A deadly combination

Mixing alcohol, medication a growing problem among college students

Dana Barney
Argonaut

Mixing medicine and alcohol can be deadly, accidentally or otherwise.

"A few involving mixing alcohol with medications that occur are important and powerful lessons," said Bruce Pitman, vice provost and dean of students.

"When we can work as do, complete the drinking and alcohol and drug education programs to help inform students," Pitman said, "along with engaging in intense enforcement actions when necessary.

"The action during the last year is cutting down on the weekend, we're getting to the health issues.

"Walker from the student health program has created a website that allows students to make reservations and to a counseling center.

"Next week, the counseling center is going to offer a panel discussion on the topic of mixing alcohol and medication to help students understand the risks.

"One of the main concerns is that mixing alcohol and medication can lead to serious health problems, such as decreased alertness and the potential for overdose.

"It's important for students to be aware of the potential risks and to make informed choices when it comes to their health.

"If you're feeling sick or have a headache, it's best to speak with a healthcare provider before consuming alcohol.

"The counseling center is available to help students navigate these situations and make safe decisions.

"For more information, please visit the website or contact the counseling center.

You're really flirting with fire by mixing alcohol and medicine. It's over the count and prescribed.

- Lehmann

LEHMITTZ

Department Lieutenant

President

"This can come to the Counseling and Mental Health Center, or students can speak with their primary care provider.

"We want to ensure that students are aware of the risks and are able to make informed decisions about their health.

"The counseling center is available 24/7 and offers services such as counseling, medication management, and support groups.

"If you or someone you know is struggling with substance use, please reach out for help.

"The counseling center is here to support you and help you maintain your well-being.

"For more information, please visit the website or contact the counseling center.

"Thank you for your support and for taking care of one another.

Stories from Friday, Feb. 5, 1960

Foresters Plan Stomp
Idaho's foresters will turn the pages of his
tory tonight and live for a few short hours in "the
good old days" when modern innovations in their
field were still in the embryonic stage.

The occasion will be the annual Foresters Ball, this
year being held in conjunction with the college's 50th
anniversary celebration.

Celebration of First C Club
Birthday Held

New members and seasoned veterans of the Cam-
pus Club financial campaign joined in celebrating
the first anniversary of the occupancy of the new
cooperative dormitory following a foresters' homecoming after dinner Wednesday.

Thanks to financial reserve of the Club, its
liquidable kitchen-equipment, and the $2,500 loan
which the University has promised, the rates of
the Club have been reduced, giving the members
a reasonable saving over the semester, commensu-
rate with the 70 plus hours of potential and ba-
shing duties they perform.

Two U. Pros Will Leave For
Research Work

By Pat Jordan
Argonaut Staff Writer

The Idaho professors have been granted sabbati-
uc leave this semester to give them opportunity to do
research work in their particular fields of interest.

Theodore A. Sherman, professor of English and
Harry C. Harmsworth, professor and chairman of oc-
ology, were selected for the leaves on basis of their
seniority of professorship.

KEY OBAMA EDUCATION PROPOSAL IN THE WORKS AT UI

By Kayla Hermann, Argonaut

A "nationwide approach to promote and strengthen future education in science, technology, engineering and mathematics [STEM], in therastructure that is underfunded," said Gregson, also a professor of adult, career and technology education.

From page 1

Name Change

In the last 10 years, UI went through the process of having outreach classes and doing outreach activities so we can attract great diversity in regards to backgrounds."

Different areas of the university are integrating STEM in their programs to reach out to new students. Steven Holbenstein, a member of the STEM committee at UI, is involved with the School of Natural Resources.

"STEM works with other elementary kids from Mccown all the way to Boise," Holbenstein said. "The kids might have a different perspective on STEM and science." He also said that the Outreach is very involved in STEM, and being more effective requires new research and development dollars.

"There is an event on STEM, but we are not pushing for it," Gregson said.

FEE from page 1

The university for a breach of contract. The university had announced a charge of $1,000 in federal and state court for the team's alleged欺负ive conduct. The family said the university was entitled to the $1,000.

FEE

The fees are paid to the state attorney general for the purpose of maintaining quality of service.

Counseling and Testing Services

Joan Pulaski, CIT director, requested $25,000 for mental health services and the counseling center.

Dean of Students

Valerie Russo from the Dean of Students Office requested $1,000 in faculty/student development funds. Russo said the money would be used to hire a diversity consultant.

"We have kids from all over the country and the state want to be in your program go places," said Russo.

ICSU

The Idaho Commons and Students Senate requested $22,000 in federal and state court for the team's alleged欺负ive conduct. The family said the university was entitled to the $22,000.

LGBTQ office

LGBT program coordination is requesting $3,000 for federal and state court for the team's alleged欺负ive conduct. The family said the university was entitled to the $3,000.

Marching Band

The UI marching band is requesting $3,000 for federal and state court for the team's alleged欺负ive conduct. The family said the university was entitled to the $3,000.

Rod's Game

The Women's Center director requested $5,000 for the team's alleged欺负ive conduct. The family said the university was entitled to the $5,000.

University Support Services

According to U.S. Rep. Robin Smith, the U.S. Department of Education would provide $2,500 to the university to support the team's alleged欺负ive conduct. The family said the university was entitled to the $2,500.

UIR's goals are to create a sustainable framework, which would help the university to maintain a long-range stewardship plan for the entire Dome and fully operational. University President Kall are overseeing the Dome renovation. Brook Bihl will be covering lighting, custodial work and locker rooms.

The Argonaut
Don’t learn the hard way
Students should never mix alcohol, drugs

It seems like every semester stu-
dents at the University of Idaho learn a similar lesson at the tragic expense of other students.

Last spring a UI student died of alcohol poisoning in his sleep after a night out drinking with his friends. In the fall, two students fell out of frater-

nity house windows after reportedly consuming alcohol, though they did not die, thankfully. Just last month, a student, Shan-

non Marlowe, died after consuming alcohol and drugs.

Alcohol, on its own, in reasonable quantities and in a safe environment, can be relatively safe. Students who are of age and want to unwind after a long day or have something to celebrate, but there is no excuse for mixing drugs with alco-

hol. Even prescription drugs that have you can be prescribed has disad-

eous effects when mixed with alcohol. When alcohol, adowner drug, is mixed with anotherdowner drug, whether prescribed or not, the result can cause serious damage to the person’s body. This isn’t “Reality Mad-

ness.” The threat to your personal health is real.

According to Sharon Pfitz of the UI Counseling and Testing Center,

there has been an increase recently in people combining the two substances. While the effects of awareness or simple carelessness, this is something that must be taken seriously. If you drink with someone and/or or with them when you are intoxicated, then you have a responsibility to help ensure they make it through the night and wake up safe the next morning. After all, if we can’t take care of our friends, then who can?

There is no reason for this. The facts are out there. Don’t think you’re invincible.

— JR

In the name of love
Why do we fall in love? Why is it we will spend seemingly countless amounts of energy for someone other than ourselves?

The basic instinct of a human being is to survive, but someone in love will willingly suffer and even die to protect those whom he or she loves. The sexual instinct is secondary to love. It only protects our own existence — our basic animal instinct.

This is absurd. Anyone who has been in love knows this. When you are in love, you feel something that can never be reduced to logical arguments. It fills your life, and no amount of debate can

President stands up for himself
In the past week, President Obama gave his first State of the Union address and then, two days later, spoke at the GDP House issue con-

ference. The GDP was nothing of the ordinary, save for the usual combative political rhetoric. His performance was far stronger than

expected.

The President seemed quite at ease, and even delivered a speech that was full of energy, spirit, and hope.

It was a welcome contrast to the 2007 State of the Union address.

Where’s my bonus?

The world of high-flying bonuses in the financial world sat to have weathered the storm quite well, even after the banks were bailed out by taxpayers. According to reports today that it does not appear that $4.4 billion in bonus money were paid. That is 19 percent of their gross profit for the 2009 fiscal year, in which they were bailed out by the taxpayers, ordered by Congress for excessive bonuses and told they would be regulated on bonus spending by, no less than, President Obama himself.

Big banks, however, must have missed the memo.

To give a perspective, the $4.4 billion, if spread out over every single Bank of America employee and they employ roughly 150,000 people, would equate to about $460,000 salary per employee. But, of course, not every employee is seeing the -- in fact, most are not. The $4.4 billion payout goes to top-tier employees; high- prized bankers, high-risk investors and stock analysts.

The very same people who have caused the economy into the ground are being paid millions in investments and over- the-top compensation packages -- getting rewarded.

Of course, bonuses have been around since the dawn of time, and thinking they will go away is absurd.

But banks have also been heating because of their lavish spending on their personnel while the rest of the country circulates the proverbial dead debt.

"The Fix. That’s exactly what they were doing. ‘Making a profit’ via fractional money-printing. Take in $100. Loan out $80. Fried," wrote one unhappy blogger.

The burden of paying for these bonuses, of course, falls on us, the consumers. Banks have come up with inventive new fees for everything on the planet. Overdraft fees to late payroll fees to late mortgage money for taking out your not ready mortgage.

Big banks have defended these fees and bonuses saying they need them to stay competitive. How can these people sleep at night knowing they are financing those who cheapen bonds and banks who have millions of dollars in their baggy knapsacks.

Not only that, they dare justify their actions of squiring away thousands of dollars out of our pockets.

Thankfully, there can be an end to it, as the Obama administration has made it a high point to reduce or curb bank bonuses spending.

In the mean time, at least this Fix has a blog.

"Work for Felix in a manner of speaking, since I pay my mortgage money each month. As a bonus, I think I’ll grab all of the rest of my mortgage."

Responsibility: not a stock option

Last week, Toyota announced a massive recall and stop-selling order for more than eight million cars, including the 2009 Corolla, RAV4, Camry and Corolla. This recall is due to a faulty accelerator pedal in these vehicles, as well as six others.

Manufacturers are making an immediate response to this customer problem will be implemented in hopes of retaining some dignity and respect. Unfortunately, Toyota considers an immediate responses they also hope consumers consider the mentality that, although millions of cars were faulty. Toyota responded quickly in showing their compas- sion for the consumer.

What Toyota failed to report in their press release is that the investigation to the discovery of such an exces- sive number of faulty vehicles began in August of 2009, after the accelerator pedal failed in a Lunar ES570 and on a Toyota Solara. Toyota had received more than 2,000 peer complaints stating that accelerator pedals were being jammed. The drivers were experiencing uncontrolled acceleration. The drivers were not able to separate their foot from the accelerator pedal, which caused the vehicle to move suddenly, putting lives and property at risk.

Unfortunately, the legislation is that the Senate needs to define a fault in order to be able to allocate and prioritize the Na- tion’s transportation fund. The executive branch is trying to write a budget that doesn’t have enough money for the NHTSA’s Diesel of Motor Ve- hicle Safety. The bill was released in November of 2009.

Hopefully, the safety of more than eight million potential drivers does not quite meet the market.

Even though the NHTSA has received bigger issues than faulty ped- als, Toyota’s reputation was hit. Toyota took more time to investigate this prob- lem. Toyota failed to notify the public in a timely manner, instead it was the situation and was working in the interests of the consumer. In actuality, Toyota is sticking to the people, their stockholders.

After releasing the recall, Toyota’s stock dropped about 489 points. However, on Feb. 1, when Toyota issued a statement claiming repairs on the faulty pedals would begin, the shares were still down about 260 points. Although their shares are still less than admirable, their actions make it clear that their intentions are in the best interest of the consumer as they like the public to believe. Toyota's stockholders, however, who actually hold all the cards.

Wall Street has regained its footing since the bank bailouts.

As quoted in the New York Times, Yunus, four months to the day of his first Executive, said "Every day in a bank, I am reminded of myself. I am learning to be a bankers. This was a hard lesson."

Toyota decided to learn their lesson and take their responsibility for even more pre- cious lives.

On stands every Tuesday and Friday.

And online all the time at uiargonaut.com, Facebook and Twitter.
Through a single random event that sets the rest of the plot into motion and allows the hero to fall in love, though they are complete opposites in many ways, Layne is a bratty charmer, being spoiled in Chase's theory, and be rushed at Idaho State University. Brian is a science fiction writer, though she hasn't even been the courage to publish anything yet. She meets Layne on the way to see her mother in Seattle. While their love story is fairly typical and the plotline is nothing too far out of the ordinary, what is special about "Strange Attractors" is its characters. Sweet (though perhaps brilliantly as Layne) is displaying the quirky perks of her personality in a perfectly balanced mix of sad and absurd. Brian, played by Jonathan Groff, is a strange frenetic character if only toward the end and a good trans- fer to Layne's ramblings on science, which are relayed by Elton, played by Eric Jasen, and Brian's best friend Louis, played by Nellie McKay. What shows the brightest about the plot is its dialogue. It is witty, sarcastic, educational and ideological all at once, playing off the themes and characters and the idea that even the most unlikely of matches can be perfected in the end.

While the actors did need to throw their voices further during a few scenes to keep the audience engaged in their dialogue and the ending was nearly anticlimactic, these were the only major flaws to be found in the performance. "Strange Attractors" is worth seeing and maybe even twice. Council weaves diversity tapestry

Elisabeth Rudd
Argonaut

Diversity has been a major component at the University of Idaho throughout its history, remaining a central mission and obligation of the school. The president's newly formed diversity council in the latest addition to creating a well-rounded campus.

According to the council that information-gathering and communication-building body that helps the president and his cabinet keep informed of diversity efforts on campus. In all, there are 16 members of the council, including the dean of the College of Liberal Arts, the director of the Office of Multicultural Affairs, student government leaders and such members of the faculty and student body.

Each committee has specific goals it will try to achieve based on the president's charge for the council.

Dive Merriman, Unity co-chair and council member, said her committee, student recruitment and retention, is planning on taking students of what they want to see in diversity and try to figure out how to get people to come back.

"Diversity is a crucial experience and adds to the uni- versity beyond what's in the classroom," Merriman said. "It's the life experience that makes the college experience so powerful.

Merriman said knowledge is a big part of the process and students should be aware of the measures that have been taken to improve diversity on campus. Juan Conner, ASUI director of diversity affairs and student recruitment, said a retention commit- tee is working on awareness and understanding and important elements to be gained from the meetings.

geek isSEXY

Twitter: as good as ever

The Internet was first the realm of the geek. Early message boards devoted to Star Trek and other popcultur pursuits pioneered social net- working. Harvard students started Facebook, and Twitter is still in need — such as Nellie McKay. "Strange Attraction" is written in a more than a few popular accounts.

Even though nearly everyone is on Twitter, most of the trending topics are dedicated to pop culture. Or as the anonymous Twitter user @nicholas_morris recently wrote: "I wish all the trendy topics were dedicated to pop culture. Just... not thinking about it... whatever..."

"If I were doing a mix or just trying to make people think before they tweet in the future, the keyword is thinking before they tweet. The phrase "I'm just a twittering cause... in a tweet that's not getting out is being used.

The No. 1 trending topic right now is #twittering, where people Tweet what town or other media piece they are listening to. A quick search turns up more Omari- ans, T.I. and Demi Lovato than Rus. They Might Be Giants and Jonathan Coulton. This is probably because of prevalence and popularity, but Twitter's user base is shrinking.

Many nerds who jumped on Twitter early are now complaining the Web site isn't what it used to be, as now a more general populua- tion uses it. These are the same people that become outraged when their favorite band becomes popular. The Internet has changed about Twitter. In fact, it became a bit of an antithesis to re-branding: easier ones can use it, push a button and say "hello," and trending topics help keep up with the news. Don't let the hashtags and memes! Don't click on the trending topics that don't look interesting. Avoiding what you don't like on Twitter is easier in avoiding pornography on the Internet — don't go to it in the search bar.
Gimme money

The Black Eyed Peas are overrated

Dress size dysmorphia?

Victoria Beckham, a.k.a. Posh Spice, was 29 years old last year. Picture experts say she started wearing 10-year-old boy-like figure in the same size as Jennifer Lopez’s? What? Has Posh looked in a mirror recently? How
does she compare her figure to J. Lo’s? curvy.

Nudie Lindsay

Lindsay Lohan is under going about 15 minutes of screen time in her new film, “Machete,” during which she’ll be swimming naked in a waterfall with her on-screen mom. Oh Hollywood, you and your soft porn.

Congratulations, Virginia

The “Miss America” pageant crowned its new winner, Miss Virginia, last Saturday. This time of year is awesome because the latest beauty queen topless photo/anti-gay marriage sex tape scandal is coming up.

All calm at the Shore

The feud between “Jersey Shore” cast mates The Situation and Pauly D has blown over. The two of them hosted a wild night at Miami’s nightlife. This time there were no physical fights and no sucker punches to

DIVERSITY from page 7

“I think great things will come out of this,” Comer said. “It’s a starting point for the future.”

Will you ever answer the question of how to actually change the world? Has no one person or group of people

should make the decisions for ever

ey says every parent will have to vote on because it will affect

ey and everyone. The promos are fast part of “weaving the UI
textures,” or blending each threads of diversity to make the campus a whole community.

Suer says many people think

of diversity as an end in and of itself, but it is actually a large part of an academic community, and that something the diversity council is working to change.

Upset in road to redemption

Pierce Bingle
Agonal

The Gem State’s claim is still up in the air, with the next game between Idaho and Boise State deciding it all. The Idaho men’s basketball team will be traveling to Bozeman Saturday to take on the Broncos for the final time this season in conference play.

The last time these two rivalry teams met ended in an exciting overtime game, finishing in a tie for the Vandals. With the game coming down to the last seconds before heading into overtime, both teams played competitively but the game ended in the Broncos’ favor despite the thrilling ending.

The Vandals are looking to turn around the losses to the Broncos and regain their basketball dominating presence.

The Vandals, 10-2 and 7-2 in the WAC, would also been two coming wins going into the game against Boise State and instead fell to the Aggi-ens, 84-71, Wednesday.

“They shot the free throw out of Idaho coach Don伏rak said. “They just beat us in every phase of the game again (Wednesday night), and that’s really frustrating.”

The Vandals, 10-2 in the WAC, are coming off a two-game winning streak and a loss against 1-25 in the WAC.

For the Vandals, Focused on State and Seattle University, saw contribution from everyone on the team to bring victory. Against Seattle, every starter on Idaho had a minimum of 13 points. Boise State, 2-7 in the WAC, is coming off a two-game winning streak.

Vandals are playing their best basketball in the WAC.

Vandals reach 2-7 in the WAC, but are at 4-4 in the conference. The Vandals are playing their best basketball in the WAC.

Idaho’s Rachel Kyle fights for a rebound with Nevada’s Amanda Johnson in Wednesday. Idaho snapped their three-game losing streak by knocking off Nevada 61-53, as Kyle led the Vandals with 17 points and seven rebounds.

The Vandals, 10-2 and 7-2 in the WAC, would also been two coming wins going into the game against Boise State and instead fell to the Aggi-ens, 84-71, Wednesday.

“Every coach in the country is excited about who they’re signing today,” he said. “We’re at good season.”

Idaho’s Rachael Kyle fights for a rebound with Nevada’s Amanda Johnson in Wednesday. Idaho snapped their three-game losing streak by knocking off Nevada 61-53, as Kyle led the Vandals with 17 points and seven rebounds.

Vandal soccer improves depth with talented crop of signees

Ilya Polchak
Agonal

With only six new signees for next season, it would be easy to dismiss the Vandals as underwhelming, but, that, never-coach Pete Shouet would be a huge mistake.

The girls all come from top-drawer club programs with a tradition of success. Pete Shouer said, “They are high-quality players as well as students.”

Fishing in Idaho

Living on the Palouse and being an outdoorsman, I find myself being blessed from so many angles. At a mosquitoes angle, I am aided — flying minutes away from great fishing grounds and a short drive from the biggest sturgeon in Idaho.

One of the best and most popular activities to do is fish the Spring Valley Reservoir. This is the closest fishing area to the University of Idaho. About a half-mile outside of town, many students spend their days relaxing there, eating fish, and watching the day away.

The Spring Valley Reservoir is located on the 106th Annual Fly Fishing Derby. This derby in Idaho is largest and is hosted by the Recreation Student Organizations, Idaho Fish and Game and Moscow Parks and Recreation. It starts at 8 a.m. Saturday and goes until 3 p.m.

Fishing is obviously not restricted to the spring of the year if you live in the Palouse, Idaho. Fishing on the Palouse is very popular, and the catch is usually worth your time.

Around the beginning of November the ice starts to freeze to a texture. Depending upon the weather, the ice starts forming late in October. Since this year has been warmer than usual, the freezing came a little late, but is strong nonetheless. Right now at Spring Valley Reservoir there is around eight inches to a foot of solid ice. The ice must be over four inches in thickness to be safe to walk on. This is the greatest time of the year to fish.

The Vandals will be competing against a few of the up and comers in the county including Coeur d'Alene, Waukegan, Pittsburgh and others.

The PLAYOFFS Season comes at TPC in Blaine and these will be the last event and has been named one of the top 10 golf events on the world by Transamerica and Golf magazine. A year ago it was Lamar University who Scotland completed in third. Despite the world being a little more challenging, this will be the first tournament of the spring season for the squad and is expected by Coach Teevens.

"It’s been a long, long winter and I’m sure we’ll see a lot of people who are interested in being involved in the sport, and we'll see how it goes," added Coach Teevens. "We'll go through the process and see how the sport evolves over time."

Weber said that the goal is to have 10 people on the team by the end of the season. The team will compete in the spring and hopes to continue to improve as the season progresses.

The entire Idaho team, including Weber himself, are concerned about this weekend's competition. "We need to come out with a clean slate and be competitive," Weber said.

Training has been very intense up to the meet. Tightening up the weight room and being fresh for the weekend. Last weekend a few members of the team went over to be a part of a University of Washington meet to get a little taste of the big time.

"We still have a ways to go," Weber said. "We need to work harder and smarter to prepare ourselves for the upcoming meets."
Time to take it up a notch

The women's tennis team had only two days of practice after winter break before jumping into its first match-up against a competitive Washington State Cougar team. Now, with a few weeks of practice, the team is ready for a home match against Eastern Washington and Gonzaga.

Washington State is usually nationally ranked and a strong Pac-10 school, coach Tyler Niel said. Now the team is settled in and is expecting competitive matches that could go either way.

"Eastern is always really competitive with us," Niel said. "And like Eastern, we expect close matches with Gonzaga.

The team has been working with different couples pairings and will continue to adjust this weekend to see who works well together. Next weekend, senior Gabriela Luca, a transfer from the University of the Pacific in California, will be able to start matches with the team.

There are a few things the team will need to focus on for the match to go smoothly. Niel said, Idaho faces EWU first and will need to close out the close match-up before it takes on Gonzaga in the second match of the day.

Niel said it's going to be tough to take on Gonzaga in the second half of the day because Gonzaga will be fresh and the Vandals will have already played. Being able to push through the EWU match and still be strong for the Bulldogs will be a big obstacle.

Another obstacle the team has is how to get through a double-header strong and without experiencing any injuries. The team has a few players that will be managing injuries throughout the day, but the players will need to be solid for both matches.

Senior Danielle Cohen and senior Yvette Le have some chronic injuries that they need to factor into how they can perform in both matches, Niel said.

"And we'll need them for both," he said.

Niel said he will have to collectively perform well and keep the injuries at a minimum to get through the grueling weekend. He is sure to show on Saturday.

Idaho brings winning streak to Oregon Ducks

The Idaho men's tennis team is taking its victorious streak into a close match-up against Oregon, Portland State and Seattle University on Saturday and Sunday.

Coach Jeff Beaman said the team has been playing pretty well across the board, but it will need to play well this weekend too.

"Should be a close match-up," Beaman said. "Oregon is our big one this weekend.

Last week the team beat Gonzaga, Lewis-Clark State College and University of California-Davis. Beaman said the team is going to need to play well and want to play their best to have a chance against Oregon.

This weekend should be a good test for the team.

AGRICULTURAL + LIFE SCIENCES AND NATURAL RESOURCES
AND Spring All-Majors' CAREER FAIRS

FEBRUARY 10

sponsored by the career center www.uidaho.edu/careercenter 208.885.6121
Welcome Employers & Students! We are very delighted to host this event and thank you for your participation in the 2010 Spring Career Fairs. This is a wonderful opportunity for students to speak with employers and explore the options for internships, summer and seasonal jobs, and entry-level positions. Employers learn about the quality of education and training students received from the University of Idaho. We are truly proud of our students and are confident employer representatives will be impressed with students’ academic achievements and subsequent准备ness as they enter the workforce. The University of Idaho takes an active role in assisting students find pertinent work experiences while undergoing their academic responsibilities. We also provide career-related assistance prior to and upon graduation, providing opportunities for students to achieve their employment and career goals.

This Career Fair provides a wonderful opening for students to connect with local, regional, and national industry leaders. It represents an important step in the lives of students who are well prepared to enter the work environment and become contributing members of society.

Best wishes to each of you!

M. Duane Nellis
President

10 Tips for Career Fair Success

By Kim Engle

1. Do your homework! Research information on specific companies that you find interesting. It makes a better impression if you are able to ask informative questions about the company.

2. Update your resume, and tailor it to specific companies! Personalizing your resume to the company and the position you are seeking shows your interest in their company. Visit the UI Career Center prior to the fair for help in revising your resume and for tips on how to make it stand out. For a quick review of your resume prior to the Career Fair set an appointment with a Career Advisor.

3. Prepare and practice for possible questions! Visit the UI Career Center or log onto www.uidaho.edu/careercenter for some helpful hints on interviewing.

4. Attend workshops provided by the UI Career Center! Topics include: resumes, interviewing, job/internship search, and career fair prep.

5. Network, Network, Network! The career fair is a great place to network. You will meet people currently working in your field so take the time to ask questions. Talk to everyone about your job or internship search.

6. Dress to impress! Be sure to look professional to make a great first impression; dress as though you are going to an interview. Men, wear a button-down shirt and tie, jacket, with dress slacks and shoes. Ladies, a business suit (knee-length skirt or slacks) with jacket or cardigan, a modest blouse (no low-cut or see-through fabric) is preferable, along with dress shoes (not spiked heels) and hosey. Sweats and jeans do not impress, even if you have a killer resume.

7. Prepare a 30-second elevator pitch! Think of how you will introduce yourself to the recruiters and initiate that first conversation. Sounding prepared and polished is going to give you an advantage over your competition; state your name, your major, year in school, and maybe two or three qualities that make you stand out. These qualities could be skills acquired from a project, an internship or job, your leadership roles in your clubs or organizations, or even volunteerism.

8. Always be polite and courteous! Wait your turn patiently to meet employers and make sure not to arrive at the last minute of the fair when employers are closing down their booths.

9. Turn your cell phone off! It is not professional to have it ringing (or to text) while you are meeting with a recruiter. Answer it later. Better yet, lessen the temptation by not bringing it with you.

10. Get business cards from the employers! This will allow you to write each employer you met with a thank-you card. It will show that you appreciated their time, enjoyed getting the opportunity to meet with them, and allow you a chance to reiterate your interest in the company. Jot a few notes on the back of the card to help you remember details.

Ferguson, a Wolseley Company
Booth #16
http://www.wolseleyny.com
Ferguson is a diverse wholesale distributor with operations spanning multiple business groups. The company is ranked as the largest plumbing wholesaler in North America. Ferguson is also the industry's second largest distributor of pipes, valves and fittings, waterworks, and heating and cooling equipment in North America.

In 1953, Ferguson was founded with $150,000 capital and two locations. The next five decades saw phenomenal growth, with the company doubling in size every five years. In 1982, Wolseley plc, based in the United Kingdom, acquired Ferguson, analyzing the financial strength for Ferguson's rapid growth and aggressive expansion into the industrial, heating and cooling (HVAC) and waterworks markets.

Majors Recruited: All Majors

US Forest Service-Missoula Booth #32
http://www.fs.fed.us/6/w-w/
We are a nationwide organization of more than 30,000 people engaged in hundreds of specific occupations, including Foresters, Biologists, Engineers, Teachers, Firefighters, Accountants, Computer Specialists, Law Enforcement, Public Affairs Specialists, Recreation Specialists, Geographic Information Specialists, and more. Most Forest Service employees focus on managing and improving our Nation’s forests and grasslands. Some employees focus on Forest and Range research, others focus on human resource development in Job Corps Centers, and others focus on state and private forestry coordination. This may sound simple, but it’s not. It takes men and women in several hundred disciplines working in coordinated teamwork nationwide.

WASHINGTON RIVER PROTECTION SOLUTIONS

Booth #41
http://www.wrps.com

Washington River Protection Solutions (WRPS) is the Department of Energy Office of River Protection prime contractor for safely retrieving approximately 53 million gallons of highly radioactive and hazardous waste stored in 477 underground tanks. The waste is stored in 199 older single-shell tanks and 28 newer double-shell tanks that are grouped in 18 farms at the 560-square-mile Hanford Site in southeastern Washington. The tank contents include materials from years of World-War-II and post-war weapons production, which account for 60 percent by volume of the nation’s high-level radioactive waste. These aging and deteriorating tanks are just a few miles from the Columbia River. Position Types: Entry-level, Internship/Co-op

WASHINGTON RIVER PROTECTION SOLUTIONS

Willamette University - College of Law
Booth #28
http://www.willamette.edu

Located in the heart of the beautiful Willamette Valley in the Pacific Northwest, Willamette University College of Law has trained talented, skilled lawyers for the past 126 years. Among the distinguished alumni are numerous graduates who have graduated more than a dozen Supreme Court justices and members of the U.S. Senate and House of Representatives. The nationally recognized certificate programs in law and government, law and business, international and comparative law, sustainability and dispute resolution, further solidify the strong foundation provided at the College of Law. Students gain practical legal skills through simulation courses, moot court competitions, externships placements and experiences with actual clients in the Clinical Law Program. Position Types: Full Time Experienced
