To beat summer's high gas prices, use common sense: conserve gas and avoid scams.

**By Gary Allred**

It's summertime in Moscow, and so are gas prices. But as students look for ways to improve their gas mileage, they should be on the lookout for gas scams to avoid.

**Typical schemes offered by gas stations**

- **Hot car sales**
  - Low price
  - Special offers
- **Gas cards**
  - Discounted or free
- **Gas stations with no cash**
  - Only card payments
- **Gas stations with no gas**
  - Empty pumps
  - No gas in the tank
- **Gas stations with no service**
  - No mechanics
  - No repair
- **Gas stations with no customers**
  - Empty stores
  - No people

To avoid these scams, use common sense: conserve gas and avoid scams.
Restaurant smoking ban takes away citizens' right to choose

A s of July 1 Idaho restaurants have gone smoke-free. This could be considered a monumental step forward for the health of the nation. Finally, we finally wipe out the problem of second-hand smoke for otherwise healthy individuals. It could have been these things, had it been done properly.

The issue here is not whether or not the smoking takes place; it's that smokers want to smoke by their own free will. They are not thinking about what's in the best interest of all. The whole point of having a place where private business owners had the option of making their restaurants non-smoking.

People, both smokers and non, also had the choice. If they were bothered by the smoking, they could choose to go to another restaurant. Simple choice.

Taking away the freedom to choose is never the smoker's to decide. A simple generalizing away of the practice without definite assurance of their places in the world is very well to go on in an issue that is far more concerning to the individual.

The country has any other issue (like B-rated television, for example), violations of the law and the lives of others.

Unfortunately, smoke — rather impossibly — clouded this solid ground.

The distance of the practice, while still standing, is to point out to the non-smokers that they are glorified to do so. We have been through this with the non-smokers and they are the citizens of the realm of the non-smoker.

Every single

But this is certainly not the case. There are many restaurants, even before the ban, that were smoke-free. The businesses are acting in the best interest of all the citizens.

If there is no law that clear-cut for non-smokers as to the threat of second-hand smoke, then is that the area that should be addressed. Inform the masses with campaigns that accurately portray the hazards of smoking in restaurants.

When politicians skip this important process and immediately take action for the people, it seems to us. One may agree with the smoking ban, but the next time the legislative decree decided to act without giving the public a chance to voice their concerns, it could be very well to see an issue that is far more concerning to the individual.

For the lack of education for non-smokers as to the threat of second-hand smoke, then is that the area that should be addressed. Inform the masses with campaigns that accurately portray the hazards of smoking in restaurants.

Warped Tour will bring punk rock to the Gorge

Lollapalooza canceled due to poor ticket sales

Lollapalooza, one of the original "alternative music" festi- 
wals, has canceled its entire schedule of events scheduled for 
this year because of financial problems. The "alternative music" festi- 
wal has not only become of super success since its creation 10 years 
ago, but also because it was the first "alternative music" festi- 
wal to grab a major network television audience.

The tour will now be 
opened by Perry Farrell, 
Jane's Addiction and the 
tour's last name, a band 
that has grown from a seve- 
rance band to arena- 
size headliner status.

Warped Tour is a nation- 
wide music tour for 
"alternative music" bands. 
The tour features bands from the 
interior, as well as bands from 
the east and west coast. 
Warped Tour has 
been around for a few years. 
The tour is known for its 
non-stop shows, and 
the bands that perform on the tour. 
Warped Tour is a 
very popular tour for fans of 
alternative music.
