OUR UNIVERSITY

The choices of a university or college to attend by a student should be based upon four principal requirements: 1st, a high and broad program of study; 2nd, a well-equipped instructional plant; 3rd, a sufficient equipment of faculty; 4th, a student body of high ideals. The University of Idaho fully meets these requirements.

1. Purpose and Field

Its purpose is to serve the people of Idaho in developing and training students; in advancing the entire State educational system of which it is a part; in assisting toward the solution of economic and social problems; in furnishing expert knowledge in Agriculture, Engineering, Chemistry, Home Economics, and other fields; in the extension service and all under its auspices. They are to know the State and its conditions and give such help and service to its development as will bring good and lasting results to the agricultural extension division and six agricultural county agents.

3. Equipment

Its equipment is ample. It has a library of over 25,000 volumes, excellent facilities for teaching literature, philosophy, and the natural sciences, and well-provided laboratories for the natural and applied sciences.

4. Students

Its student numbers, however, are varying from 1,000 to 1,500 in the fall of each year, with a growth rate of about 200 per cent, or an increase of 50 per cent in each succeeding year. The University of Idaho is entitled to the highest rating for the quality of instruction it offers. The University of Idaho is one of the leading universities in the nation in regard to the quality of instruction it offers.
