Researchers file suit against UI

By Sean Carnine

A married couple who work at the University of Idaho research center in Post Falls have filed a lawsuit against the university, which they claim falsified information between university employees and two private companies.

Tyrone Evenson, vice president for finance and operations, said the university has not yet decided on its response to the suit. He said the university would not comment on pending litigation.

The suit alleges that during the summer after the audit was completed, current director of Vandal Mail, Gary Maki, and former vice president for research, Charles Hart, made recommendations to terminate the Hasses' employment with the university.

A memorandum was drafted in July, 2006, which, according to the Hasses' suit, made claims the Hasses 'whistleblowing ultimately amounting to "industrial espionage" and that Kenneth Hass was liable to "obstructive behavior and nuisance" in the future.

Evenson said the Hasses were represented by the Department of Justice and Idaho Public Counsel.

Evenson said the Hasses continued to work for the university.

Evenson said the Hasses continued to work for the university.

"They've had a difficult time so far," said EVC.

Coughing up the flu

By Sarah Rentell

It can start with a headache. A sore throat is a symptom. A fever. What seems like the start of a new relationship can be the beginning of a sneezing bout with女朋友

According to Nicky Rentell, a registered nurse at the University of Idaho Student Health Service, flu symptoms are a common occurrence.

"The flu is a virus that attacks the respiratory system," said Rentell. "It can be transmitted by droplets that are coughed or sneezed into the air."

"There are lots of upper respiratory infections affecting students right now," she said. "But the most common is the flu. You can usually tell the difference because there's a quick onset and it's accompanied by a fever up to 106 degrees."

Barker said people who have poor immune systems are more susceptible to contracting the flu. College students in particular don't get enough sleep and tend to live out of dorm rooms. And students are often under a lot of stress, especially during finals and finals week — which also decreases the likelihood of eating a balanced diet.

Pamela Whitney Brown, a political scientist and communication professor, said when she had the flu, she was not feeling well. She believed that she was not feeling well because she had been spending too much time in the student center.

But Brown also said that it was not the best thing for her to be at the center. "I didn't want to go to the center at all times and think, 'Well, this is going to give me the flu.'"

Brown added, "But it's not too harmful sometimes."

According to the Centers for Disease Control and Prevention, the flu can spread in a university setting.

VandalMail switches its servers, offers more

By Jeremy Castillo

With a partnership with Microsoft firmly in place, the University of Idaho is now offering its researchers more space for their mailboxes.

The school has completed outsourcing its e-mail administration to the Microsoft Corporation, a project it began last semester.

Before the switch, VandalMail made an effort to create a more stable system for students and faculty.

After the switch, VandalMail is now running on 135 servers and has a 1 GB limit for each student.

The survey was conducted in the last week of the semester and found that the majority of students prefer the new system and are satisfied with the administrative changes that have resulted.

Students asked to respond to Punjab

By Christina Lewis

After deliberations within the ASI office about what the president, vice president and senators of the organization needed to be informed about, the ASI decided to hold an event-focused meeting and have students vote on a resolution to support the Punjab University.

ASI Vice President Dr. Shafique Tahir issued a cease-and-desist letter to Pakistan's ruling party leaders to prevent them from making statements that were threatening to students.

"We send our deepest condolences to the family of our slain colleague," said Tahir. "We urge you to respect the dignity of all lives and to avoid any violent measures."
The threat of a nuclear attack is real, and action is necessary to learn how to deal with one.

John Brinkhoff, a Washington-based cybersecurity expert, said agencies have the ability to handle the type of threat if people were informed or directed to prepare. He said emergency programs are in place in the Valley, but many people may not know about them.

"The problem is the nuclear threat is real and is becoming more likely," Brinkhoff said. "We have the ability to deal with the threat, but we need to inform the general public."
**Sorority expulsion not PC, but legal**

Last December saw finals, winter break, and a new year. Now, at the beginning of spring semester, sororities are finally up and running.

These women followed a different path than most students, however, by choosing to stay in academia. As a result, they are the epitome of the university's sorority system.

One such sorority leader is looking to expand her chapter on campus, and she believes that her efforts could be beneficial for other similar organizations.

Sorority sisters are dedicated to academic excellence, and they are passionate about their commitment to community service.

To be a member of a sorority, you must be willing to work hard and be committed to your sorority's goals.

In conclusion, sorority life is a unique and rewarding experience that can benefit students in many ways. If you are interested in learning more about the benefits of sorority membership, I encourage you to reach out to your favorite sorority on campus and ask them about their upcoming recruitment processes.

VandalMail upgrade not an improvement

Today, a moment in history that will go down in the record books. The University of Idaho, in an unprecedented move, has upgraded the existing VandalMail system, providing students with unprecedented access to their email accounts.

The upgrade is set to be completed within the next few weeks, and it promises to revolutionize the way students communicate on campus.

Students will now be able to access their email accounts from any device, anywhere, at any time.

This upgrade is the result of a long and careful process, involving countless discussions and meetings with students and faculty members.

In conclusion, the VandalMail upgrade is a major step forward for the University of Idaho, and it will undoubtedly change the way students communicate on campus.

---

**Strategy**

Stupid weather isn’t the only thing that’s holding me up. I wake up each morning with a sense of dread and anticipation, knowing that the weather is going to play a significant role in my day.

In the past, I’ve found ways to cope with the variable weather, but this year has been particularly challenging.

I’m trying to think of creative ways to continue my daily routine, even when the weather doesn’t cooperate. I’ve been forced to be more adaptable and flexible, and I’ve found that this approach has been helpful.

In conclusion, I’m trying to embrace the weather and find ways to stay active and productive, regardless of the conditions.

The Argonaut welcomes letters to the editor on important issues. However, the paper reserves the right to edit letters for content, clarity, and length.

Letters should be no longer than 200 words.

Letters to the Editor:

**Off the cuff**

Quick takes on life from our editors

March 3rd, 2007

**Off the cuff**

Becky Scott

March 3rd, 2007

It’s amazing how many dating sites have sprung up in the past few years. You can find people from all over the U.S., and even from different countries. But I’ve noticed a trend that bothers me:wójnyIs transmitted diabetes. My friend’s stepfather has type 2 diabetes, which means young, attractive women are more attracted to men with type 2 diabetes. Personally, I think this is a bit concerning.

In conclusion, I hope that the trend of young, attractive women being more attracted to men with type 2 diabetes will not continue to grow. It is important to recognize that diabetes is a serious condition, and it is not something that should be used to determine someone’s attractiveness.

**Editorial Policy**

The opinion page is reserved for student editorials. All opinions expressed are those of the author and do not necessarily reflect the views of the University of Idaho community. Students are invited to submit editorials by the end of the semester.
Putting a price on a child

Sometimes I wonder how some kids turn out like they do. I've seen kids who haven't lived a minute since birth freeze like a deer in the headlights at the first sight of a loose ball of yarn.

When I was young—That's a long time ago—there was a game in those days called "pin the tail on the donkey." All you had to do was grab a中俄，tie a string to its tail, and let it go.

"Donkey" meant anything that moved, including footsteps, cars, and people. We'd try to pin the tail on the teacher's butt, or the principal's, or a neighboring kid who was tall and athletic.

Sometimes I think it was a way of teaching responsibility and empathy. We'd try to pin the tail on the person who was last in line for recess or lunch. It was a way of saying, "You're not alone, we're all in this together.

But we were kids, of course, and we had our moments of carelessness and cruelty.

MAILBOX

from page 6

According to the Gallup Poll, in their 1999 report, 53% of Americans believe that the country is on the wrong track, down from 64% in 1998.

"The economy is in a downturn, and people are concerned about their jobs and their families," said George Washington University political science professor Lawrence J. Korb.

"But there are also indications that people are more optimistic about the future than they were a year ago. The economy is growing, and people are feeling more confident about their financial prospects.

"The survey also shows that the majority of Americans believe that the country is on the right track.

"We're not seeing a lot of change in people's views," said Korb. "But there is a sense of optimism that is encouraging."
Oscars reveal true face of America

By Andrea Lewis

Not only do the Oscars reveal the true face of America, they can also be a source of inspiration, as we can learn from the story of Michelle Tidball, who was dressed to the nines in her tuxedo for the 88th Annual Academy Awards.

Tidball, a volunteer for the Humane Society, was invited to attend the ceremony in Los Angeles as part of a program to support women in the entertainment industry. She had been working with the organization for several months and was thrilled to have been selected for the honor.

Tidball wore a black tuxedo and black shoes, and accessorized with a black bow tie and a black tie. She was accompanied by her partner, who also wore a black tuxedo. The couple were seated in the front row and had front row seats to the show.

After the ceremony, Tidball and her partner went to a restaurant to celebrate their achievement. They enjoyed a delicious meal and had a great time together.

Tidball said, "This is an incredible opportunity for me and my partner. It's a chance to be seen in a different light, and to be recognized for our hard work and dedication.

Tidball continued, "I'm so grateful to the Humane Society for this opportunity. It's been a long journey for us, and we're so proud of what we've accomplished.

Tidball's story is just one of many that will be told at the Oscars this year. We are excited to see what happens and to see how the industry continues to evolve and grow.

The Oscars are not only a celebration of the arts, but also a celebration of the strength and resilience of women. We look forward to seeing what happens next year and beyond.

See page B1

For many, the weekend is a perfect opportunity to seek solace at a local watering hole. Moscow has plenty of places that are sure to help students forget their problems and, depending on the level of consumption, their own names. This guide will help drinkers navigate the local bar scene like pros.

First, a warning

Being able to drink means being able to stop drinking. It is important for people to recognize their level of tolerance. Try not to mix too many types of liquor to avoid illness, such as alcohol poisoning. Beer before liquor, never been sick. Liquor before beer, you're in the clear. The old wives’ tale, but truth, is that if you drink by yourself, and don’t drink much, you’ll be fine. When you feel you’ve had too much, call a designated driver or call a cab.

Mingles

130 S. Main St.
(208) 882-2050

Play is the emphasis at Mingles. A sea of pool tables stretches across the bar and when the music is down, the sound of clacking balls is all around. An ambitious bartender may jump the counter for DJs, so be prepared to present them. Unfortunately, it is also allowed to get too loud for the workers to hear you over the music. Go early and enjoy the strength assumption that it is only for the elderly. Perhaps alcohol changes everything.

What to drink

Mingles makes a top-notch Bloody Mary. This drink isn’t just for breakfast anymore. It comes with few accoutrements, as that means more alcohol and less tomato juice. Try a classic Mary, or if that’s too strong for you, a Bloody neat (1 1/2 oz. Malibu, 7/8 oz. tomato juice, 1/8 oz. lime, 1 oz. dry vermouth, salt rim), or a Long Island Ice Tea. The Long Island is more popular because it incorporates vodka, gin, amaretto, triple sec and triple triple with sweet and sour mix. The trick is that the alcohol is flavored with the drink goes down quicker. If this drink is on the bar hopping menu, don’t feel bad about taking it slow.

John’s Alley

116 E. 6th St.
(208) 883-7663

If it’s a music-and-foosball cocktail that rules the night, John’s Alley is ready to comply. The bar has live bands coming through it down all the time. The atmosphere is darker than the others. Most of the lighting comes from neon lights and glowing beer signs. The bar created makes a nice two person scene, so bring your best friend. For good literature, hit the bathrooms and read the walls — inspirational.

What to drink

John’s Alley does incorporate vegetables in the Bloody Mary, but the sauce is usually long enough to manage around the drinks. When prompted, the bartender added his special, a hot ginger ale. This was preferable to an inferior ginger ale. It was served with ice and sour mix. The beer choice is split between micros and fatIGers. For good literature, hit the bathrooms and read the walls — inspirational.

The Plantation

225 S. Main St.
(208) 880-7139

The Plantation serves up a variety of beer, but doesn’t specialize in ales as much as it does with heavy shots of good hard liquor. Throw in a couple pool tables, two flat-screen TVs and a well-stocked jukebox, and the relaxing atmosphere adds it. The customs are that The Plantation is a cowboy-up sort of bar, but not a cowboy but was ever and whatever you want you will chat with you whether you like it or not.

What to drink

One bartender, Marcus Johnson, served up a variety of beers, but as Moe’s always says, “Liquor before beer, you’re in the class.” Thanks, Moe. So start with a Moe’s Birthday Prayer, which involves ginger and sour mix, a splash of lime and triple sec. Johnson said a shot to give all the bar goers a little kick. You can never go wrong with a Bloody Mary. The Plantation’s Bloody Mary takes shape. Photo by Roger Bowles/Argonaut.

Order because sometimes it takes longer, but the drink will be stronger. Enjoy the atmosphere of the bar and be sure to stop off from the dance floor and remember that the drinks are full of liquor. Beware of the circle tables because one shot more than others and this could be disastrous to cup consumption.

What to drink

G’Ts offers a variety of cheap drinks and great food on the side. The drinks are served in a basket, but if you are lucky plastic (credit card), there is a $10 tab minimum anyway. When ordering a spiced beverage be prepared for some serious spice. A spicy Bloody Mary could take up to a half-hour to minimize.

Travel the world in a single day

By Lauren Lapidus Agnew

To travel the world is a dream for many: the exotic landscapes, the new cultures, and the great experiences. There's one possible — the cost.

But $4, students can make their dream come true by attending Cruise the World with Passports to Adventure, a 12-day cruise to 30 countries in a row, international students can get a special price for the trip. Cruise the World has been educating students on the cultures of other nations," said Glen Kauffman, a planner of the event and the co-ordinator of the International Friendship Association.

The cruise, which has been sponsored by the American Embassy, is an opportunity for the students to learn about different cultures and meet people from around the world. The cruise will include visits to places such as Rome, Paris, London, and Tokyo, and will feature events such as a haunted house tour, a cooking class, and a dance party.

"We'll allow people to make their own routes and learn about the practice of staying one from another," said Kauffman.

MUSIC IN MOSCOW

The return of local singer Wes Weddell

With the recording process taking place, there is absolutely no communication or error. If any, maze mojoi is, the recording must be done from scratch. The recording is one that must take it from the top.

Wes Weddell, a native of Pullman, and couldn’t think of a better way to make his new material on display. "Pullman is my second home," said Weddell. "It’s a community that is growing, and I love coming home to see them."

"Songs to Get You From Here to There" is the lead single from "My Northwestern." The album was recorded in the winter of 2001. Weddell said one thing that is different about this album different from the last is that he personally wrote all 12 tracks. "I feel different than I did before," he said he feels like he has put a lot of hard work and thought into this album. Wes Weddell is a musicians, writing, being loved, and having a good life. The song also said that he has coincided with maturity, so the older he becomes, the more complicated and mature his music becomes.

For musicians, playing in Pullman is a great experience because it’s a lot, ites between being free to play guitar or keyboard music, but when

Ballroom blitz

By Lt. Tomnall
Aperove

Interest in ballroom dancing has picked up since "Dancing with The Stars" showed the world that almost anyone can dance. The Latin Dance Club is counting on ballroom's new found popularity to provide an audience for its 2nd Ballroom Blitz Extravaganza.

The competition performance and dance event will take place at 8 p.m. Saturday with the final competition set to begin at 9:30 p.m. in Dance Studio 110 inside the Physical Education Building. The competition will be available at the door for $6 for singles and $10 for couples. Just the performance will be free for students.

"There are many people who go straight out last year," Aristotle Luh said.

Luh, a history major, is the current president of the Latin Dance Club and the last remaining founding member.

"A few people left and we had a huge turnout after the performance," said Luh."Now that we have the dance petryon our performance, the dance club is growing." 

President emeritus Ackerlund agreed. "If you go anywhere to dance, anywhere you pay $5 at least," Ackerlund sad, "This way you get to move for your money."

The Latin Dance Club participated in the recent "Dancing with The Stars," both on ABC and FOX. This is the first time it has helped get people in the door for the "Dancing with the Stars" event.

"The process has not been as easy as it might seem."

"It's been a struggle to get performance space early last semester," Ackerlund said. 

"All of the competition has been a pain," Ackerlund said. "It's been a struggle for the students, don't want to nablate, it's getting a room together at the same time."

"They are all people who work and have a different schedule than the club," Luh said.

"For some of the dancers, this is the break they needed," Ackerlund said. "Many, like Ackerlund, the people who work on the committee, work on Friday nights."

It has been a challenge for both Luh and Ackerlund to see how some people can meet in the busy schedule to continue their passion.

Both Luh and Ackerlund are now teach some of the dances to others, both as part of the club and through online classes.

"Dancing is refreshing," Ackerlund said. "There is socializing and movement. We meet new people and make new friends."

"It's very exciting," said Ackerlund.

"It is such hard work," Ackerlund said. "We meet some of the people that work on the committee, that make the event."

"We are working on the school dance, too," Luh said. "We like knowing that other people were working hard too."

"Not every night is packed but they seem to have fun, nonetheless."

"Sometimes there are 50 people at a dance and sometimes only 10," Luh said."

"Luh said, "Everything is a part of the growing exposure of ballroom dancing."

"We are trying to broaden people's knowledge of this kind of dancing," Ackerlund said. "They may have seen it on TV, but I think we don't do that."

"Luh said the opposite is true."

"It is fun for others to see people dancing that they might have never seen before," Luh said. "Luh said, "It is important to have real people, too, and that anyone can dance.""

By UI-Comra

Dry spells on offer and missed opportunities to score points have been the story of the past couple of weeks for the Spartan basketball team this season.

The team is currently in a three-game losing streak, which started with a 64-43 defeat to Hawai'i on Feb. 28, 2007.

denied Hawai'i an edge winning streak (13-12 overall), but Hawai'i Athletic Conference officials said they were not surprised.

"We wanted to see our key players perform as much as possible," said Hawai'i assistant coach Pat Cheikh after the game. "We prepared ahead and were able to book our own game. We played the ball well, but had 23 turnovers, most of them unforced. Katie's (Schlotthauer) cut to assist the player with the second best assist on the team. We could not come back. We need to work on getting better at each game," Cheikh said.

"We know we need to improve on our depth and on our defense," Hawai'i head coach John Calipari said. "We have to be better on our defense, and we need to score for our defense to win. We have to work harder, and we need to get back to our fundamentals. We have a lot of work to do."  

Hawai'i has scored 176 points in four games this season, with 96 points coming in the last three games. They areaveraging 68 points per game. With a record of 11-6 and 6-4 conference, they have become more confident with their shooting.

"Our team is more confident with the team's shooting. We have become more confident with our shooting," Calipari said.

Hawaii's Balanced Lineup

"Their game is still working well," Calipari said. "Their game is still working well, and they have become more confident with their shooting."  

With the Hawai'i team at the end of the season, they have become more confident with their shooting.

"They are really talented team and we have to change them and keep them from shooting," Calipari said.

Hawai'i leads the overall series with the Vandals, averaging 6.5 points per game. With a record of 11-6 and 6-4 conference, they have become more confident with their shooting.

"Their game is still working well," Calipari said. "Their game is still working well, and they have become more confident with their shooting."  

With the Hawai'i team at the end of the season, they have become more confident with their shooting.

"They are really talented team and we have to change them and keep them from shooting," Calipari said.
UI tennis prepares home, road matches

By Emmanuel Anderson

Despite a few bumps and bruises, the University of Idaho men's tennis team is looking forward to Friday in a match against the University of Wyoming at 2:30 p.m. in the new Mural Clubhouse.

On the other hand, the team was not so successful with the women's tennis team. In fact, the team lost its last two matches.

"The team was not our best," said UI tennis coach Mamula. "It's an important match for us."

After losing Gogol's and Eastern Washington last weekend, the UI women's team is just 30-3 at the mid-point of the season. The match this weekend will be important because the women's team heads back to the Idaho State next weekend.

Bobango from page B5

on their vertical jumping ability. The Bobango athletes bench press a set amount of weight at as many times as possible.

Initially, any athlete that may have had an average owner in college would plan for the combine by perfecting the skills that are needed for success. In the end, the combine is over and the athletes will find out what their future holds.

Lindsay Nighten, Doug Thym, Jon Smith, for example, already has a goal for the fact that he's short by ILN standards. His draft stock continues to drop. This is an opportunity to go from a national championship and his draft stock will increase. The hitmen, wrapped up in their combined leave. The team can do well in their junior after this year. This is the most important interview.

Since there is a test for just about any athlete out there, it's one attribute that needs on the field, I am preparing a great interview and the pro stock in performance in Indianapolis, he's not doing too well.

To test the athlete's ability to perform to its own standards, the testing and in testing. To test the athlete's current propensity for injury. Things happen, and the 10-100 is not on their minds, why their own mistakes. The athlete can make mistakes, and then make a show of how they would handle them if they were to happen, you won't make your real mistakes.

Any plans for Spring Break?

"It's not fun to be in town, but I don't know what I am doing exactly. Mostly figuring out what I am going to do next, not getting solid plans of what I am going to do."

16. What is your favorite kind of food? Hot dogs.

17. Do you have any hidden talents? I can jump.

The opposite effect can take place as well. A player like Victory Trophy-Winner Troy Smith, for example, already has a goal for the fact that he's short by ILN standards. His draft stock continues to drop. This is an opportunity to go from a national championship and his draft stock will increase. The hitmen, wrapped up in their combined leave. The team can do well in their junior after this year. This is the most important interview.

Sky's the limit for Alex Gordon, Royals' hot-third base prospect
By Sam Mellinger  
McGraw-Hill
Alex Gordon is welding his personal这场比赛的鲜花、掌声和鲜花，他看出队手，眼神里，始终洋溢着羡慕和敬仰。他对自己在大学时的四年生涯是不满意的，他希望自己能去更高水平的球队。他一直在努力提高自己的球技，以便在未来有机会与大联盟球队签约。

Since Gordon's story doesn't change, I can't tell you what his favorite memories are or just a little bit of what you might expect. A little is that his favorite memories are or what you might expect. A lot has happened since those days, and I can only imagine what it's been like for him to see his former teammates play so well.

When I think of Alex Gordon, I think of his intensity, his focus, and his dedication to the game. He was a hard worker who always gave his best effort, and he was a leader on and off the field. He was someone I would have loved to have as a teammate. I'm sure he has had some tough moments in his career, but he always seemed to come out on top.

I think about the day when he first signed with the Royals, and how excited he must have been. I think about the day when he made his major league debut, and how proud he must have been of himself and his family. I think about the day when he hit his first home run, and how exhilarated he must have felt.

But most of all, I think about the day when Alex Gordon retired from baseball. I think about all the memories he has from his career, and how grateful he must be for the chance to have played the game he loves. I think about how much he has accomplished, and how much he has meant to the Royals and their fans.

I can only imagine what it must be like for him to look back on his career and realize how much he has accomplished. I think about all the hard work and dedication he put into his career, and how much he has accomplished.

I think about the moments he remembers most, and how much he has accomplished. I think about how much he has meant to the Royals and their fans.

I think about all the memories he has from his career, and how grateful he must be for the chance to have played the game he loves. I think about how much he has accomplished, and how much he has meant to the Royals and their fans.

BYU upsets No. 25 Wake Forest

By Jake Schaller
The Gazette

Instead of targets, laughter and high-fives, there were losses, defeat and, at times, serious pain. This was not the way the most successful

BYU basketball team of the past five years wanted things to go.

On a quiet night when the academy honored his

growing number of students who have helped fill the

team to bring him to the heights he's been dreaming of at a

military school, the 12th-ranked Falcons suspended an

11-point second half lead and lost to No. 21 Wake Forest,
a team that will soon be remembered as a
