**Why Go To Idaho**

The choice of a university or college to be attended by a student should be based upon four principal requirements: I. a high pur-
pose and broad field of work; 3d, a competent faculty; 3d, a sufficient equipment; 4th, a student body of like ideals. The University of Idaho fully satisfies these requirements.

I. Purpose and Field—

To serve the people of Idaho in developing and training students; in advancing the entire State educational system of which it is a part; in assisting toward the solution of economic and social problems; in furnishing expert knowledge in Agriculture, Engineering, Forestry, Home Economics, and Educational matters not only to students in residence but also to all who desire it through the State.

II. Faculty—

The faculty is made up of eighty-three teachers of those training and efficiency attained by years of study and experience. They are deeply interested in the progress of each and all under their instruction and give their best efforts to its development. In addition there are fifteen workers in the agricultural extension division and six agricultural county agents.

III. Equipment—

It has a library of over 20,000 vol-
umes, excellent facilities for teaching, Literature, Philosophy, and the Social Sciences, and well provided laboratories for the natural and applied sciences.

IV. Students—

Its students, numbering eight hundred and seven in the present school year, 1915-1916, are earnest, wide-awake, and democratic. A large number of them earn their own way. Its alumni now occupy high positions and will be the future leaders of Idaho in professions, the industrial vocations, and in the building and main-
tenance of homes.

The four colleges and the central agricultural experiment station are located at Moscow; the main agricultural extension office is located at Boise, and the agricultural sub-stations and demonstration farms at Sandpoint, Clagston, Cashmere, Moscow, Gooding, and Aberdeen.
