UI students diagnosed with viral meningitis

By Brian Padday

Two male UI students were recently diagnosed with menin-
gitis, and both are expected to fully
recover. According to the Student
Health Services Center, the illness
is more common than bacterial
meningitis, and it is spread by
respiratory droplets or direct
contact, according to the Student
Health Services Center website
(www.uidaho.edu/health).

"Knowing how important information on this issue is for our
students, we created a new column on our Facebook page
(www.facebook.com/uihealth) to address the disease," said
Bill Caldwell, director of the Student Health Services
Center.

"Meningitis is typically caused by bacteria or viruses. Bacterial
meningitis can be treated with antibiotics, but viral meningitis
is not treatable. That's why it's so important to prevent the
spread by washing hands and covering the nose and mouth
when others are sneezing or coughing. If you suspect you have
the disease, call your doctor immediately," Caldwell said.

The students, both seniors in the Life Sciences program, have
yet to be identified by name. According to the Student
Health Services Center, the virus spread through contact
and that both students have had the disease.

UI students diagnosed with viral meningitis

Two Native American flags are
being added to internal ballo-
ons in the University of Idaho,
student facilities, in honor of the
Cherokee Nation.

The flags are part of a larger
project to add Native American
flags to all student facilities on
campus. The flags will also be
added to the student center,
residences and the ballroom.

The flags represent the nationali-
sity of all cultures currently attend-
ing UI, Caldwell said. Student Native
American students are recog-
nized as sovereign nations,
proponents of adding the tribal
flags to buildings have been
active on campus for several
years.

"I thought it was a great idea and
was responsible," Caldwell said.

"There are no plans to add the
flags to other buildings on the
University of Idaho campus.

The flags hanging in the hall-
nest represent the nationalities

Anti-smoking group fueled by San Jose students

By Melissa Latham

Photo by Melissa Latham

SAN JOSE, Calif. (U-T) — A new anti-smoking campaign led by the university's Community Health Council has been bolstered by students this semester.

The group, called "Smoke Out," was formed in April by the university's Community Health Council to promote awareness about the harmful effects of smoking.

"The University has an anti-smoking policy, but there are still students who smoke on campus," said Smoke Out member Anna Smith, a junior.

The campaign aims to educate students about the dangers of smoking and to encourage them to quit.

"We want to create a healthier environment for everyone," said Smith.

Students can participate by attending events, such as the Smoke Out rally on April 29, where they were able to learn about the negative effects of smoking and the benefits of quitting.

"It's important to raise awareness about the harms of smoking, especially among college students," said Smoke Out member Alex Johnson, a sophomore.

Johnson said that many students are unaware of the health risks associated with smoking and that Smoke Out is working to change that.

"We hope to educate our peers and change perceptions about smoking," said Johnson.

The campaign has also been reaching out to the community through partnerships with local businesses and organizations.

"We've been working with local businesses to promote smoking cessation initiatives," said Smith.

The group plans to continue their efforts throughout the semester and encourage other students to get involved.

"We want everyone to know that there is support out there for quitting smoking," said Smith.

Smoke Out is a student-led organization that aims to foster a healthier campus and promote awareness about the dangers of smoking.

For more information, visit SmokeOut@sjsu.edu or follow Smoke Out on social media.
Rising college costs still a bargain, experts tell Congress

BY SUSAN C. CHATZKIS

WASHINGTON (AP) — Despite wondering why the rising cost of attending college is eating into the economic hard-won college savings of many parents, educators and politicians say that in general the job of higher education is continues to be a bargain for students and parents.

"While costs are rising, the benefits are far-reaching," said U.S. Sen. Edward M. Kennedy, D-Mass., the of Senate Finance Committee, at a hearing Thursday. "While we may not always be able to keep our educational costs low, we should do everything we can to make the education available to all students.

"It is not a single solution, but a combination of policies that will help our students to succeed,

"We need to focus on how we can make higher education more affordable for all students, and how we can ensure that the best possible education is available to all students," he said.

"By doing so, we can ensure that all students have the opportunity to succeed, and that we continue to have a strong, competitive economy.

Watermelons may help fight certain diseases

By BROOKE BROWN

WASHINGTON (AP) — The refocusing tests of watermelons isn't just for the summer months. University of Idaho College of Agriculture and Life Sciences researchers are discovering that the fruit is also a valuable tool in the fight against cancer.

"The watermelon is a great source of lycopene, a powerful antioxidant that has been shown to help reduce the risk of certain types of cancer," said Dr. John Williams, director of the university's Center for Cancer Research.

"Watermelons are also a good source of vitamin C, which is important for the immune system.

"By cutting out the watermelon and replacing it with a few other fruits, we can help reduce the risk of cancer,

"It's important to note that watermelons are not a cure-all, but they can be a valuable addition to a healthy diet.

Therefore, we encourage everyone to include watermelons in their diet, especially during the summer months.

"We also encourage people to talk to their healthcare provider about ways to reduce their risk of cancer.

"By doing so, we can help ensure that everyone has access to the best possible care.

"Together, we can work towards a future where cancer is preventable and treatable."

Hannibal more sinister, real in latest installment

Hannibal Lecter has returned yet again, and this time he is being portrayed by Thomas Haden Church. Church, an actor known for his performances in blockbuster films like "The Bengal Tiger at the Baghdad Zoo" and "The Social Network," takes on the role of one of cinema's most iconic villains.

The story follows Lecter, a serial killer and cultural icon, as he navigates the streets of New York City. The film is set in the 1970s and is based on the novel by Thomas Harris.

Church's portrayal of Lecter is praised for his ability to bring the character to life in a way that is both terrifying and entertaining. The film has received mixed reviews, but overall it is considered a success at the box office.

The film's success has prompted a debate about the appropriateness of depicting such a violent and disturbing character on screen. However, Church's performance has received critical acclaim, and the film is expected to be a box office hit.

'Hannibal' sails, comes up short

Sailing onto the big screen, the latest installment of the "Hannibal" franchise is set to be a thrilling ride. Directed by renowned director, the film promises to be a heart-pounding adventure that will keep audiences on the edge of their seats.

The story follows the adventures of the infamous serial killer, Hannibal Lecter, as he navigates the treacherous waters of the Pacific Ocean. With his cunning mind and sharp wits, Lecter must use all his resources to survive the dangerous journey.

The film's cast includes an array of talented actors, including acclaimed actor and musician. The soundtrack, composed by , is expected to be a highlight of the film, with its haunting melodies and eerie instrumentation.

"Hannibal" is set to be released on major streaming platforms later this year. Fans of the franchise are excited for the opportunity to see the next chapter in the story of the notorious killer. It remains to be seen whether the film will live up to the high expectations that have been built up around it.
