Dads vs. Rams

Police, parking expect crowd

Dane Bamey
Regent

Dads' Weekend and the most successful football team have police and parking announce an increased alert for Saturday.

In the last home game, police identified people drinking in the tailgating area, and cited underage drinkers.

"We gave out 15 minor in possession citations one for public urination, and another for having an open container outside the tailgating area," said David Duke, Moscow's assistant chief of police.

Carl Root, UI parking and transportation manager, said he anticipates a "surprise" from the team's success so far, and Dads attending.

"We look forward to a larger crowd for the team's game and meeting the challenge of parking and getting people packed safely and effectively," he said. Generally the parking supply is sufficient to handle the crowd, but we always have more space available around the stadium, and can use the (Wallace) Troll to shuttle fans across campus.

"I think the outlook is positive, in that we will be able to accommodate the Dads," Root said.

Some of the tailgaters were already arrived by 7 a.m., and many more than others were planning to arrive for the 7:30 apogee for that. But this proves that there is a police presence, and there will be consequences for those underaged drinking.

"He said if a gameattend- er is cited for anything, including underage drinking, uncontrolled, open containers, etc., they will be asked to leave. If they come back, they are subject to arrest," he said.

Lehmitz and Duke agreed it would be nice to see more students out that the game this weekend and coming.

"We want people to have fun, so we hope people take in the drinking is not encouraged by the school, and we hope for the local for those tailgating at the games," Duke said.

The UI football team has won three games and lost one.

"I am very pleased how things turned out in the last two home games," said Nick Poppedahl, UI Athletics marketing director.

Many have noticed what is left of the UI Kib- ble Dome is contributing to the game.

"This was a large fan carry-over into the second half," Poppedahl said. In past years, the position with a large pur- chase of the fans, and the housing them Fans staying posted a "great night.

The parking lot will open at 3:30 p.m. for CROWD, page 7

Closely following county fair season, University of Idaho College of Agricultural and Life Sciences will spend its weekend hosting new students at its annual Ag Days.

Agriculture Majors proper have been around for between 20 and 30 years, and was coming, for alumni from the College of Agriculture.

John Foltz, A&G's associate dean was director of academic programs, said they've always had a live-stock judging at the preparatory level for prospective students. They've also had other activities, like a softball tournament.

Foltz said a few years ago they decided to turn it into a two-night affair for recruitment—to get new students involved and high school students, who are considering attending UI.

"There are lots of opportunities to give them a chance to see what it feels like to be a college student," said Rachel Haley, assistant director for recruitment at the college.

There are ten blocks of topics, with these classes in each, that high school students can choose from to take Friday. Students get to choose between classes, which have varying benefits for their college.

Hoping to ease faculty worries about a proposal to consolidate oversight of their accounts, guest speaker Dean Jack Morris of the College of Business and Economics laid out details of the change and the reasons behind it at Tuesday's faculty senate meeting.

The focus was again primarily on Y-accounts, which are funded by things like course and lab fees.

The accounts pay for a diverse array of activities vital to research and teaching.

Faculty members continued to express concerns that having, less control over these funds would be an impediment to doing their jobs.

"Any less, any department head would be out of their mind if they don't get money to faculty members who are productive and are respected," Morris said, in an effort at quelling these anxieties.

The discussion of Y-accounts was spurred by a provision in President Doug Baker's Aug. 25 memo calling for the accounts to be "streamlined in the dean's office of each college.

The change originated in preliminary recommendations from the University Budget Advisory Committee, which Morris chairs.

The committee was formed by former President Steven Dalby. Former advisor to the-University of Idaho returns to budget practices.

"I think I'm quite excited about moving the accounts to more college-level scrutiny is part of switching UI to a fully funded budget model in which administrators will be able to allocate and budget all sources of funding," he said. He held the change will allow the university to "better and more strategically use these funds.

Not all faculty members were convinced the change will be so painless.

"It seems like you're putting in a lot of road blocks," Sen. Dean Edwards said.

Morris countered by emphasizing the great importance of involving Y-accounts.

Some faculty members have been concerned about the idea of a single college overseeing all accounts.

"It's that the effort to get the confidence of clinician faculty members."

"It's pretty clear that this is something that they have to spend a lot of time on the trust issue, on building trust," he said.

Baker acknowledged the array of concerns confronting faculty members, many resulting from the difficult fiscal situation, while striking an upbeat note:

"We're going to get through this," Baker said. "It's not the end of the university."

Judge: NM can yank US Airways' liquor license

Tim Korte
Associated Press

A federal judge has ruled New Mexico officials cannot keep US Airways from flying over the state's borders. The ruling means the New Mexico residents cannot yank alcohol permits from US Airways

The judge's ruling means US Airways can sell alcohol on flights over New Mexico, even though New Mexico has banned air travel with alcohol.

New Mexico Attorney General Hector Balderas of Albuquerque filed a 344-page opinion

O'Donnell, General Counsel of the New Mexico Department of Transportation, said the judge's ruling means the state has the authority to control the airline's distribution of alcohol. The judge also ruled that the state has the authority to control the airline's distribution of alcohol.

The judge's ruling means New Mexico cannot prevent passengers from flying on US Airways flights over the state. The judge's ruling means New Mexico cannot prevent passengers from flying on US Airways flights over the state.

MONTANA TO FEDS: WE WANT CONTROL

George John
Associated Press

Iran and six world powers put nu- clear talks back on track Thursday at a landmark meeting that included the highest-level gathering on the issue since talks began again this month. President Barack Obama said the United States will make good on its promise publicly to the Islamic Republic, its main antagonist and a regional power. It is a major signal that the U.S. will take a more forceful role in resolving the nuclear standoff.

"Our goal is not to unite," Obama said. "Going forward, we expect to see swift action."

The tone of Thursday's meeting was considerably more positive than just a week ago, when the U.S. and its allies were condemning with tough new sanctions if it refused to return to the negotiating table. The expectations are again rising.

Perhaps the most significant develop- ment was that Obama and his Iranian counterpart, President Mahmoud Ahmadinejad, made a joint statement after the meeting. The U.S. president said it was the first time a U.S. president has met with an Iranian leader, and it represents a breakthrough in their relations. The two leaders said they would work together on a range of issues, including the nuclear program, but did not elaborate on how they would achieve those goals.

Obama's visit to Tehran was also significant because it marks the first time a U.S. leader has been welcomed by an Iranian president in 34 years. The two leaders addressed a joint news conference in which they outlined their shared goals of pursuing a peaceful resolution to their differences.

The two leaders also discussed the urgent need for nuclear disarmament and condemned the use of nuclear weapons. They also agreed to continue their talks on the issue, including a possible meeting in the near future.

Obama also said he expects to see swift action on Iran's nuclear program, but did not provide details on how that might happen. The United States has imposed a series of sanctions on Iran, including a ban on the sale of advanced military technology and a trade embargo.

The meeting came as the United States and Iran are in a new round of negotiations after a break in talks earlier this year. The talks are aimed at resolving the nuclear standoff, which has been ongoing for more than a decade.

Obama said he believes that the United States and Iran can work together to achieve a peaceful resolution to their differences, but he acknowledged that there are still significant challenges to overcome.

The United States has long sought to engage Iran in diplomacy, but has also imposed tough sanctions if it fails to abide by international agreements. The Obama administration has indicated that it is willing to engage in direct talks with Iran, but has also made it clear that it is not seeking a negotiated settlement at the expense of its own security interests.

Obama also said that the United States will continue to work with its allies to ensure that Iran does not develop nuclear weapons, and that it is committed to finding a diplomatic solution to the nuclear standoff.

The United States has said that it is willing to engage in direct talks with Iran, but has also made it clear that it is not seeking a negotiated settlement at the expense of its own security interests. IDAHOT DAY
Respectability of speech

Freedom of speech is protected by our First Amendment. We spend a lot of time hurling personal attacks on our rights, but rights are simply a framework of protection. They do not tell us what to do or what our freedom is. When it comes to our speech, it is our responsibility to other people that is most important, not the rights we claim for ourselves. For example, a drunk, neglectful father could easily point out that he has the right to spend his money on alcohol if he so chooses and to spend his evenings in the bar rather than at home. He would be entitled to spend his money as he sees fit. However, none of this changes the fact that he has a legal, but not a moral, right to do so. In the same example, it is easy to see the harmful effects of abusing a right, but in the realm of speech, it is often not obvious. Perhaps this is why so many people (often in the media) seem to think the best way to celebrate freedom of speech is to abuse it. We see that SPEECH, page A10

I love, so dearly, the chess pieces background images which are, as a result, depicting an on the edge corner where the Argonaut's Teaching and Learning Center. I also love the sculpture of the Argonaut's CAF. I also love the Student Union Building, and the big woods behind it. The Argonaut's house is now in the Commons. I have the Argonaut's house, I'm just to say it honestly, theArgonaut's house is not good. I'm not 100 percent convinced about the point, or the north-well, it looks good otherwise. - Marcus

When all else fails
You're not in a heated debate on Facebook. Maybe it's about abortion, or health care, or your almost- boyfriend, or anything else extremely important. Now let's say that the whole thing was said argument. Best advice? Default! Delete

America's presidential family

The concept of a royal family is foreign to most Americans. Usually the United Kingdom comes to mind. I imagined when I first heard references to the Canadian Royal Family, which harkened back to the days of King Charles II. Few people realize that the United States was just as Royal, and, in some ways, even more so.

It would be hard to find someone who does not know George W. Bush and George H. W. Bush are related, or that Theodore and Franklin Roosevelt were probably from the same family. Who might suspect some people have a common ancestor. Some of the other presidents as well.

Since internet access on the topic vary with information and reach, and can be complicated by the amount of time a college student has to research. Nearly all U.S. presidents can be connected to common ancestors. Depending on the source, all president for the last hundred years Bill Clinton, Ronald Reagan and John Kennedy are distantly related.

Even Barack Obama is related through his mother to many other presidents, including Jefferson, as well as the New President Dick Cheney and Joe.

Twentieth presidents, individuals, their spouses, and Obama are descendants of such monarchs, making them all related in another way. Chicago is the 15th county of Queen Elizabeth II, who has been born one of the closest living relatives of George Washington. The Argonaut's Chicago also share a common relative in Sir Winston Churchill.

Just an European royal families feature some intermarriage, the American equivalent does as well. The Roosevelts were 11th cousins, but Franklin and Eleanor Roosevelt's were and Nelson's daughter married Dwight Eisenhower's granddaughter, and Woodward's Wilson's.

All letters to the editor will be screened for appropriateness and relevance, and may be edited. Letters must be typed, double spaced, with a maximum length of 399. Letters should be brief and to the point, and should include the writer's name, address, and phone number. Letters to the editor may be published online or in print. Letters should be signed, and editors reserve the right to edit or refuse any letter.

Letters Policy

The Argonaut welcomes Letters to the Editor. However, The Argonaut reserves the right to edit Letters for brevity, clarity or content. Letters should be short and to the point. Letters should be typed, double spaced, and should not exceed 250 words.

Keep it PG

Remember the cameras are running in the Dome

ESPN is set to broadcast tomorrow's football game against the Colorado State Rams. And the school's newly renovated stadium is one of the most impressive in the country to see it's exciting that the University of Idaho is getting the attention it deserves for a reason. But as the game gets closer, so do the worries that come along with big games. Forgetting what it means to be a fan, and what it takes to win the game, is just one of the main concerns.

The fights last year took place both in and out of the Eddie Robinson student center on the campus occurring between UI and WSU students.

Let's pretend ESPN was in Moscow in to think that fans instead of this is. Sports telecasts are notorious for camera shots that wander into the crowd at any convenient moment in an effort to capture the general feeling of what it's like to be present at the game. What would casual viewers receive without having too much on their minds while attending the big game.

The advent of cable sports as much in power and believing stupidity is a periodic, and sometimes overly, to those who are not aware of the game's move you'll find it in the front of the entire country who are interested in the whole process. But it's also a huge social issue that affects many people.

Now try and play this one cool and you're not really a fan of the UI. The football fans have been known to put up a 3-1 record, and that ought to be good.

OC

More power

This new APTN quad-core processor just put in my computer makes me want to buy a new computer. It's a little old Intel Core 2 Duo. As I waited for the computer to boot up, I realized I probably should have spent the extra money on the processor. I ended up with a somewhat powerful chip again, which was nice.

Greg

Insignificant worries

It's amazing how much a single word can cause a ten-year-old to begin crying. When I was grocery shopping with my son, I the word "no". He was veryлизрangers his you run me over. I thought the whole world would end. If it's true that the world is not ending, then I'm relieved.

Mark

Eating greens

Why is it that there aren't any salad bars in Moscow? I mean, you can buy salad bar in Idaho, and it's easy to get to because I've never been on campus (try until) yesterday. I did not stop at the salad bar to get a salad. Apparently there is a salad bar on campus, but there are no real salad bars here available all the time. The "salad bar" in the Commons was even removed this year. I am from Levittown there are two fantastic salad bars there that I regularly buy salad from. Why don't they have the starchy vegetables instead of a salad bar? I promise you can use greens and whatever else I dig along with me.

Elisabeth

Busy busy busy

I could probably come up with a couple days in advance when I would have to use a solid 9 letter saying no. That's an entire day without eating it. I got everything done.

Anna

**Intolerances in print**

The following is a response to Benjamin L's ad: "I'd like to see violence against God". This is last Friday's Argorant.

Aidan Blevins: I am not confident to argue against your perspectives, especially since you've already stated them. I am happy to be in a discussion where you will respond to my voice in my opinion, but I can't do that if you continue to be silent. Having ideas all included into a larger talk is a way to seem to substantiate your own voice. For me, to argue against your intolerance.

I encourage you to present your approach to this topic in a way that is not based on a position of violence. You mention that you are intolerant of violence. I believe that is important to do so.

I do not call myself an atheist, nor do I think that is something that I'm sure of, just in the way that I'm sure of any other religious belief. While I do think that the beliefs that we are choosing to follow are important to us, I Volk do see how these beliefs are important to you.

However, I do think that it's important to me that we continue to continue these discussions, not just to understand each other, but also to understand the reasons why we feel the way that we do. I think that it's important to do so.

The Iranian government also made their clear that they would allow the IAEA to conduct inspections. Also, the IAEA still allows them to conduct inspections, and there is no precedent for this.

In terms of international sanctions, the situation in Iran is more complex, according to CNN, the United Nations has been in place for several years already. And, in terms of Iran, it is clear that the United States is not working to negotiate a nuclear deal.

More so, according to CNN, Iran is the most important nation in the region. Iran is the nation that is at the heart of the region.
iPhone should be on Verizon

Karen Loult

I have a BlackBerry on the Verizon Wireless Network. The iPhone is just on the AT&T network. But I wish I could have an iPhone on the Verizon Wireless network.

All summer long, speculation surrounded Apple Inc. and whether or not it would end its exclusive U.S. iPhone service deal with AT&T and begin offering the phone on the Verizon network. None of the company representatives have released any official statements confirming or denying the idea. But I believe that Apple doesn’t want exclusive deals to sustain itself when it could earn more profit by expanding to brand additional outlets. The company is currently missing opportunities for economic expression that was available in the past.

As a consumer and a fan of Apple, I am in love with the idea of having an iPhone with Verizon. In fact, if Apple ever announces that it has a contract with any other company, I would want to be in the Apple store the very same day, purchasing the cash for a pre-order before anyone else.

In a Sept. 14 article on computerworld.com, Garnett Lee reported that even though AT&T is the exclusive service provider for the iPhone, AT&T has said that Verizon, and possibly other carriers, could still offer the phone.

“With this talk on the precise of the consumer’s wallet — because I’m sure the only one who would increase Apple’s stock if I could swing a BlackBerry for an iPhone — it also brings to light the company’s expansive in building brand philosophy.”

I have an iPhone and I’m writing this column on a MacBook. I know that the Apple brand carries a certain weight. I understand that part of the appeal of the iPhone is ingrained in the fact that it’s offered exclusively to certain carriers.

“Almost certainly, this entire strategy will fail and an iPhone without the two-year contract will not hit the market. However, it will help点钟 the memory of the iPhone in the future. In the meantime, the only ones who will benefit from it will be Apple or pre-owned phone.”

There seems to be no reason that Apple can’t pursue a deal with Verizon and other carriers. They could have a unique version of the iPhone that could be made available only to Verizon.

“lsn’t this entire strategy a waste of time and money? The iPhone is a product, and Apple does have a contract with AT&T. Then the models will be sold for a lower price and available in stores. They might even suggest that Apple can’t pursue a deal with Verizon and other carriers. They could have a unique version of the iPhone that could be made available only to Verizon.

The iPhone is a product that could be made available only to Verizon. They might even suggest that Apple can’t pursue a deal with Verizon and other carriers. They could have a unique version of the iPhone that could be made available only to Verizon.

Kate Larewes

University Daily Kansas, U. Kansas

Many years ago, only people from the established investor networks, and the images of those networks, and the images of those networks, have laddered from our memories. The networks are still there, but for the reasons above, they are no longer popular. In the case of the Nano and MacBook Air, Apple didn’t have to reinvent its entire brand. It adopted the products and technology it had already invested in and secured patents for, and offered the products at lower prices.

But would a company want to spend countless hours and money researching, designing, and marketing an entire new product? In the case of the Nano and MacBook Air, Apple didn’t have to reinvent its entire brand. It adopted the products and technology it had already invested in and secured patents for, and offered the products at lower prices.

As much as everyone wants to believe that Apple is a company that thrives on innovation, the truth is that Apple is just one in a sea of companies that are in business to make a profit. If Apple’s business model is not profitable, it will not continue to make products that are profitable.

But would a company want to spend countless hours and money researching, designing, and marketing an entire new product? In the case of the Nano and MacBook Air, Apple didn’t have to reinvent its entire brand. It adopted the products and technology it had already invested in and secured patents for, and offered the products at lower prices.

“Many years ago, only people from the established investor networks, and the images of those networks, and the images of those networks, have laddered from our memories. The networks are still there, but for the reasons above, they are no longer popular. In the case of the Nano and MacBook Air, Apple didn’t have to reinvent its entire brand. It adopted the products and technology it had already invested in and secured patents for, and offered the products at lower prices.

But would a company want to spend countless hours and money researching, designing, and marketing an entire new product? In the case of the Nano and MacBook Air, Apple didn’t have to reinvent its entire brand. It adopted the products and technology it had already invested in and secured patents for, and offered the products at lower prices.

Going to the track in red high heels

Ashley Logan

Every year, an estimated 1.5 million women are victims of physical assault by an intimate partner. One in every four women will experience domestic violence in her lifetime. Females who are 20-24 years of age are at the greatest risk of violent intimate partner violence, but most cases of domestic violence are never reported to the police. These statistics and other information from National Coalition Against Domestic Violence can be found at http://www.ncadv.org.

October is National Domestic Violence Awareness Month, and to help promote knowledge and awareness of these issues on campus and in the community the University of Idaho's Women's Center and Brotherhood Empowerment Against Rape will be hosting the event Walk a Mile in Her Shoe: The International Men's March to Stop Rape, Sexual Assault and Gender Violence.

"By walking a mile in women's high-heeled shoes, men are challenged to not only raise their own consciousness about sexual assault, but also draw greater attention from their peers to the issue of sexualized violence," said Lena Salesby, the Women's Center's program coordinator.

"By promoting it on campus, we hope to raise significant awareness of campus and dating violence issues among college students, as well as some-needed funds for local agencies that provide programs and services to survivors."

The event will take place at noon today on the Din O'Brien Track & Field Complex behind the Student Center. The cost to participate is $5, or $15 with the purchase of a calendar that will feature pictures of the event. Calendars will be available for purchase at BookPeople of Moscow and UI's bookstore, or can be ordered online at the Women's Center Web site. Proceeds will go to: Alternatives to Violence on the Palouse, Survivor's Alliance, the Women's Center and UI's violence prevention programs.

"The organizations that will receive the money are all ones that devote much of their energies either to advocating and providing services and programs to survivors of rape and abuse," Salesby said. "Or to see SUPPORT, page B3

Vanity collects jeans to make denim insulation

Amberly Beckman

Vanity, a clothing store for teenage girls, has partnered with Cotton's "Blue to Green" program, which rescues jeans to make Ultra Touch Natural Cotton Felt Insulation for homes.

"Blue to Green" was created in 2006. It started as a student-run classroom program to educate college-aged people about cotton and reusing materials. They work able to build 20 houses in spring of 2007, for those displaced by hurricane Katrina. It has been growing in popularity and support since then.

Each pair of jeans is broken down to its most basic fiber forms, said Sarah Diem, a senator at Washington State University and employee at Vanity. The fibers are then used to make insulation for Habitat for Humanity. The organization's overall goal is to build 100 houses with this natural insulation.

Melissa Shumake, University of Idaho's Sustainability Center's Outreach Coordinator, said she thought the program was a great idea.

"People throw away fabric all the time and don't even think about it. They don't think of the alternatives," Shumake said.

As an incentive, when a customer donates denim clothing, Vanity is offering them 25 percent off a jean purchase in their store.

So far, Vanity has received more than 60 pairs of jeans, but it takes 500 pairs to insulate one house built by Habitat for Humanity. Moscow's Vanity has a goal of 500 pairs.

When the time came to register for the fall classes, I knew I needed to take a class for my theatre minor. At first, finding a class to fit into an already tight schedule was proving fairly difficult. That, along with the fact that at the time of registration I wasn’t “in the mood” for a theatre performance class, left one option. The course was about to my taste — the typical one-act play reading and script analysis class. The 473. Directing.

I was never one to just let things roll over me before the role, the person taking the approach, the approach of having a very counterculture. Now, as a student, I have come to realize how much of a difference this made in the class I took. The class was with my theatre professor, who also happens to be my theatre major. This made a big difference in the class I was taking. The professor was very engaging and made the class exciting. I found myself looking forward to the class more and more.

I still find myself thinking about this class and how it has changed me. I have come to realize how much of an impact a good teacher can have on a student. I have also come to realize how much I enjoy theatre and how much I want to continue to pursue it.

The class was a lot of fun, and I enjoyed every minute of it. I learned a lot and made some great friends. I would definitely take this class again and recommend it to anyone who is interested in theatre.

to support one house in the 200 house nationwide goal, Shumake said it is a reasonable goal.

"It's not about every person just throwing in, but it will affect someone," Shumake said.

Shumake said denim insulation is safer than other types, because typical insulation has small particles that can be harmful if breathed in or touched.

She said it is a really great way to reduce waste.

"We'll take girls jeans, guys' jeans, kids jeans, colored jeans, jackets, ... any kind of denim," Duskin said.

A table will be set up in the Commons for collection of jeans in exchange for coupons in early October and will continue through the month.

Shumake is collecting jeans up until Nov. 3. More information can be found at www.cottonfrombluetogreen.org.

Kate Fairweather/Idaho Press

Vanity assistant manager, Melissa Dickens, puts a pair of jeans into a bin for Cotton's "Blue to Green" program, which collects jeans to make Ultra Touch Natural Cotton Insulation for homes. The Moscow branch of Vanity has a goal of 500 jeans, so the amount it takes to insulate one household.

educating the campus and local community on issues relating to gender-based violence. Last year was the first year this event similar to this was hosted on campus. On Women's Equality Day, Aug. 26, the Women's Center participated in the worldwide campaign held outside the UI Commons and asked men who were walking by to put on a pair of high-heeled shoes and walk their way through the course. Shumake said no less than 50 men participated and they hope to double that number this year. She said a lot of these house members planned to attend the event.

Walk a Mile in Her Shoes is an event that occurs across the country every year, and is higher than local level. Frank Reid

first proposed the event in 2001, and the "walk" has grown larger and expanded every year since then.

Valerie Rump, assistant dean of students for training and resources and director of the violence prevention programs, said most programs are currently under way to help bring attention to domestic violence and rape. This project will showcase in the next month and include a clothing project to raise money.

Three fundraising screenings of the documentary "Healing Porn," which deals with violence against Cambodian women, will be at the following this month to coordinate with Alternatives to Violence on the campus. Wallace said the filmmaker will be at the Kenworthy Oct. 18 for the final screening. Online ticket sales will go toward supporting the survivors and human rights organizations featured in the film.

Golf season heats up

Women’s golf team heading for Washington next tournament

Lila Short
Argonaut

Starting the season on top, the Idaho women’s golf team will head to Sammamish, Wash., Sunday to open the Western Athletic Conference Championship tournament.

The Vandals swept the first two tournaments this season and coach Lisa Johnson said they are looking to bring that success to the tournament they have ahead of them. The team’s main goal for the year is to improve each tournament and prepare for the Western Athletic Conference Championships. Johnson looks at the team’s early success as an added bonus.

“It’s great to set the tone for the rest of the season,” Johnson said. “We hope to continue to build on our experiences.”

Idaho will face top teams on a course outside of Seattle, Wash., Monday through Wednesday.

Johnson said the Edina Blinds Invitational is on a difficult course that calls for a lot of forethought and a steady course, which will require the team to make smart shots.

“The golf course is a little long, so we’ve got to be prepared for that,” Johnson said. “We’ve been prepared for tournaments we’ve been playing, but it will be an exciting tournament.”

The team has been practicing on the driving range over the weekend and its players are long straight drivers for the course as well as hitting with their long iron.

The Vandals expect to see typical fall weather weather, which Johnson said is the cooler weather they play in this week to help them prepare. Only two of the golfers from Idaho haven’t played on the course before, so they are hoping their experience will give them an edge on the competition. The Vandals won’t be the only team with experience at the tournament, however — top ranked teams like California, Pepperdine and Stanford will also be at the Edina Blinds Invitational.

Last year, Stanford took the tournament but Idaho sophomore Karyn Montclair took first overall and the Vandals finished 7th overall.

“We’re looking forward to the tournament,” Johnson said. “It’s going to be a challenging course and a good field of teams.”

The Vandal cross-country team will look to build on their success from the last two meets when they travel to Boise to run in the Charles Bowles Willemette Invitational this weekend.

"Our goal is always to improve. That’s what we’re doing this week and we are looking forward to seeing how we did at Sunridge," coach Wayne Fliepp said. "I think the women’s team has come close to winning a couple of times so we hope for that and the men’s to be in the top three, which would be a good accomplishment for this cal-

The night I revolutionized fandom

There are times in one's life when you register a career change or start a revolution. History is written by the victors, but as Thomas Jefferson, Thomas Edison, and Julius Caesar (among many others) have told us, the child that first staked their claim on the battlefield that day is the one whose name will live on in the history books. The same is true of my career as a sports fan. I was always fascinated with the idea of sports, but it was during my time in college that I truly became a sports fan.

It all started during my freshman year at the University of Wisconsin. I was enrolled in a history class, and the professor was a die-hard Packers fan. He had just purchased a season ticket for the team, and he invited all of his students to attend the games with him. I was hesitant at first, but I decided to give it a try.

At the first game, I was struck by the atmosphere. The stadium was packed, and everyone was cheering for the Packers. I had never experienced anything like it before. I was hooked.

From that day on, I was a sports fan. I attended every game I could, and I followed the Packers closely. I even started a blog to write about my experiences as a Packers fan. My blog quickly gained a following, and I became known as a respected voice on the internet.

This is my story. I hope it inspires you to take up the mantle and start your own revolution. There is no greater calling in life than to be a sports fan.
BSU makes its case for national No. 5 ranking

Andrew Baggato
Associated Press

The Boise State Broncos are breathing some rare air nationally.

The fifth-ranked Broncos have climbed higher and faster than any other BCS team in the controversial system's 12-year history.

The Broncos, pride of the Mountain West Conference, are 8-0 and ranked No. 5 in the Bowl Championship Series standings, their highest ranking ever.

Boise State fans have reason to be excited. They're the first team in the history of the BCS to be ranked No. 5.

But Bronco believers aren't about to become complacent.

"We've got a lot of work to do," Boise State head coachChris Peterson said after the Broncos defeated Nevada on Saturday. "They're not going to give us a free pass here."

Boise State needs to keep climbing in the polls, too, if it hopes to earn a trip to the BCS national championship game.

"We've got to keep improving," Peterson said. "We've got to continue to get better, and if we do, the sky's the limit."

But Boise State is still a long way from achieving its ultimate goal.

"We've got a lot of work to do," said Boise State quarterback Jared Zabransky. "We've got to keep improving, and we've got to keep winning games."

Hosted at Best Western University Inn Conference Center
Message from the president:

Dear Employers and Students,

On behalf of the University of Idaho, let me extend a warm welcome to each of you—attendees and participants—for joining us at the 2009 Engineering & Computer Science and Fall All-Majors’ Career Fair.

This event is an important connection point for University students and prospective employers to match skills and needs during these challenging economic times. Through the years, we have built strong partnerships with members of the business community and are encouraged by your confidence in our students.

The University of Idaho community is proud of its students; they are known for their commitment to academics and service-learning and are prepared be truly engaged citizens and engaged members of the workforce. We know that employers benefit from the distinctive way in which our students embrace learning and can put that learning to work.

But our interest in students is not just limited to teaching them in the classroom or facilitating field-learning or service-learning projects. We take an active role to assist them in finding relevant and meaningful work experiences to complement their fulfilling academic responsibilities. To that end, we provide career-related assistance prior to and upon graduation to enable students and alumni to achieve their employment and career goals.

Students, you will find this Career Fair to be an exceptional opportunity to talk with local, regional and national employers and industry leaders and to explore options for internships, summer and seasonal jobs, and entry-level positions. Employers, you will learn much about the quality of education that defines and shapes our students.

The career fairs represent an essential step in the lives of students who are well-prepared to enter the work environment and become contributing members of society — Idaho students are truly citizen professionals.

Sincerely,
M. Duane Nellis
President

Why even go to the career fair?

The student experience

Kim Engel
University of Idaho Senior

Why go to the career fair? That is what I always asked myself. My professors would require it, yet I would still find ways to escape doing so. I would glance at the prospective employers beforehand and decide that none of them appealed to me. Well, thanks to that one teacher who insisted and said there were no "ifs, ands, or buts" about it, I went. I am happy I did. Squeezing in that hour between classes, as well arriving tardy to my next class, was worth it. I found the most amazing job that I could have ever wanted!

As I walked aimlessly around the Kibbie Dome trying to decide who I could talk with to complete my assignment, I stumbled upon a company located in Coeur d'Alene, ID (which also happens to be my hometown). This company was Gooszer Ranch Golf and Lake Club, and I applied for an administrative assistant position. I was called for an interview and ultimately got the job. Being a Human Resource major, I knew that gaining office experience would be a plus no matter what the job. They had a fun atmosphere that I really enjoyed and also paid very well. I worked for this employer my last two summers and began another job as a deckhand within the company. After obtaining this position, I found that they have numerous locations throughout the United States. If I choose to relocate to another part of the country, there are many choice locations to which to transfer.

The bottom line is we never know what's in store for us unless we put ourselves out there. I know there are plenty of times that we let opportunities pass us by because we believe we have better things to do, but maybe that great contact is just waiting to meet you. In the current job market one should not leave any stone unturned. This upcoming career fair could be your chance for success, do you want to let that slip by?

Anchorage School District
Booth #16
http://www.asdk12.org/
The Anchorage School District, the 8th largest school district in the country, is diverse in its staff, students and program offerings. Approximately 50,000 students attend ASD schools. They are taught by a well-qualified staff that sets high expectations and achieves great results. Our Anchorage School District student population reflects the rich cultural and ethnic diversity of the community. Anchorage is an educational, medical and commercial hub for Alaska. Many immigrants from around the globe live in Anchorage and 39 different languages are spoken by district schoolchildren. Roughly 50 percent of students are from ethnic minority groups. Student test scores are better than national and state averages.

ASD's Mission: Educating all students for success in life.

Inclusion Booth #35

http://www.inclusionidaho.com

The inception of Inclusion, Inc. began in July of 1993 when growing frustration with the lack of supports available to people with severe disabilities prompted a need for a new look at an old system. The concept involves providing 24 hours of support, supervision and assistance to persons with disabilities so that they may live in a more individualized, inclusive community setting. The goal for Inclusion, Inc. is to recruit individual choices for where and how a person chooses to live, work and recreate. In turn, people are living in their own homes and getting the support they need in order to have the quality of life they deserve.

We are looking for staff who are passionate about providing quality therapy to individuals with disabilities.
