IDAHO ELEVEN TAKES FIRST GAME OF SEASON

Beats Gonzaga 54 to 3—Piles Up One-Sided Score—Lockhart Star of the Game While Brown Great at Line Plunges.

Employing all the strategy at their command, conceived in forward passes and fake plays, the Gonzaga eleven could not withstand the straight football employed by the Idaho warriors. This was the first game of the season for the Idaho eleven and while they were a little slow in getting together, at length they found no trouble in smashing through the Gonzaga line for yardage at will.

The first quarter was bitterly contested by the Gonzaga defenders, but they failed to stand up under the onslaught of "Pink's" dashing crew and the tide soon turned disastrously in favor of Idaho. Idaho won the toss and received the ball. McKevitt kicked to Brown on the 10-yard line from whence it was carried back 26 yards. Idaho lost the ball on a fumble when Higgin's recovery was penalized 10 yards for holding, but immediately got away with a forward pass, McKevitt to Shouldearer, for the yardage lost. Idaho was penalized for being off-side and Gonzaga was given the ball on the 20-yard line. McKevitt tried another forward pass, which was intercepted by DeWald, who then carried the ball 12 yards for a touchdown. Lockhart kicked goal.

Gonzaga braced up and came back desperately, more than holding their ground. With the ball on Gonzaga's 35-yard line McKevitt again tried a forward pass, but it was intercepted by Lockhart and carried over the goal. Gonzaga again came back strong and succeeded in carrying the ball to within 12 yards of the goal. Here they lost "Jack" Shannon, who was unequally used and from a receding position McKevitt kicked goal for Gonzaga's only score. The failure to make a touchdown seemed to take all the spirit out of Gonzaga and Idaho became more aggressive and carried the ball for a touchdown seemingly at will.

Codd relieved McKevitt and was able to inspire sufficient life into the team to hold the substituted Idaho line down to an even break. Lockhart was easily the star of the game, making five touchdowns and kicking goal six times out of the eight trials. He showed great ability at picking holes and dodging through an open field for long runs. At the rate he has started he looks like easy all-northeast material.

Brown's line plunging was a feature of the game. He proved himself worthy of comparison to Buckhietie, the famous U. of W. halfback. Purdy at quarter, handled the team well, defining the straight football used by "Pink" did not give him a chance to show his ability at field generally. Idaho, although he had a badly injured hand, was stone wall on defense, making it nearly impossible for a play to be successfully pulled off around his end. "Red" Johnston carried the ball for a touchdown, from touchdown—Lockhart, 6. Goals from field (drop-kick)—McKevitt 1.

IDAHO MEETS W. S. C. FRIDAY

Format Opening of the New Athletic Field.

On Friday of this week Idaho will again meet her old enemy upon the football arena at Idaho's home-ground. The last time that Washington State college aggregation made it's appearance on the Idaho gridiron, Idaho went down to defeat at the rate of 17 to 6. We console ourselves by saying that our team was out-weighted 15 pounds

AUDITED BOOKS

OF UNIVERSITY

EXPERT ACCOUNTANT FOR STATE
BOARD JUST COMPLETED TWO
WEEKS' WORK.

Glen Clark Bill for the Excellent Rec-
ord Kept at the Office of the
Registrar.

A. G. Kennedy who has been em-
ployed by the state board of education
as special auditor at the university for
the past couple of weeks left Friday af-
ternoon for Lewiston, having com-
pleted the first audit of the books and
records at the varsity. His work has
included many interesting and en-
tirely novel features among which have
been the compilation of figures showing
the exact cost to the state of main-
taining not only every department of instruction but every "able" course that
is offered in each department.

Further than this he has figured the
cost of the instruction per capita in
every department and in every course.
His figures have all been drawn from
the last number of the university cata-
logue.

No startling figures.

"In comparison with the cost per
instructor, in many other
state colleges and universities," said
Mr. Kennedy, "the Univer-
sity of Idaho's record presents no facts that are
at all startling. I have found to my
great surprise that the cost of instruc-
tion at the university is far below what it is commonly believed to be."

"My work here," continued Mr.
Kennedy, "has been productive of many
other very gratifying results. I have
found all of the books and records
cautiously kept and in excellent shape."

From here Mr. Kennedy went to the
Lewiston state normal school where
he will spend a couple of weeks in
work similar to that which he has just
completed at the university.

UNIVERSITY CHART

Interesting Figures Compiled in Dean
Eliglridge's Office.

An interesting chart showing the en-
rollment of new and old students in the
various departments and courses at the
university has been prepared in the
office of Dean J. G. Elidridge. The
figures are based on the registration
only up to October 3rd. Since that
date more than a dozen new students have registered, eight pupils for ad-
mission last Monday. More will regis-
ter next week.

In the college of letters and sciences, including B.A. and B.B. work, music,
home economics, and forestry there are 326 students enrolled. In the college of
agriculture there are 61. The col-
lege of engineering claims 84 and the
law college 51. In the college of
letters and sciences the B.B. course
leads with 34. In the college of
agriculture the largest enrollment is in the civil engineering course.

By courses the enrollment is as fol-
lovs: B.A., 72; music, 12; home eco-
nomics, 46; forestry, 29; agriculture, 61; civil engineering, 21; mining en-
engineering, 17; electrical engineering, 27; mechanical engineering, 11; chem-
ical engineering, 8; law, 21.

The short courses which have not
been opened are the school of practical
agriculture, school of home science,

1-year dairy course, miners' short
course, forest rangers' short course and
the good roads school. The enroll-
ment in these courses will bring the
total registration past the 800 mark.

Idaho.

Under the above head, Judge Good-
win of Salt Lake, one of the best
friends the Gem state has outside
her borders, pays the following compli-
ment to her splendid newspaper,
Goodwin's Weekly.

"Our neighbors in Idaho are dis-
pensing with us as to the measure
of progress. And they have a reason
for it, for Idaho is swiftly becoming
one great garden. Her claim is that
she has more agricultural land and
more water to irrigate that land with
than any other state in the great
basin, and that she is putting that
land under cultivation faster than any other
state. And she is right, and what
she produces is perfect. It is true that
in a very few years she will have more
land under tillage than the great
states of New York or Pennsylvania;
she will raise more and better fruit than any other state. Her miners will supply enough gold and
silver to keep perfectly reformed for
and with exultant hearts turn from the triumphs of the past to the
expected triumphs of future years?"

Truly he is great who leads his
neighbors' progress.—Fred R. Reed
Immigration commissioner, of Idaho

VARSITY INSTRUCTORS

IN RECITAL

Music Faculty Will Appear in High
School Audition on October 21.

The first appearance of the year of
the department of music of the univer-
sity will be made on the evening of
October 21 at which time a recital
will be given in the high school auditor-
ium by Professor Ruggles H. Storee,
Miss Fay Hostetler and Mrs. Ma.
Margaret Hughes of the music faculty.
The recital will be presented as one
number in the week's entertainment
which has been arranged by Miss Cath-
erine Bryden for the teachers of Le-
th and Nat Park counties who will be
nominated in Moscow on that date
for their annual Institute.

The high quality of the recital is as-
sured. Professor Storer and Miss
Hostetler have often appeared before
Moscow audiences and have never fail-
ed to please their listeners. Miss
Hughes, the successor of Professor
Colfax as instructor in violin, and di-
rector of the "varsity orchestra, has ap-
ppeared several times in student as-
ssemblies at the university and all who
have heard her will testify to the charm
of her rendition.

The recitalists will undoubtedly
nenral one of the largest and
most enthusiastic to have ever gathered in the high school auditorium.

RAISQUET A SUCCESS.

Y. M. C. A. Held Splendid Rally Thurs-
day Night.

The Y. M. C. A. rally supper held at
Williamson's banquet hall. Thursday
evening proved a great success and
was well attended by students and fa-
culty members who are particularly in-
terested in getting the organisation
on its feet for a good start this fall.

The meeting was attended by Guy E.
Needham of Portland, student secre-
tary for the northwest Y. M. C. A. who
spoke briefly of the work that is being
done in other colleges and universities
of the country by the young men of
the organisation. Many valuable sugges-
tions were offered by Mr. Needham
relative to the manner in which the as-
sociation should be conducted for the
best possible results.

Following the supper the Y. M. C. A.
cabinet enjoyed an hour's conference
with Mr. Needham at the Moscow Hotel
at which time he outlined for them a
definite plan by which greater interest
might be aroused in the work of the
association among the students and its
membership increased.

Miss Georgia Kaufman was a week-
end guest at the Gamma Phi Beta sor-
ority house. She was a student at the
university last year and is now an
instructor in the high school at Mal-
lan.
It's Important to YOU

offers you a solution of all pen troubles, ease and facility in all writing requirements.

IT IS ESPECIALLY IMPORTANT

Our YOC is not made for the convenience of writing, but is made to simplify your work. It has all the benefits of a professional writer and yet it is so simple that anyone can learn to write with it. In fact, you will find that you can write faster and more accurately than with any other kind of writing instrument.

ECONOMICAL PHARMACY

Where Quality Counts

BOLLES & LINQUIST, Props.

I Wear Spectacles Now

Not the ordinary kind, but the Fits-U Spectacles. Presented by President of the University.

President Frank Murphy is denouncing the spectacles that were prescribed for him. "They are very comfortable," he says, "and I have been using them for several weeks. They are easy to wear and I can see much better now than I could before." He adds that he is going to continue wearing them and that he will recommend them to all his colleagues.

The spectacles, which are made of a special kind of glass, are said to correct vision problems without causing any discomfort. They are also said to be more durable than ordinary spectacles.

As a result of the first referendum of the men's and ladies' glee clubs held at the "variety this week Professor Eugene H. Storer, director of the clubs, is pleased over the prospects for a splendid organization this year in both the men's and ladies' groups. At the first meeting of the clubs 60 singers reported, among whom were many freshmen.

The clubs will be organized within a short time after which regular rehearsals will be held at the auditorium. Professor Storer and other faculty members will decide just what presentations in the line of operas will be attempted this year.
VARSITY AT PAN-AMERICA

Ag College to be Featured.
James W. Jones, director of the Idaho exposition at the Pan-American exposition, will arrive in Moscow from Boise in December for the purpose of securing material that will be used to further local interests at the exposition.

Mr. Jones plans to devote much attention to the university. He will bring with him a motion picture photographe who will spend several days on the campus making films. Besides numerous views of the campus, films will be made of the cattle station and of special features connected with the college of agriculture. Particular attention will be given to the "art school.

The exhibition of the pictures at the exposition will be supplemented by timely lectures which will treat in an extensive way with many features of university activities. The exact courses that will be presented will be determined later.

A considerable quantity of the film will probably be circulated throughout Idaho and will also be put into service in the east prior to the exposition.

Mr. Jones is an experienced publicity man. He was formerly a professor in the Iowa state agricultural college at Ames, and later was connected with the Idaho state bureau of immigration, labor, and statistics. He has become well-known in Idaho because of publicity work he has done for the state, and chiefly as the designer of "The Dawn of Plenty," the biennial report of J. B. Rich, recently commissioner of immigration, labor and statistics.

Gamma Phi Betas Receive.
Gamma Phi's were at home Saturday afternoon and evening to the college girls, town ladies, and the purchasers of the college fraternities. The roomy, well-furnished, and well-ordered home at 604 Dickinson was the scene of the modest but successful affair.

During the afternoon the ladies of the town and the girls of the college called and after the get-acquainted greeting at the arrival the guests were served refreshments, which were as shown through the house. Much may be said of the excellent arrangement and order of the study rooms, all of which were in the most commendable condition, yet the thing that impressed the guests most was the elaboration of healthful and altogether delightful sleeping porch. This part of the house is the newest annex to the original structure and the girls who have both indoor and outdoor sleeping say that it is the only kind of sleeping arrangement for them.

In the receiving line in the afternoon were the senior girls of the sorority, Misses Hayes, Leasinger, and Allen, Mrs. Knecht, Mrs. Knecht, Mrs. Lowry and Mrs. Lowry. In the evening Miss Pincich and Mrs. Carlijo stood by the o'clock, many of the ladies of the banks and banks were among the guests.

But the most exciting event of the evening was the success of the excellent fraternity in its broadest significance that extended the honors of the ladies. The society is too than pleased and congratulated. Such things as these take us up our faces and those between the sorority on non-membership people and do much to their friendships.

DR. W. S. HALL AT UNIVERSITY

Noted Lecturer to Address Men in the Auditorium.

Among the men who will address students of the university this year, there will be none of greater caliber, higher standing, or broader reputation than Dr. Winfield Scott Hall, Ph.D., M.D., professor of physiology in the Northwestern University medical school of Chicago. Dr. Hall has taken a prominent part in the modern widespread movement of education in social hygiene, and through his books and lectures has become recognized as a leading authority in this particular field. He has addressed the leading universities of the middle west, but this is his first lecture tour west of the Rocky mountains. His schedule includes only the more important schools, and it was considered a stroke of fortune when it was found that he could come to Moscow. Owing to the unfortunate conflict of events that occurs on the date of his visit, it will be impossible for him to make only one address, which will be given to men only in the university auditorium, at 11:15 o'clock next Friday morning.

This will make it possible for every man in the faculty and college to have the privilege of listening to Dr. Hall's scientific and mastery treatment of an exceedingly important subject.

MUCKERS' MEETING

Miners Students Elect Officers.

The mining students of the university met at the Delta house Tuesday evening, October 20th, and elected the following officers for the coming year:

- Walter Scott, president; J. W. Johnson, vice-president; Bert P. Smith, treasurer; Marvin Herfurth, assistant treasurer; Dave Eves, historian; and Clarence Sylvester, auditor.

After the election of officers Prof. Mather gave extracts of mining methods that were used several hundred years ago which showed that many of the methods in use at the present time were in use at that time.

The organization expects to have prominent mining men address them from time to time on subjects of interest.

There are more new students registered in mining this fall than for several years and prospects for a lively organization look very good.

The muckers have planned several social affairs for the year ending with a big food in the spring and Doc. Sturg- art says they have a smoker at his home next time.

ATHLETIC BALL

FRIDAY EVENING

A Good Time Promised.

At the reception on Friday evening after the Pullman game the new athletic ball will be given. This is the first university dance of the year and promises to be perhaps the largest dance of the year.

With the opening of the new social season, the ivy, the gold, the new flowers, the first number of visitors and old friends, "Grads" present, and the wholesome, democratic feeling that is at this time evident—all will combine toward a good good time for everyone there.

It is in charge of George Scott, John Hayden, and Ted Dyer. The committee is responsible for all the best of music, and those other things that will go to make a big dance, as far as such preparations count. Go yourself and see the "scene" that Idaho has this year.

The admission is $3.50 for men and $1.50 for women.

Grand march starts promptly at 8:20.

New Evening and Party Dresses.

of plain and figured nets—shadow laces—

The Way They Do It at Pullman.

It is reported that the Pullman freshmen made Fred Sullivan neck or the Pullman guys at the Montana-West some last Saturday.

Miss Jennie Corum, a 1913 graduate
of the university, arrived in Pullman
yesterday from home at Great Falls for a week's visit at the Gamma Phi Beta house.
A.S.U. I. TREASURE'S REPORT

To the members of the A.S.U. I.,

Owing to the fact that an agreement exists as to the amount to be paid, if any, on the new athletic field, the registration receipts have not yet been proportionately distributed among the respective department funds and this report must therefore be only provisional. It shows only total receipts and expenditures instead of departmental accounts.

Total receipts from registration, $2,190.

Expenditures as follows:
To J. M. Holmes, to cover last year's deficit in debate, $46.00
To G. L. Larson, money advanced to open football season, $500.00
To M. E. Mulkey, payment of treasurer's bond, $1,060.00
Balance on hand, $3,336.00

Respectfully submitted,

MARVIN E. MULKEY
Oct. 12, 1912.
Treas. A. S. U. I.

RHODES EXAMN. AT VARIETY

Eighth Rhodes Scholar Will be Selected by Faculty in December.

The eighth Rhodes scholarship examination at the university opened this morning and will continue through tomorrow. Marvin Monroe of the 1915 class is the only one taking the examination though there are three others who have passed previous examinations and will still be eligible as candidates for appointment. They are Robert Waring of the 1917 class, Frank Osborn and Baxter Wox of the 1913 class.

From this number a scholar will be selected by the university faculty about the middle of this year and will go to Oxford next summer.

GOT WONDERFUL RESULTS FROM DIABO TERRIBLE

When the stamps and roots of the forest trees which are found covering the vast area of almost 25,000,000 acres of timberland in Idaho can be made through the process of destructive distillation to produce commercial by-products of sufficient quantity to be sold for $90 per cord for all of the wood from which they are removed it would seem high for an end to be put to the indiscriminate destruction every year of thousands of acres of stamps on cut-over land in this and other states of the northwestern states. The process through which these almost unbelievable values can be realized from the millions of acres of cut-over land is so new in this section that its adoption by timber owners will in all probability be very slow. Yet the time will come before many years, thinks Professor Shattuck, head of the department of forestry at the Idaho University, when every stump and every stick of waste wood will be turned into dollars and cents and the heretofore expensive process of destructive distillation will be revolutionized and made not only in expensive but actually a source of profit.

Nowhere in the northwest has the manufacture of forest by-products just recently entered than in Idaho with its owners, the possibilities that lie in that direction being but little realized. Even experiments toward this end are so recent that it is yet too early to draw conclusions with considerable disadvantage to the forestry department at the University of Idaho is practically the only place thus far only interested in the development of scientific methods to the conversion of forest by-products into commercial commodities is being carried on.

Investigated Other Plants.

Before commencing the numerous by-products experiments which are now in progress at the university, Prof. Jesse Shattuck visited the large by-products plants of the National Wood Distilleries company at Wilmington, North Carolina and made thorough investigations and employed there in working forest by-products into commercial commodities. The result of his investigations convinced him that the possibilities in this direction were much greater in the west than in the eastern and southern states owing to the differences in the quality of the timber, Western wood is much more easily worked than that in the east and in making the secretions which can be transformed into marketable form.

Sent Samples East.

On his return to the university Prof. Shattuck sent a number of samples of the various varieties of western woods to Wilmington for testing purposes and in promising were the results which were obtained that the National Wood Distilleries company employed one of its small refining plants to the university for use by the forestry department in its experiments. The use of this plant is costing the department nothing and it is being operated with splendid results.

Extract Valuable Liquids.

By actual experiments with a number of timber Professor Shattuck has acquired results which seem little less than marvelous. In one experiment, for instance, that was made with a four-foot stump on Moscow mountain more than 240 gallons of commercial liquid were extracted. The process of extraction being operated right on the ground by a simple and comparatively inexpensive device. At the same time the greatest quantity of crude liquid water the stamp was destroyed to a depth of feet below the surface of the ground.

All Have Commercial Value.

"Every variety of wood, even tamarack, that is to be found in the northwest," says Professor Shattuck, "will yield a sufficient amount of commercial substance to make its working worth while." So in the experiments that are being carried on at the university over a dozen different substances of marketable value have been produced among which are tar, turpentine, pitch, charcoal, resin, acetate of lime, salol, oils, pitch, creosote and coke.

Attracting Wide Attention.

The work which is being done in the forestry department is attracting wide attention among the large timber companies of the state in which they are making arrangements with Professor Shattuck for demonstration before their representatives of the more practical working of the process of distillation and refining. The secretary of the Spokane chamber of commerce will be here tomorrow to investigate the work and several representatives of lumber companies will be here in the next few days with the view of learning more of the wonderful things that will be discovered by Professor Shattuck at the university.

Will Make Extended Address.

At the chamber of commerce luncheon today Tuesday Professor Shattuck will deliver an extended address to investigate the work and several re-presentatives of lumber companies it is anticipated that the chamber will be crowded to its capacity by most people who are eager to hear more of the wonderful things that will be disc-
ROOTING RECEIVES COACH'S BLESSING

Effect of Vocal Sympathy on Players.
In an article from the Los Angeles Times, the value of rooting and its effect on competing athletes is also discussed.

Walter Christie, after twenty-five years of experience in training track athletes, states: "I consider that one-fourth of the efficiency of a track team comes from the bleachers. A man on the track that has music and noise to key him up, I always want a band when my horses compete. The livelier and better the music the faster they can run. In my own experience I found that I could not run the ten-yard dash under 11 seconds unless there were bleachers and music. On such occasions I could travel the distance in 10 seconds."

A peculiar thing I have noticed is that California men as in an intercollegiate contest invariably slow down while passing the Stanford side of the field and pick up again near the front of the California rooting section. There is no doubt of the psychological effect of rooting and crowds upon athletes.

Psychologists call this effect "crowd-contagion," and recognize its power on men. "It is a subtle, invisible something that draws results. It might be likened to an electric current flowing from the bleachers into the man on the field.

Mob Psychology.
Everyone who has seen football games knows how new life can be put into an exhausted team by cheering and shouting. Psychologists are aware of the effect just what proportion of extra physical effort can be called out by excitement of this kind, but many athletes have felt it, and know that the bleachers arouse to unwarranted physical exertion.

There are games at California where men have come from hospitals and entered intercollegiate contests with an uncertainty of life and able to walk. The case of C. F. Kiebler, now professor of physical education at Cal, is one of the most striking of recent years.

Two hours after leaving the operating table he ran the 100-yard dash against Stanford, and won it in 10.5 seconds. His experience illustrated what power lies in the bleachers, for he says: "When I arrived on the field the captain came to me and told me I would have to run if I possibly could. Weak and barely able to get my syllam into the holes, I lined up for the g.m. Just as there is fired out from our bleachers and with it came the surge of strength that carried me through to the tape in the fastest time I had ever made. It was the bleachers that won this race."

The fact that muscular strength can be increased by encouragement, is recognized by football crowds who give vent to the cries of "eight, eight," and "hit that line" when the goal is in danger. But when a fist of skill is to be performed, and it is known that skill deteriorates by coaching, breaths are held and muscles tensed lest the performer be discouraged. Does not a silence reign when a goal is to be kicked.

We all know of "second wind," and among mountain climbers it is often regularly figured upon as due to arrive when weariness has reached a certain point. This "second wind," says Professor James, in a new level of strength unexpected, a vein ordinarily blocked by fatigue, and requiring the breathing through before its power can be used. He calls it a "deeper strata of piled up strength" that is ready and waiting for anyone who dies deep enough.

Everyone knows of the freshness and life that comes with "second wind," a complete loss of "that tired feeling."

Not Every-Day Occurrences.

The urging of the bleachers and its own determination undoubtedly cause the athlete to dig into the deeper levels of his strength and call upon it in the heat of games. The quick recoveries from injuries and wonderful endurance of football players are not the results of every day, but only when urged and encouraged by the presence of a crowd and its multitude. A man breathes quickly in his reserve soveright when a thousand thorns are helping him wield the battering ram.

BRIEF LOCAL NEWS

Miss Gladys Collins left for Spokane Tuesday morning.

Harry Boulton '14 returned last week from a visit in the east.

Russelle Barber Shop for good shaves, hair cuts, etc.

Jerry Wilson was a visitor at the Zeta Delta house Sunday.

Ed Logan of Spokane was a guest at the Zeta Delta house last Saturday.

Omega Pi was delightfully entertained by their pledges at a feed Sunday night.

Mabel Redfield and Bertha Silverton spent Saturday and Sunday in Spokane.

Fred Thurtill '15 returned last week, and is again taking up his work in college.

Bill Cato, '12, who was injured while cross-country running at Anamosa, is still confined to the hospital.

James Galt, who played end for Montana at Pullman Saturday, was a guest of Phi Delta Theta for the week-end.

After the Bon Fire and at the game, you will need Idaho Colors, Pennants, Arm Bands and Hat Bands. Our stock is now—just came yesterday—and includes all the new ideas.

Catcher—it is a grandpai plt. Umpire—it is a game that is never called on account of darkness—Magazine of Fun.

Sophomore Audaciously.
The attitude of importance that a sophomore can assume is simply astounding. A freshman timidly asked the Sophomore Kelly on the campus the other day and asked, "Are you going to be one of the professors of the chemistry department?" Whereupon Kelly replied, "Don't call me professor. I'm a sophomore!"
