BLEAMASTER FORMULATES PLANS FOR INTER-GROUP BASKET BALL

OUTLOOK FOR VICTORY IN ANNUAL PULLMAN DOUBLE DEBATE IS GLOOMY

Another step toward making the campus attractive to prospective students has been taken by Professor Foster, Assistant Dean of the college, in the organization of an intramural basketball league. The league will be played for about two months, with the purpose of having some exciting basketball matches and at the same time providing a means of recreation for the students.

This season will consist of a series of matches between the various classes and the various departments of the college. The matches will be played on Friday and Saturday afternoons at 3:00 o'clock, and the winners will be determined by the number of points scored in each match.

The series will consist of a total of six matches, with the winners of each match advancing to the next round of the tournament. The winner of the final match will be declared the champion of the league.

The matches will be played on the campus field, and the games will be officiated by the college team. The matches will be played under the rules of the National Collegiate Athletic Association, and the games will be played with official equipment.

The matches will be played on the first and third Saturday of each month, with the matches to be played at 3:00 o'clock. The matches will be played under the rules of the National Collegiate Athletic Association, and the games will be played with official equipment.

President Lindley speaks at Wednesday assembly.

Under students heard a real story last Wednesday when President Lindley, exalted to the part of "The Wealth and Power of Money." Money is one of the most fascinating words in the language. Money is as such an asset to all mankind that it is more powerful than anything else. There is no argument or movement for the conservation of wealth. We are told of the material progress employed in mining, farming, financing, and manufacturing. Everywhere there is a glory of waste. But no mention has been made of the tragic waste because of the suppression of human talent.

"Wealth is whatever produces welfare or is able to add to the strength of life itself. Wealth would not exist were it not for the mind of man, for one, wrought upon by the fairy figures of the French revolutionists, may reach a value of several hundred dollars a day. Gold is not always wealth. All the history of the men in a shipwreck who heaped their gold around him and was the first to perish. Emerson said that a dollar in the hands of a stupid man deadens to a dream. I commend the Napoleonistic ambition of the woman and the man of today who are making the dollars serve their highest purpose. It is the application of intelligence that makes everybody's dollar work. Thanks to the enterprises of the larger men who have made the biggest power of a dollar what it is today. By the development of much work we have made it possible to produce a teaspoon for one dollar. The dollar has been pathfinder: they have accomplished limitless power and wealth.

"Wealth is more as intellectual and social than as natural. Good name has a dark value. "Veins of wealth are not in soil, but in flesh. That country has the most wealth that has the greatest number of good men, women, and children. What is a human life worth? The crooks have other names for this question. In terms of children the following table has been published:

<table>
<thead>
<tr>
<th>Child above one million</th>
</tr>
</thead>
<tbody>
<tr>
<td>High school pupil equals five million</td>
</tr>
</tbody>
</table>

"One college student equates twelve million; two are equaling days to reals in college as long as possible to prepare themselves to serve their country so as high as possible. One sees that colleges make into college and serves his country on a high plane. In all of his work he is of the highest level is a character of the public. Get out of the highlofted-city class by getting truly into the message of efficiency for the service. At present equal 10 per cent of the power of

"Napoleon tested once and for the possibility of the rise of race from the common man. Cleared that in any American City of 2000,000, first to get your gold United States. In this day when the spirit of fighting is striking in every life of us, let us hope that the Lauria and Grants will be released from the military service to the soil for home

"War, the final test of life's firesworks, brings with it great responsibilities. Nature says: "Follow the needs of the country and you will give power and confidence, all right—up ahead. But are you cultivating just because you do not want to be discards and there by perhaps altering your chances for the life that you have been pathfinder, they have accomplished limitless power and wealth.
