UI honors Bill Wassmuth at memorial service today

The University of Idaho today honored the life of Bill Wassmuth, a Kent doctor and human rights advocate, at a public memorial service at 1:30 in the afternoon in the Administration Building Auditorium in Moscow (Idaho). A memorial will follow. Special parking will be available near the auditorium.

Wassmuth was the executive director of the Northwest Coalition Against Vivisection, where he oversaw the coalition's work against animal rights in six western states. From 1987 until 1998, he served as a California państ and 11-year member of the State Board of Equalization.

Wassmuth was named the top Idahoan of the year in 1998.

In January, the University of Idaho announced it would accept a $200,000 grant from the 2nd President's Fund to honor Wassmuth with a speaker's series bearing his name.

UI English professor criticizes work on William Kittredge

UI English professor Tom McIntosh has written a critical essay on one of the West’s best-known writers, William Kittredge. The book is part of Boise State University’s Western Writers Series, which provides itself as the leading source for the history and the literature of the West.

Kittredge’s work, which included such novels as “Western News” and “The Longest Day,” was released in 1971, includes more than 130,000 words. All Maisel’s criticism essay and bibliography.

UI ranks among top national universities in U.S. News & World Report rankings

The University of Idaho is ranked among the top national universities in U.S. News & World Report rankings. The rankings also included four other Idaho universities. Idaho State University was ranked in the top 200 national universities; Boise State University, ranked 141, was tied with Washington State University; and Montana State University, ranked 153, was tied with Eastern Washington University and Western State University. UI engineering programs in the United States at which at least four degrees were conferred.

The UI and WSU students who were in the class of 2002 at the College of Agricultural & Applied Sciences.

The rankings also included four other Idaho universities. Idaho State University was ranked in the top 100 national universities; Boise State University, ranked 141, was tied with Washington State University; and Montana State University, ranked 153, was tied with Eastern Washington University and Western State University.
City explores options for easing traffic congestion

BY ROGER WYNN

The Palouse Discovery Science Center located in Moscow, Idaho's Discovery Park, has announced that it has received a $252,000 three-year grant from the Idaho Transportation Department for a traffic visualization system that will help make sense of the complicated traffic patterns that exist in Moscow. The system will be installed in the Discovery Park's Discovery Center and will be available for public use.

The purpose of the grant is to provide the Discover Center with a traffic visualization system that will help visitors understand the traffic patterns in the area. The system will include computer-generated images of the traffic flow, including the different routes that are available and the expected travel times. The system will also provide real-time traffic updates, allowing visitors to see how the traffic is changing in real-time.

The grant is part of a larger initiative to improve traffic flow in the area, and the Discovery Center is working closely with local officials to ensure that the system will be effective in reducing congestion and improving safety on the roads.

The Discover Center is located in Discovery Park, which is a 40-acre park that includes a variety of attractions, including the Discovery Center, a children's playground, a nature center, and a museum. The park is a popular destination for families and tourists, and the traffic visualization system is expected to be a popular addition to the park.

The Discover Center is excited to receive this grant and is committed to working closely with the local officials to ensure that the system is effective in reducing congestion and improving safety on the roads. The center is looking forward to seeing the positive impact that this system will have on the community and is committed to continuing to work to improve the quality of life for all residents of the area.

must wish for peace," he said. After tours of the facility, members were asked to answer questions.

Washington State University law student Hartman already knew a lot about Islam through his personal studies of religion. But while walking by Saturday, he decided to stop in and check it out.

"I've never been in a Mosque," Hartman said. While Hartman calls himself 100 percent Christian, he said he wanted to know about the Muslims' religion.

"It's important. These people are also the 'chosen people,' just like us. We should learn about them," he said.

Hassan had two more stimulus reasons for coming to the open house. He has taken classes about Islam, and he's working on an ethnography report on a cross-cultural study.

"I've started to involve myself with the Islamic culture of Pullman," he said. Adding: "He visited the Mosque a few times. Saturday he walked away with a

President Rebecca Campbell said the celebration was a good way for people to learn more about a different culture.

"A lecture handed out at the entrance to the celebration said more than 30 million Americans, many American-born, live in the United States. Hispanic Heritage Month was created from Hispanic Heritage Week by Congress in 1988 to observe the Hispanic heritage of many of the Spanish-speaking countries in the Americas. The observance goes from Sept. 16 to Oct. 15 every year.

"According to the brochure, on Sept. 16, 1821, Miguel Hidalgo y Costilla, a Catholic priest, ordered the arrest of natives of the Spanish Empire in Mexico. Hidalgo then swung the church bell to tell the native Mexicans and mestizos that many native Spaniards were on their way to fight for independence. The year 1988 is significant because it marks the 200th anniversary of the Mexican independence from Spain. Every year at this time in Mexico, there is a festival about the "grito," honoring the independence movement. This is a day for the Mexican community, one that is extremely diverse.

"We are very pleased and blessed to have a community around us like this."
By Theresa Palkcen

People from all over the province were enjoying the smell of cotton candy and elephant ears at the Elko County Fair. While listening to the screams of people being tossed around on the rides or the rattle of sergeants as someone was pushed into the water, the strange sounds of barking dogs could be heard in the air behind the scullion barns.

The Parkrose Hills Dog Dancers, Inc., sponsored the annual dog show. According to the dog program, one dog was entered for competing in the six classes.

The first two classes were the longest tail and longest ears. The dogs get to show their creative side in third class with the best costume for both males and females. The winner in fourth class was the dog with the best costume for the dog to wear.

The fifth class was the longest tail wagging, which went to Mr. Hall. The dog with the longest ears was the dog with the longest ears. The dog with the best costume was the dog with the best costume. The dog with the best costume was the dog with the best costume.

The sixth class was the most odd couple, given the dog hearing the loudest resonator to its owner.

Student Health suprises

Near the end of this summer, I caught a cold. It lasted for nearly six weeks—days of stuffy noses, coughing, and a general feeling of being unhealthy. I ultimately had to go to the ER for breathing issues. This is not the first time I have been struck down by upper respiratory infection. In the past, had I tested positive for COVID-19, I would have had to quarantine. I didn't want to do that again, so I decided that I didn't need those things. I needed to或者是 to the student health clinic to get to be on the safe side. I did this. I just updated my records!

Finally, I consider this a win. Are you making the same choice?

Clear Channel Comm killed the radio star

by David Gibson

NEW HAVEN, Conn. (UPI) - After decades of playing singles "Complicated," Red Lego songs, the Vines has decided to do what they have to go out and make things as complicated as they can. April 8th interested in hearing a song, things new will be complicated and will be heard so long as you're tuned into any kind of "the most" stations and waiting a few minutes. Getting tied of the "single" led Don't Linux the station. The other guys are playing, it is the "single" that is the way the song is trying to avoid it.

Following the passage of the Telecommunications Act of 1996, which eased restrictions on such options, radio stations are increasingly dominated by large corporate entities. This shift has translated into less downshifting, more mindless, and a staggering amount of repeti-

50 of the biggest offenders is Clear Channel Communications, which con-

 proprietary more than half of all popular music stations, as it is almost two-thirds of rock stations across the county. The Clear Channel's Global Network, which is owned and run in New Haven, Conn., including WHJZ (103.3), The River (105.53), Hadya 104.1034.1, and KSSO (6.7). If you think this doesn't affect your listening choices, listen to one of three times of these stations. All three are part of the same radio group in their 10 most frequently played songs. Despite the thousands of songs available, radio stations only play the same songs. DJ's have no control in selecting the songs, and they are forced to "play according to the corporate wish list." You may find yourself "waiting for another hit" in the endless song cycle.

Are you ready for more of the same music every day? Do you wonder why more local talent isn't being heard? We need to open Clear Channel's music maternity ward. "How many ways can we order it, play it, match it, mix it, create it, say it?" The up-side to this new found freedom is that the radio stations are now catering to the "audience." Our listeners have no need of such mind numbing "beats" like "Don't You Know Why." "If you don't know why, we'll tell you why." "If you don't know why, we'll tell you why."

Soccer drops two on roadtrip

With big trip to Midwest, the
University of Idaho soccer team
was looking to make a good
impression.

After starting the season 0-3 at home,
the Vandals hit the road for a four-match
circuit.

South Dakota State was the first stop
for Idaho.

The Vandals beat the Jackrabbits
6-1.

The University of Idaho football
team's 50-year losing streak at Pullman
was snapped on Saturday.

With a win over the visiting
Washington State Cougars, the Vandals
beaten up by the two-time
champions of the state, 20-7.

The win was a huge step forward
for the Vandals, who have been
struggling for years.

The Vandals have a chance to
prove themselves against a
stronger opponent in their next
match against the University of
Oregon.

The game is set for Saturday, and
the Vandals will be looking to
prove themselves once again.

UI defense quacks under pressure

The University of Idaho defense
took advantage of the
Washington State offense
in their game on Saturday.

The Vandals were able to
score three touchdowns,
including one on a
defensive stop.

The Vandals also limited the
Washington State offense to only
three points.

The win was a huge
step for the Vandals,
who have struggled on
defense in recent
years.

The Vandals will face a
close game against
the University of
Oregon on Saturday.

The game is set for
2 p.m., and the
Vandals will be
looking to
prove themselves once
again.

UI women's volleyball team
remains undefeated against
Thursday.

The Vandals women's volleyball
team remains undefeated after
their game against the visiting
Washington State Cougars.

The Vandals won 3-1, 30-28,
25-17, 25-16.

The Vandals continue to
prove themselves in
their conference games.

The game is set for
Saturday, and the
Vandals will be
looking to
prove themselves once
again.
