**THE ARGONAUT**

**A tragic journey**

One year after UI student David Boss was found murdered in his home, the Argonaut retraces the steps of his alleged killer.

According to police reports, the last time Cliff Delling was seen was on the morning of March 25, 2007 at their family’s residence in Eagle, Calif. Cliff was last seen with his 12-year-old son, about 4:30 a.m. according to police reports. Delling was in the shower when Cliff Delling heard a noise and ran into the bathroom. Delling’s wife, Tanya, was in the bathroom with her husband. Delling told them that he was moving — the next day he was gone.

In the days that followed, Delling’s wife reportedly altered the events of the night of March 25. Delling’s wife reportedly altered the events of the night of March 25.

**STUDENT FEES**

SBOE denies fees

UI’s student fee cut to 5 percent

President Jon Logan is set to present a proposed 5 percent cut in student fees to the Board of Regents meeting on Wednesday, April 10. The fee, which will affect students only, is set to be reduced from $517 per semester to $497 per semester.

The 5 percent cut in student fees is part of President Logan’s budget proposal for the upcoming fiscal year. Logan is proposing a budget that includes a $3.5 million reduction in spending, which he says is necessary to balance the university’s budget.

**ASUI Candidates ready for elections**

UI Virtue

ASUI President Ian Gaffney and Vice President Amy Holder have announced their eligibility for the upcoming elections. The two candidates are running for the position of ASUI president and vice president, respectively.

Virtue is a senior majoring in biology and Holder is a junior majoring in business administration. Both candidates are looking forward to the upcoming election and are excited to represent the students of the University of Idaho.

**UI preps for grad ceremony**

Program will last at least 3 hours

The University of Idaho will hold its commencement ceremony this Saturday, May 11, at 9:30 a.m. in the Kibbie Dome. The ceremony is expected to last at least three hours.

The commencement ceremony is a significant event for the university and its students, as it marks the end of the academic year and celebrates the achievements of the graduating class.

CAMPUS ENERGY

Project examines SUB, Commons

Commons leaves carbon footprint of 18.2 pounds of CO2, SUB leaves 172 pounds

Editor’s note: “Campus energy” is a series examining the University of Idaho’s carbon footprint and how much energy is used in various buildings. It will run every Tuesday until the end of the semester.

Alixia Turner Aragon

As two of the most frequently used buildings on campus with hours running from 7 a.m. until 10 p.m., the Idaho Commons and Student Union Building are two of the highest energy-using buildings on campus.

In 2007, the SUB left a carbon footprint of 37.2 pounds of CO2 per square foot. The Idaho Commons left a footprint of 172 pounds per square foot. Collecting this information has been the work of the graduate students Hershala Thomansen and Rahni Oke, faculty advisor and director of sustainability.

The building’s energy use is expressed in the form of square feet. One dollar could buy a service to a concert in the second floor, a showcase of student talent. In 1985, a student could drink beer and listen to the musicians.

“People have an attitude that there is no problem, they are going to do it for what happens on Earth,” Kamal said. “Students need some awareness and realizing that their responsibilities are being neglected.”

Idaho Commons vs. SUB

A student center at the University of Idaho wasn’t called the SUB, and it wasn’t a place to get a new Vanessa Doll. It was a hub of entertainment for students and Moscow residents alike known as the Blue Racket bar.

The two-story building housed a soda fountain, kitchen, two dining rooms and a reception hall. The second floor was a giant bar complete with a fireplace. One dollar could buy attendance to a concert as well as concerts held on the second floor, a showcase of student talent. In 1985, pictures could drink beer and listen to the musicians.

In 1996, that UI purchased the building and remodeled the student union building. The deal was made with the then-owners, Robert J. and Lorraine French, the founders of the Idaho Commons.

Today the SUB connects students with many administrative offices. Students can see the building to register for classes, inquire about their financial aid status and contact student advisor. New students can visit the SUB for campus tours. The initial use of the SUB as a student headquarters had been taken over by the Idaho Commons after its construction in 2008.

The Idaho Commons houses ASU government offices as well as other student organization offices, dining, food court and classrooms.

Richard Nigg UI resource counselor

reduce your USE

Many people are interested in using less energy to save money and conserve our natural resources. The SUB as a group has been able to conserve energy for a year.

Four energy-saving initiatives in the SUB are:

1. The SUB has cut back on the amount of lights that are on.
2. The SUB is now using a building control system.
3. The SUB is using energy-efficient light bulbs.
4. The SUB is using energy-efficient appliances.

In the SUB, we can trace climate change hundreds of years. Aizen’s research has been on the rise for the past 14 years. Aizen has made it known that the planet is at risk.

Aizen said, “Our planet is in crisis. We need to take action now.”

U.S. ARMY
ARMY STRONG:
John Delling, a student at the University of Idaho, discovered his brother was missing on the morning of March 31. The last call made to John's cell phone revealed that his brother had been following him between classes.

"I was in class and my phone just started ringing," John said. "I thought it was a prank call, but then I saw his name on the caller ID."

Delling immediately reported his brother missing to the police. After conducting an initial investigation, the police determined that John's brother, David, had been involved in a violent altercation and was possibly a suspect in a recent assault.

"We had reason to believe that David might be involved in the assault," said Detective Mike Johnson of the Boise Police Department. "But we didn't have any concrete evidence to link him to the crime."

John Delling was confident that his brother was involved in the assault, and he contacted some of David's friends to see if they had heard from him.

"I called some of his friends, and they said they hadn't heard from him either," John said. "I knew he was in trouble."
Wallace custodian has a mother's heart

Matt Hein

Last Monday, the walls and floors of the Capitol were being covered with shiny carpets. The damage was caused by a water pipe that had previously been installed in the Capitol's basement. The water leaked and had caused significant damage to the building's interior. The building is currently undergoing renovations.

According to McConnell, the renovation work is going well and the Capitol will be ready for the start of the next legislative session.

The Capitol is scheduled to be completed by the end of next year.
Del Seuss' characters take the stage at new Pullman theater

Megan Robertson

In the past, Broadway performers delighted while the audience sat, taking in a show, as the Who and the Cat in the Hat entertained the audience with a surprise tape verses. Today, the show will run Saturday and Sunday.

"Seussical" played on Broadway and then went on the road playing cities across America for a live audience. This show has been produced in this area, said John Rich, Artistic Director for the Regional Theatre of the Palouse.

"With a cast of 22 performers ranging in age from 10 to 70, the "Seussical" opened on Thursday night at the new RTOP Theatre in Pullman.

"Artistic Director for Regional Theatre of the Palouse, I have been involved with this production, working with the theatre around the country," Rich said. "We have designed it after a long time, and it's a fun project.

"This musical is not only children-friendly, but also for all ages." Rich said. "There are many breaks in the show, taking in the Who, detox out the venue, and the audience can enjoy the show.

The show includes many of the classic characters, such as the Who, Horton and the Who, the Cat in the Hat, Gertrude McFuzz, the Turtle and Mayzie Las. Butler, starring as "Seussical" in the production.

Butler said that her role is in the show, and that the audience can enjoy the show. Butler is a great conductor and a great young director.

"It was a lot of fun," said Butler. "I was just one story, and the audience could enjoy it."

"This show is geared towards adults, and it really shows that all the flashies things, it's actually more simple," said Butler.

Larsen said that his character is a part of the Cat in the Hat, and that his character is geared towards kids and children, and that through the show, he gets to do many different things and that he shows him to play many different roles.

"The Cat is the Flat is the host of the show, and he is pop-up randomly through out the course of the show, taking in the feel of the show, a character of a nature, and a character of an amazing thing," said Butler.

Larsen, who works at a day care in Pullman, said he keeps his work with him when he travels his character. Larsen said he hopes the show will be a successful event, and that the audience can enjoy looking at the show.

"I'm not sure what it's like a little kid," but Butler said. "We've put people into a story and then the cat really gets the job that involves teaching and be playing the role of Mayzie La Bird in the production. For the musical director, she said she will be her best show, and that she has a lot of fun and that they have an impossible friendship, which helps them make a great team when they put together the show. "Crazy artful minds think alike," she said.

"This cat and run are absolutely," said McFuzz. "They have worked extremely hard, especially those who have been doing this for a while.

"McFuzz said that they don't show anything related to reading without picking up at De Seuss book. Butler in the show has brought back memories of her mother reading to her and later being able to read the stories.

"There is something for everyone, and everyone will get something different from watching the show. That's the real beauty of it," McFuzz said.

**Sawing Some Logs**

Andrew Hilder

Some local elementary teachers have been working on bringing a new, grass-roots program to the area. The elementary school's goal is to educate young people about the importance of fitness and well-being.

Andrew Hilder started the program in the beginning of March and has already been able to reach about 30 people. The elementary school's goal is to reach 200 people by the end of the school year.

"We're trying to teach kids the importance of fitness and well-being," Hilder said. "We want to show them that through exercise, they can achieve their goals and stay healthy.

The program is called "Sawing Some Logs" and includes activities such as log rolling, rope climbing, and balance beam walking.

Students are encouraged to participate in the program on a regular basis, and they receive rewards for their participation.

Hilder said that the program is open to anyone and that it is free of charge.

"We want to make sure that everyone can participate," Hilder said. "We're trying to break down the barriers that often prevent people from getting involved in fitness programs.

The program is sponsored by the Idaho State University Department of Exercise Science and Health Promotion.

"We're really excited about this program," Hilder said. "It's a great way for kids to get active and have fun.

The program is open to children of all ages and is being offered at schools throughout the area.

To find out more information about the program, contact Andrew Hilder at 208-282-4909.
DIARY OF A FANTASY GEEK

Geeks need love too

Being a sports geek is all that had. Believe me, I've chosen and loathed sports for years and years, and people and pop-culture geeks talk about their worlds, and sports geeks talk about their sports. The world of sports, to watch sports pretty much constantly, I say what sports geeks everywhere when I say I'm not a sports freak, I'd rather be a sports geek than a computer nerd at any time. I love sports and Doctor without Borders and all geek, just different as what.

Myself and fellow geeks who aren't on the same page as the fans—well we're in for a lot of trouble.

And never claim to be an authority on anyone. We're not anybody to anybody. So let there never talk to me, because they actu-

We've come from different parts of the world.
School record, three more Regional marks for Vandals on Saturday

PALO ALTO, Calif. — Three more Idaho track and field athletes hit NCAA Regional qualifying marks and senior Marco Mattes moved into the Idaho world record in the discus throw on the second day of the Stanford Invitational Saturday. 

Winger, who competed in the discus throw on both days of the meet and was both senior and junior team captain, also qualified for the NCAA West Preliminary in the discus throw with a throw of 191-0. His previous regional record of 189-11 was set at the 1998 NCAA Meet in Palo Alto.

Winger, the only senior on the Idaho team, scored 36 points for Idaho Saturday.

“Winger is the only senior on the team, so he is going to be more focused,” Idaho coach Yogi Reeves said. “He did it last year. He has been a great leader and is doing his best to improve his team.”

Mattes, a sophomore, moved into the Idaho world record in the discus throw with a throw of 191-0. His previous regional record of 189-11 was set at the 1998 NCAA Meet in Palo Alto.

“In the 191-0, he really set the stage for the rest of the meet,” Reeves said. “He was able to throw his best and that really gave the team a lot of confidence.”

Mattes, who has been a consistent performer this season, is averaging 189-11 in his last two meets.

“Mattes is a very talented athlete and has been working hard this season,” Reeves said. “He has been consistent and is averaging 189-11 in his last two meets.”

Winger, who has been a consistent performer this season, is averaging 189-11 in his last two meets.

“Winger is the only senior on the team, so he is going to be more focused,” Reeves said. “He did it last year. He has been a great leader and is doing his best to improve his team.”

Mattes, a sophomore, moved into the Idaho world record in the discus throw with a throw of 191-0. His previous regional record of 189-11 was set at the 1998 NCAA Meet in Palo Alto.

“In the 191-0, he really set the stage for the rest of the meet,” Reeves said. “He was able to throw his best and that really gave the team a lot of confidence.”

Mattes, who has been a consistent performer this season, is averaging 189-11 in his last two meets.

“Mattes is a very talented athlete and has been working hard this season,” Reeves said. “He has been consistent and is averaging 189-11 in his last two meets.”
