That Joysome Occasion

LETTER months of the year is so relentlessly and unhesitatingly

After the mirth and laughter, the jocund songs and festivities of the festive occasions are over, the heart of the individual is left with a feeling of contentment and satisfaction. The days are longer, the weather is warmer, and the spirit of the people is lifted.

It is during this period that the spirit of cheerfulness and joy prevails. The days are filled with laughter and gaiety, and the hearts of the people are uplifted by the joyous occasions.

An underground dive to which the initiated are admitted by a gnomes was the setting for the season opening dance of the Sigma Chi. The dance was held in the basement of the fraternity house on Friday evening. Scores of stars from the campus and many guests from beyond the campus joined in the fun. One of the highlights of the evening was the appearance of the gnomes who, in their traditional costumes, led the dance through the doors of the house.

The Sigma Chi dance was the first in a series of dances scheduled for the semester. The next dance is scheduled for Saturday, with the Phi Delta Theta dance to follow on Thursday night. The Phi Delta Theta dance is expected to be one of the most popular, with its traditional Apple-Cider theme. The Sigma Chi dance, on the other hand, was a more intimate gathering, with its small, cozy atmosphere.

After the dance, the gnomes led the guests to the front of the house, where they enjoyed a treat that was placed upon the grounds. This treat, known as a "gnome bite," was a small, sweet cake that was enjoyed by all. The gnomes then led the guests to the dance floor, where they enjoyed a night of music and dance.

The Sigma Chi dance was a great success, with many guests expressing their enjoyment of the event. The gnomes were a particular hit, with their unique costumes and charming personalities. The dance was a great way to start the season, and many guests looked forward to the next one.

Telephony knows no barriers

Telephone lines must cross natural barriers. This means construction methods must be flexible, readily varied to peculiar local conditions.

Special problems arise, too, in telephone laboratory, factory and central office. How to prepore poles from insect attack? How to develop more compact equipment for use in manholes? How to assure a sufficient number of trained operators? How to build long distance businesses?

It takes resourcefulness to find the answers, to surmount the barriers. There is no stereotyped way.
