In honor of the Volunteers of Pennsylvania and Mississippi's work by a concert

MacArthur's Quizzing Society

DOOLITTLE'S QUINNEY PROFESSIONAL

Last Friday evening the Science Club listened to an extremely interesting lecture by Professor Lingenfelter of the University Department. Professor Lingenfelter is a member of the Biological Society of the University of Wisconsin, and the lecture was on "The Problems of the Evolution of Animals." He explained the various theories of evolution, including those of Darwin and Huxley, and the evidence which supports them. He also discussed the problems of classifying organisms and the methods used by biologists. The lecture was well-received by the audience and was a great success.

UNIVERSITY OF IOWA, DES MOINES, TUESDAY, FEBRUARY 1, 1916

W. S. C. HANDS IDAHO DOUBLE TRIMMING

Sheep's Man Compiled by Law

The course was 27-25 and 25-23 in favor of Idaho, but despite this being a single elimination tournament for the first time, Idaho was still able to make it to the final round. Idaho's score of 27-25 was a surprise to many, as they were expected to lose to Oregon. However, Idaho's defense was able to hold Oregon to a score of only 25-23, which allowed Idaho to advance to the final round.

LIVINGSTON SPEAKS AT CHAMBER OF COMMERCE

One of the chief addresses of the day was given by Professor L. S. Livingston, head of the Department of Chemistry of the University of Oregon. His topic was "Chemistry in the Manufacturing of Textiles." He discussed the history of the textile industry and the importance of chemistry in its development. He also explained the various processes involved in manufacturing textiles and the chemical reactions that occur during these processes. The address was well-received by the audience and was a great success.

COLLEGE DELEGATES MEET AT PULLMAN

College delegates from the University of Oregon, University of Washington, and University of Idaho met at Pullman for a conference on educational matters. The delegates discussed the various problems facing higher education and agreed on the need for further research and development in this field. The conference was a great success and was widely acclaimed.

SPEAKING OF THE WEEK

The following are the lunch addresses:

Haniya G. W.C.

Professor Lingenfelter's lecture was a great success and was widely acclaimed. The audience was well-informed and many questions were asked. Professor Lingenfelter's explanation of the evolution of animals was very clear and the evidence he presented was very convincing. The lecture was a great success and is highly recommended.

E. F. B., 1st Quart., 1916

The object of the foundation is to provide scholarships for students of outstanding merit.

DEPARTMENT OF Bacteriology

One of the chief concerns of the Department of Bacteriology is the study of the effects of light on the growth of bacteria. The department has been conducting experiments on the growth of bacteria in the presence and absence of light. The results of these experiments have been very interesting and have shown that light has a significant effect on the growth of bacteria. The department is now working on a more detailed study of these effects and is making great progress.

THE UNIVERSITY ARGUS

K. H. SCHOLARSHIP CUP

The K. H. Scholarship Cup has been awarded to students of outstanding merit. The cup is awarded to students who have shown exceptional ability in their studies and who have demonstrated their ability to contribute to the advancement of knowledge in their field.

In the University of Oregon, the K. H. Scholarship Cup has been awarded to students of outstanding merit. The cup is awarded to students who have shown exceptional ability in their studies and who have demonstrated their ability to contribute to the advancement of knowledge in their field.
