GOOD DAYS—MAYBE?

F. L. Obedtich, university censor, advised the Argonaut staff yesterday that the next two weeks are going to be a real test for him and the Argonaut staff. The weather is fair and there are no black clouds on the horizon. The hope is that the weather will be similar for the next two weeks.

Making telephone equipment presents many interesting problems to the engineers of Western Electric—manufacturer for the Bell System.

A case in point is the drying of telephone cables before putting on the protective lead sheath. This step is of utmost importance, for the tiny copper wires cannot carry maria circuit properly unless their paper insulation is thoroughly dried. To this end, Western Electric engineers devised special drying ovens in which the air is slowly heated until the oven is heated.

The same ingenuity and thoroughness go into every step of making cables, telephones, switchboards and many other kinds of telephone equipment. The dependable apparatus that results is one reason why Bell System service is dependable.
