Students help Paint the Palouse

Sororities and service clubs are spending the past week brightening the hallways of the Idaho State University-owned Palouse. There are 25 sororities and service clubs that participated in the annual painting event.

Top left: A large turn of students showed up to volunteer for the Palouse at several sites across Moscow, Idaho. Above: Jennifer Hasenwinkel paints a house nominated for the Palouse on Saturday afternoon.

UI law school growing

Alexander Turner

Construction is in motion at the College of Law. Until last week the student body was so small that the law school's classes were in a single classroom. The law school was in dire need of new buildings and spaces. The construction is a sign of the growing law school.

The law school has been growing rapidly in recent years. This year the student body has more than doubled, and the school is now planning to expand its facilities. The construction is expected to be completed by the end of the year.

Local BRIEFS

SUB evacuated for bomb threat

Approximately 25 people were evacuated from the Student Union Building for a short time Sunday after a bomb threat was emailed to the SUB information desk. University of Idaho employees called the Moscow Police Department who searched the building.

Police did not find any suspicious packages or the building was cleared. Due to the number of people involved in the incident, the university will be conducting an internal investigation. Members of the public with any information can contact Lt. Paul Kestler, Moscow Police Department, University Center Substation, at 882-2012.

More bed bugs found in Wallace

Twelve students have been located from the fourth floor of Gooding Hall of Residence after three more were found in the building on Tuesday. Only original bug reports were suspicious and furthermore, said the Director of Student Services.

Student travels to present research

Graduate student Jacob Kowalski recently traveled to the University of Akron, Ohio to present his master's thesis titled "Evaluating the long-term effect of water conservation programs in the Pacific Northwest." Kowalski is interested in the long-term effect of water conservation programs on the local water supply and how they could impact the future.

Student to find more deposits of the metal, which is used in varying ways, such as in automobile repairs and for drinking in the case of jewelry, has been working with a team of researchers at the university. The team, led by Dr. John Smith, has found that the metal can be extracted from the surrounding rock by a process called leaching.

UI classrooms receive upgrades

For the first time in years, UI classrooms received multimedia equipment upgrades over the summer. New technology was installed in 202, 203, 204, 212 and 215 new classrooms, including new projection systems, interactive whiteboards and wireless networks.

AGR's set to relocate

Hayley Contractors Agnew

The Alpha Gamma Rho fraternity members are planning to relocate to a new site.

The group is planning to move their facility at 720 S. Dailey St. near the SLUG and bookstore on Old Glory Road from Lambdad Chi Alpha, but the group already occupies a much more permanent home on North 1800 East.

"AGR is interested in having its own premises, both for security and for stability," said Tracy Fitzsimon, vice president of student affairs.

AGR President Kyle Park said though they're staying in their current residence, they are on the hunt for a living space more permanent to their group.

AGR is beginning to buy property from the city of Provo for "up to $500,000" on N. Perry Drive, Fitzsimon said. The currently empty building will be a capacity boost for AGR and Park said it will also have the fraternity member's more members.

"We have more house, house, house," Park said. "40 people, house up about 100, but we've heard about 50, but it about 95 so everyone can have their own space."

"So, we're ready," he added. "But we're excited for the new house."

"It's likely that AGR will complete these arrangements very soon."

Bruce PITMAN
We President of Student Affairs

Park said park said the fraternity plans to make a vigorous effort to fundraise for their new facility.

"We have a brick sale where people can put their name on it and it will come with the brick," Park said. "We're also going to ask big businesses for donations and maybe have a ball or room after the bricks. We're going to make the fundrasing mostly hand."

Park said all the bricks from their new house will create a lot of excitement in the house, especially from those who will directly benefit from the move.

"We're just now starting to get pledges classes who will actually be living in it," he said. "Either Park nor Pitman had any coordination on the new house and it's going to be in the air."

"You heard rumors of Lambdad Chi coming back," Park said. "I don't have a clear officially what is coming."

Crafter pleads guilty to disorderly conduct

Idaho senator steps down from roll in Romney campaign after incident in airport bathroom

MIAMI — Sen. Larry Craig of Idaho pleaded guilty Monday to disorderly conduct in a Miami airport bathroom incident and will have his case dismissed if he stays out of trouble for one year, authorities said. The 64-year-old Republican was one of two senators whose cases were settled in the Miami airport courtroom.

Craig, a member of the Senate judiciary committee, pleaded guilty and was fined $110 and ordered to pay court costs. He will also have to complete three hours of community service, the Miami-Dade State Attorney's Office said. The other senator, Sen. Lindsey Graham, R-S.C., pleaded guilty to the same charge and was ordered to perform three hours of community service and undergo a substance abuse evaluation.

Craig's guilty plea was one of a series of events that began last month when a man offered to take a picture of Craig in a men's restroom. Craig, an active member of the Senate, is one of the most prominent Republicans in Congress.

The man said he was taking the picture because he was a gay man and wanted to show his friends that he had met a male politician who was comfortable with his sexuality. Craig, who is married, responded that the man was right, and they began talking.

Craig, who represents Idaho's 1st Congressional District, said he did not do anything wrong and was not guilty of disorderly conduct. But he did not contest the charges and pleaded guilty, saying he wanted to get on with his life and move on.

The man, who was not present in court, said he had no regrets about taking the picture and sharing it with his friends. He said he was simply trying to do what he thought was right and that his actions were not intended to be offensive.

Craig's plea came just days after he was re-elected to the Senate, and he will now face a year of probation and must undergo counseling to address any substance abuse issues.

Craig's lawyer, David R. Cascio, said his client had made a mistake and was sorry. He said Craig would continue to work on his recovery and that he would do his best to be a good role model for others.

The case against Craig had raised questions about his ability to serve in Congress, as well as concerns about the Senate's handling of the incident. Some Democrats had called for Craig to resign, while others had defended him, saying he had done nothing wrong and should not be punished.

Craig has been a prominent member of the Senate since he was first elected in 1989, and he has served as chairman of the Senate Commerce, Science, and Transportation Committee. He has also served as a member of the Senate Intelligence Committee and as a member of the Senate Appropriations Committee.

The Miami-Dade State Attorney's Office said it had received several complaints from the public regarding the incident, and it decided to file charges against Craig and Graham. The charges were filed in a Miami-Dade County courtroom, and both senators pleaded guilty on Monday.

The court did not discuss the charges in open court, but it did announce that the senators would be required to complete three hours of community service and undergo a substance abuse evaluation.

Craig's lawyer, Cascio, said his client was not guilty of disorderly conduct and was not planning to resign. He said Craig would continue to work on his recovery and that he would do his best to be a good role model for others.

Despite the outcome of the case, some Democrats have called for Craig's resignation, saying he should not be allowed to serve in Congress after being caught with his pants down.

But many Republicans have defended Craig, saying he had done nothing wrong and should not be punished.

The case against Craig had raised questions about his ability to serve in Congress, as well as concerns about the Senate's handling of the incident. Some Democrats had called for Craig to resign, while others had defended him, saying he had done nothing wrong and should not be punished.
Microsoft, major pain

Till it's exponential August

First get your costumes now, right? Better order yours early. I love Halloween but it is only two months away. One of the first things you need to do is order your costume. It’s always a good idea to get it done as soon as possible. I put off getting my costume for Halloween and Thanksgiving last year, and I’m ruing my decision on several counts. I do not recommend doing it that way.

There are people looking for any kind of Halloween costume, especially college and party holidays. This is a great time to get in on the action. It’s probably not the best time to order your costumes, but it is not too late. If you want to get in on the ground floor, it’s a good idea to order early.

We’ll begin our assessment tomorrow. At the time of this writing, Microsoft has released its latest software release. It’s a new version of the popular software, and it’s available now. The update is a major step forward in the development of Microsoft’s products. It’s a major step forward in the development of Microsoft’s products.

For anyone who has been in the industry for a while, you can imagine how exciting this is. I’m really excited to see what Microsoft has in store for us.

Get your costumes now, right? Better order yours early. I love Halloween but it is only two months away. One of the first things you need to do is order your costume. It’s always a good idea to get it done as soon as possible. I put off getting my costume for Halloween and Thanksgiving last year, and I’m ruing my decision on several counts. I do not recommend doing it that way.

There are people looking for any kind of Halloween costume, especially college and party holidays. This is a great time to get in on the action. It’s probably not the best time to order your costumes, but it is not too late. If you want to get in on the ground floor, it’s a good idea to order early. Today is the last day with the new software.

People around the university tend to have a lot of computing-related trouble. Sometimes, they’re not sure what to do. But they’re not the only ones who are having trouble. Students have been getting complaints from the computer lab. They’re not sure what to do. Students have been getting complaints from the computer lab.

Second, we understand that, because many individuals do not have the time or opportunity to stop by the computer lab, we are doing this whether the individuals like it or not.

Second, we understand that, because many individuals do not have the time or opportunity to stop by the computer lab, we are doing this whether the individuals like it or not.

An argument could be made that opening up software development to the public is a good thing. It’s a good idea to open up software development to the public. It’s a good idea to open up software development to the public.

This is true, and it’s also true that opening up software development to the public is a good thing. It’s a good idea to open up software development to the public. It’s a good idea to open up software development to the public.

As stated before, the main problem with technology is the use of resources and the lack of resources. A logical solution to this issue would be to have the computer class or a similar class teach about using resources. It’s not easy for people who aren’t members of Generation Y, or people born before 1980, to use modern technology. What Doerr is doing is what artists are supposed to do," said Kevin Woelfel, professor in the Department of English. "They're playing with words, exploring new techniques of writing, experimenting with new ideas, and pushing the boundaries of what we consider literature."

"It's a great fit for me and a great fit for the University," he said. "I got here and I can't get anywhere else. This is a great town with a lot to offer."

He is a member of the American Academy of Arts and Sciences. He received an MFA from the University of Washington and a Ph.D. from the University of Wisconsin-Madison.

They played at festerity parties on both campuses and other gigs in the area. It was difficult for him to find work to pay with the Spokane Symphony, Woelfel chose to move on after three years. "I had pretty much shut my doors and was able to full time in an orchestra," he said.

Film fest links Moscow to Moscow

Kevin M. Olson

A display of 13 short works covering a wide range of genres at the Palouse Arts Council built their third annual Moscow short film festival Saturday.

The screening included 30 filmmakers from the Palouse region and surrounding cities.

Also present were the directors of two of the featured films. Frederick Bond, a co-founder of the FLC, selected 12 films for public screening after being invited to submit work that was selected from around the globe.

The selections included award-winning tragedies, comedies and interactive works from around the country as well as Scotland, Germany and Japan.

The movies ranged from silent films and short dialogues to a variety of animation and abstract films.

A panel of judges voted on their choices for the first four works out of the 12 films.

Judges on the selection committee, David Long, a Palouse film archive volunteer, and Tammy James, a Palouse film archive volunteer, each voted for the same 12 films.

The first place was given to "Double Tags," a clever Pine Valley Safari film involving the decaying "skeleton" of a dead body, two men, a puppy and a dog.

The second place, "Dawn," is a director's cut of a popular commercial cartoon that filled the horizon with a similar one that was left over from the commercial.

The second place was given to "Mute Earth: Our Response," a film that was a reminder and somewhat unsettling to the state of our world's defect from an earlier three-quarter-person, video.

The one that was the highest winner in the film was "Pepsi Earth: Our Response." The film was a reminder and somewhat unsettling to the state of our world's defect from an earlier three-quarter-person, video.

Crisis and sales were still at odds at the end of 2006. Two months earlier, the company's CEO, Jim Dando, had given an interview in which he had suggested the two sides were on the verge of a resolution. The crisis continued to dominate the company's agenda, with ongoing discussions about the future of the business.

Dando's comments in the interview had not been well received by some of the company's stakeholders. Some were concerned that the crisis was being allowed to continue without proper attention, while others felt that the company was being too reactive in its approach to the situation. Despite these concerns, the company continued to focus on the crisis, with little progress being made towards a resolution.

In the meantime, the company's financial situation continued to deteriorate. Sales were down, and the company was facing significant challenges in terms of cash flow. The financial pressure was beginning to take its toll, with employees feeling frustrated and demoralized by the lack of progress in resolving the crisis.

As the crisis拖dragged on, the company's reputation suffered. Customers began to lose confidence in the company's ability to deliver on its promises, and this had a lasting impact on sales. The crisis became a defining moment for the company, casting a shadow over its future prospects.

In conclusion, the crisis at the company was a significant challenge that had a profound impact on its operations and financial performance. The company's approach to the situation was characterized by a lack of clarity and effectiveness, with little progress being made towards a resolution. The crisis became a defining moment for the company, leaving a legacy of difficulty and uncertainty for its stakeholders.

The University of Idaho's volleyball team took home their first win over the Cal Molten Classic following two hard-fought games against some tough competition. Larsen's performance was integral to the win and earned her the first All-Tournament selection, having scored 47 kills and 23 digs during the Cal Molten Classic.

The Vandals volleyball team ended their tour in Berkeley on silver laurels by beating Boston's Northeastern in a 3-0 shutout after losing LSU, University of California at Los Angeles and 1-3 against Stanford. Idaho held several advantages over its opponents with 204 total points, matching 236-80 to win the team. Larsen kept to minimal numbers as she stated: "It's kind of draining to rack up so many service errors, five return errors, and 17 hitting errors."

On the flip, over Northwestern, the Vandals' tournament was the surviving selection of the names and allowed to bring up the overall record to 9-3. Larsen and her teammates held their own in their first game against California. Larsen led with 19 kills and Debbie Padden was done behind with nine. Sarah Larsen also impressed with four blocks, a team high.

However, the Vandals couldn't make up enough points to pull a win. "I'm feeling pretty good," said Coach Mike Bryant said about his team. "We keep them in the match and keep them on top of their game."

"California" was playing the last home game in front of home court, and it was a morale boost to the team. Idaho did beat them last year, but last year in the same series of matches.

The following afternoon didn't be much better either for the Vandals as they lost 3-0 against Michigan State.

Idaho's volleyball never did get to play outside with the Vandals' homecourt advantage against Stanford.

The team bowed out with a 19 round trip, 15 total points and a 19 hitting percentage.

"I'm not sure how this team is going to break up and a lot of my players, Bryant said. "I know we're not going to miss them because they didn't have the best season.

"It's going to be an interesting season. There are some good experiences, but we have some solid players who can't be too drawn to being too new to roles. It is great in terms of wins and losses and we have to use it as momentum to keep getting better every day."

Coach Mike Bryant said of the Vandals' system was gone by june, and they could be practicing the Northeastern on December 30, 31 and 32.

Coming off the first victory of the match, the Vandals' home road at Washington State University at 7 p.m. tonight.
The season in the Atlantic Coast Conference is expected to be a big one for the Florida State Seminoles, who are favored to win the conference. The Seminoles have a experienced team, with quarterback Taylor Jacobs returning from a season-ending injury.

Florida State's offense will be led by Jacobs, who had a strong performance in last year's championship game. The Seminoles also have a strong defense, including linebacker Deion Sanders, who was named the ACC defensive player of the year last season.

The Seminoles have a tough schedule, including games against conference rivals Miami, Clemson, and Georgia Tech. However, they are expected to come out on top, with a chance to win the national championship.

A remorseful Michael Vick pleads guilty

Lance O'Flynn
Associated Press

RICHMOND, Va. — First, Michael Vick tried to distance himself from the people he led to lie. Now, he has reached out to the people he has betrayed. The Virginia businessman who owns the NFL's Washington Redskins and the NBA's Washington Wizards is making a heartfelt apology.

Vick, who was convicted in 2008 of providing financial support to a pack of dogs used in dogfights, said Monday that he is 'ashamed' for his 'horrible, despicable behavior' and that he's 'truly sorry' for lying to investigators.

Vick, who pleaded guilty to both dogfighting and obstruction of justice, was sentenced to 23 months in prison and five years of probation. He is scheduled to report to a federal prison camp in Danbury, Conn., on Aug. 26.

The apology came during a news conference at Virginia Tech, where he is a member of the Board of Visitors. Vick said he's been reflecting on the past year, during which his life has been毁坏.

Vick said he's learned from his mistakes and that he's working to become a better person and a better leader. He said he's sorry for the pain he caused his family and friends and for the pain he caused to animals.

Vick's apology, which he delivered in a solemn, emotional tone, was his first public statement since his conviction. He said he's been 'living in a state of isolation and shame' and that he's 'ashamed' for his 'horrible, despicable behavior.'

Vick, who was sentenced to 23 months in prison and five years of probation, said he's been reflecting on the past year, during which his life has been turned upside down. He said he's learned from his mistakes and that he's working to become a better person and a better leader.

Vick is scheduled to report to a federal prison camp in Danbury, Conn., on Aug. 26.
