Alcohol Task Force preps for spring

By Tom Taylor

Heather Pearson doesn't believe the University of Idaho should try to be "the student health capital of the nation," or that "alcohol is a student's best friend," but she does think it would help if more alcohol-related cases were handled in on-campus facilities.

"I don't believe the University of Idaho or ASUI are doing enough to stop this," Pearson said, "but they're a long way from being satisfactory." Pearson, who is a psychologist and administrator at the University of Idaho's Counseling Center, added, "It's a shame that the University of Idaho has a student health center, but there are still many students who go to the University of Idaho Health Center."

Pearson has been working with ASUI's Alcohol Task Force on a proposal to change on-campus facilities to provide a "safe haven" for students to go to when they need help with alcohol-related issues.

The University of Idaho Alcohol Task Force was created early in the fall of 2004 to address alcohol-related issues on campus. The group has focused on the problem of alcohol-related vehicle collisions.

"We don't have enough alcohol-related cases to make a big difference," Pearson said, "but we're making progress." Pearson added that the group has been meeting every two weeks to discuss alcohol-related issues and to develop a plan for the future.

One committee will look at ways to increase the number of students who use alcohol, while another will look at ways to increase the number of students who come to the Alcohol Task Force for help. The group has also been looking at ways to increase the number of students who use alcohol for healthy reasons.

"Alcohol is a substance that should be used safely," Pearson said, "and we're trying to help students use alcohol in a safe way." Pearson added that the group has also been looking at ways to increase the number of students who use alcohol for healthy reasons.

"We want to focus on student intervention and prevention," Pearson said, "and we're trying to help students use alcohol in a safe way." Pearson added that the group has also been looking at ways to increase the number of students who use alcohol for healthy reasons.

"We want to focus on student intervention and prevention," Pearson said, "and we're trying to help students use alcohol in a safe way." Pearson added that the group has also been looking at ways to increase the number of students who use alcohol for healthy reasons.

October 2005, seeks to enable new efforts for existing or emerging activities to rise to a higher level of achievement and impact. It stems from the university’s Plan for Renewal and Strategic Focus. Pre-proposals are critiqued on the basis of their strategic importance, and for multidisciplinary attributes and addressing the university’s land-grant mission, enhancing and promoting diversity, contribute to the university and Idaho’s well-being, use of existing resources and potential for measured development and contain information of people and units.

The eight pre-proposals that are advancing, are in alphabetical order, including:

- "Building Sustainable Communities: A New University and Community Partnership" - Idaho Cooperative Extension

- "Institutionalizing Team-Based Interdisciplinary Research and Education" - University of Idaho

- "Nanomaterials for Basic and Applied Cell Biology" - Idaho National Laboratory and Idaho engineering education partnership

Application deadline of February 28, 2006, has received 15 proposals. Six of these are being reviewed by the selection committee of five researchers and five community reviewers, with funding decisions completed by April 17. Annual removal of feedback for each proposal is expected five years from the submission of the project.

For more information about the proposal process, visit the University of Idaho’s website at www.uidaho.edu.

The University of Idaho is the recipient of a $1 million investment. This campus and community can only support a passion for a documentary film and a better, greater, academic year if universities are free from parochialism and free to the public.

The campus and community can only support a passion for a documentary film and a better, greater, academic year if universities are free from parochialism and free to the public.

Mr. Jones and Dr. Smith are scientists studying the impact of deforestation on biodiversity. They are observing changes in the forest ecosystem and documenting the consequences. They are using various tools, such as satellite imagery and ground surveys, to track changes over time. Their research is supported by a grant from the National Science Foundation (NSF).

On Tuesday, April 8, the university will host a colloquium on the topic of biodiversity loss and conservation strategies. The event will feature lectures by prominent researchers and panels discussing the latest findings in the field. The colloquium is open to the public and will also provide networking opportunities for students and faculty interested in related research.

The colloquium will be held in the University Center from 4:00 to 6:00 PM. Refreshments will be served at 4:00 PM, and the program will start at 4:30 PM. For more information, please contact the Office of Environmental Science and Policy at 885-7784.

Additionally, the university will host a series of workshops and seminars on biodiversity conservation throughout the spring semester. These events will cover topics ranging from the role of nature reserves in protecting biodiversity to the latest research on climate change and its impact on ecosystems.

The university encourages all members of the community to attend these events and engage in discussions on these important issues. Together, we can work towards a future where biodiversity is protected and secured for future generations.
Two Katrina refugees make UI a permanent home

By Kevin Wickscher
AAGEN

Dawn Cooper had been in New Orleans for more than a day when she was forced to evacuate the city just in time to join her family in Iowa. It was a lottery for Cooper, who was one of the three Katrina refugees that UI was able to house. The move has been a challenge for Cooper, but the support from the university and New Orleans community has been a life preserver.

The University of Iowa was able to house Cooper and her family after Hurricane Katrina hit the Gulf Coast in 2005. The University offered to provide housing and support services to the refugees. Cooper and her family were able to stay at the university for six months, during which time they received assistance with housing, education, and employment.

The University of Iowa has a strong tradition of welcoming refugees and providing them with the resources they need to succeed. The university is committed to helping refugees integrate into American society and find a better life. Cooper and her family are grateful for the support they have received from the university.

As a result of the hurricane, Cooper had to make many changes in her life. She had to leave her home, her family, and her job. She had to start over and build a new life for herself and her family. The University of Iowa provided her with the support she needed to make this transition.

Cooper's story is not unique. Many refugees around the world are facing similar challenges. The University of Iowa is committed to helping refugees like Cooper and their families integrate into American society.

Many of the refugees who come to the University of Iowa are from countries that have experienced poverty, war, and persecution. These refugees are often faced with many challenges as they try to build a new life in a new country. The University of Iowa is committed to helping these refugees succeed. The university provides them with the resources they need to succeed, including housing, education, and employment.

The University of Iowa is committed to helping refugees like Cooper and their families succeed. The university is a model of how universities can help refugees integrate into American society and find a better life.
Fun in full supply at Village Bicycle Project benefit dance

By Jessica Mulhens Agnew

With more than $2,000 raised, the Village Bicycle Project benefit dance achieved more than its monetary goal Saturday night.

"The goal is to have fun, raise a little awareness and raise some money," said Dave Peckham, founder and coordinator of the Village Bicycle Project. "For me, the most important thing is the benefit dance." The South side project, a nonprofit group based in Moscow, which sells bicycles to Ghana, Africa, put on the dance to raise at least $3,000 or $5,000 needed to fund $20,000 in maintenance workshops in Ghana and train 1,000 people for their jobs.

The group’s motivation resonates beyond Africa, Peckham said. Bicycles are helping foster world development.

"At the Village Bicycle Project, we decided that putting bikes in Africa is an exciting and exciting thing to do for college students in this country," he said. "For some people it really represents an opportunity."

America’s American Legion Clinic was packed with an assortment of Palouse residents there for the drinks, dances, dinner and silent auction. Many different rhythms of the drums made up the music played by the University of Idaho ZimDrums, a marimba band.

Technical difficulties interrupted an informational video about the Village Bicycle Project at the dinner, Peckham said, but it was still played in the video, but through the CDs.

"People were enjoying themselves as much as I didn’t want to interrupt," he said.

UI senior Justin Saydell, who helped organize the event, and vice president of the UI Environmental Club, said, "I enjoyed the community atmosphere of the benefit dance."

"These are people who are open-minded about cultural and environmental issues," Saydell said. "And when you put that together, it is awesome." 

Interim Lorran Wilson, president of the Environmental Club, said he plans to get the club more involved with the project.

"As an environmental club, we are trying to be not only environmentally conscious," Lorran said.

The club helped at the project’s bicycle workshops, where volunteers prepared the bicycles for transportation to Ghana via shipping containers on ocean freighters.

"The Village Bicycle Project contributes to a positive way," Saydell said. "By providing an alternative mode of transportation it’s cut down on oil and virtual situations.

"To make people think about the world, the club campaigns for issues such as the project that effect both the United States and the world," Lorran said.

"It was a real good experience and a good way to give back to the world," Saydell said.

"As the world becomes more capitalist and free-market, people have a greater need for transportation," Saydell said.

Peckham continued, his passion to bring bicycles to Africa after volunteering with the Peace Corps for his work in a small village in Africa.

"I had a firm belief that bicycles can make a huge difference for people in Africa," Peckham said.

"It will have more money and new time to work, and they will great more need to work a lot together," Saydell said.

If people see more production in the worst areas, they won’t have to move to the other areas where there are no people.

"They can work their own land and make their own money," Peckham said.

The first shipment, in 1998, the Village Bicycle Project and the American Legion Clinic have been gathered from places like Boise, Moscow, Seattle and Boise.

"I have a lot of help and supporters in the Palouse area," Peckham said.

And the support was obvious at the benefit dance.

**What is after college?**

**By Cydie Holub**

I don't know how many times in my life people have asked me the reason I am going to school.

"Do you have another decision that you hadn't decided last quarter?"

"Do you know that it's even in the forefront of my mind?"

"Do you just want to get away from it?"

"Do you want to go to the church where it's going to be okay?"

In my mind, I come up with any type of thing that's about to happen with the... why are you coming here?"

"Do you have any interest in terms of a future or a job."

They're just asking questions.. You don't have a director, you're waiting for the day that you will be okay.

**By Carrie Wolfer**

From the earliest times of recorded history, humanity has been obsessed with origins. Various religions all have different stories about their own creation stories. Some of these stories even differ from another another, others only come closely related.

The news is that the humans and the beliefs were often important upon them to be a source of a good course of action. The more people are considered from the stories of the different cultures, the more we are considered from the stories of the different cultures and the different cultures have the source of evolution and natural selection sources. The basic idea that God created all beings as we are, and now we are still the same. However, their theories basically are considered acceptable to withstand gradually improve with advances in alcohol research.

Because of the general acceptance, Darwin's theory became a driving force of high school biology classes.

When I was in high school, the textbooks were written on them and the textbooks were revised often upon them by the regression of the textbooks.

The more of these stories that were considered from the different cultures, the more we are considered from the different cultures and the different cultures have the source of evolution and natural selection sources. **Knowledge of protection**

Dear Editor,

To your article in Taylor's article, "Learning on the best seat in the house" (Dec. 17), I would like to add a few comments that may be summarized up quite well in the words of "The J.R. in Chicago" (Dec. 17). Students are considered to be the most effective audience for presentations when it is within their group. The first question that is often asked: "What is your goal?" and "What are the tools they have that we don't?" The second question that is often asked: "What is your goal?" and "What are the tools they have that we don't?"

It would be wise to remember that students should be educated about how to practice safe sex and responsible sex that can get sexually transmitted infections (STIs) from anyone, including HIV. This shouldn't be a surprise to anyone.

Safari Pearl relocates

By Rhett Reese

The Day! film festival announced Thursday that it has moved its 2007 venue from the PlayStation Co-op building downtown to the new Safari Pearl building on South Street.

The move, said festival director Fisher Phillips, was necessary because the building was no longer available.

"We were really excited about having the festival in the Co-op building," Phillips said. "But the building is being sold, so we had to find a new location.

The Safari Pearl building is ideal for our festival," he added. "It's a large, open space with lots of natural light."

The Safari Pearl building is located on South Street, just south of the intersection of South and 8th streets.

The festival runs from July 15 to 21, with a variety of film screenings, workshops, and social events.

For more information, visit www.theday.com/filmfestival.

Bats and Sisiths aside, these movies ruled in 2005

By Rhett Reese

This time, the movie world has gone back to the future. The year 2005 was full of movies that were just what we wanted, from big-budget blockbusters to independent films that made us think.

1. "The Lord of the Rings: The Return of the King"

2. "Dances with Wolves"

3. "Pirates of the Caribbean: The Curse of the Black Pearl"

4. "The Constant Gardener"

5. "King Kong"

6. "The Bourne Identity"

7. "Brokeback Mountain"

8. "Crash"

9. "Cinderella Man"

10. "2001: A Space Odyssey"

Moscow residents Lacille Ranco, Matt Haggard and Ron Ranco look through thousands of comic books sharing their interest in comic books at the comic book store. Emily Ramsey, 19, moved into the old Moscow Food Co-op building last semester.
Versatile Sol’Jibe to walk the Alley

By Brian Rich

"The music of Ben Harper's 'Cajon' is the touchstone," Kelt Lohman, the band's percussionist and part-time cellist, says. "We all drew inspiration from his music. We wanted to make it work, which involves an interesting performance when mixed in with other percussion instruments."

Sol’Jibe has been together for 16 years, though it disbands during the summer months. It began when guitarist Daniel Miller met and played with a schoolmate at their high school. After two years as a band, they began playing together and eventually moved to Spain to study flamenco music. Since then, they have put up 45 albums, which has been an amazing performance when mixed in with other percussion instruments.

"I never knew that I could do that sort of performance," Phillips says of his joining the band. "I knew a couple of them, but I never knew that I would go out and set it up and work."

Phillips said the band's live performance is unique because the members use one record for a show, a song that they try to reproduce in the studio. The music is full of energy. You need to be ready to thrive.

Sutherland, who has been playing classical music since he was 15, also plays rhythm guitar and sings backup vocals. He says "I had a melody come in at 11 a.m., then we made it and got it passed out, rock and roll that time." Sutherland said "I picked up guitars and started playing."

I met Miles in high school and got into acoustic world music. Miles, the world's most influential hammer-based harpist, is the band's lead singer. He began playing piano when he was young, telling family stories that he was ready to thrive.

'Sol’Jibe' is a fascinating Puget Sound adventure

By Tori Roberts

Here's a journalist making a living in the Pacific Northwest. As editor of the Friday Harbor Republican, she's in a unique position to witness the local music scene. And she's not shy about it. In the story of Miles O'Malley, a Washington bluegrass band, she uncovers the most fascinating details.

Even Idahoans without much experience with the ocean

When people think of the ocean, they think of Miles. Miles is a bluegrass band, like no other. They are a band of brothers and sisters, and their music is full of energy. You need to be ready to thrive.

Getting the Adrenaline Going

Yours and Who Reads About It on Your Resume?

At an Army ROTC Leader's Training Course is a great 4-week leadership experience that provides the beginning of your career as an officer, a leader of the Army.

Your ROTC Leader's Training Course is a great opportunity to develop your leadership skills and gain valuable experience in a variety of military-related activities. You will also receive valuable training in military tactics, strategy, and logistics.

You will be introduced to the leadership skills and techniques that are essential for success in the Army. You will also learn how to work effectively in a team environment.

You will have the opportunity to develop your decision-making skills and learn how to manage time effectively. You will also learn how to solve problems and make decisions in a variety of situations.

You will also have the opportunity to develop your communication skills and learn how to work effectively with others. You will also learn how to work effectively with others.

Your ROTC Leader's Training Course is a highly selective program that provides a challenging and rewarding experience for those who are interested in leadership and military careers.

To find out more about Army ROTC Leader's Training Course contact CPT Rick Stahl 208-485-7643, or visit www.armyrotc.idaho.edu

THIS BAND ALWAYS GETS A STANDING OVATION

From jazz to rock, show tunes to symphonies—of course, the world's greatest marches—Soldiers play music in the U.S. Army every day around the world. And when they play our national anthem, we all stand and cheer.

Join the band. Call Sergeant Taylor at 509-332-6578 to arrange an audition. And find out about money for college plus Army benefits.

or talk to a Recruiter at the Pullman Army Community Center, 401 Main, Pullman, Washington. Monday - Friday, 9 a.m. - 4:00 p.m.

A '24' movie could be in the near future

By Daniel Fieberg

LOS ANGELES — Since 2001, Kiefer Sutherland's dedicated condo-dwellers have been following the life of Jack Bauer, a counterterrorism agent for the CIA, and his family. The show's "24," whichJack Bauer has been on Fox TV since 2001.

Speaking with reporters at the annual convention of the Screen Actors Guild, Sutherland said "I can't believe that '24' is already in its 16th season." Sutherland says that he has been working on the show for the past 16 years, and that it has been an amazing journey. "I never knew that I could do that sort of performance," Phillips says of his joining the band. "I knew a couple of them, but I never knew that I would go out and set it up and work."

Phillips said the band's live performance is unique because the members use one record for a show, a song that they try to reproduce in the studio. The music is full of energy. You need to be ready to thrive.

Rachel Carson, as vehicles to work amazing facts endlessly into the story.

While many people think of the ocean as the deep, Miles is more familiar with tidal life. Miles' music contains emotions that are expressed in the music, which Stravinsky says is anything but a challenge. "I'm a musician," Miles says. "I like music and I like the ocean."

Rather than make Miles a one-hit wonder, Lynch remains true to his character. Like most teenage boys, Miles becomes self-centered and tries to use the attention to his own advantage. While he's a leader, he's also a teenager and sometimes needs to be dragged kicking and screaming to the Promised Land.

"I believe the character of Miles is very much like that of my younger brother," Lynch says. "He's a teenager, he's a soldier, and he's also a musician."
Vandals fall to Spartans

By Karen Lamb

A mid-court lay up allowed the Idaho men's basketball team a few extra days to rest before its next game against San Jose State Tuesday.

However, even the few extra days didn't help Idaho's shooting woes.

Shooting 31 percent, the Vandals (12-2, 4-2 WAC) continued to be ineffective as they attempted to pull the ball in the basket against the Spartans, 71-45 at Cowan Spectrum and ending a 2-game road conference losing streak for Joe State.

"Wasting any game on the road is very difficult to do, so for us, this is a big win," San Jose State coach Tom Sienkiewicz said.

"Coach gave us a great scouting report on the state," New Mexico guard Keni Watson said.

"The fans were loud and busy on film. I just come down to the舒服, to the floor, and got the freedom for the fans.

"We just struggled making shots from time to time and miss layups." 

Although the Spartans (5-12, 1-3) shot nearly as poorly as the Vandals, the telling stat was the 3-point shooting. 2 of 31 for the U of I compared to 6 of 19 for JSU.

"We all made baskets, "said Mark and Daniel Chadwick led Idaho with a game-high of 17 points each. Senior Todd Marken added nine points and six rebounds, shooting shorting controlling at the end of the game and 2 of 2 from the arc.

The shot and two teams that have been struggling to win games. Idaho coach Leonard Perry said, "We got it down to a one-possession game and they had some guys step up" with the shot.

With the win, the Vandals (12-2, 4-2 WAC) shot nearly as poorly as the Vandals, the telling stat was 3-point shooting. 2 of 31 for the U of I compared to 6 of 19 for JSU.

B-BALL
from page 9 and covered the first three quarters, but just got Wittenberg's open in the corner for a potential game-winning jumper with five seconds left. The shot was short, and he was wide," Perry said.

Wittenborn filled the shot, after a timeout, and annoyance and a chance for the Vikings, first with 3.3 seconds left. He immediately made an attempt to make a full court shot, which was again short and wide. "We should have won," he added.

On Wednesday, the Vikings will travel to face Buena Vista in a non-conference game at 7 p.m. The game will be over the weekend.

TRIATHLON
from page 9 The 2006 Triathlon Challenge in the Spokane area, held a year ago, had a membership fee of the broken record at the Student Recreation Center. The Virginia Street community center hosted the event.

"Each person has their own strategies, programs or a jack of all trades," he said. "But the acts of the members can be a BIG difference in the outcome of their own, the clubs, or the groups for which they change." Although most people are comfortable with the idea of eating a meal at the triathlon, many are still interested in learning more about nutrition.

"It is certainly open to people who want to see. There are a lot of people interested in the triathlon." The male-to-female ratio of the members is split.

"It's a great thing to see. All people are accepted, regardless of any criteria that might be in place, to enjoy the event and to have a good time. We encourage all to try to participate. They do not have to be a member," said For more information, call Tracy Chalmers at 228-0291.

UF men's tennis loses first match
UF's men's tennis team lost in its first match of the spring season.

Despite the 7-0 loss to Florida on Tuesday, UF's men's tennis head coach, Michael Zug, said that the team is doing well.

"It was a very exciting match," Zug said. "We were going for it the whole match, and we beat Florida before.

The team is one of the top 10 teams in the nation and is ranked No. 6 in the nation. The team has a shot at a national championship, Zug said.

"The team is very excited about this season," Zug said. "We are going to play with a lot of confidence and we are going to play with a lot of enthusiasm.
