Gunderson takes architecture position

By Bruce Cunningham

Gunderson has a busy semester ahead of her before she graduates in May with a master's degree in architecture. She has 10 weeks to finish her thesis, design, Green House Building on Main Street.

She currently is president of the University of Idaho AIA chapter, planning fund-raisers and programs. And in between all this, she will take several trips to prepare for her national AIA position. She attended the American AIA conference last summer where she decided to run as a candidate for AIA.

During winter break Gunderson declared her candidacy at the annual AIA forum. She spoke to a group of approximately 700 architecture students.

"I worked, I totally get it. Everyone slapped several times during my speech," she said.

Later she participated in the officer candidate debate before leaving her seat this morning.

"It's really tough," she has to say a lot of stuff before she begins her new job. Then, she said in the fall she is going to touch a lot.

"It would be great for most people to think of," she said, "but I think I'm going to miss a lot. I hope she gets a chance to make good choices as she goes." said UNWEVER, See Page 8

ASUI rallies for student involvement

By Megan Otto

In an ongoing efforts to encourage students to participate in campus activities, the ASUI is planning the Student Union Rally this month.

The rally will be held in the Common's food court from noon to 3 p.m. in honor of those students who come in and out of the building.

Speakers included Krista Berg of the vice presidents office, Faculty Council Chair Dan Smidler and former Senate President Pat McKeever.

All of these spoke about the growing need for involvement from students in the core centers for higher education.

ASUI Senate Pro-Temp President Krista Berg spoke of the lack of student participation in legislative issues just in years. It is our goal to increase the number of students involved," she said.

The goal is for every student to participate in a group of campus board or executive. Students will be given the opportunity to vote on all of the students in the state who were the main messages that the rallies are trying to get across.

The rally for the future include students, faculty and staff on the importance of involvement with people in Idaho. It's not against them," Smidler said.

"We're trying to make the people feel involved, not afraid of the system. By participating the students, faculty and staff get involved in the world of our university McKeever said, and benefit.

It's open to the public.

McKeever added the message must be be the message the students that should be sent, according to Smidler, is the message not just McKeever and higher education. You can't go anywhere with a high school diploma. It's really important for students to represent themselves in the process.

We want to emphasize new, not afraid of the system. By participating the students, faculty and staff get involved in the world of our university McKeever said, and benefit.

It's open to the public.

By working together to change the voices it is possible to make a positive impact on the environment. By reaching out among the voices of the college the message sent must be to the students who want to be reached by students, according to Smidler, is the message not just Smidler and higher education. You can't go anywhere with a high school diploma. It's really important for students to represent themselves in the process.

Middle East students return following Sept. 11

Parade of 55 students from the Middle East at WSU and Washington State University following Sept. 11 have returned the warning. "The reasons for coming back are the same," one student said. "We want to show that we are not a group that was attacked in a good reputation." as international officials know for WSU International Programs but a Polish student said in a phone call.

Most of the students who left last week were from the United Arab Emirates and were transferred to WSU from other colleges. The United States is the result of solving things. They were afraid of all war and the war was over. "The reason was it was a good idea to leave because the war is going on. We want to show that we are not a group that was attacked in a good reputation," as international officials know for WSU International Programs but a Polish student said in a phone call.

Gallery celebrates Black History Month through art

Photographs on the cover are displayed at the Complex Union Gallery at Washington State University. The exhibits opened Monday and remains open until Fri., Oct. Gallery hours are 10 a.m. to 4 p.m. Monday through Friday. The gallery will be closed Oct. 13, Presidents' Day.

This collection of photographs was compiled by Ansel Adams of the WSU department of art. It is a collection for the American student or the American teacher and American students of African American

Joint Military Ball

The University Student Union Ball will begin the Joint Military Ball Saturday. Brigadier General Lawson, the newly commanding general of the United States Command, will speak to members of the ROTC programs at Washington State University. The University Student Union will host the event. The ball will begin at 7 p.m. and will include a dinner, social matching ceremonies and dinner.

The ball to open the ROTC programs and their guests only.

UI Outdoor Club reaches highest summit in South America

Three men out of a group of seven reach top, only one returns home early

by Tom Nicolson

Two University of Idaho students topped 32,465 feet Mt. Aconcagua last month. "We're just happy to be home," said Don Rupp, one of those students. Rupp and partner Jim Kappes were part of a seven-person team to climb Mt. Aconcagua Jan. 7. The team was made up of members of the UI Outdoor Club and friends. Rupp was joined by his brother Gary, Glenda Blakesley, Dan Skolnick, Rob Ward and Chris Haagen.

"In the old days, an expedition was considered a success if they made it to the summit," Blakesley said. "This was an experience I'll never forget.

The highest peak in the Americas, Aconcagua is one of the highest mountains on earth and one of the highest mountain ranges in the world. Climbers must deal with dangers of high altitudes. Climbers are always at alert for the signs of cerebral and pulmonary edema. Both of these conditions can be deadly. The elevation on the summit is 22,628 ft. and the temperature on the summit at times goes below 70 below zero.

"This expedition showed me that the mountains are waiting. I really add to the impact the mountains have on me," Rupp said.

The climb involved over 30 days of climbing up and down the highest peaks in the Americas. The climb involved over 30 days of climbing up and down the highest peaks in the Americas.

"I'm very proud of the fact that we've climbed Aconcagua," Rupp said.

At the top, the team was joined by their guide, a mountaineer. Rupp said he was very pleased with the team's performance.

Let them attend university

Surge in admissions may be result of economic slowdown

The staff at the Idaho State University witnessed the economic environment firsthand earlier this year when a number of their students decided not to return to campus. This year, the university has experienced a significant increase in student enrollment, with more students returning than in previous years. This trend is likely attributed to economic factors rather than an increased interest in higher education.

The surge in enrollment is not limited to the University of Colorado, as other institutions across the country have also reported increased student numbers. This phenomenon is believed to be driven by the economic conditions, as students may be choosing to pursue higher education to improve their job prospects and earn more income.

As the economy continues to recover, it is expected that this trend will continue, with more students seeking to enhance their skills and knowledge to improve their career prospects. However, it is important to consider the sustainability of this trend and the long-term impact on the higher education system.

Arguments can be made for and against this trend. On one hand, increased enrollment can help address the skills gap and address labor market shortages. On the other hand, it may put financial strain on universities and affect the quality of education.

In conclusion, the surge in student enrollment is a significant development in the higher education landscape. It is important to monitor this trend closely and consider its implications for the future of higher education.
Arnold Schwarzenegger is back in the same old role

By Chris Kushe... 

WYNN & ENTERTAINMENT

Ted Brewer, who has long been famous for his "Collateral Damage," is back in the same old role. While "Collateral Damage" was a thriller, "Old of the Mainstream" is a disaster movie. Brewer is the director of both movies, and he is known for his ability to make movies that are both visually and audibly impressive. In his latest movie, "Old of the Mainstream," Brewer has created a disaster movie that is even more impressive than his previous work.

The story of "Old of the Mainstream" is set in a future world where the Earth is on the brink of environmental disaster. The planet is being destroyed by a combination of natural disasters and human negligence. The movie follows the story of a group of scientists who are working to save the planet from destruction.

The scientists are led by Dr. Arnold Schwarzenegger, who is played by himself. Schwarzenegger is a scientist who is dedicated to saving the planet. He is joined by a team of experts who are also dedicated to the cause.

The movie is filled with action and excitement. The scientists are on a race against time to find a way to save the planet. They face many challenges along the way, including natural disasters, political hurdles, and even threats from other countries.

Despite the challenges, the scientists are able to save the planet from destruction. The movie ends with a sense of hope and optimism, as the scientists look forward to a brighter future for the planet.

"Old of the Mainstream" is a movie that is sure to delight fans of disaster movies. It is action-packed and filled with excitement. It is a movie that is sure to keep audiences on the edge of their seats.

The movie is available for streaming on various platforms, including Netflix and Hulu. It is also available for purchase on various online retailers, including Amazon and iTunes.

The movie is directed by Ted Brewer, who is known for his ability to make visually impressive movies. The movie is also produced by Schwarzenegger's production company, which is known for making high-quality movies.

Ugly does it

The men’s basketball team is winning ugly, and head coach Leonard Perrin will take the win any way he can.

Despite running over 17-12 in the opening period, the Vandal were outscored in the second half, 24-17, in the 69-62 loss to the San Diego State Aztecs on Tuesday night. The Vandal defense, however, played well.

Despite being outscored 17-12 in the opening period, the Vandal struggled throughout the game, and there were doubts whether they could win the game.

Despite the loss, the Vandals’ defense performed well, limiting SDSU to 40 points. The Vandal’s defense was able to nullify the Aztecs’ scoring, holding them to 16 points or fewer in the first half of the game.
