The University Argonaut
The University of Idaho is operating on a peace basis. In facing the new problems that confront the state and the nation, the University is giving—as it has in the past—to its utmost of time and energy. The training of men and women on the campus of the university is proceeding with the same enthusiasm as the training of soldiers. The University can help explain the critical state of the special technical problems that confront the state. Write for information to the Dean of the College of Forestry, Mines, Engineering, Agriculture, and Art, or Letters and Science.

**INTERESTING SEX DIFFERENCES IN GRADUATIONS—UNIVERSITY YEARS**

The department of Psychology has given intelligence tests to 315 students. The results prove that the average man and woman are a great deal higher in mental matter than is generally supposed. This is to be expected when we consider that the women are in the great majority of homes representing the highest 45 per cent.

The distribution of scores made by the University of Idaho students is practically the same as that of the D. T. I. normals: 35 per cent A, 30 per cent B, 30 per cent C and 5 per cent C.

Max Grade Highest.

The men's tests show some interesting differences. 40 per cent of the men were A's & grades as compared with 30 per cent of the women. The highest score made by a woman was in the 80's. The highest score made by a man was in the 90's. The score 1,000 was reached in the 90's. The women's scores were in the 90's. The highest score made by a man was in the 90's. It is very difficult to explain, but laboratory experiment shows that the sex difference is due to the peculiar nature of the sex hormones in quick movement and quick thinking.

Same as Army Test.

The girls were the same as those given to the men in the army. The men's and women's officers were graded into seven classes: A, B, C plus, C, C-, D, D- minus average intelligence, C plus, high average; B superior, and A very superior. The meeting of the two groups was arranged by them to examine the results from 661 Idaho soldiers from the various training camps who had taken the tests.
