Police scoot around town on Segway in trial run

by Gary Allain, Opinion writer

People ride around town and on campus as a duo-decker twin that owns the streets of this rural locale a police officer rid-

ing a Segway. The Supervisory Human Transportation is a high-tech, two-wheeled motor that employs a sensor of gyroscopic sense to sense the rider’s movement and guide the vehicle. According to the Web site, origin.ww.segway.com, the gyroscopic sensor measures the rider’s sense of ‘‘intensity about 30 times each sec- ond. When the rider leans forward or back- ward, the motor and the vehicle do the same. Segways are now being tested for a six-month trial from the Department of Public Safety to evaluate its use as a police vehicle. Lee Newell, campus police officer and the primary Segway driver, “We have a a trial basis to see if we like it, whether we have a use for it or whether it’s just a fad,” said Newell. Newell is theprimary operator of the Segway for experimental purposes.

Newell said the Segway is a fairly common mode of police transportation in larger cities, where the vehicle can navigate the crowded side- walk of downtown areas or the backwaters of sur- rounding areas. The Segway controlled car does not do it in such a seamless way.

“Segways are good for police work primarily for campus patrol.”

It’s great for routine patrol,” Newell said, “but it’s not ideal for the speed department.”

Newell has stopped motor traffic in the lin- es of traffic, but there are still times when the Segway is too slow to chase down and pull over a driver. “A bicycle can outrun it,” he said.

The Segway’s speed is controlled by a series of keys, such as selecting a top speed. The maximum speed is about 16 mph, but it is generally slower.

One thing for which the Segway is not made is extreme Segwaying.

Chemistry student finds formula for college degree

by Tad King, Opinion writer

Grant Carver never planned to study chemistry, but he did graduate with an associate’s degree in chemistry at the University of Idaho.

Carver, a 29-year-old father of two, was born in Richland, Wash., began his college career in an unusual manner.

“I actually dropped out of high school, which leads to do people,” he says.

Carver says he did not enjoy his high school chemistry classes but had a problem with the teacher. He matriculated to California Baptist College in Palm, Wash. Because Carver was attending college, high school did not matter anymore.

“My high school gave me a diploma when I turned in all my school books,” he says.

Carver continued to attend CBC but did not originally study chemistry. He was inspired by Karen Grant, a regular cus- tomer at the restaurant where he worked during high school and college. She was a chemistry teacher at CBC.

“The told us to take a chemistry class, and I did,” he says.

Carver began to study chemistry with a minor in biology.

Soon after Carver was admitted to the brotherhood research center at CBC and applied to the on-site research of the Pacific Northwest National Laboratory in Richland.

“I got to really jump in my freshmen and sophomore years of school to see if research was really nice.”

In the first semester, Carver worked primarily at CBC, and a master’s research assistant at the laboratory taught him and worked with Carver. He says it was clear Carver had an enthusiasm for chemistry.

Despite the occasional confounding of Carver, he put the majority of his effort in learning the chemistry we were doing and the chemistry class.

Jane of all trades: General studies major searches for ways to utilize diverse knowledge

by Nate Topper, Opinion writer

Unlike many of her fellow graduates, Patricia Stevenson honestly has no idea what she will do after commencement.

“Majors don’t have to know what they want to do,” she says. “It doesn’t make sense. I don’t see how you can have a major without having a plan.”

She says she’s just insistent she knows what she wants to do.

“I’ve been a communication major,” she says. She went on to explain the degree she’s been pursuing.

“I’ve been in social work, too,” she says.

She’s not concerned that she’s done and got her diploma. They’re pretty supportive,” Stevenson’s husband, who has plenty of suggestions for her future plans:

“I think she could do something where she’d be helping people,” says Christian Rainahl, Stevenson’s roommate. “She’s a good listener and willing to help people out if they need it.”

WhitneySolan. Whatever ends up she’s still there.

“She’s really smart and really a caring person,” Bethany Greggs says. She would be great in counseling. She’s also exploring teaching abroad, which would be good because she really enjoys traveling.”

George Stevens, dean of the College of Science and Mathematics, in many ways.

“She went away to college as a women’s studies major in chemistry and农田—

“She got us a student in every one of our degrees,” he says.

Permitting her degree, Stevenson splits

STEVENDEN, see Page 5

Steve says a law enforcement officer’s work never ends.

If they are going to have a good time, they have to be aware of their surroundings,” says police officer Sid Newell.

Newell, who has been in the force for 17 years, has no plans to retire.

“I am going to be a police officer for the rest of my life,” he says.

Newell says he enjoys the variety of work.

“We get a lot of different cases that we’re going to have to deal with,” he says.

One day, Newell was a police officer.

“arrested a man,” he says.

Newell says he enjoys the variety of work.

“We get a lot of different cases that we’re going to have to deal with,” he says.

One day, Newell was a police officer.

“arrested a man,” he says.

Gary Schroeder Fights for the University of Idaho

It's a new environment in our state. Our state and local economies depend on quality education, and the future is bright for the University of Idaho.

—Gary Schroeder, President, University of Idaho

The Facts:

1. Idaho AIDS/HIV Awareness Campaign: A new AIDS/HIV awareness campaign is helping to improve Idaho's results in the nation's battle against AIDS among Idaho's youth. The campaign is a joint effort between the Idaho Department of Health and Welfare and the University of Idaho. It is important that all students and staff members participate in this campaign to help stop the spread of AIDS.

2. Idaho University of Transportation: The University of Transportation is a national leader in transportation education and research. The university offers a wide range of transportation-related programs, including civil engineering, transportation management, and transportation policy. The university also conducts transportation research on a variety of topics, such as traffic safety, transportation economics, and transportation planning.

3. Idaho University of Public Administration: The University of Public Administration is a national leader in public administration education and research. The university offers a wide range of public administration-related programs, including public administration, public policy, and public finance. The university also conducts public administration research on a variety of topics, such as state and local government, public management, and public policy.

4. Idaho University of Education: The University of Education is a national leader in education education and research. The university offers a wide range of education-related programs, including education administration, educational psychology, and educational technology. The university also conducts education research on a variety of topics, such as teacher education, educational leadership, and educational technology.

5. Idaho University of Business: The University of Business is a national leader in business education and research. The university offers a wide range of business-related programs, including accounting, finance, and marketing. The university also conducts business research on a variety of topics, such as entrepreneurship, business ethics, and international business.

6. Idaho University of Law: The University of Law is a national leader in law education and research. The university offers a wide range of law-related programs, including law and economics, law and technology, and law and society. The university also conducts law research on a variety of topics, such as legal ethics, legal history, and legal theory.

7. Idaho University of Social Sciences: The University of Social Sciences is a national leader in social sciences education and research. The university offers a wide range of social sciences-related programs, including anthropology, sociology, and psychology. The university also conducts social sciences research on a variety of topics, such as cultural diversity, social inequality, and social policy.
Peace Corps gives real-life experience, new perspectives

By L. CLIFTON RUSSELL

One option for UI graduates in their last year or two of school is the Peace Corps, which was the most life-altering experience for Smith, who had already worked in international development. "It was the most enriching experience," Smith said. "It changed her in a way that I guess other people value too, but it made her feel like she had a new purpose." 

Smith, a 32-year-old woman from Des Moines, Iowa, is currently serving as a Peace Corps Volunteer in Nigeria. 

I asked Smith what she said to people when they asked about her Peace Corps experience. 

"I thought to tell the truth, but I'm not sure if you're interested," she said. "It's not a story that people want to hear." 

When asked about the most valuable skill she learned in her Peace Corps service, she said, "I learned to be a hierarchical by American standards and it was a hardship, but I wouldn't trade it for the world." 

Leigh Ann Smith, a 26-year-old woman from Des Moines, Iowa, is currently serving as a Peace Corps Volunteer in Nigeria. 

I asked Smith what she said to people when they asked about her Peace Corps experience.

By consolidating your student loans with SLCC you can keep more of your money each month and reduce your interest rate at the same time.

Did you know you will pay more in interest when you consolidate eligible student loans through the Federal Direct Consolidation Program compared to consolidating with the Student Loan Consolidation Center (SLCC)?

It's true. You don't have to pay more in interest because SLCC offers some of the best borrower benefits in the industry.

By consolidating with SLCC you can keep more of your money each month and reduce your interest rate at the same time.

If you are graduating this year please call the SLCC toll-free number at 800-864-7053 and we will help you PAY LESS now.

PARK

From Page 1

"I think everybody that’s able for a couple hours has tried something silly on it," Newell said. "It doesn’t do well at that.

The Segway also drives well on gravel or pavements, which recently set a new record for longest distance driven without stopping at 124 km (77 miles) with the value $6,400 for a Segway? In an appropriate segment, unfortunately, he did not ask.

Newell said the Segway has many advantages and disadvantages. The advantages include being able to drive on sidewalks, which is 100 percent legal, and it has a range of 25 to 30 miles with no recharging required. The disadvantages include insufficient safety, because Segways do not have a separate barrier for the opponent, and the fact that the Segway has only been on the market three weeks.

RELIGION

From Page 1

"To start the discussion, Reverend Dangerfield, deacon of the College of Missionaries and Representative is a member of the Church of Jesus Christ of Latter-day Saints. He explained that because of the LDS faith he was conducted by the Church and that he was ordained at first a priest and then a bishop in the LDS church. He said that for missionaries to have faith to the American rebels in their religious teachings, but in order to appreciate the diversity of different religious traditions, they are attempting more and more to be open people, to challenge the world and to explore the American society."

"It is important to study the literature about the culture in which the LDS faith is practiced. The LDS faith is missionary and is conducted by the Church. It is important to have faith to the American rebels in their religious teachings, but in order to appreciate the diversity of different religious traditions, they are attempting more and more to be open people, to challenge the world and to explore the American society."

Campus issues will not disappear easily

JESSICA HATHAWAY

I have been a 12-year reporter for the student newspaper, and I'm afraid to say that the level of student involvement in campus issues has not changed significantly. As a new student, I attended a junior college in my home state, and I learned that living away from home was different from what I would have thought. My first year, I learned that I had to adapt to a new environment, but I also learned to appreciate the community around me. Thank you to all of the students who have helped me over the years.

The third year, I learned that sometimes you want to be in a place where you will learn the most. Thank you, UI.

During that semester, I learned to URBAN DRIVE./.

Thank you, UI.

Spring marks 27th season of Farmers Market

By JONATHAN KOPPEL

Community members who want to be a part of the movement toward local, sustainable food production are invited to participate in the market at the Moscow City Farmers Market, which is now open for its 27th season.

The Farmers Market, now in its 27th season, goes from 8 a.m. open every Saturday through September. The market offers up to 80 vendors and is located in downtown Moscow.

Downtown Moscow was once the site of Moscow's Art Commission, and the market serves as a location for vendors and farmers from surrounding areas who want to sell their goods.

Those who want to participate should contact the market by emailing farmersmarket@uiw.uidaho.edu or by calling 208-885-7030.

There will be more than 80 vendors in attendance over the summer. Around 60 percent of the market is dedicated to food, with the rest providing a space for vendors to show off their goods.

Del gets ‘Funkee’ in the SUB

By DANIEL BICKLEY / ARGONAUT

As a town of its time, Moscow is culturally rich. It seems that there is a little something for everyone in town, and no better example of this than the Moscow’s Spring and Fall Festivals, held at the Moscow Theater.

For example, one thing that made the concert great was the way the actors interacted with the audience. Even in the opening act, Ratcliff and the performers provided a lively atmosphere.

Del’s reputation as a great showman, however, comes from the fact that Del is a one-man show. The performer is always dressed in a suit and tie, and his show is a well-attended event.

But Del is not the only one to perform at the SUB. Many other performers, including some of the top names in the business, have appeared at the SUB.

For example, recent performances have included Marvin Mclntyre, one of the top names in the business, and Del’s own son, who is also a well-known performer.

On tour with Del in his first-ever Moscow appearance was the actor and comedian Zachary Levi, who has appeared in several films and TV shows.

“Del is a great performer and a wonderful person,” said a fellow performer who has appeared with Del. “He is a true professional and always brings his A-game.”

Director hopes UI production begins rise in community interest

By BILL McDEVITT

The UI Department of Theatre and Dance will host its annual Summer Stock Festival on Tuesday, July 8, to stage management to the technical and performance students.

The play, "The Rise and Fall of Destin" by Eric Metzger, is a showcase production and provides a unique opportunity for the students to perform in a large-scale setting.

The play is about a young named Donal Ketchup who can fly but does not fit in with his peers. As he gets older he becomes more and more successful, but he still does not fit in with his peers.

The play was written by Peter Metzger, who also wrote the script for "Other House Rules." Originally the play was written for the mainstage "The Shubert Brothers," but at some point in time the play was transformed into a television series and has been performed countless times.

"The main theme of the play is that doesn’t change no matter who you are," said Bill McDevitt, director of the play.

"It was looking for a play that people could relate to and that didn’t have that cheesy slasher," he said.

Dee, Del's wife, who was the director of the play, said that the show was a huge success and that it was a great way to showcase the talent of the students.

"The show was a huge success and that it was a great way to showcase the talent of the students," she said.

"I was a shy kid alone in a class," he says.

“Brown says, "Because of the show that he had auditioned and performed in more than 30 productions. Brown is a member of the show’s casts and says, "It’s called ‘A Fairly Certain’ Yesterdays’.”

Teaming with Vandal pride

BY NATHAN JERKE
SOUTHWEST IDAHO

Overall, it was a normal year in Moscow. There were no national champions, no big headlines, and no huge surprises in what happened on the field or on the court. For the most part, that is.

While there were no headlines about University of Idaho athletics that grabbed national attention, there was more than enough excitement to keep the Vandal athletics world focused on campus, causing a stir on the field and in the community.

There were a few small occurrences: the volleyball team making its first NCAA tournament appearance in 10 years; women's basketball starting the year by winning 13 of 14 games, and transfer Emily Faurholt leading the nation in scoring; the men's basketball team winning its first post-season game since UI's 1996 move to the Big West; and newly appointed football coach Nick Holt arriving on campus, causing a stir in Vandal athletics not seen since the Humanitarian Bowl win in 1998.

While this is just a taste of what happened at UI this year, the fact of the matter is that the Vandals have not had a year this good since most people on campus began their schooling.

Even though there aren't a lot of All-American athletes at UI, and rarely do the Vandals make it into a SportsCenter highlight reel, there is still a sense of pride with those that wear the gold and black.

And even after a year of ups and downs in virtually every sport, the awareness that many UI fans and students know is that Vandal athletics is in an ever-evolving rotation, and now, after a few years away from the limelight, the home team is once again on the rise.

Women's mountain bike clinic takes place May 23

The Polecat-Clearwater Environmental Institute is offering a women's mountain bike clinic this Sun. from 10 a.m. to 2 p.m. Local experts will teach basic biking skills, including braking and turning, trail bike etiquette and strategies, and introduce mountain biking equipment. The clinic will also cover safety techniques such as scouting, cornering, body position, and hill climbing. After the clinic, the group will ride as a race—races are free for the beginner and intermediate levels.

Registration forms are available at Blue Mountain Sports & Fitness or by calling primarily @ 844-3-Riding or e-mailing hugh@clearwater-ei.org.

Thunder game starts earlier than usual

The Pelicans Thunder game against the Tri City Thunder will begin at 3 p.m. instead of the regular 2 p.m. start.

Track approaches end of season with confidence

By Jane Rubles

As the University of Idaho track team's season comes to a close, there are two months remaining to qualify for people for the NCAA Championships in the Mountain West Conference, Outdoor and the Big West Championships. Beginning Wednesday in Irvine, Calif., the coach of the university's team, Wayne Phillips, said he thinks the women's team should be the favorites to win the conference and the men's team—if it performs well—could also win the conference this year.

"We are looking at the conference title on the women's side, we score a bit of a point on the conference title on the men's side that we need to maintain that sort of level," Phillips said. "On the men's side I think we will come down to a few key spots—so we are working on doing ... if we can perform well in the sprint and put myself in a great position as well."

Some of the key women's performers include Leitner Manohar, who at one point had the world's best steeplechase time of 8 minutes and 22 seconds, and Kori Gowman, who is ranked second in the steeplechase with a time of 9 minutes and 15 seconds.

"I know that we would have a chance to be in a conference title," Wayne Phillips or Coach of Men's

"If we have a chance to be in the conference title, I think we have a chance to win the conference title," Phillips said. "As a group, we have performed very well this year, we did our best to put ourselves in a position to win the conference title."

The men's team is led by Jon Falon, who is ranked sixth in the nation in the mile and was fourth in the conference. Falon said he has a good chance to win the title at the regional level.

Other key performers on the men's team include therapist (his name) and (his name), who is ranked second in the steeplechase, behind (his name) and (his name), who is ranked first. Falon said he has a good chance to win the conference title.

"I think the team is looking for a title," Phillips said. "The team is looking for a title this week in the depth of the team, we have a good chance to win the title."

Midwest to Moscow: Women's tennis player makes transition, utilizes military training

by Kei Torres

Moving halfway across the world and leaving family and friends, Lucy Leopold, who comes from Kansas, is doing just that, but there are other factors as well that sent her on her current path.

Lucy Leopold, who comes from Kansas, is doing just that, but there are other factors as well that sent her on her current path.

Leopold, moving at the full tide of the tennis scholarship she spent three years as a sophomore, left her former school, the University of Iowa, in January. Despite the fact that it isn't far from her hometown of Battle Lake, Minn., Leopold said she was thrilled to be out of the small town and small-school appeal.

However, her transition to Moscow is far from easy for the young tennis star who will try to adjust to the change in training facilities and available resources.

Before deciding to continue her tennis career in the USSR, Leopold enjoyed running the tennis club in the small town. She said she was told by several sources that she would be able to continue in Moscow, but she made the decision to join the Israeli Army.

Leopold said that in the past two months she has been a combat physical at a military training camp near Moscow.

Lucy Leopold

After school is expected. The girls are required to spend two years and the boys three years.

You get paid, but it's very small amount," she said. "Basically it's just a means of getting money."

Leopold, who has been playing tennis since she was a child, uses US as a great base to continue and improve on her game at the age of 17, that's one of the factors she is looking forward to. She also plans to keep on going home for good goes always around.

Lucy Leopold

Though she had been away from my family and the city, she was happy to be in Moscow.

"Once I was there with the best tennis player in the world," she said. "I never felt like I did."

When all are over, she doesn't want to go home. She wants to stay in Moscow.

The style of tennis and the social scene have changed as well.

The main goal of Lucy Leopold is to enjoy the tennis and the culture of Moscow.

"It's a lot of fun," she said. "I can't wait to go again!"

Lucy Leopold

According to her, the best thing about Moscow is to enjoy the tennis and the culture.

"It's a lot of fun," she said. "I can't wait to go again!"

Lucy Leopold

Despite the best and worst, the Voldans fight on

by Edward Skolnick

The death of a loved one is a difficult experience for anyone, but when that loved one is a professional athlete, the impact can be even more devastating.

Orlando, Fla. (KRT) — In the 1990s, the Florida Gators were known for their intense, physical style of play. Now, in the 21st century, the University of Miami is trying to capture the same success on the court.

The team, led by Former Gators head coach Jon Barry, has a 11-8 record this season and is currently ranked 16th in the nation.

Coach Barry said he was pleased with the way his team has performed so far this season. "We've had some ups and downs, but overall, I think we're doing pretty well," he said.

Barry added that he was happy to see the team come together as a unit, despite the recent death of one of its members.

"I know that this has been tough for everyone," Barry said. "But I'm proud of the way the team has handled it, and I'm confident that we can keep playing at a high level no matter what happens.

Many athletes enter era of rarefied hair

by Ernest Skolnick

The end of a relationship often marks the beginning of a new chapter in a person's life. For former Saskatchewan Roughriders quarterback Darian Durant, the end of his marriage and the beginning of a new era have coincided with a significant change in his appearance.

Durant, who is currently playing for the Saskatchewan Roughriders, revealed in a recent interview that he has recently started growing his hair longer, a move that has earned him the nickname "Lionheart." This change in style has been met with both praise and criticism from fans and media alike, but Durant remains committed to his new look.

"I've always been a bit of a rebel," Durant said. "I've never really cared what people thought about me, so why start now?"

Durant's new hairstyle has also had a positive impact on his performance on the field. "I feel like I'm playing better since I started growing my hair," he said. "It's like a new me."
Viagra, murder, tears — the year in sports

Vienna Dekin. He knows his basketball, but for the love of all creation please jump off the Duke bandwagon.

Chicago White Sox manager Oto Atmajian. That would be an attempt at a sniping shot on the part of the racist humorist. Of course, George Steinbrenner or any other owner would have been equally as likely to make a comment of that nature.

Brian Moorman. One of the most prolific in-season runners in the NFL may well be the running back of the Denver Broncos. Questioning Father Min Le is his way of saying he's ready to replace my Mrs. and be the one expecting my gals.

Topic No. 2: Ochocinco. What are the three most exciting things about Versal for the 2003-04 school year?

Because this is not a story of murder, the question is not for comment here.

Question: The women's basketball team finished with a record of 22-7, the men's team was 12-14. What's the story here?

No. 4: Flared use in basketball has been a big issue this past year.

Question: No, it's not a problem. The majority of players are taking it seriously. Even the school players who were only taking it to be able to stay in good academic standing.

That's why we're not seeing so many players improving, which is why the competitiveness of basketball.

See page 6.

Book shows how Ichiro's father played major role

By LINDA BONE

SEATTLE (SEP) — Robert Whiting, the leading American expert on Japanese baseball, has published a book about the most astoundingly driven Ichiro Suzuki, which is destined to become one of the classic baseball columns. "He's gonna be the man, and he's gonna be a very great baseball player." The Mainichi Shimbun, a newspaper published in Japan, characterized the book as "a great contribution to the study of baseball, a great contribution to the study of man, and a great contribution to the study of a great baseball player." Ichiro Suzuki is a right-handed batter, a left-handed pitcher, and a first baseman. He was born in 1969 in the city of Chiba, Japan. Ichiro has played baseball his entire life and has been an icon in Japanese baseball for over a decade. He is the first and only Japanese player to be named the Most Valuable Player in Major League Baseball, and he is one of only a handful of players to be named the National League Player of the Year. He is also the first Japanese player to win the Gold Glove Award for his exceptional defensive play.

In the interview Whiting talks about Ichiro's journey to the United States, his adaptation to the lifestyle of America, and his eventual domination of the Major Leagues. "Ichiro is a unique player, and his influence on baseball in Japan cannot be overstated. His playing style, his approach to individual games, and his relationship with the media have all contributed to his success. Ichiro is not only a great baseball player, but also a role model for young Japanese athletes." Ichiro's story is one of perseverance and hard work. "He has worked hard to be the best player he can be, and he has never lost sight of his goal. His dedication and determination are inspiring to all young athletes." Ichiro's story is also one of cultural exchange. "Ichiro has brought Japanese culture to the United States, and he has helped to bridge the gap between Japan and America. His influence on baseball has been significant, and his legacy will be felt for generations to come. Ichiro is a true American hero, and he will be remembered for his contributions to baseball and Japan." Ichiro Suzuki is a true American hero, and his influence on baseball will be felt for generations to come. He is a role model for young athletes, and his story of perseverance and hard work will inspire all who hear it.

GRADUATING
Spring 2004
## CONGRATULATIONS 2004 GRADUATES

### UI Class of 2004

**Megan Michalak**
We love your smile and the joy you give us everyday, we are so proud of you!
Love you, Mom, Dad & Markey

**Jana Leachman**
From candy corn to the world, you've always discovered the exciting things in life.
Love, Mom & Dad

**Kyle Blake Larson**
We're so proud of you! Now you're ready to take on the world!
Love, Mom & Dad

### UI Class of 2004

**Curtis William King**
Congratulations Son - we are so proud of you! Go get 'em Bud!
Love, Mom, Dad, Marsha and The Gang

**Amy Rebekah Hollenback**
Always the dreamer! We are so proud of you and all your accomplishments!
Love you, Mom, Alan & David

**Kate (KoYo) York**
Off to College try to achieve get a diploma before they ask you to leave!
Love you lots, Mom, Dad, Andrea & Tyler

### UI Class of 2004

**Meredith Nicole Csencsits**
You fill my heart with joy, pride, laughter and love. You'll always be my Merbear!
Love you lots, Mom

**Amy Renee Roe**
Congratulations! You did it! We're very proud of you and love you very much!
Love, Mom, Dad, Jerry, Cathy, Ashton and Grandma

**Erin Marie Foye**
You've traveled far and studied hard. The future is yours to take.
We love and support you, Mom & Dad

### UI Class of 2004

**Ann Palmer Brough**
Preschool through college, you always made the grade. Congratulations! Bear to high places Alaska girl.
Love you the most, Mom and Dad

**Bethany McMillan**
Never caught lying down on the job, you deserve a rent for a job well done!
-Your Ever-Lovin' Family

**Daniel George Jensen**
Congratulations on a job well done! We are all very proud of you Dan,
Your Family, Mom, Dad, Scott and Jeff

### UI Class of 2004

**Nolana Rapozo**
Congratulations on reaching an important milestone. Life is now in session.
All our love, Mom & Kurt

**Angela Ralene Vold**
Look out world, here she came! There isn't anything you can't do and we're looking forward to watching your accomplishments.
Love you, Mom & Dad

**Anna Christine Henson**
Wherever she leads, they will follow.
Love, Mom & Dad
The Computer Science Department would like to congratulate their Spring-Summer 2004 graduates:

Bachelor of Science

David Andari
Danny Browning
Gale Smith
Shana Cornhall
Christopher Carra
Emuel Atchley
Michael Holdren

Jale Berry
Edward Flowers
James Colburn
Mark Graham
Wayne Boyer
