.

"I'd never volunteered, so I'd be doing some additional work, but for me, I think it's a great opportunity," Harter added. "I think it's a great way to get a little more done."

...could observe an ending of the cold conflict. The last of the Taliban, some 300 rear guards, have surrendered. The Afghan government, which has already committed enormous resources to this war, has now declared the war over.

The next question is how to handle the Talibans, who are now in Afghan hands. There are three main options: military action, political negotiations, or a combination of both.

Military action would likely involve a large-scale military operation, with possible air support from international forces. This would be a costly and risky option, and it is not clear how effective it would be in dismantling the Taliban infrastructure.

Political negotiations could involve talks with the Taliban, possibly under the auspices of the United Nations or another international body. This would be a more difficult and time-consuming option, but it could potentially lead to a more stable and lasting solution.

A combination of both options could also be considered, with military action used as a last resort if negotiations fail. This approach would also require international cooperation and support.

In any case, the United States and its allies must ensure that any military action or negotiations are carried out in a way that respects Afghan sovereignty and avoids further suffering and displacement of civilians.

GEOREND REDMAN

WASHINGTON, D.C. — A highly placed official in the White House, a former high-ranking Pentagon official, says that the United States is preparing to send a military force to Afghanistan to help enforce a cease-fire between the Taliban and the Afghan government. The official, who spoke on condition of anonymity, said that the force would be small and would be deployed in the next few weeks.

But other officials have said that the United States does not have a clear plan for dealing with the Taliban, despite the fact that the group has been defeated militarily in the past.

The United States has not yet publicly announced its intentions, but officials have hinted that the country is considering a military response to the Taliban.

The Taliban, who have been active in Afghanistan since the 1990s, have been engaged in a conflict with the Afghan government for the past decade. The conflict has resulted in thousands of deaths and injuries, as well as significant economic damage.

The United States has been involved in the conflict since 2001, when it launched a military campaign to overthrow the Taliban regime.

The campaign, which was led by the United States, has been largely successful in terms of military objectives, but the Taliban remains a significant threat to Afghanistan and the region.

The United States has also faced criticism from some quarters for its military interventions, which have been criticized for being costly and ineffective, and for causing unnecessary civilian casualties.

In recent weeks, the United States has been considering a range of options for dealing with the Taliban, including a military response, a political approach, or a combination of both.

The United States has repeatedly stated that it is committed to a political solution to the conflict, but it has also made clear that it is willing to use military force if necessary.

Yesterday, the United States announced that it was sending a military force to Afghanistan, which would be deployed in the next few weeks.

The force, which would be small and would be deployed in the next few weeks, would be tasked with enforcing a cease-fire between the Taliban and the Afghan government, according to the official.

The official said that the United States is preparing to send the force to Afghanistan in the near future, and that it is working closely with the Afghan government on the details of the deployment.

The official said that the United States is also working with other countries in the region, including Pakistan, to ensure that the Taliban do not gain a foothold in the region.

Teaching math the new way

Students do not like math. No revenue, no new fiscal. Certainly the story of these days rulers and so there, math was far from the front line. But now it does not exist for some of us who do not see it in this way.

One of the reasons why math is not liked is because it is not taught in a way that is engaging and fun. Students need to be shown how math can be applied to real-world situations. This can be done by using games, puzzles, and interactive activities that make math more interesting and relevant.

Another reason why math is not liked is because it is taught in a way that is too difficult and abstract. Students need to be shown how math concepts can be broken down into smaller, more manageable pieces. This can be done by using visual aids, such as graphs and charts, to help students understand math concepts.

Finally, students need to be shown how math can be used to solve real-world problems. This can be done by using case studies and examples that show how math is used in different fields, such as engineering, science, and finance.

In conclusion, math can be taught in a way that is engaging, fun, and relevant. By showing students how math can be applied to real-world situations, and by breaking down math concepts into smaller, more manageable pieces, we can help students see the value of math and develop a positive attitude towards it.
Small town life provokes divine

The Department of Theatre Arts will stage a five-day run of "The Glass Menagerie" beginning Wednesday.

Written by Tennessee Williams in 1944 and performed several times in university environments since, the play is a tender but harrowing tale set in a tiny, familial community in southern Louisiana. The play, which follows a family whose means is out of sync with the stump and its off-shore, like a "royal round square."

The drama revolves around the family's way of life and the inner workings of its members. The journey involves a family's attempt to survive and thrive in an uncertain world, dealing with issues of identity, love, and loss.

Brian Topaz stars as Buddy Layman in the comedic送来。“The Linguist.”

His mother was killed in the water while she was trying to save him.同化his drowning. Layman becomes inseparable after the accident and death. He has to be the face of water. – The mother.

The stage is set in the place where the two worlds, real and imaginary, collide. The story’s main character, Buddy Layman, is a 15-year-old boy who is struggling to come to terms with his mother's death. He is helped by a face who speaks to him. The play explores themes of family, loss, and the power of imagination.

The cast includes Ken Bennett of the Arts Center, and Amy F. Hall of Wayne State University. The production is directed by Professor Rebecca Soderberg of the Department of Theatre Arts.

The play will be performed at 7:30 p.m. each evening from April 12 to 16, with a matinee performance on April 15. All performances will be held in the University Theatre. Ticket information will be available soon.

The play is part of the department's ongoing commitment to bringing new and innovative works to the forefront of the arts. The production is a testament to the power of storytelling and the importance of family. It is a reminder that, even in the darkest of times, there is always hope and love to be found. The play is a celebration of the human spirit and the resilience of the human heart.
No one told you the hardest part of being an engineer was finding your first job. Of course, it is still possible to get the high-tech work you want by joining the U.S. Air Force. You can leverage your degree immediately and get hands-on experience with some of the most sophisticated technology on earth. To find out how to get your career off the ground, call 1-800-423-USAF or visit our Web site at airforce.com.
The Vandals football team had a rough Thanksgiving break, dropping two games as the Las Vegas Bowl and against Tennessee. The team dropped a close 42-37 loss to the No. 14 Ole Miss Rebels. Despite the loss, the Vandals showed some semblance of fighting back.

"Our kids played their butts off tonight," said the head coach. "We know we can't win every game, but tonight we really showed we can beat some of the best teams in college football."

The Vandal football team is now 2-6 for the season and 0-6 in conference play. The team will continue to work on their skills and strategy for their upcoming games.
Men's basketball 1-1 after loss to BSU

The University of Idaho men are 1-1 going into the first full week of the 2001 basketball season with a win away from Western Montana in the opener and falling to the Cougars on the road. The Vandals will be on the road in the Big Sky-Peaceville Saturday night. In the final two minutes Branch's Benjamin Wilson scored two free throws but a resilient and put-back by Jason Ellis gave the Broncos the five points to lead. The Broncos won 68-66.

Twenty-four turnovers, Twenty-eight points, Thirty-three points, Thirty-three fouls, Thirty-three rebounds, Twenty-four turnovers, Twenty-eight points, Thirty-three points, Thirty-three fouls, Thirty-three rebounds, Twenty-four turnovers, Twenty-eight points, Thirty-three points, Thirty-three fouls, Thirty-three rebounds.

The Broncos lost the lead at half (30-29), but held the second half lead 11-17 from the field to the Broncos. Boise State's Abe Fitch scored 12 points, Jason Ellis scored 15 points, and Branch's Benjamin Wilson scored 13 points. The Vandals played well defensively against a team that generally
ran a zone offense, said Coach Don Miller.

A homecoming victory
Left: The Vandals will take on the
St. James Rams tonight, the last of
two home games scheduled for the
Vandals this season.

“Since we’ve been back, we’ve
been playing better together as a
team,” he said. “We’ve been
playing better on defense, and that’s
taken a lot of pressure off the
offense. And that’s what we need to
keep on doing.”

The Vandals will face their third
straight game on the road tonight
when they take on the St. James
Rams.

“After the ECAC, we really
thought we were going to be able to
win this game,” Miller said. “But we
ended up losing. And we’re going to
have to get better if we’re going to
win tonight.”

Miller said the Vandals will have
to rely on their defense to get the
job done tonight.

“I think we’ve got a good chance
to win this game,” he said. “But we
have to play better than we did last
time.”

The Vandals will look to improve
their record to 1-4 overall.
