IDaho Enjoys Debate Victories

The Forensic Season of the University Comes to a Brilliant Close by Double Debate Victories

Iron and Beckman, Idaho's Representative Make Good Account of Themselves

On Friday evening of last week Idaho met a new rival in debate for the first time, the Utah Agricultural College, and the bird of victory perched upon our banner. Our boys have not yet returned, and so we have only the meagre news of the contest that came in a telegram. It was a stubborn contest. Every essential point of the railway pooling question was contested by both teams. When the debate came to its close it was evident that the Idaho team had smashed the affirmative case on every important point, and so the decision was awarded to the defenders of the Silver and Gold.

The Utah debaters were Irvin Nelson and William Starley. The two men who represented Idaho were Alvin Beckman and Melvin Ison. Beckman was heard here in the debate with Gonzaga University. He surprised even his best friends in that contest by the great advance that he has made in the last few months in the art of public speaking and the tactics of debate. Ison did excellent work in the debate that was held in Spokane with Gonzaga, and since that contest he has labored incessantly to perfect the case against pooling.

After the victory at Logan, which, as much as the Agricultural College defeated the State University in their last debate, gives to Idaho (the debate championship of Utah) the Idaho boys spent a day in Salt Lake City, taking in the sights of the Mormon metropolis. Then they proceeded to Los Angeles, where on last Wednesday evening they administered defeat to the much heralded debating institution, the University of Southern California. Southern California has well on toward two thousand students. They are all arts and letters students and law students. In the law school they have over five hundred students. The University holds debates with Texas and with Colorado. For several years they have not been defeated. But Southern California came to the turning of the tides when she ran up against Idaho. The California debaters were E. R. Collins, a senior in the law school, and Neal Ames, a junior in the College of Liberal Arts. All the judges were residents of Los Angeles, and we know very little about them, but two of them voted for Idaho, and so we think they are a pretty good lot and have their business.

Having seen a good deal of Los Angeles and its surroundings on Tuesday and Wednesday of this week our boys probably left for San Francisco after the debate to take in the World's Fair. They are expected home early next week, and surely something. Continued on Page 4.

BASEBALL PROSPECT BEGINS TO BRIGHTEN

The Prospective Embryo Material and Vets Are Fast Being Whipped into Shape

Many Contestants Are Out For Important Positions—Pink Has High Hopes—

"Come on, Harold, get a blow." "At's a goin' in there, big boy." "Nowhere on R bug the teams and they're right—I've just saw yuh 'tend to the track."

"We got two on this baby and the bunch says he'll swing like old Mother Back at this game." And finally, from Coach "Pink" "Hit the ball. I'm gonna pay attention to the lady who hanged 'em on the nose this year."

If you haven't been noticing any chatter similar to the above, get out on the field this afternoon and spring a little something just by way of letting people know that a spark still jumps for you occasionally. If the box car bugs tell you that you're pulling 1864 stuff, polish up your carburetor a bit and keep coming back.

Yes, the baseball team is still practicing. The furious horseplay continues to grow on the walls and hands it by the hickory and the embryo infielders are continuing to wear the boots quite frequently but the University does not seem to be aware of these strikingly important facts. The dope seems to point to a good team this year. Wade and Williams

THE UNIVERSITY ARGONAUT

VOLUME 17
UNIVERSITY OF IDAHO, MOSCOW, IDAHO, MARCH 26, 1915
NUMBER 24

CALENDAR
March 27, Sat., Home Economics Association.
April 2, Fri., Band Concert, Auditorium.
April 9, Fri., Phi Delta Theta.

UTAH looks like promising moundsmen. Mitchell and Fry, both vets, seem ready to scorch up the rubber a trifle and the coach may have two classy backstops in Evans and Barger.

A merry little race is on for first and the man who wins the position will have to hurry all season to keep from being apliked in the heel by the candidate chasing him. Humphries, Purdy, Almquist, and Xip have all been going good and they will all make a strong bid for that initial corner job.

Jim Keene, Purdy, Neilson, and Charlie Gray have all been cavorting around the keystone rock. Captain Burns, Hallam and Agee are prospective shortstops and Neilson and Bloom will scrap it out for the station where they come at you with plenty of English and machines-gun speed, the last at the bat.

Among the stars with an ambition to twinkle in the tall uncut beyond the field are Jones, Dauert, Lasting, Jean Gerloough, Bitline, Woods, Pickle, and Ison. The coach has more than enough material for a pair of teams which can slug each other around and by the time the first practice game with the Colorado Giants is ready to be staged an aggregation may be whipped into shape that will trim the black boys, favour the Spokane Indians, smear Pullman, make Whitman look like a bunch fresh from a class X circuit and then go on to grab the Conference cupola.
Y.M.C.A. TO MAKE DEPUTATION TRIP

THE MEMBERS HAVE ARRANGED A VERY FITTING PROGRAM TO BE GIVEN AT THE CLOSE OF THE WEEK

Secretary Leonard Will Leave Friday
With Men to Begin the Meetings—Others Will Join the Party Saturday

It has been the practice heretofore of the Y. M. C. A. that deputation trips be made in the spring of the year to some of the smaller towns in the neighborhood. This plan was taken advantage of two years ago when a man was sent out from here under the auspices of the Y. M. C. A. of the city. These trips have been made to take a trip to Troy where arrangements have been made to conduct a series of meetings touching different phases of college life, and problems which serve as a stimulus for a better type of student and morality.

The man which leaves here on Friday will be given the opportunity of making a tour of the country. He will be in charge of the work to be done and will be in charge of the meetings. He will be met at the door of the Y. M. C. A. and will be given the opportunity of making a grand tour of the University. He will be given the opportunity of seeing the different phases of college life and will be given the opportunity of seeing the different phases of college life and of the different phases of college life.

In the evening a meeting will be held in the town hall which will be open to all the people of the town. The speaker at this meeting will be Joseph Podl who will discuss the University. We feel sure that the people will be fortunate to hear the talk by Mr. Podl and will be interested in the work of the University of Idaho really stands for and that this is a University of Idaho rather than a "University of Moscow."

On Saturday afternoon the time will be devoted to an outing trip for the benefit of the town boys of Troy. Various phases of plant and animal life will be discussed and an effort will be made to make an interest in the more common affairs of life with which we come in contact every day without realizing their value and the lessons that they teach.

Sunday afternoon and evening will be given over to the more serious side of life. These meetings will be conducted in the town hall and will be in charge of Messrs. Leonard, Orren, Chas. Cooper, and other members of the local Y. M. C. A. There will also be given an opportunity to those meetings special rooms by members of the Glee Club of the University. It is difficult at this writing to say just how many men will make the trip, but it is expected that at least fifteen men will each do their share to make the trip a success for the people of Troy and credit to the Y. M. C. A. organization.

STUDENT FEST

Something new is sure to be done by the students of Troy in the spring, a so-called "Student Fest" and some contests. A large amount of enthusiasm on the part of the students and work on the part of a few students—namely the committee—resulted in the successful arrangement of such an event at the University to be conducted sometime in the early spring. It is the custom of a that which finds its definite form at that in the common sentiment of the student body that which when translated into expression would supply a long felt need at our school.

Has the interest been met? Has that "hunger for excitement" the high tide of emotions been satisfied? Perhaps the interest is not wanting. It may be, working on solution in science, it is very truly said that "the greatest things are done in silence." And it may be that the classes are in this case doing. Rather than let their plans be made public property they may be working industriously yet secretly on their program for the big contest.

Such a plan would be entirely proper in view of the fact that the classes have given in their consideration some of the possibilities of such a contest. It should be given attention by all the classes, for if we are going to construct such a common activity that they have all made the most started preparation for the contest.

We agree that this is one of the most commendable events that the student body has added to its calendar for the year and for that reason we feel that the classes, since they are to enter separately should do their very best to produce the best at their command so that the winning of true place would be won with and what is not more so that the performance would be a credit to the entire University.

A CENSUS OF UNIVERSITIES

The development of vocational and technical departments in the universities has been so rapid and unusual that few persons would be able to tell which are the largest schools in each field, if the reader thinks himself well informed let him take the following quiz:

Which has the largest law school? Harvard, followed by New York and Michigan.

Which has the largest medical school? New York, followed by Michigan and Johns Hopkins.

Which has the largest victim school? Northwestern, followed by Chicago and Yale.

Which has the largest engineering school? Illinois, followed by Cornell and Michigan.

Which has the largest non-professional graduate school? Columbia, followed by Chicago and Harvard.

Which has the largest school of education? Columbia, followed by Pinnaborg and New York.

Which has the largest school of agriculture? Cornell, followed by Wisconsin and Ohio.

Which has the largest school of commerce? New York, followed by Pennsylvania and Pittsburgh.

Which has the largest school of journalism? Columbia, followed by New York and Wisconsin.

Which has the largest school of architecture? Cornell, followed by Michigan and Columbia.

Which has the largest body of undergraduate students? California, followed by Harvard including Radcliffe and Michigan—University of California. Daily Kansan.

Wear a Style That’s Different This Spring!

GET away from the commonplace and try a coat that is different—not freakish or extreme, but one that expresses originality of thought, that shows that extremely rare combination of taste and cleverness. PRINTZESS coats are designed by men whose salaries run well into the thousands—the coats they design are meant for you. We bought them because we felt they were the kind we would be proud to offer you—try one on, and you’ll grow fonder of it as the season advances.

Pizza, Win. BREAD — We Deliver

Why not add a little variety to the usual homemade meals by sending for a loaf of...

"ROYAL" BREAD
The music for assembly was furnished by Prof. D. D. Parmalee, head of the Violin Department. Two numbers were played, the difficult "Hungarian Dance" by Brahms and "Swinging Song" by Ethel Barnum. Both were highly enjoyed by the audience because of their masterful rendition.

Pres. Geo. W. Black of the Lewiston State Normal figure the assembly address on the subject, "The Call of Idaho." "It shall not be my purpose," he said, "to settle what this call may be, but rather to open the question.

Under the leadership of her educational forces, the thinking people, Idaho problems will be solved.

Idaho as yet is only a potentiality. Underdeveloped resources do not make a state but rather the people make the state. The resources of Idaho are especially strong but over half of her land is still unsurveyed. She has timber land, grazing, arable land, mining, water power, all waiting for utilization by people.

Between 1899 and 1919 there was an increase in population in Idaho of 101 per cent. During that time irrigation projects were developed, government increased, University rebuilt, development of railways increased 70 per cent. Since then the balance has swung the other way. Many people have left the farms to become business men. The price of things has been raised until a reaction has set in. The state has been placed in a position where she is not progressing but rather regressing. The educational institutions have been the first to receive the blow because they were doing something. In connection with the cost of operating the educational institutions of Idaho, it is interesting to know that if all three institutions ceased operating, the people of Idaho could be saved $23.72 for every $100.00 taxation paid.

The people of the state do not know the value of the educational work, its ideals and aims. Our call then must be in some way to let Idaho see these things. By pulling in diverse ways, the power of co-operation has been lost to the people. Cities try to build themselves up by tearing down others rather than building up thru co-operation.

We must gain a vision of the larger self, make intelligent people more intelligent, break up isolation, in politics and business. The students of the University should help to spread this new doctrine, farmers above farms, people above regions.

Dr. E. O. Sisson expressed great joy in the progress of the University in bringing co-operation between the different parts of the state thru the students. Mr. O. D. Center spoke of the great influence which students can exert in their own communities for aiding in the University Extension work.

IDAHO AT FRISCO FAIR

The San Francisco Chronicle's report of the opening of the exposition contains the following under the heading, "Idaho a Hustler!".

"First of all the states of the union to have their building complete at the exposition was Idaho and that fact has been a source of lively pride to her people. With an area of 81,000 square miles and a population of 378,000, the inter-mountain state set a record for hustle and accomplishment by a result of the display of her products at the exposition and in giving after the homeseeker in a systematic and a sincere manner.

"In the Idaho pavilion, which occupies one of the choicest sites in the state's section, overlooking the prettiest part of San Francisco bay, there are ample accommodations for entertaining visitors. Indeed, the stranger is made particularly welcome. The interior arrangement must satisfy all who approve of utility with ornament. In the furnishing comfort is combined with elegance, especially in the rest room for women, and the smoking room for men. Hospitality is liberally extended, a completely equipped kitchen being among the accessories.

"While mining is a particular feature of Idaho's exhibits, the agricultural, live stock and industrial commodities and products of the state are especially displayed. Attention has been paid to relief maps showing the formation of different copper-producing properties."
SUGO CONTEST

It is to be hoped that all four of our college classes are making preparations for the song contest and the stunt contest that are to be held on the evening immediately preceding Campus Day. This is a new form of contest, one that deserves every encouragement. It will help to round out our student activities. Moreover, if it results in adding worthy songs to our rather slim store of Idaho songs it will confer a lasting benefit upon the student body. No class can afford to neglect this contest. Preparations should be going on now. The rules are very simple. Each class is allowed to choose a coach. Each class must sing two songs. The music of the songs need not be original, but the words must be original, and they must be suitable for an Idaho song. Fifty per cent of the class must take part in the singing. For the stunt contest twenty minutes is allowed each class. A performance, consisting of singing and acting, that relates to some phase of college life is to be given. None of the music need be original; and only those words must be original that are necessary. This contest is to be held on May 14-15.

A SPIRIT OF IDAHO

One needs only to be out of school one semester to see the vast improvement in the "Spirit of Idaho." About one year ago the present administration began. From that time on there has been a gradual tendency toward more real student interest. The "Greater Idaho" rally held late last spring, in which vital issues of student and faculty welfare were discussed frankly, was a meeting that was well attended, and the interest aroused there is very far-reaching.

In their first place, we can notice a vast improvement in assemblies. They are better attended, and better conducted than they have been during the past few years. Two whole rows of faculty people, not to mention those who are hidden among the students, look very good indeed, and the students attend also.

And then there is the student body meetings which are a great improvement over those of a year ago. Men meet and actually discuss student rules and activities.

Next, there are bright promises of greater democracy in the fraternity and sorority circles due, largely to activity of leaders trying to establish inter-fraternity councils.

Another strong manifestation of a struggle, yet real "Spirit of Idaho," is the work of Mr. N. W. A. secretaries and cabinet. And their efforts to make Mr. Wetherford here were rewarded with a large attendance as well as support. They have very good ideas, and the debate teams have been better every year than the year before.

The debate teams have been better every year than the year before.

We wonder if the governor's cut on the judicial appropriations will prevent the tennis courts from being fixed up.

We are glad that there are no plans for the Idahonian to be closed.

Some wag suggested that freshmen law students ought, when preparing lessons, to get their "cases" outside the library.

NOTICE ALBEM

There will be a meeting of the Alumni at Guild Hall, March 30, at 8 p.m. All alumni are requested to be present.

PRESIDENT SCHWICK OF EMERSON COLLEGE OF ORATORY WILL VISIT MOSCOW

It is well that an announcement should be made at this early date of the notable orator who will visit the University of Idaho late in May, the 25th and 26th of that month.

In this he has been the good fortune of the University to be included in the schedule of President Henry L. Southwick of the Emerson College of Oratory, Boston.

President Southwick bears an enviable reputation for distinction and talent as an orator and a reader. He is especially forceful and pleasing in the interpretation of Shakespeare.

The students and faculty of the University and townspeople of Moscow may look forward to an unusual literary and cultural treat.

BOARD OF EDUCATION MEETS

A meeting of the Executive Committee of the Board of Education and Board of Regents of the University of Idaho has been held in Moscow on Monday, Tuesday, and Wednesday of this week. Commissioner K. O. Simson, who just returned from filling a lecture engagement in Cambridge, Massachusetts, met with Mr. Herman J. Rosul, Mr. Evan Evans, and President Eronson to discuss recommendations and proposals to be made before the State Board of Education meeting which takes place in Boise early in April.

Y. M. C. A. ELECTION

The following men have been nominated by the nominating committee to be voted upon next Tuesday at 3:45 p.m.:

President—J. D. Boyd and William Boekel.
Vice President—Vernon Crasnow and Kenneth Collins.
Secretary—Albert W. Sandanum and Harry Enkehouse.
President—Royd Ellington and Oscar W. Johnson.

The election will take place in the Y. M. C. A. office in the Engineering Building. All members are urged to remember the date and come out and cast their vote.

CHANGE SITES

"Cheney Sides" in the backdoor of a cravat is a mere indication of unusual and individual design both in color and style. A man does not have to try and will a "Cheney Cravat" it slides readily, twenty head quarters for these mercurial needs.

Creightons

IDAHO JOYCE DUBER VICTORIES

(Continued from Page 1)

should be done to show our appreciation of those two men who have carried the name of Idaho to so many distant parts and who have made known our institution as a place where men are training to hold their own in intellectual contests with rivals of no mean caliber. It is not given to many college students to take part in three debate victories in the short space of three weeks, but this has been done by Beckman. Two of those victories were due in considerable measure to the speech and orating and university worker, who was our final speaker on the platforms in Utah and California.

The Omega Pi's report a new pledge, Miss Helen Patten of Moscow.
PROFESSOR HULME IN LEWISTON

LEWISTON TRIBUNE MAKES VERY
PREFERABLE COMMENT ON
HULME'S LECTURES

Series of Lectures Given Were Well
Received—Talks in High School
Assembly

Last Friday Professor Edward M.
Hulme gave four lectures in Lewiston.
One was given in the Auditorium of
the High School at the weekly
Assembly, the second was given at the
Normal School. The Lewiston Tribune
said in its issue for January 11 that:
"Professor Hulme has a very
attractive personality and speaks
his words with telling effect
Everyone gave perfect attention.
The only regret seemed to be that he did
not talk longer." And the report ends
with the statement that the speaker
will be gladly welcomed back by the
students, the faculty, and by all who
knew him as a speaker and as a man.

The subsequent lectures, four in num-
ber, promise to be of vital interest
and equally as good." On the fol-
lowing day The Tribune said:
"The lectures by Prof. Hulme, delivered
before Normal students on Friday,
were deeply appreciated by all who
were fortunate enough to hear him.
He is a man of great enthusiasm and
philosophy, and he is assured of a
warm welcome when he returns, on
April 3, to give the next lectures in the
series of addresses on Art and Life.

In his lecture on Art and Life, Prof.
Hulme stated, "What is the Art of
Life? I believe that it is the ability
to give pleasure to others."

Your Goal and Ours

HAYNES-WHITE CO.
Phone 197
Next to Orpham

The University of Idaho

PURPOSE—To render service to all
of the people in Idaho all of the time
and in every possible way.

EQUIPMENT—A faculty of men
and women of high ideals and thoro
training; laboratories and a library which make mod-
ern and exact training in languages, sci-
ences and philosophy possible.

ORGANIZATION AND WORK—
There are four colleges in the University of
Idaho: Letters and Sciences, Agricul-
ture, Engineering, and Law. Special op-
portunities for research are made possible
by the Agricultural Experiment Station
and other science laboratories; particular
and state-wide service in Home Economics,
Boys' and Girls' Clubs, Field Demonstrations
in all subjects pertaining to the wide-
ly diversified agricultural Extension staff.
Instruction and demonstration has been
taken to more than twenty thousand people
in Idaho during the past year by means
of the Extension work. If all of the people
cannot come to the University, then
the University wishes to go to all of the
citizens of the state.

For information, send to
MR. FRANCIS JENKINS, Bursar,
University of Idaho,
Moscow, Idaho

WHY ALL IDAHO COLLEGE STU-
DENTS SHOULD ATTEND THEIR
OWN UNIVERSITY:

1. It is their own University. It be-
longs to every man, woman, and child
in Idaho. No tuition is charged. The state
appropriates approximately one hundred
dollars annually toward the education of
every student enrolled in the State Univer-
sity.

2. The cost of living is modest. It
should not exceed $350 to $400 per year
for a student coming from any part of the
state.

3. It is democratic. Many students
earn their own living while attending
the University. A recent survey shows
that over $1,600,000 were earned by students
while in residence this year.

4. It is the best University in America
for men and women who expect to engage
in the business and civic life of Idaho.
Here is the group of men and women who
represent state loyalty. Here is the place
for "plain living and high thinking." This
is the people's University. Here are be-
ing trained your associates for future state
leadership in business, in state development
and in right living.
AGRICULTURE

The Department of Farm Crops is planning some extensive experimental work with Canada field peas for the coming year. In this project there are 40 1-10 acre plots. A number of the different varieties are being grown for the purpose of determining the best yielding varieties for this locality. Tests are also being made with the object of determining the rate of seeding, time, manner, and method of seeding for best yields.

Several of the above plots are devoted to experiments to determine the best method for growing peas on hay. A number of new dry land Russian alfalfas will be planted for the purpose of determining the varieties best adapted for dry land conditions. The department has received a small sample of a new alfalfa from South America that propagates itself by means of running underground root stolons. The seed for this new variety is very scarce and sells at five dollars a pound. The department was very fortunate in being able to secure a sample and will grow it on the university farm here for the purpose of determining its value as a pasture alfalfa.

Besides the testing of fifty varieties of small grains the department has a cereal nursery containing 800 individual cereal plants. This is for the purpose of variety improvement. A number of varieties of corn will be grown in order to determine early maturing varieties for northern Idaho.

The department has in all a total of 160 1-10 acre plots and will conduct the experimental work on a larger scale than it has been done heretofore on the Experiment Station.

The Department of Bacteriology is having received a large number of orders for legume bacteria. Last year several cultures were sent out to insulate four thousand acres, and reports from these have been favorable in nearly all cases. Beside filling orders coming here, the department is furnishing cultures for orders coming to our neighbor institution at Pullman where they are not as yet preparing cultures for commercial distribution. The cultures are sent out in bottles, each with a card stating what the number of bacteria to inoculate seed for five acres, at a price of twenty-five cents a bottle, or five cents an order.

Professors Fishburn and Hickman have begun an experiment to determine the digestion coefficients of alfalfa hay. In the experiment four sheep will be used and both north and south Idaho alfalfas will be tried. The results should be of considerable interest and value from the stock feeder's as well as from the student's viewpoint.

The class in Soil Physics and Fertility under Dr. Peterson took a field trip to Grouse Ridge last Tuesday. The trip was of genuine interest to the study of different rocks, their drainage and decomposition and the final product, soil.

COMMENTS ON 1915 GEM OF THE MOUNTAINS

Mr. Francis Jenkins.
Moscow, Idaho.

Dear Sir: The University annual was duly received. It is excellent in all respects. I can suggest no improvement in its mechanical construction. It is as good as the best, and will be a valuable bit of property whose value will increase with the passing of years. Those who are not sufficiently interested in this time which it covers. I speak from experience, for the old annuals are the most precious relics of my college days. Let every student get and keep one. You have a good one, you need never be ashamed of it.

Permit me to say a word which is not directed at your publication especially at the annuals published. I would like to see a touch more of color in the literary work of the book. Now you have therein chronicles of events that thrilled you all for example your game with Pullman or some of your big debates? See some of your pen artists to work on such events at the time they occur and get the best possible on the event. Get a moving picture of it instead of the lantern slide-type of record which is so common in the average college annual. A story that gives the event in its color and dynamic aspect will be a treasure twenty years hence. I would give a good deal for the write up that appeared in the Chicago papers telling the story of the defeat of Chicago by Captain Griffin's corn-fed team from Iowa University, 1900. Ask "Pink" about it, he remembers. This is the way to make the book reflect the real spirit of the school. Tell not only what the University is doing but what it is thinking. With kindest regards.

Naono Morley, Lois Jones, Velma Spaulding, and Voral Morgan were guests of Gamma Phi Beta Sunday evening.

Graydon Crawford, who was called home on account of the illness of his mother, will not return to school due to her continued serious condition.

Mrs. C. W. Leaflart, member of the Grand Council of Kappa Kappa Gamma Fraternity, will arrive today to inspect the local chapter of Omega PI.

Let us do your kodak finishing and developing at reasonable prices. Booth Bros., 156 West First St.

Mr. G. S. Conter, Director of the University Agricultural Extension, was present in Moscow for a conference with President Brannon and the Executive Committee of the Board during the past week.

Mr. Jess Bedwell is becoming absent-minded, saith the bachelor partners, since that fatal evening two weeks ago. He is pursuing diligently the art of cookery but always forgets whether it’s dinner or breakfast, and falsely, he continually puts the hot cakes in the oven—and dreams on.

Dr. Weatherford at 0. A. C.

Dr. W. D. Weatherford recently delivered his series of addresses at 0. A. C. There were 415 present at the last address at which time he spoke on “Our Source of Power.” Few listeners took exception to the truth of his statements. Every statement was backed up by an actual illustration or proof taken either from his own observation, history, science, or psychology. His lectures were the personalization of simplicity of style, thoroughness of preparation, logical sequence, clearness of understanding and all combined to make a strong impression on his listeners.

THE FRESHMAN GLEE

The Freshman Glee went off with the usual zest. The crowd was not so idle as to make dancing uncomfortable, and it was almost entirely composed of college people. Miss French, Miss Bostow, and Miss Stephens made charming patroneses, and the informality of the affair added to the pleasure.

There are always those college wits who have something screamingly funny to say about the Freshmen and the Freshman Glee, but nevertheless they are the ones who enjoy themselves the most, and every one of them must admit in the depths of their ridiculous souls that the Freshman Glee affords the most real fun of any of the college programs. There the programs were given out and the punch served by a number of daintly-dressed little girls. On the whole the freshman Glee was a decided success.

NEW BULLETINS

The Department of Agricultural Chemistry and the Department of Horticulture of the Idaho Experiment Station now have in press three bulletins which will soon be ready for distribution.

Bulletin No. 81 is a survey of the soils within the eas and burned-over area of the county of Bonner, Kootenai, and Latap. Besides giving a number of analyses of these soils, the bulletin discusses many points of good natural mixup considering the decorations, but in spite of this the Gym looked very well on Friday night. Of course the “conventional” green was used in decorating—it wouldn’t have been a freshman dance without its green—and a great deal of evergreen brightened up the brick wall of the Gym. The program was given out and the punch served by a number of daintly-dressed little girls. On the whole the freshman Glee was a decided success.

Besides giving a number of analyses of these soils, the bulletin discusses many points of good natural mixup considering the decorations, but in spite of this the Gym looked very well on Friday night. Of course the “conventional” green was used in decorating—it wouldn’t have been a freshman dance without its green—and a great deal of evergreen brightened up the brick wall of the Gym. The program was given out and the punch served by a number of daintly-dressed little girls. On the whole the freshman Glee was a decided success.

THIRD STREET
MAIN 250
Iowa's weekly "news" to the Iowa State College, March 18, 19, and 20. This special "school" was authorized by the state board of education at its meeting in Des Moines. It is to be a place where newspaper men can come together to study their special problems and to work out a solution for them with the help of practical men. The instruction will deal with the important phases of agriculture because the men back of the short course believe the future success of country journalism is closely linked with rural prosperity and happiness.

Strong man at Michigan

Roy W. Johnson, a husky 180-pounder, is believed to be the greatest strong man unsurpassed at the University of Michigan. The gymnastics authorities believe that with a little training this youth will be able to take away the title of "strong man" from the present holder, William Roos of Yale. Johnson's greatest strength is in his grip. With his right hand he can push the needle around to 210, while Roos can make but 148.

At a meeting of the basketball team on Thursday, March 11th, Adie Sieberts was elected captain next year's basketball team. Sieberts was one of the fastest forwards in the conference this year, although this is only his second year in the game. His ability as an athlete is not confined to basketball alone for Sieberts is a varsity lifeguard on last year's baseball nine as well, and will be in line for a berth again this year.

The student body has considered and passed a proposition for a general student ticket which will cost $5.00 per year to be collected by means of an addition to the incidental registration fee. This will allow every student to college the privilege of attending all athletic contests held on the campus, subscription to the official college paper, the treasurer, medical assistance admission to all forensic contests and to the Gleie Club and Band Concerts given in Carvelian.

Texas

At a smoker recently, the Senior Class of the University of Texas, decided not to wear caps and gowns this year. They decided that the official costume should be set off with flowing Windsor ties and that they should carry canes.—Ex.

Old Harvard Rules

Imagine a twelfth century Harvard graduate asking President Towel's permission to smoke or buy a drink. Yet permission was necessary in the eighteenth century. According to Albert Mathews, '92, who is editing the history of Harvard before 1758 for the Massachusetts Historical Society.

One college rule read: "No scholar shall take tobacco unless permitted by the President with the consent of his parents or guardian and on good reason first given by a physician and then in a sober and private manner."

Further, "No scholar shall unnecessarily frequent any tavern or public house Cambridge to eat or drink there without leave from ye President or one of ye tutors."

Another regulation read: "If any scholar be guilty of drunkenness, he shall be fined five shillings and make a public confession. To undergraduate shall keep by him distilled spirits liquors; nor shall he use any such drinks as punch or flip."
