VESPER SERVICES GREATLY ENJOYED

PROGRAM WAS WELL ARRANGED AND NUMBERS CREDIBLY GIVEN

Under the Direction of Mr. Parmlee Organization Has Bright Future

Sunday afternoon occurred the first of a series of recitals given by the University String Quartet in the auditorium. Perhaps at no time has an audience heard a better program by that quartet than that listened to so attentively and pleasantly appreciated by all. The four instruments harmonized perfectly and produced that balance, tone and color so characteristic of chamber music.

Two centuries ago the term, "Chamber Music" was applied to an ag to during performances in a drawing room of some noble in the gray days of Medievalism when court life flourished.

In more recent times the term is most frequently applied to concerted pieces of instrumental music in the sonata form, a string quartet, quartettes, trios, and the like in which each musician plays a distinct part.

Quarter writing has been carried to its highest point by such composers as Beethoven who composed the first number on the program, three numbers being played from his C Minor composition. Beethoven's later music is deep toned, august and severe but this quartet number was written in earlier life, at a time before the glorious and troubled life of later day had affected his style. Of the three movements played, the Scherzo was perhaps best enjoyed for its playful humor and waltz.

The violin duet played by Mr. Holoday and Mr. Pittinger was enjoyed immensely. Ch. de Beriot's ornamental style and rich embellishments are characteristics of the composer.

The melody and fluent Lieberklang by Joctin Raff, more simple in form, is descriptive of scenes of rural life. It is a series of sketches laid about a country mill, and the movement played, painting a love motive between the mill girl's daughter and her lover, was described in the dialogue between the cella and the first violin.

The concluding number by Karl Ditter von Dittersdorf, the Austrian Violinist, was a Duetter Tana, a simple, graceful, peaceful dance of the eighteenth century.

The recital will be accompanied by the St. John's Organist.

All the quartets and chamber music was performed by the University String Quartet under the direction of Mr. Parmlee and nothing but a year's future can be predicting for the organization. The next appearance of the quartet can not come too soon.

GRAIN GROWERS GO TO COLLEGE

All the grain growers are expected to attend in College Farmers' Week, Jan. 27-30 and especially on Jan. 25. This has been set aside as Field Crop Day. Wheat growing and marketing and the growing of forage crops will occupy prominent places. The maintenance of fertility of the soil cropping the logged-off lands, and the place of live stock on the farms are questions of everyday consideration. Legume inoculation is a problem which has been causing some trouble in parts of Idaho, and this will be dealt with fully.

Prof. N. S. Robb, in charge, will be aided by scientific and practical men. Mr. Stears, a practical farmer at C. A. A. Fisher, farmer superintendent of the Aberdeen Experiment Station; P. P. Peterson, professor of soils, University; O. D. Center, head of the Extension Department, University; Dr. Peterson, bacteriologist, and J. M. Fish, practical farmer, will take active part in the discussions.

The program is calculated to be of value especially to men who grow field crops, but will contain good things for the diversified farmer.

TAKEN FROM THE EDGES, FLY LEAVES, AND TITLE PAGES OF STUDENTS' BOOKS

As Seen In Horace

If there should ever be a flood, back to this book I'd fly. For if the whole world were submerged, this book will still be dry.

In a Chemistry Book

Don't eat this book, little ladde. For it's been handed down from my old daddy.

As Found In "Napian"

Wide as the ocean, deep as a brook, is the knowledge contained within this book.

So I say unto you who would turn its pages:

To learn all this would take you age,

Text In Second Year French

All the people dead who spoke it.

All the dead who wrote it.

Blessed death, they surely earn it.

N. B.—It would not be doing justice to the authors of these little genua to publish their names, as they are withheld. Should any one make a similar discovery some day, by chance or otherwise, we would be glad to publish same free of charge.

THE ELEVENTH ANNUAL MILITARY BALL

The Eleventh Annual Military Ball will be held the 19th of February in the University Gymnasium and promises to be one of the most successful social functions of the school year. The members of the Cadet Battalion will carry out the precedent of appearing at the dance in drill uniform to its fullest extent and the decoration will, if possible, surpass those of last year's Military Ball in excellence.

The selection of the dance has been left to a number of the cadet officers and at a meeting of the cadet officers on January 15th, Commandant's Office, the following committees were agreed upon:

Central Committee—Major Carlson assisted by the chairman of all other committees.

Program and Invitation Committee—Captain Morrison, Lieut. Kretz

FARMERS' UNION PRESIDENT AT UNIVERSITY

L. C. Crow, president Washington-Idaho Farmers' Union, will deliver an address during Farmers' Week, Jan. 25, on Co-operative Buying and Selling.

BURSAR'S OFFICE
Assembly

The College, the Individual, and the State

The assembly program given this week in an empty auditorium presented the year. The University Orchestra gave two numbers, "The Song of the Bonnet on the River Vologa," and a Swedish Procession. The names of the composers were excellent and gave much pleasure to the students and faculty who were attending. The event was successful and energetic enough to attend.

Professor E. M. Bumle of the department of history gave a talk on "The University and the State." He explained that University had most of the students of the nation. He pointed out some of the great events in history and the society. The Renaissance and Reformation, the result of this research, was presented.

Mr. Bumle spoke on the subject. The College, the Individual, and the State. The College would preside in America's life, and his purpose was to show the relationships which exist between them. He showed the relation between the individual and the college. Mr. Bumle's speech was based upon the facts that what the student does for himself in college is the most important thing, not what his college does for him. He must use the own education under the direction of the college, and he is himself the greatest factor in his education. These things the college can do for the student, catch his memories, hand down to him the civilization of the age, and teach him to know the long list of men who have been a message to their fellows. It can teach him Plato, a man of great spirituality, of Jesus of Nazareth, the most radiant figure in all history, of Benedict, who from his holy mountain top put forth that ideal of life which governed men for five hundred years, just as Justinian had governed men for one thousand years before him. It has had a formulation of the Roman Law, and it has been the most saint-like figure among men.

The college can make the student acquainted with Abelard, that great teacher of Paris who first taught students to reason like those in the Holy Land. "Sic et non," who showed too that the function of a University was not only to be the custodian of the truth previously discovered, but to be constantly seeking new truth. The students of Abelard, he said, were the workers and to think is due the Renaissance in Europe; of Luther who gave spiritual emancipation to a world enslaved to the beliefs of the age of faith, just as Abelard had given it intellectual emancipation; of Wordsworth, who taught return to nature; of Emerson, and of our own great Lincoln the college can give you information. These men rule us from their graves, and the mind which does not know them cannot be a truly great mind.

The college can tell us of the different ages the life of the world, that life which is not static but is rather like a mighty river flowing on and on.

It speaks of the age of Athens, and the follies of life of that age is expressed in Greek art and sculpture and drama; of the age of Rome, the age of Cicero, and the age of Philosophy, which is expressed in Gothic architecture, whose lofty spires reveal its spiritual

then for Heavenly things; of the age of the Renaissance when man's minds were filled with controversies concerning the way of salvation from which controversies and religious wars resulted. (We of today smile at the idea of religious wars but are they not inspired by a love as passionate as our wars for trade and territorial expansion?)

The college can tell of the eighteenth century when men had grasped the idea of reason and by it tried to unlock all the doors of life, but were treating life too vast and difficult to be locked within the confines of reason and that science has shared in making the world conscious of new things and new goals.

The college, too, can show in the many complexities of the world today how we are in the process of coming to a better understanding of what our twentieth century is to be, certainly in nothing closer to do so than to share in sharing its destiny. Let us try to do our part in making this the most vital and spiritual of any century.

Your college life gives you the privilege of meeting great teachers, it gives you association with students who are the best, most energetic, most valuable to the people of any group who expect the leaders of tomorrow. If you are of an unwarped na

story of intellectual cultivation.

Moreover, you must have judgment. The arts should not make men traditionalists. They must make thee able to judge, and to decide the merits of what has been done in the past. Only as you develop judgment do you become masters. But you must learn to pass judgment. "The aim of education is to teach people to endure the agonies of unspoken judgment."

The college can help in the development of imagination, which is the development of the power of sympathy, and the first step is to understand the social and political problems of the day. It is important to all of us to understand the social and political problems of the day. It is important to all of us to understand the social and political problems of the day.

The college can make you a man of the future, a man of the world, a man who can understand the social and political problems of the day.

Most important of all the college can make you a great idealist. Someone has said: "In youth a man aspires to build to the moon, and spends his years collecting material, building a wood-

FARMERS' WEEK

Next Monday will mark the opening of Farmers' and Housekeepers' Week at the University under the direction of Prof. Eddings and his associates.

This session, lasting from Monday to Saturday, Jan. 28, will concern itself with practical problems that confront the farmer and housekeeper and is intended to bring these interested or curious in touch with the work being accomplished by the Agricultural College.

Students of the University have a duty to perform while these visits are here. It must be borne in mind that the farmer is the man who pays the most taxes to support and maintain this University, far farming is the major interest of the state. Every student should attend as many lectures as possible, and assist in every way that he can help pay for their University. They need only to know the facts to become more interested and to realize the importance of their University.

ASSEMBLY OF RESOLUTIONS

"To be resolved it is to be argued. Perhaps the most compelling force which led to the great movement of history is the force of resolutions. History is full of examples of great men whose strongest and most winning characters were firmness and resolution. It is a synonym for strength, for you must be resolved in order to be strong. When you are thrown into the current of adversity, you must be resolved.

We see men in all walks of life, who possess inexpressible virtues yet go the fell short of their mark because they lack this quality of being resolved. We see individuals who possess all the natural abilities to become scholars, yet in place of being clasped as they are common placed, they are "the "go" or "they may even be found in the "can't" and "don't" class. Perhaps they may not be softened by your resolutions but they did not have the "hard-bone" to carry them out.

We have again proved that when which inexpressible resolutions are made, perhaps, too, we have realized that our resolutions made ten years ago may be cleared as well as your legislation. This year we will do better. We will reform and do what has been done before.

Have you stepped to think whether this is a good method? In the early days of the university when you accomplished last year it is a good patience. Resolutions are a part of every person's life and as such it is very important. But, have you ever thought that it is a good habit to wear and what can we do to rise to your resolution? Perhaps the incentive was not locked up with enough, and it is a place of speaking by your resolution you feel weakened? It was the case it might be advisable to make resolutions covering shorter periods and at the same time make them more reasonable so they would not tax your will power. What do resolutions mean to you? Are you among those who are as regards when the New Year comes make your resolutions and then forget them as the year resolves?

GONZAGA DEBATE—PREPARATORY MEETING

On Saturday afternoon the trial debate for the purpose of choosing two teams to meet Gonzaga University in debate was held in the auditorium. The question of government ownership and operation of railways was discussed. This question is also to be debated by the University of Oregon, Stanford University, the University of Washington, and the Oregon Agricultural College. It will, therefore, be debated in every part of the Pacific Northwest. It is a very interesting question, and should make the various inter-collegiate debates attractive and helpful to the audiences that hear them discussed.

The six students who are to represent Idaho in debates with Gonzaga on the third Friday in March are all without much experience on the debate platform, but if convinced of its purpose and industry can accomplish victory the outlook is most encouraging.

There will be another trial debate next Saturday afternoon in which another debate team will be chosen, and as much as this team will travel to another state more of the older debaters are waiting for the chance to win places on it. The subject of this second debate is that of railway pooling. The only time we shall have the opportunity of hearing the debaters who are to represent us as a distance will be the next Wednesday in the trial debate do be there to give your support to them.

It is to be regretted that our debate forces are divided this year between different subjects and different institutions. A second division should be avoided in the future. But we must get work and overcome the handicap we have to work this year.

Idleness

Idleness is the bane of body and mind. The great abstract of the debaters, the chief author of all mischief, one of the seven deadly sins, the bane of all existence, the perilous enemy to the man of action, and a great cause not only of indolence but of many other diseases, for the mind is naturally active; and if it be not occupied about some honest business, it rushes into mischief and sinks into mischief.—Burton.

Next to Orpheum Theatre
Mr. Barry Dibble, United States Reclamation Service engineer, in charge of the development and utilization of power on the Minidoka Project in southern Idaho, visited the University of Idaho Thursday. At 3 o'clock in the afternoon he addressed the faculty and students of the College of Engineering, who provided the lecture room of the Civil Engineering Department to capacity, upon his work under his charge.

At the Minidoka dam, across the Snake river near the town of Minidoka, 20,000 horse power are developed, which is used mainly to irrigate during the summer months 30,000 acres of land in addition to the 70,000 acres in the project under the gravity system. During the winter months about half of this power is utilized in the heating and homes of the project, mainly for heating and lighting. In Rupert, a town of about 1,000 people, electricity has practically supplanted the use of other forms of fuel. For instance, the high school is equipped to use 400 kilowatts for heating a cost of about $1,500 a year, which is considered an economy as compared with coal. A new hotel is being erected in Rupert plan to consume 400 horse power, and will have electric radiators in every room. The charge for electricity for heating is $1.00 per kilowatt per month, about 1 per cent of the charge at present in Moscow.

Mr. Dibble described the plant and equipment, mentioning the fact that the pumps on the project were the largest 600 in the world, though larger ones are being constructed for pumping at New Orleans.

Mr. Dibble spoke of the danger of over-specialization in the case of young men. What is needed is an all-around man with good common sense and thorough fundamental training. He recommended that where possible compensation at first he made a secondary consideration, and that one should not expect pay for experience yet to be obtained. Very few young men are worth graduation more than $75 per month, and it is safer to begin at $50. He recommended to the mechanical and electrical engineers some job where they would have to work with their hands. A big job is a combination of little details, and details can best be gotten when just out of college. Experience will teach the proper compromise between conflicting considerations. For several years it is well to round out one's education as an apprentice. Engineers are as well compensated as men in other professions. When you get to the point of doing your own thinking do not be afraid to question the results of others. Check all results—those of engineers of big companies as well as your own. College work is too much specialized. Electrical engineers should know something about surveying and roof design; and on the other hand, the civil engineer should know something about electricity. All special engineering is related to all other engineering work. He quoted the definition that "a well educated man is one who knows something of everything and something of everything." He emphasized the utility of acquaintance and the necessity of being a good mixer. He urged thinking on general subjects and respect for the opinion of others. There is more than one side to every question and tactfulness is a great asset.

In closing he gave the young men advice from the standpoint of a technical graduate who has become a successful practicing engineer, which was so simple and so to the point that it holds the closest attention of the young men.

Mr. Dibble is returning from a visit to Seattle to arrange for the construction of new runners for his pump on the project, which will increase their pumping capacity 30 per cent. Mr. Dibble has been a most welcomed variation in the routine of instruction in the Engineering College.

The following is the result of the second match fired by the University of Idaho Rifle Club vs. Rhode Island University:

Schick 177
Carlson 167
Smith 155
McAllister 145
Morrison 145

For the 2nd match the standing of those who have fired their preliminary score for name is as follows:

Va, Nebraska University:

Schick 177
Carlson 167
Harding 155
McCormick 155
Smith 155
Morrison 145
McAllister 145
Swan 145

GENTLEMEN FIRST!

To the girls who take chemistry: you may not know of the time-honored custom that prevails in the chemistry laboratories. But certain we who have been there long enough to see that we reverence observe this custom with great respect. These are all needed if you are not always used by the poor, tired boys. Learn to stand up "womantically" and do all your experiments leaving over your desk as comfortable a position as possible when you write them up.

The May of life blooms only once—Schickler.
Brief Local News

Mr. and Mrs. Hutton were dinner guests of Omega Pi Wednesday.

Mrs. Ross of Caldwell, was a dinner guest of Omega Pi Thursday.

Theodore Driscoll who was a student here in 1910 visited the University last week.

Prof. Peen Moore of the University, judged poultry at St. Marys, Dec. 28 and 29.

Miss Vesta Cornwell, a Freshman at the University, is reported as seriously ill with typhoid fever.

Miss Hoover and Prof. E. V. Ellington will speak at the Wapie and Fraser high schools next Friday.

Homer Lingealfler recently passed the state bar examination and next joined his father in the law profession in Boise.

A recent letter from Enoch A. Berndt who is now in Anacoda, Mont., says that the Idaho delegation there is doing nicely.

Mrs. Balderson and Misses Wiley, Spaulding, Carithers and McMonigal were dinner guests at the Kappa Sigma house Thursday.

Beta Theta Pi entertained the Misses Burns, Weise, Nodle, Richmond, Wilson, Greene and Mr. and Mrs. Haladay at dinner last Sunday.

Will Schofield, vice-president of the Associated Pressers, is in receipt of a letter from H. L. Lansing of the University of Montana asking for information regarding our forestry organization. The information to be published in a forestry edition of the University of Montana paper.

Miss Louise Richardson will return to the University as a junior next semester. She left college two years ago and since then has spent most of her time in the north country up near Anoka. She returns a good time during her sophomore year but seems to be glad to get back to America. She says it feels more like home.

The faculty of the College of Letters and Science has been meeting frequently this month considering changes in the requirements for admission and graduation with a B.A. or B.S. degree. Final action will probably be taken in the next few days. These changes will of course, not take effect until next September.

Prof. E. V. Ellington returned Sunday evening from the south of the state where he attended the State Beta Theta Pi Association convention. He reports a very interesting meeting and the attendance showing a goodly representation from all parts of the state. While there Prof. Ellington was elected state treasurer of the association.

The men of science of the University held a meeting in the Engineering room Wednesday to organize a Science Club. The purpose of the club will be to encourage research work and to develop a closer relationship among the various departments of the College of the Science. Committees were appointed to arrange the details of this organization and are to report at an early date.

It is urged that the students body endorsed townpeople support "The Idaho First, "motion pictures which will be shown in the Auditorium next Tuesday or the following evenings. These pictures were taken by J. W. Jones of all phases of Idaho activity. Last campus day Mr. Jones took most of the scenes and the students will have an opportunity to see them during Farmers' Week." The admission is only 10 and 25 cents.

ALUMNI ASSOCIATION NEWS

Last Wednesday evening the Alumni Association came out of its dormant condition, which it has been maintaining for ages, and made the bold assertion that it is the all-powerful Benevolent and Protective Order of Elks. The executive committee composed of C. E. Farrow, Roy Stillinger, and Miss Bertha Stephenson met with the treasurer, Clarence E. Anderson, and the secretary, Mrs. Mable Price, to investigate the conditions of the association. The financial affairs were found to be in a dilapidated shape while the rest of the association is in fine condition. Plans were drawn for organizing the local members (some 76 people) into an active body and in this manner hopes for a stimulation of the association's activities are nourished. It was definitely decided to get out letters to all the members, in an effort to stir up a little interest in the association's work.

Concrete plans for a big reunion this year at commencement time are being laid and carefully moulded into shape. If the alumni would write to the secretary they could keep in closer touch with University and Association affairs. It is promised that should the alumni take enough interest in this correspondence, adequate part of the week's Argonaut will be given over to Alumni Notes.

DORMITORY NEWS NOTES

Orpha Verstegen, Edulah Byman, Ethel Richardson, and Bertha Polley were guests of the Beta Theta Pi house Sunday at dinner.

Lillian Erickson was a dinner guest of Mary Burke Sunday.

Lillian Erickson has completed her work at the U. of I. and will leave Saturday for a teaching position at Dayton, Wn.

Trunk.

HOW TO ACT IN ASSEMBLY

1. Always take the back seats.
2. Never let your fellow students know that you have memorized any of our college songs.
3. Always visit with your neighbor when the speaker is striving to make you pay strict attention.
4. Always bring one or more books with you so you may read one to your neighbor if he has forgotten his.
5. Never be on time.
6. Entertain your neighbor with amusing books.
7. Chew your gum as fast as you can.

It is claimed that the University of Idaho student council is not only the largest in the country, but also has the most efficient student government. It is composed of 62 members.

The Purdue Exponent runs a story of the organization of a club of college alums in Detroit to make college men useful to the community in which they settle. The story goes on to say that this organization threatens to spread over the entire United States.

There is nothing more aggravating on the farm than trying to start a gasoline engine these cold days. Prof. Hamilton is going to tell Farmers' Week: just how to make them gentle and docile.

The best lightning-rod for your own protection is your own spine. Emerson.

A mask of gold hides all deformities. Dekker.

Pennsylvania State College is the latest addition to the growing list of institutions which prohibit freshmen from Varsity sports. The measure, which became effective on September 15, not only bars freshmen from Varsity sports, but also excludes freshmen in special academic courses. No Pennsylva
nian state can play for more than three years on a college team.

With Penn State's decision, the number of Eastern college dating freshmen is increased to eight. Yale, Harvard, Princeton, Cornell, Dartmouth, Syracuse, and the University of Pennsylvania are the other institutions with similar restrictions. In the Middle West the nine colleges of the Western Conference keep freshmen from all games between members. Southern California supplies three more members of the rank in Pomona, Occidental, and C. S. C.

Oregon

The University of Oregon, A. A. W. will conduct five courses during the second semester, open to all men of the University. The curriculum is as follows:

1. "Geography of the People of the World," by Dr. James G. Groves, 3.00. The course in geography will be divided into three parts: Europe, Asia, and Africa. The individual parts will be divided into three sections: history, economics, and culture.

2. "The Art of Writing," by Professor J. B. Mixon, 3.00. This course will cover the art of writing, with special emphasis on the principles of grammar and the rules of usage.

3. "The Science of Chemistry," by Professor J. B. Mixon, 3.00. The course will cover the fundamental principles of chemistry, with special emphasis on the study of the periodic table and the classification of elements.

4. "The Art of the Engineer," by Professor J. B. Mixon, 3.00. The course will cover the principles of engineering, with special emphasis on the design and construction of machines.

5. "The Science of Mathematics," by Professor J. B. Mixon, 3.00. The course will cover the fundamental principles of mathematics, with special emphasis on the study of algebra, geometry, and trigonometry.

Party and Afternoon Dresses

Silk, Silk Chiffon, Organzades, Crepe, etc. Values $18.00 to $30.00.

All Party Slippers of Patent, Satin, Colored Suede, and Velvet.

Values to $5.00 at—$2.60

DAVIDS'

GOOD POULTRY PROGRAM FOR FARMERS' WEEK

The Poultry Division at the University has prepared an excellent program for Farmers' Week. Poultry Helen Daw Whitaker and E. R. Headley, a practical poultry farmer of Mansfield, Ohio, will be the speakers. The program will be held in the early morning on the Ohio campus the week of June 20-26. The program will be open to all persons interested in poultry production.

RATES TO NORTHERN FARMERS' WEEK

The rates for transportation will be one and one-half for one person, and one and one-quarter for two or more persons. The rates will be as follows:

- One person—$2.50
- Two persons—$3.75
- Three persons—$5.00
- Four persons—$6.25
- Five persons—$7.50
- Six persons—$8.75
- Seven persons—$10.00
- Eight persons—$12.00
