Why Go to "Idaho"

The choral of a university or college to be attended should be based upon four principal requirements: 1) a high purpose and broad field of work; 2) a competent faculty; 3) a sufficient equipment; 4) a student body of high ideals. The University of Idaho fully satisfies these requirements.

1. Purpose and Field—It is purpose to serve the people of Idaho in developing and training students; in advancing the entire state educational system of which it is a part; in assisting toward the solution of economic and social problems; in furnishing expert knowledge in Agriculture, Engineering, Forestry, Mining, Home Economics, Law and Medicine. It is to serve the students in residence but also to all who desire it throughout the State.

2. Faculty—The faculty is made up of eighty-three teachers of courses in training and instruction. They are deeply imbedded in the progress of each and every student; they instruct, guide, advise, and assist in every way to develop their best. In addition there are fifteen workers in the agricultural extension division and fifteen county agent workers.

3. Equipment—It is ample. It has a library of over 20,000 volumes, excellent facilities teaching literature, philosophy, and the social sciences, and well equipped laboratories for the natural and applied sciences and for the technologies.

4. The students—The students numbered one thousand and nine in the school year of 1916-1917 and were widely distributed, well informed, and democratic. A large number of them earned their own way. Its alumni now occupy high positions and prominent places in every line of business, the industrial voca-
tions, and in the building and maintenance of homes.

The six colleges and the central agricultural extension station are

Della Garner announces the pledge of Virginia Haim Littlejohn.

Miss Gertrude McCall of Lewiston was a Clarksdale High guest all week.

The Misses Olivia Chamberlain, Texie Johnson, Marie Jerrard, and George Chell were Haines High guests Wednesday night.

Lieutenant Paller felt outlined the different kinds of artillery, and the efficiency of affairs weapons. They were trained to be a great deal of the field pieces, and then the importance of speed of which to the position. However, the importance of position was that the artillery must also be the preparation of this in this great field. This was an example of the Kaysa house, and the position of the Gurney's house.
