A world against: UI Muslims speak out

By Nate Poppen

Editor’s note: This piece is the second in a series of articles on the Muslim Student Association as a whole and its recent activities. The first article was written by Muslim Student Association member Justin Mousseau.

FOR MORE INFO
Those who wish to learn more about the Muslim Student Association can e-mail info@umisu.org or visit www.pages.uidaho.edu/~musu.

By Sunny Winnefeld

Seven people a week die from violence in the United States. And the United Nations has estimated that one out of every five people has been directly affected by violence. The issue is not one that can be ignored. As Muslim students at the University of Idaho, we are working to educate the community about the Muslim religion and the teachings that it contains.

Other groups on campus have tried to address violence, but none has been as successful as the Muslim Student Association. The Muslim Student Association established to do much of anything until recently.

There were a period right after 9/11 when nobody did anything.

EARTH WEEK

Recycling good, but think further

By Mackenzie Stone

Local recycling activists say students need to recycle, but the process needs to be incorporated into their daily lives and the university is acting on this.

University of Idaho students need to make changes in their waste production, including more emphasis on reducing and reusing before the recycling process even begins. That includes making sure recycling and solid waste supervises.

"Recycling is the easy part," Martin said. "Reduce the amount of waste you generate.

"It emphasized that students are aware of the consequences of not properly disposing of waste and reducing the amount of trash. Not only can they benefit from the environment, but also improve their daily lives in the process.

"But I think the most important thing is to think about the environment first." Martin added. "In the face of the current generation, and if all clue fails, then recycling begins.

"Reduce, recycle, reuse" have been buzzword in the recycling industry, with some companies even promoting the idea that recycling is the only way to solve the problem. But it is still a struggle to get students to practice effective waste management.

"Waste Management," Martin said. "It's very important to some people.

"Moscow Recycling's Andy Boyd and Martin both said that the average undergraduate student generates about 5 lbs. of trash per week."

"Reduce, they really need to think twice about whether that waste is even worth recycling." Boyd and Martin think students can be more environmentally conscious by changing their habits, buying reusable materials and finally making more decisions to recycle.

"We're trying to do our best to keep the waste from being thrown in the garbage. Also, students can make a difference by choosing sustainable items and having less waste," Boyd said. "We work closely with the recycling center and try to keep the waste from being thrown in the garbage.

"Simple things like not using disposable coffee cups and not using paper towels are very important. Simple things like not using disposable coffee cups and not using paper towels are very important.

"I think the most important thing is to think about the environment first." Martin added. "In the face of the current generation, and if all clue fails, then recycling begins.

Five new proposals granted funding

By Sean Carroll

The University of Idaho has chosen five new programs that will share $32 million in statewide research funding. The projects, part of UI President John V. White’s Plan for Renewal of People, Programs and Places, were selected by a committee of 43 proposals submitted last fall by the university’s community. Eight people were invited to be members of the committee, and the chair was an at-large member of the Board of Trustees.

The leaders of the new programs will begin working to implement their ideas this summer. They will present their projects to the university council at the fall meeting, and the projects will proceed as originally designed. "We believe that the new programs will bring new ideas to the university and will be a new source of research opportunities that will benefit our students and faculty," said Dr. Fred McMillan, associate professor of physics.

"We will have a new approach to the university’s research infrastructure," said Dr. Fred McMillan, president of the university. "This program will be a significant step forward in the development of innovative research and educational programs at UI." The new programs will draw on the strengths and resources of the university.

"The programs will be a positive step for our university," said Dr. Fred McMillan, president of the university. "We have been committed to fostering a culture of innovation and excellence, and these new programs will provide us with a strong foundation for future success." The university will continue to seek opportunities to fund these programs.

UI club members succeed at Model Arab League

By Kevin Wilkens

Five new proposals were approved by the University of Idaho’s Board of Trustees on Monday, April 8, following a presentation by President John V. White. The proposals, which will be implemented over the next five years, will provide $32 million in research funding.

The projects were selected from a list of 43 proposals submitted last fall by the university’s community. Eight people were invited to be members of the committee, and the chair was an at-large member of the Board of Trustees.

The leaders of the new programs will begin working to implement their ideas this summer. They will present their projects to the university council at the fall meeting, and the projects will proceed as originally designed. "We believe that the new programs will bring new ideas to the university and will be a new source of research opportunities that will benefit our students and faculty," said Dr. Fred McMillan, associate professor of physics.

The university will continue to seek opportunities to fund these programs.

UI selects CBE dean finalists

Two finalists have been selected for the position of dean of the College of Business and Economics.

Dr. James Flynn and Dr. John N. D. Davis have been selected to serve as the dean of the College of Business and Economics. Dr. James Flynn is an associate professor of accounting at the University of Idaho, where he has been teaching for 12 years. Dr. John N. D. Davis is an assistant professor of management at the University of Idaho, where he has been teaching for 15 years.

Everett's replacement announced Wednesday

By Sarah Bacek

As UAS students anticipated a fresh face to replace former host Tom Brokaw at the station's weekly morning show, the anchor's replacement was introduced.

"I'm happy that I was chosen, and I am really excited," said the new co-host. "I have been waiting for this opportunity to come to the station." She added that she is ready to bring energy into the segment.

She added that she wants to stick to the style and format that Brokaw had for years. "He is a wonderful model for me to follow and learn."

For this reason, she said that she would continue to bring an "energetic and fun" viewpoint to the program.

"I would like to make sure that we continue to bring a student perspective to the segment," she added. "It is important for us to bring our own voices to the table and to continue to contribute to the growth of the station."
"Islam is the human religion... it's a religion of life."

John Pierce

"Islam is the human religion... it's a religion of life." — John Pierce

"I'm Muslim, my goal should be personal improvement," he says. "I believe in being kind to others. I don't want to be viewed as an enemy to other Muslims or to the Western world."

"I believe in being kind to others. I don't want to be viewed as an enemy to other Muslims or to the Western world."

MALAYSIA: "We are not bigots, we are people," he says. "We don't want to be viewed as an enemy to other Muslims or to the Western world."
A cohesive student-led government, anyone?

The past few weeks have been quite interesting for the student body of ASUI. The student government passed a bill that would allow a student-led government to be formed, and the response has been mixed. Some students are excited about the possibility of having a government that represents their interests, while others are concerned about the potential drawbacks of such a system.

The bill was passed with the support of the student body, and it now awaits the signature of the President. The President has indicated that she will sign the bill, which means that the student government will be able to proceed with its plans.

There are several reasons why the student government is popular among students. First, it is elected by the student body, which means that it represents the interests of the students. Second, it is transparent, which means that the students can see how their government is working and can hold it accountable. Third, it is inclusive, which means that all students have a voice in the decision-making process.

However, there are also some concerns about the student government. First, it is not a bureaucracy, which means that it may not be able to make decisions as efficiently as a bureaucracy. Second, it is not a democracy, which means that it may not be able to make decisions as popularly. Third, it is not a republic, which means that it may not be able to make decisions as constitutionally.

Despite these concerns, the student government is a step in the right direction. It is a step towards a more democratic and representative government. It is a step towards a more transparent and accountable government. It is a step towards a more inclusive and representative government.

The student government is a step towards a more democratic and representative government. It is a step towards a more transparent and accountable government. It is a step towards a more inclusive and representative government.
The "Grizzly Man" narrates his own intriguing story by Tyrone Wilson "Argonaut"

Documentaries are not only interesting as an subject, but also in the case of "Grizzly Man," the subject wasn't very intriguing.

While there are quite a few bears, the subject of the film is particularly interesting. "Grizzly Man," directed by Timothy Treadwell and the other two persons, is an interesting story. Treadwell and his girlfriend, Amour, lived in the wilderness for some time, and they were featured in the film. They were featured in the film, and their life in the wilderness is an interesting story. While not very interesting, the film is an interesting story.

Case of the missing funeral

"The West Wing" episode, "The Wedding," featured the funeral of President Bartlet. Unfortunately, the funeral was-only featured in the first two minutes, and the rest of the episode centered on years away. He actually lived in the wilderness for some time, and he was featured in some scenes of the film. This film is an enjoyable and interesting story.

People, like "Grizzly Man," are doing their best to protect the environment. This is a great story, and the film is an interesting story. While not very interesting, the film is an interesting story.

Patchwork family

The Poetry Slam: high energy, strong emotions

By Carissa McGraw

Though she's had numerous poetry slams before, Cecilia Alaksa is especially looking forward to Sunday's event.

Cecilia Alaksa, who has been performing for 10 years, said that this is the first time she's performed at the Palouse Slam.来kim the event is "It's about time to noises sexual violence," Alaksa, a senior sociology and Spanish studies major, will perform three poems.

"I'm looking forward to it," she said. "I don't do it for attention."

Alaksa has presented poems about religion and learning what's important in life, the story of a woman in Mexico, and the violence against women in the United States and Mexico. She plans to perform the last poem on Sunday, along with the other two.

When preparing for the event, Alaksa said it was challenging to find pieces that would fit with the theme of "It's about time to noises sexual violence." She said she was able to find three pieces that would fit the theme.

"A piece that is interesting to me is a poem about a woman who's a victim," she said. "It's a tough subject." The poem Alaksa will perform on Sunday is a free verse slam, but she said she didn't want to do a free verse slam, because it's "It's about time to noises sexual violence." She said she was able to find three pieces that would fit the theme.

"My favorite piece is a poem about a woman who's a victim," she said. "It's a tough subject."

Mother and daughters Wendy and Karen Lawrence work together on a quilting project. Wendy's "Patchwork family" will be on display at the fairgrounds this weekend.

When breaking up is the best answer

By Brian Rich

I treasured our last ... the love we'd built over a lifetime.

"because she's the wild card, the one who's always changing, always unpredictable, always forcing us to adapt and rearrange our expectations."

"But it's also because she's the one who's always challenging me, always pushing me to be better, to be more." -- John

"because she's the one who makes our relationship so exciting, so full of surprises and new adventures." -- Sarah

"because she's the one who brings out the best in me, who makes me feel like I can do anything, like I can accomplish anything." -- Michael

"because she's the one who keeps me grounded, who reminds me of what's important, who helps me stay focused and centered." -- Emily

"because she's the one who makes me laugh, who makes me smile, who makes me feel like the world is a better place just because she's in it." -- Jason

"because she's the one who makes me feel loved, who makes me feel like I'm the luckiest guy in the world." -- Tim

"because she's the one who makes me feel alive, who makes me feel like I'm living in the moment, like I'm experiencing life to the fullest." -- Ben
Already the buzz for ‘Snakes on a Plane’ at fever pitch

By David Hilhwhel
Knight Tribune Network

It’s hard to imagine a name that mercurialized the Internet or maybe it’s the movie that mercurialized the Internet because of its alter

name.

Despite the overwhelming pro

nunciations campaigns being led

on ‘Wichita Falls’ aka ‘We’re the

Weirdos’ aka ‘Wichita Falls’ aka ‘Supernatural’ and other alter

names, the movie ‘Snakes on a Plane’ from the company that happened, in fact, is noticeably a ride of mostly small

film on that flight.

Whether it’s goofy or genre (as both), the movie’s essence

is the same.

I think the whole appeal is that it’s the most honest movie ever.

—Stephanie Wnek

The larger question is why

this ill movie, right answer, has

generated such overwhelming

interest months before its rele

se.

‘Snakes on a Plane’ is an

untimely title, a middle

American, a joke maker that has been creating huge buzz on the Internet says Harry Mendel of the ticket

service thread: “It’s a movie that

seems to have been made to

be seen in plane

flees.”

The movie has an

awkward title. Popularity is sim

ilar: It’s the stupid. “I think

the whole appeal is that it’s the

most honest movie ever,” says

Stephanie Wnek, 22, a student

urgently growing ‘Snakes on a

Plane’ community on LivJournal.com. “When you think about how critical my generation is, we’re used to the studios pumping out

movies to sound more like more

than what they are. ‘Snakes on a

Plane’ is so refreshing, it’s all

the time and it leaves something

to the imagination. I think the

thing clearly shows the movies have

the value of the title. After

Johnson signed up the role, the

movie was briefly changed to ‘Flight’ because of the tit

e. New Line, who has done

a few films that would attract a

higher audience than action

titles about the switch, didn’t

change the movie,” says

The cast includes: Samuel L. Jackson, who plays a

man with a wry sense of humor, and

Dina Meyer, who plays Jackson’s wife in the film.

While the trailer is a

sordid text of a bonus to online viewers, the movie itself is

a fast-paced, action-driven

adventure that includes

an explosion of violence.

One of the changes involved in the movie was the

cutting of the film. The film was

edited for 120 minutes, while the

average trailer is 90 minutes.

But it’s the whole that matters.

I’m highly into doing observations and tempera

ments,” he said. “I do a lot of re

work, like Black Hill from

this plane.”

In presence of the movie’s

weirdness, comments, I think the whole appeal is that it’s the most honest movie ever.”

—Michael Howell

Can edgy really be sexy? when it's everywhere!

By Jeff Daniel
St. Louis, Mo.

Dana Knott remembers her first punk rock concert quite well. It was Aug. 17, 1977, and Knott made her way into the 
upstairs balcony of a packed ballroom.

"I'll never forget," says Knott, 46, who now lives in 
Albuquerque, N.M. "I'm not even sure if they played."

As Knott had heard, the crowd was so 
rowdy, the bar literally shook. The 
everyone pushed to the front, and 
knocked into the stage, which fell 
off the raised platform. The 
microphone stood on top of a 
barrier, and the speakers were 
permanently damaged.

"I was at the concert because 
I was into the Ramones and the 
Marx Brothers. I was a fan of 
the punk rock style," she says. "And I was more of a 
man that I am now."

Knott was not the only one 
who was affected by the 
concert. Her boyfriend 
(then-husband), with whom she is 
still living, was also there. 
When the Ramones 
finished their set, he 
was angry and ran out 
and started a fight 
with someone else.

"It was a step toward 
some of the kind of 
violence that I have 
seen in my life," she 
says. "It was a step 
toward the kind of 
violence that I have 
seen in my life."
Silver and Gold game wraps up spring football

By Ryan Atkins

The Vandals football team will kick off Ryan's Weekend with the Silver and Gold game. The game will wrap up the end of the spring football season.

With two scrimmages already in the books, the Vandals' offense and defense will show off their skills on Saturday afternoon.

"We ask them to play hard on defense, to play as hard as they can, to play to the best of their ability, and that is what they are doing. Scrimming around and making a lot of plays," Erickson said.

Last week the defense collected seven sacks while also forcing three turnovers and holding the offense's rushing attack to just 94 yards on 34 carries.

After the scrimmage performance on the field, the Vandals' offense was especially impressive for the quarterback of junior quarterback Jared Blikra, Darnell Dominique, and Kyle Rum, who are all battling to become the next quarterback for Erickson.

Despite the in-house competition, quart- terback Steve Wiesman said the team unity is at an all-time high.

"I think we have been closer as a team, being a little guy and been here for three different coaches, two, but I think we've been closer than we've ever been," Wiesman said. "We have all felt the bond and adversity brings everybody closer together." Wiesman said.

With Tom Cable and Nick Hill both having departed Moscow in the past three years, Erickson is working toward improving the Vandals' 2-9 record last year.

Still, Erickson knows that the Vandals and Idaho will be the first team he will be, and his team is a true game-like setting.

"The spring game will really be the first time that we have big guys. You know you're not just acting not playing and all these different things together," Erickson said.

Despite the high number of turnover and penalties committed in the first two scrimmages of the spring, Wiesman expects the team to be ready to play with the most guy-like setting and not too much hesitancy.

"We have got me another Saturday to continue and try and get it right," Wiesman said. "Everybody's going to have their parents here, as I see everyone is going to be ready for that.

MEN'S TENNIS

Trudel brings new skills to WAC conference

By Mackenzie Stone

It has been a challenging season for the men's tennis team, but freshman Joel Trudel is finding success in his transition into college athletics.

He has been a part of the team for this season, but he is only the player on his record before heading into the Western Athletic Conference.

Trudel’s team’s victory against LCSC’s All-Stars in two straight sets was a disappointment for both teams.

Trudel had the chance to compete in the match against LCSC on April 9. For Joel, it was a big goal to accomplish.

1. How did you get started in tennis?
I started playing with my parents when I was about 10. I didn’t start out on the ground, but I started playing competitively when I was 12, which is late for tennis.

2. What has been your biggest accomplishment?
I am a very big fan of the game, and I think it is great to have fun. I came from a coach, but I don’t have the most success. I am not the best, but I have friends, and I like to think of it as fun.

3. What do you wish you could become?
I wish I could be a professional tennis player. I want to be able to go to college and be able to continue playing tennis. I am very passionate about it.

4. Comment on your recent match against LCSC.
We played well, and I think that we played better than we played against LCSC. We played well, and I think that we played better than we played against LCSC. We played well.

5. Who is your favorite tennis player?
I think the best tennis player is Roger Federer, but that’s personal because of his dominance. He’s the No. 1 guy in the world in his prime under pressure. I think it’s a shame he’s not the one who’s really playing right now.

6. What is your biggest mistake?
My biggest mistake is that I don’t always go out and play. I don’t always go out and play. I don’t always go out and play.

7. Any nicknames?
I think I’m called ‘Trudel’ because I have a lot of stuff.

8. Do you prefer indoor or outdoor tennis?
I prefer indoor because it’s cold outside. We have to go outside, and it’s kind of a problem outside. We have to go outside, and it’s kind of a problem outside.

9. What other sports do you enjoy?
I enjoy playing soccer and running, and that’s probably it. I just want to play whatever sport is going on, but those are the ones I watch the most.

10. Which book is on your night table?
I don’t have one that’s on my night table.

11. Do you prefer indoor or outdoor tennis?
I prefer indoor because it’s cold outside. We have to go outside, and it’s kind of a problem outside. We have to go outside, and it’s kind of a problem outside.

12. What other sports do you enjoy?
I enjoy playing soccer and running, and that’s probably it. I just want to play whatever sport is going on, but those are the ones I watch the most.

13. Which book is on your night table?
I don’t have one that’s on my night table.

By Aline Hart

It’s a big weekend for UI climbing enthusiasts in the area. The University of Idaho Climbing Club will be holding a weekend of climbing events to try to get people to try climbing.

"It’s a great opportunity for people to try the sport," said Mike Reiter, Outdoor Program Coordinator. "There’s been a huge growth in indoor climbing as an activity in the last couple of years. It’s a great way for people to get out and have fun, and we have seen a huge increase in the number of people who are interested in climbing."

TRUDEL
from page A14
14. Have you ever dealt with
injuries?
I've had a few over the years. I was
once thrown from a horse after it
fell, but I have had surgery and the
damage was minimal.
15. Do you have any
pre-existing medical conditions?
I don't think so. I'm in good
shape and have no known
medical issues.
16. When was the last time
you were sick?
I take vitamins every day, so I don't
get too sick. The last time I was
sick was last year.

Morrison declares eligibility for NBA
Gonzaga's All-American Washington says
he will skip his senior year and make himself
eligible for the NBA draft.

The 6-foot-4 forward said he had a verbal agreement with an agent, which means he can change his mind and return to Gonzaga for his senior year.

A year ago, he led the Bulldogs to the Sweet 16 and is seen as one of the best shooters in the country.

The Gonzaga website said he had named the West Coast Conference as his agent.

WCC commissioner Leeza Davies said in a release that the conference is "pleased to assist the Gonzaga basketball program in their decision to move forward with the NBA draft process.

This is a big decision for any athlete, and we all wish him the best in whatever he chooses to do.

Gutierrez, who averaged 17.3 points and 7.1 rebounds as a junior, had 23 points and 12 rebounds in Gonzaga's 63-19 win over New Mexico Friday night.

The freshman forward, who is also a member of the U.S. national team, is the only player in college basketball to average more than 15 points and 10 rebounds.

Gonzaga's win ended New Mexico's 14-game winning streak and moved the Bulldogs into first place in the WCC.

"I'm very proud of this team," Gonzaga coach Mark Few said.

"They've worked very hard and have executed very well over the season.

"We've been able to bring some consistency into our lineup, and that's been a big part of our success.

"I'm just happy for our players and our fans.

"We're off to a great start, and we want to keep it going.

"We're happy to be in first place, but we know there are still some tough games ahead.

"We just need to keep practicing and playing hard.

"I'm excited for what's ahead.

"We're looking forward to the rest of the season."
