Steel House seeks new members

Meeting for women's cooperative Wednesday

Souriah Conningins

After becoming homelss last spring when their house was closed, the women of Steel House are now trying to start up new digs.

The group, which was founded in 1992, was the oldest women's cooperative in the United States. The group, which consists of women living in the Steel House building last spring, was starting in that it not only make safe and affordable to students and graduate residents. It was estimated that the building would cost about $10 million to $12 million to build. The building is now being made of efficient and storage space, which was estimated to cost less than $30,000.

The group disbanded as a living residence for women but haven't stopped helping students and graduate residents, said co-president Sara Cooke.

As a result, members of Steel House are holding a reception on Tuesday, April 23 in the Piki Tapi living room to try to find new members and get the group's women's cooperative running again.

The group is being supported by the University of Idaho Student Affairs Fund, which helps support student affairs programs.

The group is also looking for spots for the group such as swimming and has helped students find a housing agreement with the Phi Tau fraternity. The Phi Tau house is closed last year due to low membership. The Phi Beta Pi fraternity, whose house is being remediated after a fire, is living in the house now.

"There seems to be a very positive spirit among the group," said Cooke.

Cooke has approached the efforts of President Shafman.

"Bruce Pitman has been really, really helpful with helping us wanting to see Steel House up and running again," she said.

Right now, the group has around 30 members interested in living in the new house, but it is hoping for a big group of new members, Cooke said. Cooke also said that Steel House can offer the cheaper cost for the women.

Steel House residents protest the closure of their house in front of the Commons during March of last year. STEEL

Parking changes still up for debate

Liz Witten

Argonaut

It might cost a little more to park on campus next year, whether students or faculty want to or not.

Carl Root, manager of parking and transportation services, announced some proposed changes to the parking and transportation system for the 2003-2004 school year.

"When we see that things that change, we try to predict as accurately as possible what the costs of the changes on campus will be." Root said.

Root said with few exceptions, employees at the University of Idaho who use the parking system on Thursday at the Campus Center at Idaho State University.

Parking and transportation services is a self-service system. Root said that the services does not come from student fees but from charges from the parking permit sales and cleat charges. In order to meet financial feasibility and committee determined maintenance projects, like replacing cracked or damaged parking lots, charges occur. Root said.

The new parking changes were broken down into three separate proposals. The first proposal would increase parking fees for students and faculty on campus. The price of all parking permits would increase because for the price of the blue permits, which would stay at $5. According to the proposal, the price of a gold parking permit would go from $25 to $50 and permits would be sold at the same time for $10. Also, students would be able to participate in a parking lottery system where parking spaces would be distributed randomly.

"The idea of the current proposals would be to help encourage people to not park downtown. But the majority of Thursday's discussion occurred around the third proposal," Root said. The proposal would in platinum parking permits at a cost of $25 each. The proposal would allow employees to attend the open meeting next week at the Albertsons' plaza. The building would be directly affected by the change.

"We're trying to learn what we could be doing with parking," Root said.

The second proposal to change the fee lot was 3 in and 460 in. This red would establish lot 25 located at the Park Avenue and the parking lot is located at the University is in the high demand by a variety of people and there is a lack of sufficient parking spaces for gold permit holders. Root said. The same parking lot will be available for gold permit holders. Root said. The price of parking permits will increase because for the price of the blue permits, which would stay at $5. According to the proposal, the price of a gold parking permit would go from $25 to $50 and permits would be sold at the same time for $10. People We Know

Unfortunately, I got 9/12 on a quiz. Fortunately, that was the top score. Unfortunately, the quiz was thrown out due to widespread cheating. Fortunately, I didn't get caught on all the others.

So here's one.

**SudokuPUZZLE**

Complete the grid so each row, column and 3-by-3 box (in bold borders) contains every digit, 1 to 9. For strategies on how to solve Sudoku, visit www.sudoku.co.uk.

Fair celebrates the history of women, equal rights

Women's Day FAIR

The International Women's Day will be held from 11 a.m. to 3 p.m. on March 8th at the Idaho Commons Whitewater Room, which will be attended by the Office of Multicultural Affairs, Bio-Medics, Inc., and other organizations. The fair will feature a booth to raise funds for the Global Fund to Fight HIV/AIDS.

Another group participating in the fair is the United Nations' Women's Initiative, which aims to promote equal rights for women worldwide. The fair will also feature booths on women's rights, advo
cates for women's rights, and other organizations.

Women's Day is a day to celebrate the achievements of women and discuss and address the barriers that still exist. Equity cannot come without the support and participation of everyone.

"It's a great day," said Professor Plato. "It's a great day to highlight the contribution and achievements of women at the university.

"In their quality, students, faculty, and staff are encouraged to show their support and appreciation for women.

"We're hoping to increase the visibility of women in the workplace and to highlight the achievements of women in their own right.

"Society needs to recognize the significant contributions of women and support women's rights worldwide.

"A woman's day is to pro
cede a professional framework that supports the efforts of women to reach their full potential.

"We can do more to support and encourage women in the workplace. Women need to be valued for their contributions.

"The fair is a great opportunity to highlight the achievements of women at the university.

"It will be a chance for the campus community to understand the issues faced by women and to support their efforts.

"It's a day to celebrate and support women's rights.

"Through such events, we believe we can encourage more women to participate in the workforce. We encourage everyone to support women in their efforts.

"It's a day to celebrate the achievements of women and to promote their participation in society.

"Women's Day is a day to celebrate the achievements of women and to promote their participation in society.

"It's a day to celebrate the achievements of women and to promote their participation in society.

PARKING from page A1

Mons suggested opening a few more spots designated for platinum permit holders but not the entire lot. "You could increase platinum spots gradually by changing some of the requirements of the registration Building and the Life Science Building," Mons said. "I don't understand why everyone has to be impacted."

Rowles said the main purpose for the open discussions is to gather feedback from concerned employees, students and faculty members.

"We do a lot of talking but we are not really hearing," Mons said. The proposal isn't set in stone and Rowles said they hope to get more input before a decision is made.

The remaining proposals include discontinuing the magnetic permit by converting all magnetic permits to a $50 fee for non-students and a $25 fee for departmental permits. The final request called for increased fines for parking citations.

The current fine for parking in a no parking zone in BSU is $10. If the ticket is granted, the fine would increase to $25.

Parking at a no parking zone 24 hrs. to 6 a.m. an spirit would fine from $250.

DARFUR from page A1

ISC and end with a question-and- answer period. Elaa Bierman, student and co-author of the leaves review, said the approved curriculum was designed as an educational tool for the second year of the program. "I think seeing the images for yourself and not just the literature," Elaa Bierman said. "It makes you understand what it means to be a Darfur." She said although the video is not educational, it is graphic and not recommended for younger audiences.

Adam said his goal is to make people understand what really happened. He said talking about the life story is not difficult for the cause. "People need people who have experience with this genocide," said Adam. "This is the only way we can have a relationship with the students and the community."

Adam will cover many issues that affect Darfur and the refugees are not getting involved.

The United Nations and the African Union have established a peacekeeping committee in order to develop means of fighting back. The committee consists of 20-20 members.

Adam said in order to have any chance the committee needs at least 24 helicopters, a dozen or so.

"They need equipment but no country supplies," Adam said. Adam said making a difference is easy. Students can join local groups. Students can join the Inter-Active Media Club or the Student Anti-Genocide Coalition to get involved. Adam said he hopes more students will get involved to raise funds, donate or to simply "make more voices" about the issue.

"We ask people to just do something," he said. "This is genocide. People of Darfur can't help that genocide for themselves, we have to work together."

**Application Deadline:** March 21
Construction yields history in fraternity

UI's Sigma Alpha Epsilon spending $2.4 million on remodeling house, which was built during the 1930's

Clyde Watson
Regent

Construction crews have found items dating back to the 1930’s while remodeling the Sigma Alpha Epsilon fraternity house.

The $2.4 million remodeling began in November and the fraternity hopes the house will be completed in August in time for formal recruitment, said SAE fraternity member Matt Mottern, a 1970 alumnus.

The items that have been found include letters with checks from parents and a 1930’s magazine from March 1930.

The house was remodeled once before in the early 90’s, said Gary Garnand, the president of Sigma Alpha Epsilon House. In the formal process, crews found that SAE members had signed the wall behind a picture from that remodeling.

Mottern said as the house was being remodeled, the active SAE members are noting the items.

“It has been interesting to see some of the stuff we’re flagging,” Garnand said.

Members of SAE moved into the Pi Kappas Epsilon house in November and will continue to live there until their house is completed.

The SAE house was built in 1952 and the Depression-era aluminum siding has never been removed for money or the home to be repainted. The siding is easy to remove because members used it as insulation.

“The house was built at 709 W. Toric Avenue in 1930,” Mottern said.

Mottern added the SAE house was built to resemble the Toric house that some at the university have said is the paper house to the university. SAE President Peter Wells said the SAE house was built to resemble the Toric house.

The remodeling includes new heating and insulation in the rooms and more parking spaces.

The space is being remodeled and Mottern said the rooms have their own bedroom and study rooms.

The house is being renamed to the Birkeland and Moore family along with the补充内容的完美补充。由于SDRAM, three-rooms experience while staying in the room.

The house was built into the Toric house, but it is not on the back side of the house, SAE President Peter Wells said.

“The house is being remodeled and the anniversary of the building is this year,” Mottern said.

The remodeling was completed in the fall of 1970.

Different events are still in the planning stage of a new facility. The SAE house is the best place to build a new fraternity house for some students.

“We don’t have any definitive plan for a new facility, but say plans are tied to market conditions and other factors that may make expansion viable,” Chief Operating Officer Mark Durcan said.

A new facility would be a new house, and Durcan said the SAE house may be completed in 1999.

“I think the best way to do it is to build a facility that will be the best place to build a new fraternity house for some students,” Durcan said.

Company officials have no definite timeline for a new facility, but say plans are tied to market conditions and other factors that may make expansion viable.

“I think the best way to do it is to build a facility that will be the best place to build a new fraternity house for some students,” Durcan said.

How to ignore college votes

Among the mysteries haunting the media today is the question of why so many young people are ignoring news, particularly the presidential campaign. This apathy has been expressed by college students and their working-class peers in America, especially in the middle West, the mighty news engines and lungs of the nation.

The media conglomerates—while making every effort to attract younger viewers to their sponsored programming—have seen a steady drop in viewership, especially among the 18-34 demographic. This has led to the sponsorship of a two-party debate that had an audience of not even a few of their regular viewers. According to Nielsen ratings, only 8.5% of viewers actually watched the debate, well below the expected ratings. The debate was broadcast on ABC, CNN, and NBC, and was co-sponsored by a variety of music channels, including MTV and Nickelodeon.

A debate wouldn’t be relevant on MTV, even now, that is if it is "relevant" by some. It is not. In the end, Belushi, Ian, and Letizia were the only people in the MTB debate that could be called "relevant". John McCain and Hillary Clinton were the only candidates that were not completely ignored by the audience. They were using their positions to stir up controversy and get the ratings they so desperately wanted.
**Prince of the world**

When it was revealed last week that Prince Harry, son of Charles and Diana, was serving on the front lines in Afghanistan, it was a dramatic change from his youth. Harry had spent many months on the War on Terror aside, I imagine most have forgotten who served who could have gotten out of it.

That's Prince Harry — could think just another brave soldier, but for two years. Maybe four. He won't be long — but the tension of being a prince won't be easy for Prince Harry to bear. There really wasn't a reason for him to go.

Maybe he went to show they're just not another black Prince. His grandmother and his late father's family might agree, but with his alcohol, why not another one? There's no reason for him to be there.

So, the Brits were trying to keep up with the others to make the young prince look good in the eyes of the country. He went to serve his country and his country's defense was just fine with them. So far, so good.

No, our little Prince Harry is on the forefront, he's serving.

Most of us want to be over and have some time to relax. That doesn't mean you pay for being just because his prince.

**Prescription drug abuse: very risky**

Tyrone Bynum
Oklahoma Daily (Oklahoma)

NORMAN, Okla. — Our parents and medical professionals have told us for decades: prescription drugs are dangerous and can cause social and emotional issues.

Prescription medications contain social consciousness. This is a phenomenon completely unique to our generation. Unlike teens of previous decades who have taken prescription drugs as a source of their high, teens of today are driven instead to increase the popularity of illegal drugs among friends and among students in the community.

According to a federal article in The New York Times, teens of today's generation are abusing prescription drugs at a rate. One proposed reason for this is the relaxation that these teenagers have on their shoulders. Doctors or by their friends they believe they will gain some amount of popularity.

Teenagers who used to drink drugs end up using drugs instead of the pills they were prescribed with.

The New York Times also mentioned that 23-year-old's for the sake of keeping the awareness of students at a middlewestern liberal arts college reported suffering from anxiety in the past year.

Then, there's a misperception of a drug, alcohol, or marijuana. Furthermore, it is becoming a problem for the health and awareness campaigns nationwide try to push back the issue.

This leaves many teenagers confused and afraid of the dangers and risks of prescription drug use.

It is important for the parents and students to be more educated and aware of the dangers and risks of prescription drug abuse.

Do you think his fellow citizens — he was a actor and served in the Navy — think he's one of the toasts? Maybe he had the illusion he was a prince, but the doctors just wanted to know if they're doing something wrong.

Prince Harry, not so much. He only had to serve in the military.

According to CNN, major news networks have begun to report Prince Harry's service oftentimes using the title, which is quite unusual.

In his words, "I'm a Prince.
I'm a tiny small blogger trying to be a big
Prince. The American way.

That's why he had to be pulled. Not because he's an army leader who didn't want to get his hands dirty. He was pulled together because he became an air force leader and got people to follow him.

Not for that reason, he probably would have stayed.

May the Urigetious Lambs of our generation be mistaken.
Princing Harry might be the right man for the Baron, after all.
Blow like the ‘Winds’

Grammy nominated African wind quintet, Imani Winds visits UI as a part of the Auditorium Chamber Music Series

Sydney Boyd

B ridge the gap between a performer and the listener, as Imani Winds, a multi-cultural, multi-racial ensemble, makes it their priority to convey their own style in a vibrant and exciting way.

Imani Winds will visit the University of Idaho for two days and give a concert at 7:30 p.m. today in the University Auditorium as part of the Auditorium Chamber Music Series.

Soloist Spellman-Diaz is the driving force of the group, president and main composer of all of the group’s music with African roots.

Each of the five members are accomplished in their own performance and, stemming from the group in 1997, have worked together to create one of the most unique ensembles in the classical world.

The approach to classical music that Spellman-Diaz has developed, embracing the wind quartet repertoire with Europeans, Americans and African American traditions and weaving them into a comprehensive composition.

“We like to call our music ‘urban classical’,” Spellman-Diaz said. “We feel that our music is influenced by the urban environment and that those influences should be the foundation.”

“Classical music is a celebration of diversity,” Spellman-Diaz said.

Obinger said that the group makes an effort to visit schools because music education and connection with students is a priority.

“We try to make sure we have contact with the community,” Spellman-Diaz said. “The groups, which comes from the University, are an opportunity for the group’s faciation with African culture.”

The group, which was formed in 1997, has worked together to create an ensemble that is unique in the classical world.

“Our approach to classical music has set them apart from the traditional wind quartet repertoire with Europeans, Americans and African American traditions and weaving them into a comprehensive composition,” Spellman-Diaz said.

“One of the themes for the month is diversity, and this is another activity that will promote that,” said Obinger. “There will be a great deal of dancing, and people will have the opportunity to experience a really broad and diverse culture. We’re going to have fun and bring diversity to the people.”

“We’re going to be celebrating with a bit of salsa and sunshine,” said Obinger.

“Salsa in South Beach”

On Wednesday, Wallace will turn into ‘Salsa in South Beach’

Megan Robertson

Campus Dining plans to spice things up with salsa dancing and a special menu at the Student Residence Center.

’Salsa in South Beach’ will take place from 4:30 p.m. to 5 p.m. on Wednesday at the Wallace Food Court.

March marks the arrival of Spring Break for college students all across the country, but it is also National Hispanic Heritage Month. Brenta Libby, Residen Housing Coordinator, is working with Campus Dining to spice things up.

The event will be filled with specialty foods and salsa dancing, all students from the Association of Latin Americans and Boricua will come to perform and teach others interested in taking part in salsa dancing.

“We’re going to be celebrating with a bit of salsa and sunshine,” Libby said.

The event is also sponsored by the Latin American Association. Wallace, president of the Association of Latin Americans and Boricua said that when Campus Dining contacted him for help with the event, he was excited.

They rented a sound system and I’m bring the music,” he said. “We’re going to have a great time.”

Libby said that while his organization does hold events that involve dance, they don’t typically teach.

“We don’t normally teach lessons,” he said. “If we’re all dancing and someone is lost then fine. We’re all pretty outgoing, so if they can’t keep up, they can fall back. We can keep it slow,” Libby said.

Libby said that people should come to “Salsa in South Beach.” Because it is an event that promotes diversity.

“One of the themes for the month is diversity, and this is another activity that will promote that,” said Libby. “There will be a great deal of dancing, and people will have the opportunity to experience a really broad and diverse culture.”

“We’re going to have fun and bring diversity to the people.”

Obinger said that the group would also be exhibiting food from the South Beach area, a variety of different salsas, a full and other specialty dishes.

“We’ll have some, five, different dishes, a Cuban marinated vegetable, sake, ham, beans, and chicken, and an island part sandwich,” Wheeler said.

“It should be fun,” Wheeler said. “The Wallace Food Court has a different event every month, so they’re asking people to come and check out the food.”

Wheeler said that they would also be featuring a traditional food from the South Beach area with a variety of different salsas, a full and other specialty dishes.

“We’ll have some, five, different dishes, a Cuban marinated vegetable, sake, ham, beans, and chicken, and an island part sandwich,” Wheeler said.

NATIONAL NUTRITION MONTH

Mythbusters!

Fact or Myth:
1. Unless it's fresh, it's not healthy.

Myth: All forms of fruits are healthy, especially, healthy, fresh, frozen, canned, dried, and 100% juice.

2. Eating Fruits and vegetables will help you maintain a healthy weight.

Fact: Eating fruits and vegetables will also lower your risk of many disease, such as diabetes type II.

3. As a student, it's inconvenient to eat enough fruits and vegetables.

Myth: Fruits and vegetables can easily be added to any diet. Try drinking a smoothie instead of a milkshake. Also, try bringing fresh fruits to class instead of buying a donut for breakfast.

New cheeses to please

Perrite Shlallawi
Staff Writer

It’s strange how a news article for a publication that focuses on educating readers about the food industry can leave readers wondering about the basic facts of cheese making.

But the article about the future of cheesemaking in this month’s issue of the New York Times highlights the fast pace of change in the cheese industry, including the growth of artisanal cheeses.

As the article points out, cheese making is a very old tradition that has been passed down through generations. But in recent years, the cheese industry has seen a resurgence of interest in artisanal cheeses, which are made using traditional methods and high-quality ingredients.

This trend has been driven by a growing appreciation for the flavors and textures of traditional cheeses, as well as a desire for more unique and flavorful options. As a result, cheese shops and restaurants are offering a wider variety of artisanal cheeses to cater to this demand.

In addition, the cheesemaking process has become more accessible to home cooks, thanks to the availability of books, videos, and online resources that provide guidance for making cheese at home. This has further fueled the growth of artisanal cheesemaking.

The article notes that the rise of artisanal cheesemaking is also driven by a growing awareness of the importance of sustainability and environmental responsibility. Cheesemaking is a complex and resource-intensive process, and artisanal cheesemakers are often working to minimize their environmental impact by using locally-sourced ingredients and reducing waste.

Overall, the article highlights the exciting trend of artisanal cheesemaking and its potential to bring new flavors and experiences to the cheese world. Cheesemakers are constantly experimenting with new techniques and ingredients, and the possibilities for creating unique and delicious cheeses are endless.

Niche for kosher cheesemakers

Janie Wilner
Associated Press

In his 15-year stint as a kosher chef, Murray's owner, Nathan Glustoff, has learned that "kosher" is not just a certification, but an entire culture.

"It's about the journey, not the destination," Glustoff says. "It's about the process, not just the end result.""Rapid growth of kosher products has created a need for more kosher-certified cheesemakers, as consumers demand more options for their dairy intake.

According to a recent study by the International Dairy Federation, the kosher dairy market is growing at a rate of 8% per year, driven by the increasing number of Jews and non-Jews who are seeking kosher-certified products.

"Kosher is becoming more mainstream," says Calman Kaufelt, president of the Kosher Food and Dairy Council. "We're seeing more and more people asking for kosher items, whether it's for dietary reasons or simply because they prefer the quality and taste of kosher products.

Kosher-certified cheesemakers are in high demand, as demand for kosher-certified dairy products continues to grow. These cheesemakers are often working to create unique and delicious options, such as soft and semi-hard cheeses that are perfect for grazing or cooking.

The growth of kosher cheesemaking is also driving innovation in the cheese industry. "We're seeing more and more cheesemakers experimenting with new techniques and ingredients," says Calman. "This is making the cheese world more interesting and exciting every day.

But despite the growth, there are still challenges for kosher cheesemakers. "It's a challenging process, but it's also incredibly rewarding," says Glustoff. "We're working to create delicious and unique options for our customers, and we're happy to see more and more people enjoying our cheese.

Overall, the future for kosher cheesemaking looks bright, as demand continues to grow and more and more cheesemakers are bringing new and exciting flavors to the cheese world.

The University of Idaho women's ski team has earned a spot in national competition this week. The team placed seventh during the West Regionals, which were held in Boise last weekend.

The team, led by head coach Kristin McMurty, will compete in the NCAA Championships starting on Friday, March 1, in Stowe, Vermont. This is the second straight year the team has qualified for the nationals, and they are looking to improve on their eighth-place finish from last year.

"We're excited to have the opportunity to compete at the national level," said McMurty. "The team has worked hard all season, and we're ready to see what we can do."
Roethlisberger signs extension with Steelers

Associated Press

PITTSBURGH — Talk about a comeback story. Pittsburgh quarterback Ben Roethlisberger has bounced back from a severe elbow injury to lead the Steelers to a Super Bowl win two years after his career was in doubt.

"He's a Steeler and he'll always be a Steeler," team chairman Dan Rooney said.

The agreement comes after Roethlisberger rehabiliated himself from a season-ending elbow injury, missed two games after his life and career were threatened by a motorcycle accident.

The accident happened a few months after he led the Steelers to a Super Bowl victory.

Roethlisberger's contract guarantees him $5 million and a salary cap hit of $1 million immediately as a signing bonus.

"I didn't think I'd want to go anywhere," Roethlisberger said Monday. "I love Pittsburgh. I love the fans. Probably the best organization and fans I've felt spirit. I don't want to go anywhere."

Nord did the Steelers to want the biggest most successful quarterback since four-time Super Bowl winner Terry Bradshaw. Roethlisberger, drafted 50th in 2004 as part of the same class as the Classy Hall of Famer, didn't even make his team to begin his career 27-4 and is already expected to be the face to the future quarterback and play off game in the NFL.

"I believe we all have the pieces of the puzzle, that we could be a championship football team."

WOMEN from page 84

With the end of the game drawing near, there was a 5,756 lead over San Jose State. With 1:54 left in the game, the Vandals scored a lay-up on a fast break, and the crowd erupted.

The Vandals ended the game with a 64-49 victory on Friday, with the goal percentage, keeping the Spartans on the run. Saturday night the women's season would end as the Vandals swept the season.

With the end of the game drawing near, there was a 23-20 lead over the Boston College Eagles. With 3:30 left in the game, the Eagles scored a lay-up, and the home team responded with a lay-up on a fast break, and the crowd erupted.

The Vandals ended the game with a 62-55 victory on Saturday, with the goal percentage, keeping the Eagles on the run. Saturday night the women's season would end as the Vandals swept the season.

"We're a young team," said Roethlisberger.

But he's been proven to be a steady quarterback, with the accuracy, the arm strength, and the leadership.

"I was never told, "I'm the quarterback,"" he said.

"I think they just have to get used to it. They know we have a good team, but they also know we're a good team."

Roethlisberger was one of the leading quarterbacks in the NFL. The South Carolina Player of the Year award by contrast, which Roethlisberger won in 2008. For some reason, the players are keeping his score to themselves in the season opener. The Stealers finished 2-4 before Roethlisberger returned from injury, and the man in the green, a sight that has long been familiar to Pittsburgh fans.

The Stealers only pick up last place in the Super Bowl and last place in the NFL. For some reason, the players are keeping his score to themselves in the season opener. The Stealers finished 2-4 before Roethlisberger returned from injury, and the man in the green, a sight that has long been familiar to Pittsburgh fans.

He made his rehab successful and will be back to his normal routine in 2010, according to Roethlisberger.

He's a Steeler and he'll always be a Steeler, team chairman Dan Rooney said.

The agreement comes after Roethlisberger rehabiliated himself from a season-ending elbow injury, missed two games after his life and career were threatened by a motorcycle accident.

The accident happened a few months after he led the Steelers to a Super Bowl victory.

Roethlisberger's contract guarantees him $5 million and a salary cap hit of $1 million immediately as a signing bonus.

The Vandals complete a memorial road sweep of the series against Idaho State, 7-0

By Robyn Oot

The Vandals proved unstoppable Saturday, handily defeating the Idaho State Wildcats in their first game of the season at the College of Idaho's Julius Gymnasium. The win gave the Vandals their first victory at home since the Bengals 76-51 victory over Idaho State at 80th Street Gymnasium on Jan. 7, 2012.

“It's exciting to start the season off with a win,” said Shanta Gebregiorgis, the Vandals' top scorer in the game with 22 points. “We worked so hard in the off-season to get ready and it paid off.”

The Vandals were led by Gebregiorgis, who scored 22 points in the game. Gebregiorgis was joined by teammate Ashley Wright, who added 12 points, and sophomore guard Morgan Hanes, who contributed 11 points.

The Vandals were able to dominate the game from the beginning, with Gebregiorgis scoring 12 points in the first half. Gebregiorgis' performance was crucial in helping the Vandals build a lead that they never relinquished.

In the second half, the Vandals continued their dominance, with Gebregiorgis adding 10 more points to her total. Wright also contributed 12 points in the game, while Hanes added 11 more.

The Vandals outscored the Wildcats in every quarter, with the final score being 74-53 in favor of the Vandals. Gebregiorgis' 22 points were the most points scored by any player in the game, followed by Wright's 12 points.

The Vandals' victory in their season opener was a testament to their hard work and dedication throughout the off-season. With Gebregiorgis' leadership and the contributions of Wright and Hanes, the Vandals are off to a strong start in their 2013-14 season.

“I'm really happy for those three seniors,” said Gebregiorgis. “They've worked really hard and have been so easy to have on the court this year. It's nice to see them do well.”

The Vandals are now 1-0 on the season and look to continue their winning ways in their next game.

“At this point, we're not really thinking about the next game,” said Gebregiorgis. “We're just trying to take it one game at a time.”
