MOSCOW—This fall, if they will come, that is what Moscow's skaters hope to see on the newly restored 2,000-square-foot skate park built this fall, at the intersection of 9th and Mountain View. Renting to the Fagerman Center. The park is the brainchild of two local skaters, Mike Wilford and Nila Nelson, who decided it was time to have a place where all local skaters could gather.

Since skateboarding is prohibited on the local campus and in much of the town, the skaters have been seeing a need to have a separate facility for skateboarders, inline skaters, and in-line skaters.

Now 14, Wilford got his ball rolling when he bought a petition with about 20 signatures before formal member Paul Gullberg. Since then, local organizations and individuals, in conjunction with the City Council, have been steadily along the skating/lifestyle education.

After the Task Force on Youth Recreation recommended a skate park, the local skaters began placing donation cans at various locations around town, and a website for the project was developed, according to the website of the Student Association of Moscow. The City Council pledged $2,000 to the project in February 1994, and later added another $20,000 from the Parks and Recreation budget surplus in July of 1995. The City Council also had a volunteer group to help organize the design and building of the park. The Moscow School District donated $10,000. The skaters themselves have spent countless hours raising money by placing donation jars, holding benefit dinners, selling books at the Farmer’s Market, and the Renaissance Fair, and raising funds by holding support in the community. They have made use of the Moscow High School, and have been involved in the skate park.

Planning began early this year, and skaters worked with the city Hall on a site. A local architect then designed the park for the city. The building site was purchased by the city, and work will begin on the park in the fall. The skate park will include rails, pyramids, half-pipe, and other elements. Work began very early this year, and now we are going. Organizations hope to have the long-awaited project in place by the end of October.

For information on donations, the fundraising coordinator committee, Moscow, at 219-7271, or contact City of Moscow Parks and Recreation.

ATF tries to hide evidence

**Associated Press**

DALLAS - A federal judge was expected Wednesday to hear a motion to suppress evidence gathered during a search of a Lake Worth, Texas, house.

The judge is considering a motion by the prosecution to bar the use of evidence collected in a search of the home of a man who was charged with conspiracy to distribute marijuana. The man's attorney had argued that the evidence was obtained illegally.

The man, who is accused of distributing marijuana, said he did not know the evidence was being collected.

The evidence was obtained during a raid on the man's home in May. The man's attorney said the raid was illegal because it was conducted without a warrant.

The judge is expected to rule on the motion Wednesday.

Opinion

This land is our land!

By Walt Grulich

University of Idaho Argonaut

We have long been told that the land we use is the land we own. And then you real-ize you are somehow to blame for the destruction of that which you exist in the degree in which you live in that land.

The United States consists partly of public lands owned by all of us. This classification includes the National Forests, National Parks, Bureau of Land Management lands, National Monuments and more. These lands of a whole are open to access these public lands. I value and cherish this access as much as anything in this world. Conversations with others across our beloved public lands enhance our status as Americans.

September 5 marks the 75th anniversary of the Wilderness Act, a profound and visionary piece of legisla-tion that allows preservation of large tracts of public land from most com-mercial activities. It is the perfect space to celebrate this anniversary. Public lands are not some arcane entity of land. So they are not just land. They are not any other land. They are public land.

If you ask most people about their favorite National Forest, you would be surprised to hear a story like mine. The story of the characterless, inhuman system used to control the land instead of the land itself. The more stories I hear, the more I wish to share them with the world.

The Forest Service is the federal agency that manages the public lands. The Forest Service is a very large and complex agency, with a budget of over $10 billion. It manages over 190 million acres of land, making it the largest single land manager in the United States.

The Forest Service is responsible for managing public lands for a variety of purposes, including recreation, wildlife and habitat, timber production, and water resources. The agency is composed of five major divisions: the Region, the National Forestry and Range Service, the National Park Service, the Fish and Wildlife Service, and the National Biological Survey.

The Forest Service is also responsible for implementing the Wilderness Act and other laws that protect public lands. The agency is also responsible for providing information to the public about the benefits of public lands and the importance of conserving public lands for future generations.
Comets win 3rd straight title

HUTSON - The Houston Comets' third WNBA championship offered a fitting finale to a tumultuous season.

One day after playing one of her worst games of the season, Tina Thompson was named MVP of the championship game in a 90-80 win over the Sacramento Monarchs.

Weatherspoon produce a signature victory for the Comets against the Monarchs.

The Comets were 12-2 and had not lost since the 1991 season.

The Comets will face the Memphis Grizzlies in the Western Conference finals.

The victory was the Comets' 12th in a row and they have won all five games since the 1991 season.

The Comets' victory was the first in their history and they have won their last three games.

The Comets are the second team in the WNBA to win three straight titles.

The 13th Warrior Has Viking Power
By Matt White
University of Idaho Argonaut
It has been a long time since a video hit made its way to the local screen. And an even longer time since some Viking power emerged in the cinema. Now, you are looking for your next adventure. Viking action, and Vikings from the 13th Warrior could be for you.

The story behind the 13th Warrior is based on Michael Crichton's 1978 novel, The Great Train Robbery. The story features a man named Limp, a boy named Peter, and a Viking girl named Bodil. The story takes place in the early 12th century and is set in the far-out lands of Britain and Ireland. The movie could have used more action and adventure. But there is no doubt the young actors have done a great job as the Viking girl and the boy. Their expressions are believable and their lines are well-delivered.

University of Idaho video producer Kelly Quinnett is the Bakst, an independent film created in the Palouse.

Kelly Quinnett in The Basket, an independent film created in the Palouse.

Quinnett is very passionate about producing films. She is a member of the Idaho Film Commission and has worked on several projects in the Palouse.

Quinnett said that she thinks people really want to see the final product of The Basket.

The Basket is targeting its audience to the 17 and 18-year-old MTV generation. It features a group of teenagers who are struggling to fit in and are looking for an escape from their daily lives. The film is a mix of drama and comedy and is designed to appeal to teens.

Quinnett said that the movie is exciting and has a lot of great moments. She said that the film is about how teenagers deal with the pressures of school, relationships, and family. The film explores the challenges that teenagers face and how they handle them.

The film is about teenagers and their struggles. It is about how they deal with the pressures of school, relationships, and family. The film explores the challenges that teenagers face and how they handle them.

The Diary of Bridget Jones: a laugh-

laughed depiction of the life of a 30-

something London single woman. By

wished by Helen Fielding, I’ll have no

in her pink yoga pants. I fully

advantage of the fact that I love

Bridget at 37. I adored the movie. Let’s

the men's movie. Full of jokes and

Bridget is in love with a married man.

her situation. If she could only get

women. This is a perfectly

will have to be

Some say it is

The Diary of Bridget Jones: A View

from the Spiral Staircase. Written by

Helen Fielding, the book is a

look at the life of Bridget Jones, a

30-something single woman in London.

The book is a hilarious look at

the challenges and opportunities

that come with modern urban life.

Bridget’s love life is just one of the

many aspects of her life that are

explored in the book.

Bridget is a

character who

manages to

achieve balance in

her personal and professional

lives. She is a

independent

woman who

is not afraid to

follow her

heart.

The book is

full of

humor and

reality,

making it a

enjoyable read.

I highly

recommend this book to

anyone looking

for a fun and

thought-provoking read. It

is a

true
classic.
