IDAHO WINS AT TENNIS

Defeats W. S. C. in their Annual Meet—Take Five out of Seven Matches.

Last Saturday Idaho and W. S. C. hooked up in their annual dual tennis meet, which Idaho won easily. Several of the matches were close and hard fought. Wright and McCall put up a pretty battle in their match of the sinuses. The men were evenly matched and were by far the best players on the court. McCall of W. S. C. won by a score of 6—4, 6—3. David, Soulen, Sakuma and Hockett won their matches handily. In the doubles, Soulen and David won out after a fierce tussle.

Folser and McCall of W. S. C. defeated Wright and Sakuma by the score of 6—4, 6—3.

AT ASSEMBLY.

At assembly last week one of the most important amendments ever adopted by the student body was adopted without a dissenting vote. By this amendment the registration fee for the semester will be raised to five dollars and season tickets to all athletic contests will be issued to the students. This has been adopted by practically every university in the northwest and has proven most successful wherever it has been tried. There is a heavy attendance at all games and the amount received for athletes accounts to approximately the same as under the old system. Nothing could have been done which will do more to better the spirit at Idaho and to arouse interest in athletics.

Barson was the moving cause in the adoption of the amendment and he is very much pleased at the way in which the students took up with his suggestion.

The speech at the assembly was given by Miss Johnson of W. S. C. and was on the subject of social conditions. It was very much enjoyed by the large crowd in attendance.

Debate.

Idaho has made arrangements for their debates for next year. Prof. Hulles has recently signed on a contract for a triangular series with W. S. C. and O. A. C. for debates to be held in December and January. We will also meet Gonzaga in a dual debate.

Maude Hines was a dinner guest of Kappa Sigma last Sunday.

Summer School at the University.

This year the university will conduct a regular summer session which will begin July 6. The school will last six weeks. The work will be carried on by the regular professors and will be modeled after their regular courses. Instruction will be given in all branches and the object of each course will be to furnish a rather rapid but thorough review of the subject. The summer school is maintained primarily for the benefit of the teachers of the state but anybody may attend who desires.

Among the courses which will be of special interest will be: given by Professor Nichols of the department of bacteriology. He will offer several courses at the coming session. One of these courses will be on school sanitation and communicable diseases, which will be of special interest to teachers. Professor Nichols will also give a course on general research work in bacteriology.

From all indications at present there will be a large attendance at this session and many applications have been made for rooms and board for the summer.

The Idaho Alumnus.

The first issue of the alumni magazine, "The Idaho Alumnae," will be out in a few days. The magazine should receive the support of the alumni of the university, every member of the faculty of every senior, each a large group of members of the classes.

If the University of Idaho is to support an alumni magazine now is the opportunity to show its intentions. The magazine is not dependent upon advertisements but is entirely supported by subscriptions to maintain itself.

The work of publishing an alumni magazine means considerable work and money for the editor and business manager, and they receive no financial returns for their labors. They are perfectly willing to engage in the work if properly supported. Every one who subscribes for the magazine at once, and contribute to the management of the publication that Idaho can support such a magazine. Aid the new enterprise, and the success of the magazine can it be said that the magazine is starting out with legal support.

Beware.

Miss French is on the trail of some famed in human form who has been eluding the lights out on lover's lane.

Lucas Wins Watkin's Medal.

In the annual oratorical contest held last Thursday evening in the auditorium, Parker V. Lucas, a senior in the law department, won first place with an oration entitled, "The Message of Socialism." The other contestants were Thorne Warren and J. Pond. Warren spoke on "The Sin of Wages," and Pond on "The American Standard." J. H. McVay had submitted an oration but withdrew from the contest.

It was an excellent contest in every respect. The orations were of much thought and care and were delivered clearly. Mr. Lucas won two firsts on thought and composition and two firsts on delivery.

The judges on thought and composition were: Dr. Moore, Prof. Wilson and Mrs. E. Holler-Cooke. The judges on delivery were: Prof. Astell and Roy Nelson.

At the close of the program Mr. Lucas was presented with Watkin's Oratorical medal, which is given each year in memory of Dr. Watkins, who started the custom.

New Instructors.

In an interview with President Carby he stated that only two instructors for next year had been decided upon at this time. There are many applications on file for every vacancy and the board will act on all of them at its next meeting. The two who have been elected are:

Miss Amy Kelly, who will have charge of the field work of the Home Economics Department.

Mr. Robert A. Lasson will be assistant in dairy manufacturing. He will graduate from the dairy department at the University of Wisconsin this year and will arrive July 1. He has been very prominent as a student and was editor of one of the college papers this year.

Bench and Bar Association Hold Election.

Last week the bench and bar association of the law school held its annual election of officers. The officers elected for the coming year are: Arthur Hess, chief justice; George Donart, associate justice; James Howley, clerk.

It was determined at this meeting to have the association take up the work of securing jobs for the outgoing classes, and to keep in close touch with all members of the state bar.

Beware.

Miss Harriet Bolger was a weekend guest of Gamma Phi Beta.

WASHINGTON WINS CONFERENCE MEET.

Oregon's Showing a Surprise—Idaho Pulled Out of Cellar.

The conference track meet was a surprise to all the "bookmakers" not only on a total of points but in nearly all the races as well. McCallister, of Washington, in the two miles was the only favorite who won his race.

Before the meet Oregon was considered first place by all. But the best that the bunch of stars clocked by the famous Bill Haywood did was to finish fourth. Cuidde, the freshman of Washington, led the meet and the Washington team came in both the mile and the half. In the former he set a new coast record. McCallister of Oregon, set the pace in the three hundred and fifth men gave way to the Washington youth who held the lead to the line. McCallister was about two feet back. Windmills of Oregon lead all the way in the 880 and was "nosed" out in the last foot. Dinico was fourth in this race.

The hundred was called a tie between T焚烧han of Washington and Kinder of Whitman. Cooke of W. S. C. was third. Morrison was fourth. He defeated the 9:45 man, Baker of O. A. C., who won the race last year. Monico, the Stanford, coach has been coaching the "Aggies" and clocked him as a sure winner.

Pollock throw in the javelin may be a surprise to some, but none of the men did as well as was expected of them in this event, due no doubt to the rain. In the first two hundred and fifty men were tired from standing so long, watching the meet.

When the relay was called, Idaho had only seven points to bar credit, O. A. C., eight and one third. W. S. C. led the way and set a new record. The relays started for Idaho and came in third Morrison went in as second man and came in second, passing the flying Olde who had led. In the third, Lewis took the "come home" fifteen yards ahead of Washington and Dingle still farther increased the lead giving us three times the points. In the final count, Whitman succeeded in ousting Washington in the last lap. Oregon was last. The showings in both of this event was a surprise to all.

GIRLS ON THE LADDERS.
Their Rapid Work In Coaling Ships at
Nagasaki, In Japan.

Coaling at Nagasaki, Japan, is done
entirely by girls. Big coal barges bear
down upon the ship as it approaches
the shore, and as soon as it comes
to anchor a rough ladder is placed be-
tween the liner and the foremost
barge.

On each rung of it a girl takes her
place. Men in the barge quickly shov-
eld the coal into shallow buckets hold-
ing half a bushel each to the sound of a
monotonous chant, and these but-
kets then pass from hand to hand up
the lading ladder with marvellous celer-
ity.

Each girl seizes one and swings it
straight up in front of her, above her
hand, when it is caught by the next
girl. Down a second ladder, likewise
packed with girls, the empty baskets
pass in similar manner back into the
barge to be refilled.

Barge after barge is emptied in this
way. The monotonous chanting never
ceases. The lading elevator goes on
hour after hour with its never ending
stream of baskets until the last bun-
k is full, when the ladders disappear
as if by magic and the ship is ready
to proceed on her voyage.

A Pacific Mail steamer will "bunker"
2,500 tons of coal in six and a half
hours, an average of 354 tons per
hour, or nearly six tons per minute, as
an almost incredible record.—Wide World Magazine.

FORESTS AND HYGIENE.
The Value of Trees From the Stand-
point of Human Health.

We bear much of the importance of
the conservation of forests from an
economic standpoint, but little is said
as to the hygienic value of forests.

Forests contribute to the general
beauty by breaking the force of stand-
fly blowing winds. They mitigate the
heat of summer by the vast amount of
evaporation from their leaves that oc-
curs by day. They also promote rela-
tions. Thus they check the tendency
of the earth to desiccate, which is al-
most as injurious to health as it is to
vegetation.

Cholera often passes a wooded dis-
tribution and ravels in a desert area.
A certain road in India leads for sixty
miles through a dense forest. Further
on it runs for ninety miles through a
barren plain. Hundreds of persons
travel the entire road daily. Now, in
the first or wooded section cases of
cholera seldom occur, while within the
latter it has been of frequent occur-
rence. One year cholera raging in
Alabadeh—soldiers whose barracks
were on a hill suffered the most from
the epidemic; those in barracks sur-
rounded by four rows of trees much
less. But not a single case occurred
among the soldiers whose barracks
were in a thicket. It was the same
the next year.—Harper’s Weekly.

Movie Operator Saves Audience.
Seattle.—Action Meli, a moving pic-
ture operator, is recovering from par-
tial asphyxiation from celluloid flame-
here, following his heroic action in
shutting off the port holts in the oper-
ating room of the Washington theatre.
When a film exploded, thus preventing
a panic among the spectators. Meli
says that the film broke and exploded
when one end fell against the ar-
right. He rushed to the port holts and
clamped them, turning to find his
pathway to the door cut off by a jet of
white fire from other reels.

Snatching to a closed door, he turn-
inside, Smokes pouring from the ven-
tilators attracted the police, who clear-
ed the theater and turned off the alarm.
Meli was found unconscious by fire-
men and removed to the city hospital
where he was revived.

Mr. McInerney restarted yesterday
for Walling, where he intends to
work during the summer.

Prep Commencement Saturday Night.

The annual Prep commencement has been announced for Friday night, Washalla! It will be Saturday night.

The program will be one that the public will enjoy and one that all former Prep students will remember.

President John A. Thomas of Spokane, will deliver the address and the reminiscence will be given by former students.

Professor Francis W. Shaw and Mrs. Shaw will be entertained by the Theta Mu Etonion during the intermission.

Last Saturday, Delta Gamma entertained some of their friends with a hay ride to the mountains.

Claude Hood has returned to school to take his examinations and graduate with his class. He has accepted the position of manager of a farm in central Oregon.

Miss Mary Petersen has been chosen to represent Idaho at the National Convention of the Delta Gamma sorority. The meeting will convene sometime in August and will be held at Niagara.

George Donnell has left school to accept a position with the forestry department for the summer. He will receive his B.A. degree with the present graduating class by special dispensation of the faculty.

The contract has been let for the grading of the new athletic field and it will be ready for use by next fall. By recent action of the athletic board, the field has been named MacLean field, after ex-President MacLean.

W. N. Ellis and George O'Donnell, former students of the University, were guests at the Teton Dells house last week. Mr. O'Donnell left Monday for Washington University, where he will attend the summer school.

Under the direction of Professor Temple and Pratt, the botany classes made an excursion into the Kendrick country for the purpose of investigation. About thirty students attended. The party went down Thursday on the noon train and returned Saturday. They camped about 1 1/2 miles from Kendrick on Polkitt Creek. A few started out very early in the morning to return early in the evening. Special credits are given to Mr. Pratt for the able manner in which he handled the department.

The girls are particularly enthusiastic over his executive ability.

See Russell & Rowland for first choice shoes and hats.

AQUIT ALLEGED SMUGGLERS

Misleading Inspector MacArthur, Mentioned As Member of Opium Ring.

PRESIDENT CLINTON L. RILEY and the names of A. Ralston, accused of conspiracy to smuggle opium, were acquired by a jury in the United States district court after a trial lasting three days.

During the trial testimony was given on that Ralston, when arrested, charged that customs officers in Seattle were "crooked" and that the state of Washington admitted carrying large quantities of opium from Seattle to other cities in the northwestern states, and said that he had nothing to do with bringing the opium into the country, this being done by a mysterious Henry Wellman, who was his employer.

The name of Earl MacArthur, a customs inspector, who disappeared a week before the trial began, was frequently brought into the case by the government, the district attorney alleging that MacArthur and Louie were on intimate terms and producing evidence to show that MacArthur has passed the opium trunk, found in Portland when Ralston was arrested.

Lumber Tariff Removal No Cause for Worry, Says Weyerhaeuser.

Spokane--In an interview at Sand Point, Idaho, Charles A. Weyerhaeuser, member of the world's greatest forest interests, declared that the removal of tariff on lumber would have little or no effect on the industry in the United States.

"I see no reason why the lumbermen of the United States cannot easily adjust themselves to the removal of the tariff without any apparent effort," stated Mr. Weyerhaeuser. "This tariff, as it stands, is so low that the removal will not seriously affect the industry. We are not worrying.""\n
Borah May Be President.

New York--Harper's Weekly makes the following editorial forecast:

"We predict that the next Republican candidate for president of the United States will be William E. Borah of Idaho."

"More than a year before Woodrow Wilson's nomination, Harper's made a similar prediction, which fact is referred to editorially by the New York Sun.

Gray's Harbor Wants Light and Power. Abortion. Recommendations of the Mayor" France that the council take steps toward building a water pipe line to the headwaters of the Wynoochee, 30 miles north, have been supplemented by petitions, which are being generally signed, favoring also the building of a municipal lighting and power plant at the same point to supply the cities of the harbor with light and power and all manufacturing plants. The cost would be $2,500,000. The cities of the harbor now pay about $40,000 annually for light alone.

The persons in the gallery who were most impressed with the J. Pierpont Morgan collection of pictures were small girls, one eight and the other ten years of age. Uncertainty they spilled the names of the paintings, which conveyed very little, and they were not much interested in the surrounding Duchess of Devonshire's 1667 portrait by Velasquez, and the president's engaging young lady by the unknown Spanish painter. Lastly they came to a portrait of Mr. Morgan himself, and from this they appealed directly to the attendant on guard.

"Please, sir," they asked, "did Mr. Morgan paint all these pictures?"

"The guard was a true gentleman. "Not all," he answered. --New York

RESOLVED THAT WE WILL MAKE A HIT WITH YOU WHEN YOU SEE OUR STOCK OF GOOD GOODS. WE SELECTED THEM FOR YOU. THEY ARE HERE AT A FAIR PRICE AND WE STAND BACK OF THEM.

EVERYBODY likes a certain amount of applause and appreciation shown them when they know they have done a good thing. We are always trying to make a hit with the people of our community by having a new, fresh stock of shoes, and by being able to give customers just what they want, and by making good, honest prices, so that everyone who buys from us will go satisfied. We can do no better advertising than to please our customers and get their confidence and good will.

PLANS TO UTILIZE WASTE TIMBER

Plant Will Be Installed at Idaho University to Extract Oils.

University of Idaho, Moscow, Idaho, Mar 31. — (Special) — Professor C. H. Shattuck, head of the department of forestry at the university, announces that within a short time there will be installed a plant at the university a plant for utilizing timber by-products. The professor has just returned from the inspection of several plants in the middle west and southeastern part of the United States. He was most impressed with the plant at Wilmington, S. C., where pitch, tar, turpentine and oils are extracted from the wood by a chemical process.

The national government is making extensive experiments along this line and according to Professor Shattuck the northern portion of Idaho, where no effort has been made to profit from by-products, should be greatly benefited. The plant to be installed at the university will be modeled after the Wilmington plant, but will be constructed on a smaller scale.

For Foreign-Born Women.

A foreign-born unmarried woman may become a citizen by being naturalized. To do this she must be 21 years of age, and have lived five years in this country, one full year of which has been lived in the state in which she makes her application. Or she can marry a man who is a citizen, for the wife’s citizenship follows the husband, and she continues to retain her citizenship if she continues to reside in the United States, unless he renounces the sovereignty of the United States.

A foreign-born woman living in the United States whose husband is a foreigner, who refuses to become naturalized, cannot become a citizen unless separated from him by divorce or death.

A native-born woman who marries a foreigner loses her citizenship during the term of the marriage, but upon the death of her husband, or divorce from him, she may resume her citizenship by registering within one year, with the American consul in the country of her residence, a declaration that she desires to do so, or she may resume it by returning to the United States to reside.

Professor Sturtevant will read in the 'Chimes of Normandy' on June 20th and will be assisted by university talent.

D. M. Buffington, Arthur Beer and Russel Adams, juniors in the college of law have completed their year’s work and left for their homes.

TREASURERS ARE TAX COLLECTORS

Supreme Union Right Amendment Becomes Effective Second Monday in January.

"Every county treasurer in Idaho is the tax collector for his county, and has been such since the election last fall because of the adoption by the voters, of the amendment providing that the treasurer shall be tax collector by virtue of his office. The constitutional amendment on this point adopted by the voters was self-executing; it required the enactment of no act of the legislature to put it in operation; and therefore the statute enacted by the legislature last winter to put the constitutional amendment in operation the second Monday in January, 1915, is null and of no effect whatever."

It is the sentiment of a decision rendered by the state supreme court on Friday, a decision that will be of vital interest to every county in the state. It is far-reaching in importance, because it holds that "constitutional provisions are self-executing when there is a manifest intention that they should go into immediate effect, and no ancillary legislation is necessary to the enjoyment of the right given or the enforcement of any duty."

Professor Eldridge, of the college of agriculture, will give several interesting and important courses on animal husbandry at the coming summer session of the university. There will include a course in animal husbandry for teachers, a course on the market value of the stock, and one on the feeding of farm animals. These courses are so arranged that they will be of special benefit to the teachers of the state who attend the session.

Everybody is admonished to swat the fly. It won’t hurt. Swat ‘em. He is a no-good citizen, a breeder of disease, a source of worry to the bald-headed man, a torment to the housewife, a menace to the baby, a conjugation-pedler and disseminator of filth, an agent for typhoid, tuberculosis and other diseases, a pest to the dog, and not worth a fiddler’s curse to himself. Aim ahead when you go to beat him, and you will materially increase the list of fly fatalities.

Prof. Shattuck has returned from the east, where he was investigating plants to work up the by-products of lumber. He spent most of the time in South Carolina.

Doctor Baker has been appointed assistant state veterinarian by the state live stock and sanitary board. He will have the North Idaho district and will maintain headquarters in Moscow.
WASHINGTON WINS MEET

Continued from page 1

440-yard dash—Windsdale, Oregon: Bloequist, Whitman. Time 52.3 sec.

Pole vault—Williams, Washington: Miller, O. A. C.; Fee, Oregon. Height 11 feet 7 inches.

High jump—Bowman, Washington; Sato, Whitman: Woodworth, O. A. C.; Powell of W. S. C. H. Bowers of Whitman tied for third, each taking one third point each. Height of Bowman, 5 and 88.10 (measured to determine fig in cross bar).

Broad jump—Parsons of Oregon; Bowers, Whitman; Williams of Washington. Distance 22 feet 1% inches.

Javelin—Phillips, Idaho: Diets, W. B. C.; McKenzie, O. A. C. Distance 105 feet 7 inches.

Relay—W. B. C. first; Idaho, second, and Whitman, third.

Notice: Sophia.

Miss labrins threatens dire and terrible punishment if the members of this class don’t listen up and pay their dues.

Miss Virginia Sharrer, instructor in the home economics department, has returned to accept a similar position in the Lawrence Normal.

Delta Gamma entertained the following at dinner last Friday, Ballard Foester, Bert Smith, George Downer, Fred Carlson, Alfred Lycome, George Scott, Banks Kimion and Fred Babcock.

Wednesday evening at 8 o’clock Omega Pi gave their third annual banquet in honor of the seniors. Besides the active chapter and alumnae those present were Miss French, Mrs. and Mrs. Hutton, Mrs. Von Enke, and Dr. Gunrey.

Graduation Week—Program for Tuesday, June 5

The graduation exercises will be held on Tuesday, June 5, at 2:30 p.m. at which time the diplomas will be conferred. Mrs. Stinson was the only one of the class of 1922 who had not been invited to form a banquet instead of the 90 ways in cards. The program for the week is as follows:

The general exercises of the commencement are open to the public.

All friends of the University are invited to attend.

Saturday, June 7, 7:00 a.m. —
Senior Breakfast, campus.

Tuesday, June 7, 8:30 p.m. —
Commencement Convers, Auditorium.

Tuesday, June 7, 10:00 a.m. —
Meeting of the Board of Regents, executive office.

Tuesday, June 7, 10:00 a.m. —
Alumni Senior’s Baseball Game, Idaho field.

Tuesday, June 10, 5:00 p.m. —
Convocation Address, Auditorium, by President E. A. Bryan, LL.D. (Washington State College).

Tuesday, June 10, 8:30 p.m. —
President’s Reception, Gymnasium. Public cordially invited.

Wednesday, June 11, 10:00 a.m. —
Commencement exercises, Auditorium, by Prof. Frances W. Shepardson, Ph.D., LL.D. (University of Colorado).

Wednesday, June 11, 1:15 p.m. —
Alumni Banquet, followed by Executive Session of University Convocation, Ridenbaugh hall.

Plano Recital.

Miss Ross Stroebel, assisted by Mises Ruth Motie, Bertha Olson and Fern Berry, gave a very successful recital last Saturday evening in the Y. M. C. A. Hall. A large crowd was present and everybody thoroughly enjoyed the very excellent program that was given. The following is the program which was rendered:
