DEATHS RESULT FROM SPANISH FLU

There are now a total of three confirmed cases of Spanish flu at the University of Idaho. The cases are among the 10 students living in the residence halls, and one of them is among the faculty members.

One of the students is a sophomore from the Northwest who was admitted to the hospital with a high fever and severe respiratory distress. The other two cases are among the faculty members, one of whom is a professor of English and the other is a professor of mathematics. Both faculty members are in critical condition and have been placed in the intensive care unit.

The third case is a freshman from the Northwest who was admitted to the hospital yesterday with a high fever and coughing. The student is in stable condition and is expected to recover.

The University has activated its emergency response plan and is working closely with the local health department to contain the outbreak. All students and employees are being encouraged to practice good hygiene by washing their hands frequently, wearing masks in public places, and avoiding close contact with people who are sick.

FOOTBALL SCHEDULE IS UPSET, SCHEDULES OF OTHER CAMPUS EVENTS/ion

The football schedule for the upcoming season has been upset, and the University is working to reschedule the games.

The University has announced that the football team will not participate in any games until further notice. The team had been scheduled to play games against several other universities, but due to the outbreak of Spanish flu, the games have been postponed.

The University is also working to reschedule other campus events that were scheduled to take place during this time. The activities include concerts, lectures, and other events.

MUSIC SCHOOL GROWS, BLUES CEELED FRIENDLY

The music school at the University is growing, and the school is welcoming new students to its program.

The school has announced that it is adding new programs to its curriculum, including courses in music theory, composition, and performance. The school is also expanding its faculty, with new faculty members joining the institution.

The University is committed to providing a quality education to its students, and it is working to improve its music programs to meet the needs of its students.

S. A. T. C. MEN VACINATED AGAIN

The men's basketball team has been vaccinated against Spanish flu.

The team received the first dose of the vaccine yesterday, and it is scheduled to receive a second dose in two weeks. The team has been working closely with the University's medical staff to ensure that it is prepared for the upcoming season.

The University is committed to providing a safe and healthy environment for its students and employees, and it is working to prevent the spread of the disease by vaccinating those who are at risk.

FLU IS ON THE WANE IN SECT. B BARRACKS

The flu is on the wane in Section B barracks, and the majority of the men there are reporting that they are feeling better.

The University has been working closely with the local health department to contain the outbreak, and it has been successful in reducing the number of cases.

The University is still monitoring the situation, and it is working to ensure that the men are healthy and well-rested.

MILITARY POLICY "SHO" AWAY SUSPECTS FROM CAMPS

The military policy has been changed to exclude anyone from the camps who is suspected of having Spanish flu.

The military has announced that it is working closely with the local health department to ensure that the camps are safe and healthy.

The military is committed to providing a safe and healthy environment for its personnel, and it is working to prevent the spread of the disease by excluding those who are at risk.

EVERYBODY MUST WEAR FLU MASKS WASHINGTON ORDERS SUBSYSTEMS

Orders for everyone to wear flu masks have been issued by local officials.

Local officials have been working closely with the University to ensure that the students and employees are healthy and well-rested.

The University is committed to providing a safe and healthy environment for its students and employees, and it is working to prevent the spread of the disease by issuing orders to wear masks.

FLUSH OUT THE DISEASE-SPECIFIC VACCINES VOLUME XX

The University is working on developing specific vaccines to combat the disease.

The University has announced that it is working closely with the local health department to develop vaccines that are specific to the disease.

The University is committed to providing a safe and healthy environment for its students and employees, and it is working to prevent the spread of the disease by developing vaccines that are specific to the disease.
THE UNIVERSITY ANONYMOUS

Published Every Week by the Associated Students of the University.

Price: Per year, $2.50; except subscribers through the United States, which are $4.00.

Target: The opinion of Missouri, as Speed Clear Head Matter.

The students of the University have established this weekly to express the sentiments of those members of the B. A. C. who now serve in the second made to wear their hats in the temple. Despite the dark cloud which is hanging over us, we must consider ourselves extremely fortunate in being the students of the best university in the United States. Conditions are constantly improving, and the future is promising. The sentiment of President Lindley and his associates is that of the University is to be splintered with cooperation that has always been fostered among the students, and the students to be one in thought of spirit of service. The old and new students are the students to express to them our deep gratefulness.

But for the sake of loyalty it is missle recognition being aimed every day. We are growing weak in this circumstance. Last fall is growing stronger and stronger. Some may return to the "old glory" and we have a better chance than the rest. There is no better way to show the President and the Faculty that your songs and yells. Let us go at it.

CLEVER ARTIST JOINS S. A. T. C.

E. J. MILLER OF IOWA FALLS CALLS AT COLUMBIA.

A young artist who is to have a tentative for the Associated Students of the University is the S. A. T. C. of the University. Miller is a young artist who is a young student at the University. Baker Miller has already shown able and clever work to the students of the University. Baker Miller is a student who is a young student at the University. Baker Miller has already shown able and clever work to the students of the University.

Edward J. Miller is a student of Iowa Falls and has been in the army. Miller has been in the army and has been in the army. Miller has been in the army.

During this time he has been illustrating the Tribune and Daily Signet, which is a student of Iowa Falls and has been in the army.

The University is interested in having this young man join the S. A. T. C. and looks for some success in the future.

From Revelle to 6 A. M. at Taps at 10 P. M., the University of Idaho is devoted to war service. This does not mean that the colleges of the University, agriculture, engineering and law or the schools of mines and forestry have ceased to exist, or that the experiment stations in agriculture, mining and the like have stopped their work; but it does mean that each of these organizations of mining, enlisted for the war as well as the present and continuous period must inevitably follow it.

MOSCOW PEOPLE CURE THE SICK

Victims of influenza are being cared for here better than elsewhere.

Professor Lewis, who is chairman of the committee on health and nutrition, called a meeting of the president and other officials of the hospital. He warned the nation not to underestimate the severity of the disease. Great credit is due to Captain Folker, commanding officer of the medical unit of the hospital, for his prompt and effective action. The medical staff is too aware of the threat that influenza is bringing to the country, and they are determined to give it the best care possible.

The system of caring for the sick has been improved greatly. The medical staff has increased its number of nurses and doctors. The hospital has received donations from various sources, including some from private individuals. The hospital has also been given a new building by the local government.

The hospital is doing everything possible to prevent the spread of the disease. It has been closed to visitors and only essential personnel are allowed in the premises.

The hospital has been doing a good job in caring for the sick. The medical staff is doing their best to provide the best care possible. THE HORSE STILL HAS A FUTURE

By John H. Gill

If one takes seriously the rather extravagant claims of some advocates of the tractor, the future of the horse is not at all assured. One hears of ten-ton outfits, in which the horse is represented as the efficient and economical unit. In the farmers' field, it is claimed, the horse can do the work of three men.

The facts of the case are that a single horse can do the work of two men, and that the horse still has a future in the field of agriculture.

The horse is one of the easiest and most economical animals, and has been a favorite for 3,000 years. The average survey of the entire problem of farm power shows that the horse is the cheapest and best beast of burden for the average farmer.

Several conservative students of farm mechanics of today believe in the supplementary of men over the tractor, but regard the horse as a fine.
