FRESH LAURELS FOR GLEE CLUB

UNIVERSITY ORGANIZATION HOME AFTER SUCCESSFUL TOUR OF THE NORTH

Net With Splendid Response From The People and Entertainments Highly Appreciated

The University Glee Club returned recently from its trip through north Idaho with every member of the club feeling that they were well repaid for all the hard hours and the discomforts arising from making one-night stands over a large area. The club is to be congratulated in that no member became ill on the trip, that everyone behaved admirably and carried to the towns visited the best fraternal musical greeting of Idaho’s leading educational institution. It was not necessary to substitute anyone in any musical number.

The trip has stimulated the musical interest in glee-clubs and orchestras in the towns visited; strengthened the loyalty and interest of the alumni who heard, and given unusual musical satisfaction to the audience. Editors and critics had to be given an almost every one.

There is no question but what return dates can be secured next year in all the towns on the schedule just visited provided the musical standard is kept up.

Former Student Dies in California

CHESTER F. SMITH, MEMBER OF '91 CLASS, HAS BEEN SPENDING WINTER IN CALIFORNIA

His Life at School Was Characterized by Closest Attention to Duty and Courtesy to All His Fellows

Chester Fowler Smith, B.S.(Chem. E.), '91, died Wednesday morning at Monrovia, Calif. (Silver Spring). Smith was a well-liked student body of the University of California. His life at school was characterized by the most stringent recommended in his excellent ability and character. Mr. Smith was very well liked by the society and student body of the university.

Mr. Smith’s house was in Caldwell, Idaho, and he graduated from the local high school of that town in the class of 1910. While here he was known as a student of great ability and of unexcelled character. He never lost the friendship of the Chaplain's Department with “A” honors in the various offices of honor as Vice-President of the A. S. U., President of the Y. M. C. A.; Argonaut Staff, and Class Campus Day Orator. He received the Engineering Scholarship for 1912.

Chester Smith was only twenty-two years old and it seemed sad and unfortunate that so promising a young man should have been called home so soon. He was entering his life’s best years.

Professor von Endo, head of the Chemical Department, said, “He was one of the most promising young men that we ever had, showing rare ability and character from his freshman days until his graduation and, above all, greatly benefited during his last year here by falling health, but he was able to do excellent work.” Of all the students join with his many friends in mourning his loss.

Dr. Steisman Is Making Good

In the issue of February 25, 1915, of the Engineering News is a very interesting article on the Equivalent Uni-
MR. GOODELL TALKS TO FORESTERS

INDUSTRIAL SECRETARY OF THE
Y. M. C. A. MAKES VISIT TO THE UNIVERSITY

Problems of Great Concern to Young Men Are Discussed

Mr. John A. Goodell, who is serving in the capacity as traveling industrial secretary for the Y. M. C. A., made a visit to the University last Wednesday, and took occasion to talk to the students of the Forestry Department. Mr. Goodell has charge of the western district which includes Washington, Idaho, Montana, and Oregon. The purpose of the visit was to promote the work of the Y. M. C. A. to further the interests of the men who are engaged in the various enterprises throughout the Northwest, as well as elsewhere. In mining camps, lumber camps, construction work, and in every activity where a large number of men are engaged.

The work done finds expression in the construction of club houses where men may gather for various diversion, which breaks the monotony of the camp life. The lumber interests of the Northwest are very willing to further this cause as they realize the direct advantage to their own interests of providing the best possible accommodations for the men with whom they deal.

The Potlatch Lumber Company, this county, and the lumber companies on the St. Joe river are supplying club houses in their camps where also a Y. M. C. A. secretary is kept in charge. A regular program is arranged in this week. During the week numerous sources of amusements are provided and on Sunday there is conducted religious services.

At the Air Eek dam in north Idaho the association maintains a club house. The work done by the association in such a place is similar to that done by the Y. M. C. A. secretary at the Pussy canal during its construction. The service rendered to this great cause by these men has been pronounced as one of the factors which was directly responsible for the success of the enterprise.

Mr. Goodell told great stories on the Y. M. C. A. which is being made by the men of large industrial enterprises for cases for their protection who are capable of handling successfully large forces of laboring men. This is one of the greatest problems with which they have to contend. There are large numbers of men who are able to handle a situation last who hopelessly fail when they are placed in charge of large forces of men. He emphasized the importance of being leaders of men, because sooner or later that responsibility would be thrust upon all of those who are active in the work for which preparation was being made.

STUNT PARTY FOR THE Y. W. C. A. DELEGATES

Friday evening all of the college girls gathered at the "Dorm" for a real good time in honor of the Y. W. C. A. delegates. The program was supposed to represent a copy of "The Ladies' Home Journal," and the stunts were carried out with a great deal of ingenuity cleverness. Marion Nadle introduced and explained the different acts, of which the first was of course, the frontispiece. Hester Pettijohn was charming as the old-fashioned girl with the graceful curtsey on the last Home Journal. The Omega Pi girls had charge of the advertisements and such well-known characters as the Gold Dust Twins, the Cream of Wheat man, and many others were scattered thru the performances at different times.

Miss French gave the editorial and Miss Fox responded to it. Then Gladys Hamilton gave some extracts from the "That Reminds Me" page, which furnished a great deal of amusement. In place of the page devoted to reports from Women's Clubs, the Y. W. C. A. delegates from the different colleges gave most interesting reports. This was followed with a short story very well, and Vera Johansen and Tress McNabon gave "Mrs. Enhardt's March" answer to girls, which were unusually funny since they had a personal "campus" flavor. The Delta Gamma's also had some humorous recipes pertaining to campus life, and the Gamma Phi's represented the fashion sheets of the Home Journal. Punch and wafers were served after the program was finished.

IDaho SHORT-COURSE TEAM WINS HIGHEST SCORE

In the Interstate Butter Judging Contest held at Spokane, Saturday, March 13th, our Dairy Short-Course team, composed of B. E. Elder, O. F. Kuster, and W. C. Cummack, won the team from Washington State College by a score of 6564.25 to 6532.55, making the highest score of the four teams entering the contest. B. E. Elder stood second highest in the contest, winning a silver rated trrier donated by the Columbia Supply company of Portland.

The short course has now won the pentomol offered by the Spokane Seed company two years in succession and it thus becomes a permanent property of the University of Idaho.

The collegiate team consisted of R. B. Cummack, Archie Hawley, and Herbert Breier and lost to the collegiate team of our neighboring institution by a narrow margin. As this team, as well as the short course team, defeated W. S. C. in the contest last year, we are still in the lead and feel confident that the silver loving cup will soon be returned to the University of Idaho and that it will then become our permanent property.

The contest was held at the Spokane plant of the Hardwood company and Professor O. E. Frevert of Salt Lake City, dairy products specialist with the United States agricultural department was referee. Much credit and good will is due these men for their work and cooperation in the contest. The J. B. Ford company, Wyan- dota, Michigan, was a heavy donor of prizes as was also the Diamond Crystal Salt company of St. Claire, Michigan.

It is expected that a larger and better contest will be held again next year and if it is held the University of Idaho is going to be more selfish and bring home all of the honors and prizes. These contests are of great value in training the students, who are fortunate enough to be entered, and more indicative to better work.
PROFESSOR ARNOLD GIVES LECTURE

FORESTERS FAVORED WITH INSTRUCTIVE TALK ON LEGAL ASPECT OF PROFESSION

Source and Disposal of Public Lands

Prof. E. C. Arnold's lecture on Public Lands to the Associated Foresters Tuesday evening was one of especially instructive value. Mr. Arnold is well qualified to speak on such a subject, having served several years as District Forests Engineer. He handled his subject under three heads, first too soon to dispose of the public domain as the disposal of public lands, and finally the history and purpose of National Forests.

The term public lands properly used, said Mr. Arnold, applies only to unreserved lands that is, it does not include military reserves, national forests, or other reservations.

Public lands, he explained, have been acquired in two ways, first, by cession from the original states to the federal government, and second, by purchase, or treaties with foreign countries. By cession from the states the federal government acquired 259 million acres of land, and by purchase and treaty, 1,482,649,000 acres. This land has cost an average of 6.36 cents per acre.

Extensive disposal of the public domain began in 1841 with the passage of the Pre-emption Act. Other laws were passed later, the most important being the Homestead Act of 1862, which stands today with certain modifications. Mr. Arnold cited several instances showing the abuse of these laws under the old regime, and explained that, in the last few years, the settlers, in order to secure land, have been compelled to make some show of complying with the laws.

Besides this disposal of land to settlers the government has made numerous grants to the states, particularly for the support of schools.

The first move towards forestry was made in 1876 when Congress made an appropriation for the purpose of investigating forest conditions in this country. In 1881 a law was passed authorizing the President to set aside certain lands as Forest Reserves. President Harrison was the first to act under this law. The law has since been amended so that in most of the western states such reservations can be made only by act of Congress. Public lands can be included in National Parks except those more valuable for minerals or agriculture. Owners of claims within National Parks are entitled timber free as is necessary for the development of their claims, but not to sell.

MILITARY

The annual inspection of the Cadet Corps of the University was made last Wednesday afternoon by Captain McDaniel, 11th U. S. Infantry, from Ft. Miles, Montana. Lieutenant Osterman, Commandant of Cadets, Washington State College, Pullman, Wash., was present for the inspection.

The "Old Guard" turned out for inspection and the various other ceremonies for which it is famous. It did not go on the campus where the regular inspection was held so that it did not interfere with the regular inspection. It was quite up to date as it had a submarine and an aeroplane. It afforded much amusement for the onlookers.

At the end of the regular inspection the competitive company drill was given to determine the best drill of the companies. Lieutenant Garber and Lieutenant Osterman graded the companies on this. Company B won first place, Company C second place, and Company A third place.

Another inspection, general in its nature, will probably be made in May at the regular time for the inspection of the various military schools, colleges, and universities. Captain Merry, General Staff, U. S. A., will make the inspection of the western schools.

The Cadets presented a very creditable appearance at the inspection. The annual encampment for the Cadet Corps this year will most likely be at Hayden Lake, Idaho. Plans are already being made for this.

THE CO-ED

On Saturday evening, March 27, all the girls of the University are to have a party given at the Gymnasium, beginning at 7:30. While it is given under the auspices of the Home Economics Association, every young woman is urged to be present and make the party a great success.

The entertainment of the evening will consist of games, songs and dancing for those who care to. The object of the entertainment committee is to give everyone a good time.

All are requested to appear in costume which may be made extremely simple and inexpensive. Refreshments will be served.

Wednesday, March 24th, has been set aside as "Tag Day." Tags will be sold at 5¢ each which are to be worn Saturday night for entrance to the Gymnasium.

The Co-ed Party is one of the most popular and jolliest affairs of the year in most colleges and universities. It is a time when all the women get together in the most democratic spirit and a time when everyone gets better acquainted.

DELTA GAMMA BANQUET

Saturday evening, March 13th, Delta Gamma held her annual founder's day banquet at Williamson's Cafe. The table was beautifully decorated with smilax, corn, and carnations. Lights were afforded from pink-ribbon candles. At 8:30, thirty guests gathered around the table and a seven-course banquet was served. During the evening songs were sung and letters from the old girls who could not be present were read.

Mrs. Hulme made a most interesting and charming toast. Misses Bowen, Helen Dencke, Lois Jones, Pemish Nollus, and Frances Fishburn responded with toasts.

Aside from the active chapter those present were: Mrs. Haline, Helen, Ettie Fields, Edwin Trenor, Lee McDaniel, Lillian Shattuck, Mrs. Wm. Lee, Mrs. H. P. Fishburn, Anita Taylor.

A 60-DAY MAN

The 7. 11. A. performed a signal service to the University when Dr. Weatherford was assigned for a series of lectures on wholesome subjects that would concern every college man. Dr. Weatherford did not disappoint in any particular. Gained with a winning and unassuming personality, he has enabled us to present glamorous problems and their solution in a manner that is at once dignified and sincere.

We cannot, nor forget, the beneficent influence of this quiet man. Not only are his messages of permanent impor-
tance but his ability to influence his audience. His normal audience on campus has grown to be a very large one, and in his capacity as a lecturer, he has been of great service to the entire student body.

FRENCH

With a few more warm, rainy days, the season of tennis will turn to its usual activities among students and faculty. Each year this game becomes more and more widely enjoyed and last year was a year for which we have been very much anticipat-
ed. The improvements made last year were remarkable.

Second Friday, the tennis courts are filled with enthusiastic fans, who have come to enjoy the game with a greater appreciation of the skill and artistry involved. The tournament was well-organized and well-prepared for the event.

Tennis is a game of skill and strategy, and it is important that we continue to support our tennis teams in order to ensure their success.

WEATHERFORD: THE MUSICAL GENIUS

Dr. Weatherford, a renowned scholar and musician, presented a series of lectures on the importance of music in today's society. His lectures were well-received by the students and faculty, and his insights continue to inspire us to appreciate the beauty and power of music.

Simplified Spelling is Used in Eastern Colleges

Every seven universities in the United States are using simplified spelling, according to the report of the simplified spelling board. Among those who have adopted the new system are Idaho, Emporia, Friends, Kansas, Missouri, Southwestern, and Baker Colleges.

Several state universities have adopted this method. Missouri leads with nine such institutions.——
A recent analysis of the present-day undergraduate's tastes reveals the startling fact that the type has changed entirely and that poetry rather than football is of prime importance. Some quotations from the survey of conditions at Columbia contributed to the New York Times will be interesting to those concerned with the college world.

Brown of Harvard is no more. The play of that name may still be running, but of Harvard life it is now about as accurate a picture as "Trevelyan of the Wells" is of modern English life. At Harvard, and at all the great American universities, the bustling, picturesque young athlete is no longer the prevailing type or the undergraduate ideal.

Of course, undergraduate athletics and undergraduate athletes persists—it would be a tragedy if they did not—but the type of youth that has been rather effectively denominated the "rah-rah boy" is increasingly difficult to find. His place has been taken, not by the "grid," the plodding, prematurely old student, caring only for his books and his scholastic record, but by a normal young man, aware that the campus is not the most important place in the world; aware, in fact, that the university is not the universe.

This young man knows about class politics, but also about international politics; about baseball, but also about contemporary literature. He is much more a citizen than his predecessor of ten years since, less provincial, less aristocratic. And he not only enjoys literature but actually desires to create it.

The chief enthusiasm at Harvard seems to be the drama; indeed, the Brown of Harvard of today must be represented not as a crimson-sweatered gladiator but as a cross between Thringberg and George M. Cohan. At Columbia there has lately developed a genuine interest in poetry!

Undergraduates: ideas have greatly changed during the last few years. College life reflects the ordinary life of the world more closely than is usually believed. This is a day of general cultural and spiritual awakening. The college student is walking, just as everybody else is walking; like everybody else, he is becoming more interested in the great things of life. There is no reason why the college walls should shut him in from the hopes, ambitions, and problems of the rest of humanity.

It isn't only the boys that have changed—the parents have changed too. Time was when the father and mother wished their son to go to college so that he could join a group of pleasant, nice-mannered boys of good family. Now they have a definite idea of the practical values of a college education, they send their son to college intelligently.

Also, the whole theory of teaching has changed. The purely Germanic system has been superseded by something more humane. The old idea of scholarship for its own sake is no longer insulited upon. Instead, the subjects taught are treated in their relation to life, the only way in which they can be of real interest to the students.

You will look in vain in the modern university for the old type of absent-minded, dry-as-dust professor. He has been superseded by the professor who is a man as well as a scholar. And naturally he approaches his subject and his classes in a different spirit from that of his predecessor.

The extraordinary amount of writing done by the students is one of the extra-curricular manifestations of literary interest in the students. It is not at all unusual now for a Columbia student to sell his work to the regular magazines. The student who writes for the magazines and newspapers is no longer a novelty. Randolph Bourne, who recently graduated, contributed a number of essays to The Atlantic Monthly during his junior and senior years.

Many of the students write for the newspapers. The better sort of newspaper humorists have had a strong influence on the undergraduate mind; they have shown the way to writing things that are funny but have an intellectual appeal. This has resulted in the production of some really excellent light verse.

Prof. and Mrs. Pullman were guests of Phi Delta Theta last Sunday.

Dean Ayers was a dinner guest of Kappa Sigma Wednesday evening.

Get your hair cut at the Idaho Barber Shop, Idaho Bros. Prop., advt.

'Saturday evening Omega Pi gave a shower in honor of Misses Fox and Schwan.

Colquhoun and Mitchell of Pullman were guests at the Kappa Sigma house last weekend.

Prof. Graves of the Solls Department announces a masculine addition to his family last week.

Prof. and Mrs. van Ende and "Pink" and Mrs. Griffith were dinner guests of Omega Pi Thursday.

Bruce Crt., a student of the Dairy Short Course, is now manager of the Nelson Creamery, Moho.

Save your whiskers for the Idaho Barber Shop. Idaho Bros. Prop., advt.

James Lockhart left last Friday for Salt Lake City where he has accepted a locative position in a creamery.

Let us do your kodak finishing, printing and developing at reasonable prices. South Bros., 116 West First St.

Lola Jones, Nunn Miller, and Evelyn finishing were dinner guests at Ridenbaugh Hall last Wednesday evening.

Larry O'Neil spent the week end at Kappa Sigma house and returned to Lewiston with his sister Sunday evening.

Gamma Phi Beta had as dinner guests on Wednesday evening Miss Woods, Izaetta Lutkin, and Valley Knouse.

Miss Elizabeth Fox, traveling secretary for the Northwest Division of the Y. W. C. A. was week-end guest of Omega Pi.

Miss Rose Steler, who graduated from University of Oregon, last February, visited Omega Pi over Friday and Saturday.

Mrs. Penrose of Walla Walla, Miss Fox, Miss Burton, and Mrs. J. O. Bridger were Delta Gamma dinner guests Sunday.

Dean Eddings, A. L. Johnson, Frank'E "Pink" and Julia Xarley were dinner guests of Phi Delta Theta Wednesday evening.

Budalla Byrne, Kathlene Lyon, Frances Meek, Leta Meacham, and Vera Mead are special guests Sunday evening at the Gamma Phi house.

Graydon Crawford was called home recently on account of the illness of his mother, but is expected to return in the near future.

On Sunday night the active chapter and alumnae of Phi Delta Theta held their annual Founder's Day Banquet in Williamsen's Cars, about forty being present.

A copy of the 1914 Baccalaureate Address, "The Towed-Girded Master," by Rev. Willard Martin, D.D., was sent out by the President to each of the alumni of the University.

Miss Hoskett of Whitworth, Miss M Architecture of Pullman, and the Misses Gate and Bungenhul of Whitman, who were here for the Y. W. C. A. conference, were guests of Delta Gamma.

"Jim" Lockhart left Saturday for Salt Lake where he has accepted a position with the Nelson and Rice Creamery of that place. He will relieve his degree in June with the class of 1915.

Misses Arnold and Prior from Pullman and Misses Tanner and Longhish from Whitworth College, Spokane, were week-end guests of Omega Pi while attending the Y. W. C. A. conference.

Horace Berg of the Dairy Short Course has received the position in charge of the new creamery at Pendleton, Or. In addition to manufacturing dairy products, they will establish the city milk supply.

Y. W. C. A.

The Y. W. C. A. Cabinet Conference which was held at the University, March 12, 13, and 14, was a great success. Twenty-two delegates were entertained. This number did not include the members of the local organization. Several ladies of the advisory board in Pullman attended. The conference was especially fortunate in having 35th Blanchard, one of the national secretaries, and Mrs. Penrose, President of the National Executive Board, as two of the main speakers.

The reception Friday evening in Ridenbaugh Hall was well attended and was enjoyed by all. The Ladie's Home Journal given in pantomime by the local girls, showed much ingenuity.

The Summer Conference Banquet, Saturday noon, and Dr. Brannan's earnest talk on "Social Aspects of Religion," Saturday evening were meetings worthy of special mention.

MEMORABLE

"What little boy in the class can mention a memorable date in Roman History?" asked the teacher.

"Antony's with Cleopatra," ventured one of the boys.—Fruth.

The University of Idaho is the only university in the United States, out of over 85 universities that charges no tuition, other than a student and diploma fee.

The average fee charged by the 85 universities tabulated in the report is $60. The lowest, a fee of $12, is charged by the North Georgia Agricultural College and the highest, $250, by the Massachusetts Institute of Technology.

The only other school known that does not charge a tuition fee is the College of Hawaii. Washington was a free school this past year, the present legislature made provision for a fee of $19 a semester.

In the Chemistry lecture room, there are many a frozen grins; For want of heat we must content We very often miss our guests.
