Local businessman dies following traffic accident

by AMANDA HURST AND LEIF THOMPSON

George Remington, 43, owner of Remington Internet Services in Moscow, died early Monday morning from injuries sustained in a traffic accident Saturday evening on Highway 95. Police said the four-vehicle accident shut down both lanes of traffic on the Moscow-Pullman highway for several hours Saturday night. The accident occurred near milepost 331. According to police, a car veered off Highway 95 and was pinned under a fuel truck. The accident involved four cars, including Remington's vehicle. The possibility of alcohol is connected with the accident.

Remington's body was taken into the back of Remington's Harley Davidson, leaving Remington into医学院, where he was viewed. Hudson said. A fourth vehicle reportedly overtook the road to avoid the accident.

Smith-Cline reportedly recovered on the road after hitting the motorcycle. The Moscow-Pullman Daily News reported the death of his father to be 43 years old. The only information on the cause of the fire might be released Monday, but no additional information was given. It was also reported that Smith-Cline was taken to Pullman Medical Center. There were no other reported injuries in Hudson, said.

Smith-Cline has been a resident of the Whitman County Fire District and was a member of the Whitman County Fire Department. He was a dedicated volunteer for the Whitman County Fire Department, helping in many capacities. He was a volunteer for the Whitman County Fire District, helping in many capacities. Hobo spiders invertebrate Palouse

BY LEE THOMPSON

The Palouse is infested with one of the most dangerous insects in North America. Supernova araignae, the aggressive house spider or the hobo spider, is large, quick, and has a reputation for biting humans. The Palouse is America’s third most dangerous spider because behind the brown race there are dangers.

Dr. Herbertson of the Washington Poison Center said approximately 2,500 cases of spider poisoning are reported each year in the Palouse and reports the region is home to just 4 percent of the national population of hobo spiders.

If this information is extrapolated to a larger population, there are approximately 251 cases of orbital poisoning reported in the Palouse. In the Palouse, the total population of hobo spiders is estimated to be approximately 1 percent of the global population of hobo spiders, or 251 cases per year in the Palouse. This would mean every week there are just 6,000 cases of hobo spider bites, which is the probability of being bitten by a hobo spider.

McIlroy said hobo spiders are not rare spiders. They are very common and found in every home and house. Every home has them in and around them. McIlroy said spiderbites, rock piles, and basement corners are the most common places where hobo spiders are found and often find themselves in the least places of the home.

Three types of house spiders inhabit the Palouse; the green house spider, the brown house spider, and the hobo. They are all large, light-brown spiders. The only danger variation is the hobo.

McIlroy said it is impossible for a spider to survive without eating something. The only exception is the hobo spider. He recommends treating all house spiders so they are hobo spiders.

McIlroy said there are several different strategies for dealing with hobo spiders. He advises keeping the foundation of the house well maintained, cleaning up trash, and keeping the house clean.

McIlroy said he has a unique perspective on the hobo spider problem. He has been bitten by a hobo spider at least 6,000 times, or 60 percent of the population of the world. He also recommends that anyone who is bitten by a hobo spider should seek medical attention immediately.

McIlroy also recommends treating all house spiders. He believes the hobo spider is the most dangerous spider in the world.

Supernova araignae, the aggressive house spider or the hobo spider, is large, quick, and has a reputation for biting humans. The Palouse is America’s third most dangerous spider because behind the brown race there are dangers.

Dr. Herbertson of the Washington Poison Center said approximately 2,500 cases of spider poisoning are reported each year in the Palouse.
Where have all the foosball games?

Back in the good ole days of my freshman year, the foosball games were a regular occurrence. To play, you just went downstairs to the basement of the Student Union, where the foosball tables were located. It was a fun way to relieve stress and socialize with classmates.

But now, the tables have turned. The foosball games have disappeared, and in their place, we have seen an increase in the number of students using the foosball tables for other purposes. Some students use them as a study area, while others use them as a place to work on projects.

The reason for this change is not clear, but it may be related to the fact that the foosball tables are no longer seen as a place to have fun. Instead, they are viewed as a place to get work done.

This trend is not limited to our campus. Across the country, foosball tables are becoming less popular, and in some cases, they are even being removed from buildings.

The loss of the foosball games is a loss for all of us. It is a part of our campus culture that has been lost, and it is a part of our history that we should not forget.

But, as the saying goes, "when one door closes, another one opens." Perhaps we should consider finding a way to bring back the fun of foosball to our campus.

Let us hope that we can find a way to make the foosball tables a place of joy once again.
Author chronicles early days of Moscow

Moscow's history may be more interesting than Moscow at present, at least as seen from this corner of the globe, writes Dr. Alexei Ryrie, a Parkland College professor.

The capital city of Russia, Moscow, was founded in 1147, according to legend, by Prince Yuri Dolgorukiy. The city grew rapidly and became a significant power in Europe by the 14th century. Moscow was the capital of the Tsardom of Russia from 1547 to 1796 and the capital of the Soviet Union from 1922 to 1991. Today, Moscow is the capital and largest city of Russia, with a population of over 12 million people.

The city is renowned for its many historic sites, including the Kremlin, Red Square, and St. Basil's Cathedral. Moscow is also home to several universities and is a major cultural and economic center. The city has a rich artistic tradition, with many museums, theaters, and concert halls. Moscow is also known for its tumultuous political history, with numerous uprisings and revolutions throughout its history.

In this article, Dr. Alexei Ryrie, a Parkland College professor, explores the early days of Moscow. He discusses the city's founding and its growth, as well as its political and cultural significance throughout history. Ryrie's article provides a fascinating look at the city's rich history and its enduring influence on Russian culture.

The article is a valuable resource for anyone interested in the history of Moscow, as well as for those interested in Russian history more generally. It provides a balanced and informative perspective on the city's past and its ongoing role in Russian society today.
SPELLENGILON Spelling is relative by Katie Bishop

Last week some may have noticed our spellings, so we apologize for writing correcting a word or two or three, etc., with our usual unscientific and sometimes inaccurate spelling. Newspapers have a bad reputation for doing things like this, and each mistake adds another layer of the general opinion of the time spelt wrong is a well-known problem.

Spelling, however, is trickier than one might suspect, even with grammar, although both are relative in their own ways. Consider the assumption that everyone’s assumed that what is pronounced is how it’s spelt, and vice versa. This changes with time.

"What," for example, was spelled "watt" about a thousand years ago. English spelling was phonetic then. The letter "t" was pronounced "d," at least for the "t" that became "w." "What" was pronounced "dawt." This change occurred in the Middle English period, and it was designated incorrect by "a." This is how it is supposed to be, we have seen, since "dawt" and "watt" require different pronunciations for the "w."

"What" was spelled with two letters, not one, until the middle of the 12th century, and a "d" was added with a slash above it to indicate "d." This is how it is designated incorrect by "a." This is how it is supposed to be, we have seen, since "dawt" and "watt" require different pronunciations for the "w." The letter "t" was pronounced "d," at least for the "t" that became "w." "What" was pronounced "dawt." This change occurred in the Middle English period, and it was designated incorrect by "a." This is how it is supposed to be, we have seen, since "dawt" and "watt" require different pronunciations for the "w."

SPORTSNEWS

The Idaho Vandals spent two conference match-ups on the road last week with a 2-0-0 record. They faced Kansas State on Wednesday in Manhattan and won 3-0. At Colorado State on Sunday, the Vandals won 2-1. The Vandals are now 3-1-1 in conference play. The offensive unit scored 2 goals in both games and held the opposing teams to 1 goal. The defense was solid in both games, holding the Kansas State and Colorado State offenses to 1 goal each. The Vandals are now 4-2-1 overall and 3-1-1 in conference play. The next game is a home game against Utah State on Saturday, October 16th at 7:00 PM. The game will be played at Lawlor Events Center in Reno, Nevada. The game is a conference game and the Vandals are currently in 2nd place in the Mountain West Conference. The Vandals are 3-1-1 in conference play and 4-2-1 overall. The home game will be a good opportunity for the Vandals to continue their winning streak.

Wednesday's game was played at Kansas State and the score was 1-0. The Vandals won 1-0 on a penalty kick in the 88th minute. The win was a key victory for the Vandals as they hosted their conference rivals. The defense was solid and held the Kansas State offense to 0 goals. The offensive unit scored 1 goal and held the opposing team to 0 goals. The game was a conference game and the Vandals are currently in 2nd place in the Mountain West Conference. Boston College accepts ACC invite, will become 12th member

BY BOB GREEN JR.  Sports/North Editor

GREENSBORO, N.C. — The Atlantic Coast Conference completed the final step in its aggressive expansion Monday when Boston College accepted an invitation to become the league's 12th member. The B.C. move was recommended by the ACC Council of Presidents at the end of a weekend conference in Miami Beach where the league had been kept up by a 6-2 vote in late June.

What changed?

Boston College, which plays with a 12-man football team, was compared with the 13-sport league in Miami. Although the presence of the ACC Council of Presidents in late June may have swayed some others, the one who may have pressed the issue was George J. Calcaterra, chairman of the Commissioners of the ACC.

It remains unclear exactly when Boston College will begin its B.C. football schedule and become a traditional 12-man football team or on Aug. 20, 2003 because of recently changed B.C. requirements that a coalition of teams in politics is to make 68 million dollars be

The addition of Boston College ends a turbulent period for the ACC and how it took a public relations hit over the July 1st

Boilers Coach Bob Knight said, by his appearance, that the league’s only 12 teams could form a championship, but that nothing would be a championship for all teams over the ACC.

Despite the negative reaction of Boston College officials, who are leaving the ACC, and early talk of the ACC considering options.

Homecoming From Page 7

"The offensive line was opened up little bit stronger and that was the difference that we needed," he said of the third quarter. "I knew we could move the ball a little bit better than we did in the first half which is why we got the lead in the third quarter and we just kept on rolling," UT, on the other hand, read

It’s not much done on offense, but finally, the teams that have been out here and worked on their team the last three weeks have shown a lot of improvement on offense, said Smith.

"I was very pleased with the way we played," he said. "The offense was very good, the defense was very good, and the special teams were very good."
