Don't rain on their parade

Local veterans continue observances year-round

Veterans Day ceremonies around the country may have come and gone, but local veterans aren't about to take down the flags just yet.

Several veterans' organizations in the Moscow area still have many activities to carry out over the next year. One group, the American Legion, announced this week that its post was established in 1931 and has about 125 members.

"We're pretty much what we are," said Meyer, a local veteran. "To be a member you have to have fought overseas during some point in its service, even if you only served for 3 days to 50 years, so we have members who are from all walks of life."

Meyer said the VFW group in Moscow is fairly active, giving out scholarships and working to keep young men interested in local schools. Having its Fourth of July parade, and providing a van that runs between the veteran's home in Lewiston and the veteran's hospital in Spokane.

"About anything that has to do with veterans we end up pretty much getting involved," Meyer said.

Pitcher said the group held a luncheon last month at the historic Tamarack Hotel and later visited the Moscow's chapter of the American Legion, an organization founded in Moscow in 1912 after the local chapter was established.

Michael Hussey, a 25-year veteran of the U.S. Army and Pitcher's stepson, said his father has been a member of several organizations and has been involved in a lot of activities and sponsors community activities such as local and state competitions, local sparky meals, basketball games, food drives and also helps the veteran's home and hospital.

Hussey said one of the services the legion provides for veterans is the awarding of military honor medals to veterans, even if the veteran is no longer alive.

ACCUSED MURDERER ARRIVES IN LATALLA COUNTY

James White is arraigned on the murder charges.

VETERANS, see Page 3

Accused murderer arrives in Latalla County

James White is arraigned on the murder charges.

The murder indictment alleges Riggles killed the murder and asked the Riggles to help him dispose of the body. Riggles was convicted of first-degree murder.

In another development, Latalla County Prosecutor Jim McKee announced that he has filed a motion to dismiss the charges against Riggles.

McKee said the motion to dismiss is the result of a defense motion filed by Riggles' attorneys, who are seeking to have the charges against Riggles dismissed.

The motion is scheduled to be heard in court on November 28th at 10:00 a.m.

The murder charges were filed against Riggles in connection with the death of James White, who was found dead in his car in the parking lot of a local restaurant.

In a press release issued by the Latalla County Sheriff's Office, the sheriff said that White was found with a single gunshot wound to the head.

The sheriff said that investigators believe the killing was related to a previous dispute between White and Riggles.

White reportedly told police that he had been threatened by Riggles in the past and that Riggles had been following him.

Police said that they believe Riggles had been stalking White for several months prior to the murder.

The investigation is ongoing and police are continuing to search for Riggles in connection with the murder.

Congressmen discuss future of U.S. programs

BY JACOB MURPHY

Further Congressman Jim Sladey, Calif., and Orval Hallman, Wash., offered a State of the Union address at the United States Capitol on Tuesday, with a focus on issues that they believe are critical to the future of the country.

Sladey, a Democrat representing California's 3rd District, said the nation is facing a number of challenges, including budget deficits, the war in Iraq, and the need for economic growth.

"The federal budget deficit has grown to an unsustainable level," Sladey said. "We cannot continue to spend more than we take in, and we must take steps to reduce the deficit in order to ensure the health of our economy and our future." 

Hallman, a Republican representing Washington's 9th District, said the nation is facing a number of challenges, including the need to modernize the military and to improve the nation's infrastructure.

"We must ensure that our military is prepared to defend the nation," Hallman said. "But we must also invest in our infrastructure, so that our communities can thrive and our economy can grow."
ASUI deserves a vote

Section Day has come and gone, and after a brief period of hype and excitement, ASUI leaders have been forced to address the issue of student interest. ASUI elections serve as the primary forum for student input and expression, but this year, the interest among students for the ASUI elections has been notably low.

The elections have been a source of controversy for years, and the low interest this year is likely due to the lack of meaningful candidates. While ASUI has traditionally been a bastion of student advocacy, the candidates for this year's elections have not lived up to expectations. The candidates have been unenthusiastic, and the campaigns have been lackluster, resulting in a lack of student engagement.

ASUI serves an important role in the University of Idaho community, providing a platform for students to voice their opinions and advocate for their interests. However, the lack of student interest in the elections is concerning, as it undermines the effectiveness of the ASUI system.

The ASUI elections are a critical opportunity for students to participate in the decision-making process and influence the direction of the university. If students remain disengaged, the university may lose the voice of the student body, which is essential for a healthy and vibrant campus community.

In conclusion, the lack of student interest in the ASUI elections is a cause for concern. ASUI leaders must take steps to address this issue and encourage student participation. This can be achieved through creative campaigning, engaging candidates, and fostering a sense of community among students. Only through active participation can ASUI continue to serve as a voice for the student body and a platform for their ideas and concerns.
Send Idaho football back to where it belongs, the Big Sky

Death Cab strums the hearts of listeners

by Christine Vesper

The last time I saw Death Cab for Cutie back in 2001, I only knew the name. By the time the band performed at the University of Idaho’s sits &UB Productions, the indie-rock band from Bellingham, Wash., was a household name in my tiny college town. The stage filled with warm, bright lights and the audience hummed along with the opening track, "Alloll." The band’s first show in Idaho was sold out, leaving me and many others to wait for the encore. But the encore never happened and the band’s reception in 1999, the members have now a long way with their unique, sensitive sound and intimate lyrics.

In the ensuing years, the band has not lost its passion for music, and has perfected the art of relating to each listener. Even at a performance at the FivePoint Amphitheater in 2003, Death Cab for Cutie’s fans chanted along with the opening track, "The New Year," which was one of the band’s most successful songs.

The timeline of those rising stars and their music provides a powerful lesson to those who graduated.

With casual dress consisting of baggy pants, the band members dispersed across the stage and opened with the song "New Year's," an aerial piece that alternates between fast-paced and emotive vocals.

The song was the first track on Death Cab for Cutie’s new album, "Transatlanticism.

The band’s persona eventually emerged and grew of Death Cab’s contagious and influencing sound. Simple lyrics like "In the New Year/Death has lost different" preceded wide when sung as The New Year's album.

Aptly named for a popular band, "The New Year's" was a triumphant performance that left fans wanting more.

Death Cab’s performance was exploding with energy and sounded as clear as if it were recorded.

The sound level was just right. The amps did not distort on each instrument’s aesthetic and characteristic sound, which was perfect for Death Cab’s live shows.

As the band finished their set, the crowd burst into applause, cheering for the members who had just played their hearts out on stage.

After the concert, the band performed a brief set and walked off stage, with a feeling of excitement and accomplishment.

The concert was a testament to the band’s passion for music and their ability to connect with fans.

Death Cab for Cutie’s music is a true reflection of life, with each song telling a different story. Their performances are a journey into the depths of emotions and moments that are shared with fans.

For more information or to learn more about Death Cab for Cutie, visit their official website.

Eight blackbird returns to University Auditorium

by Jon Rose

The last time eight blackbird was in town, the band was on the road and couldn’t make it to the show. That was no problem, as the band’s music was on full display in the latest trailer for their upcoming album, "Recess." The album has been highly anticipated by fans, and the trailer has confirmed that the band is once again releasing music.

The trailer shows the band performing in a variety of locations, from dark rooms to outdoor venues. The music is energetic and full of emotion, and fans are excited to hear more of what the band has in store.

The band’s music is a perfect mix of indie-rock and electronic, with a focus on catchy hooks and memorable lyrics. Their live shows are a must-see for anyone who appreciates a good performance.

Eight blackbird’s return to town is sure to be a hit, and fans are eagerly awaiting their performance at the University Auditorium.

For more information on the band or to purchase tickets, visit their official website.

Women’s cross country makes history

BY AMANDA STEANE
SPORTS STAFF

The University of Idaho women’s cross country team wins the first Big Sky Conference title in program history. The Vandals won the women’s cross country meet at the Big Sky Conference Championships on Oct. 27. The team finished 1st out of 6 teams, with Troels Thoelke, who finished first, being the highest finisher for the Vandals.

Troels Thoelke said, “It was very emotional and exciting. It’s a goal that we’ve been working towards for a long time. We’ve had some moments out of the top ten, but we never really put it all together. Today, everyone stepped up and ran their best.”

Coach Wayne Philips said that the team’s performance was a result of hard work and preparation throughout the season. “We’ve been training hard and pushing each other to improve. Today, it paid off.”

The Vandals will now advance to the NCAA West Regionals, where they hope to continue their success. "We’re excited to see what we can do at the next level. We’ve worked hard all season and we’re ready to compete.” Coach Philips said.

The Vandals are on a five-game win streak, which has brought them closer to a potential conference championship. "We’re working hard to secure our place in the conference finals. The team is strong, and we’re confident in our ability to perform well.”

The Vandals will be looking to continue their winning streak and solidify their position in the conference rankings. "We have a lot of potential, and we’re excited to see what we can do in the upcoming games.” Coach Philips said.

Volleyball dominates final home game

By SHAWN CAPPELL
SPORTS STAFF

The University of Idaho volleyball team had one of the strongest performances of the season Saturday. The team defeated Oral Roberts University with a score of 3-0. The Vandals went on to win 25-11, 25-15, and 25-15, respectively.

According to Defoor, the two freshmen went well in the game, earning a total of 14 points and 4 blocks. The Vandals were also aggressive and well-balanced, with eight different players scoring points. "We were really strong as a team, and we were able to make good adjustments throughout the game.” Coach Defoor said.

Defoor said the game was a good start to the season, and she expects the team to continue their strong performance. "We’ve had a lot of success this season, and we’re excited to see what we can do in the upcoming games.”

The Vandals will now advance to the National Championships, where they hope to continue their success. "We’re excited to see what we can do at the next level. We’ve worked hard all season and we’re ready to compete.” Coach Defoor said.

The Vandals will be looking to continue their winning streak and solidify their position in the conference rankings. "We have a lot of potential, and we’re excited to see what we can do in the upcoming games.” Coach Defoor said.
Thomas runs over Vandals

Idaho loses final Sun Belt game to North Texas

By Ben Crace-Guido

Despite injuries, penalties and the absence of defensive coordinator Joe Thomas, the nation's leading rusher, the University of Idaho's defense remained intact Saturday and kept the ball out of North Texas' hands as the Vandals moved closer to their homecoming game.

Following the 23-10 victory, Idaho was 5-1, with, including the win over Eastern Washington, 3-1 in the Big Sky. Idaho is back on the road when it travels to Boise State on Friday.

North Texas (2-4) scored three touchdowns in the game, with 1,018 yards rushing, 125 yards passing and five first downs. The Mean Green, who entered the game with a 1-3 record, was led by running back Jason Thomas with 151 yards and two touchdowns.

The Vandals moved up one spot in the 14th week of the season and a new chapter of football rivalry when it faced Hawai'i. The Rainbow Warriors are more the equals of Idaho and have just an average record.

North Texas running back Jason Thomas scored a three-yard touchdown from the one yard line with 9:25 remaining in the second quarter of the game, the first of the four touchdowns scored by the Mean Green. Thomas ran for 107 yards on 16 carries against the Vandals.

SEL Manufacturing Building — 2440 NE Hopkins Court

Friday, November 19 • 4 to 7 p.m.

Come and see why SEL is a worldwide leader in the prevention, monitoring, and control of power systems through quality manufacturing, innovative design, and world-class customer service.

Join us and bring your family! The event will include:

- Looking at the problems that large power systems face. We don’t just sell equipment, we help solve problems.
- The opportunity to meet and interact with the SEL engineering team.
- Working with us is fun. Because we are serious about your career opportunities, we’ll be ready to show you around.
