President A. H. Upman
Addressee Faculty Body
Editors: Changes in Administative Policy
Hoping for Work-End Project

In this address, President Upman discusses the significance of changes in administrative policy and the hope for a work-end project. He mentions that the changes will be beneficial for the student body and the university as a whole. The hope for a work-end project is mentioned as a way to improve the overall quality of the university and its programs.

CAMPUS SPRUCED UP FOR NEW ARRIVALS

WOMEN'S BATHROOMS OVERHAULED, ALL BUILDING AND ROOM LABS REARRANGED

Many changes and improvements have been made during the current session in the buildings on the campus. The library has been moved to the north wing, where more study space has been provided. The stages, Wawlor, Walter C. Opy, and the two rooms in the new library have been made into class rooms and the rooms given to the

The new facilities occupied by the Department of English and the women's rec room have been rearranged and made into a laboratory for the Department of Home Economics.

A film women's rec room has been provided in the north wing. The work in biology will be largely transferred to the Annex building. Two rooms on the third floor for other

Many changes are being made in the old class rooms, in preparation for occupying the new north wing of the administrative building. Rooms of the physics, chemistry, and biology departments are being

Since the stacks on the first floor of the new wing are nearly ready for the opening of the university library of 16,000 volumes, which is expected to be the biggest lake of the nation. The books will be shelved on the first floor and are now being placed in the stacks. The library is expected to be a part of the present quarters of the present library at the current floor. A special periodical room, in quarters formerly occupied by the physics lecture room, will be a new feature of library accommodations.

A big battery of furnaces is being erected from the main building, which will be connected into a main stack and also from the basement for the department of physics. Present quarters of the woodworking department and the former classrooms of the third floor of the Administration
