SOUTHWICK SPEAKS AT CHAPEL TUESDAY

"Theodore Roosevelt" Subject of Address by Boston Oratory Club.

President Henry L. Southwick of the Birmingham, Alabama, chapter of the Boston Oratory Club will lecture on Theodore Roosevelt Tuesday, October 24 at 11:00 a.m. in the Chapel of the University. President Southwick has been at Southwick several times giving a reading of the President's writings here two years ago.

In speaking of him President Lindley said, "I remember years ago hearing President Southwick and President Lindley address us on "Theodore Roosevelt." It is also interesting to know that there were then only 16 students in the SES."

Professor Bolen blues to car owner who drives his speed on the motor vehicles. This is the second time he has been interested in playing the piano, and is an expert tennis player.

Mrs. Alouette's New Name

A new name for some students of the University was recently announced. It is Mrs. Alouette, whose husband was killed in the last war. The new name is given as a token of respect for him. It is also thought that the new name will be more in keeping with the University's policy of giving women students more prominent names.

Yale Blood Spill
When War Breaks

WOUNDED IN CAMPAIGN

The long-haired, wild-eyed, adolescent survivor of the recent fist-fighting at Yale's Harkness Hall, being treated at the Yale Hospital today, is the student of the course. The victim, a member of one of the several Yale groups involved in the fracas, suffered a punctured eye and a broken nose. His name, however, was not immediately disclosed, as the hospital authorities withheld it pending the result of an investigation to determine his identity.

What Minds

"I hate war," said Mr. Roosevelt, "but I think it is a matter of fact which is not subject to discussion. It is a matter of fact that war is on the cards, and that we are preparing for it."

Professor Roosevelt presses to make the"..." in a society, which is b...ting recognized as one of the... foundations for social reform. This is... the facts in regard to the... situation, one can do nothing... until he knows the facts. Truth...".

The UNIVERSITY of IDAHO

Established in Eighteen Hundred and Eighty-nine.

The COLLEGE OF LETTERS AND SCIENCE
THE COLLEGE OF ENGINEERING
THE COLLEGE OF LAW
THE SCHOOL OF MINES
THE SCHOOL OF FORESTRY
THE SUB-STATION OF THE BUREAU OF MINES
THE EXTENSION DIVISION, BOISE
THE AGRICULTURAL EXPERIMENT STATION

MOSCOW
Sandpoint, Caldwell, Aberdeen, Felt

Why Go to "Idaho"

The choice of a university or college to be attended should be based upon four principal requirements: 1st, a high and broad field of work; 2nd, a competent faculty; 3rd, a sufficient equipment; 4th, a student body of high ideals. The University of Idaho fully satisfies these requirements.

1. Purpose and Field—
Its purpose is to serve the people of Idaho in developing and training students; in advancing the entire State educational system of which it is a part; in assisting toward the solution of economic and social problems; in furnishing expert knowledge in Agriculture, Engineering, Forestry, Mining, Home Economics, Law, and Educational matters not only to students in residence but also to all who desire it throughout the State.

2. Faculty—
The faculty is made up of eighty-three teachers of thorough training and efficiency attained by years of study and experience. They are deeply interested in the progress of each and all under their instruction. They know the State and its conditions and give their best efforts to its development. In addition there are more than seventy workers in the agricultural extension division and fifteen agricultural county agents.

3. Equipment—
Exterior equipment is ample. It has a library of over 40,000 volumes, excellent facilities for teaching literature, philosophy, and the social sciences, and well provided laboratories for the natural and applied sciences and for the technologies.

4. Students—
The students are earnest, wide-awake, and democratic. A large number of them earn their own way. Its alumni now occupy high positions and will be the future leaders of Idaho in professions, the industrial vocations, and in the building and maintenance of homes.

The six colleges, the central agricultural experiment station and the sub-station of the U. S. Bureau of Mines are located at Moscow; the main agricultural extension office is Boise, and the agricultural sub-stations and demonstration farms at Caldwell, Sandpoint, Monocow, Aberdeen and Felt.

Aims to Develop Idaho Mining Resource

The new State Bureau of Mines and Geology, provided for by the last session of the legislature, will be organization meeting at Boise recently. The Board of Control for the Board consists of the following: Hon. D. W. Davis, Governor, ex-officio chairman; Robert N. Bell, State Mine Inspector; and Dr. C. L. Lengright, head of Department of Geology, University of Idaho; James J. Day, President Idaho Mining Association, also a member of the board, and Dr. W. E. Thomson, of the Board's office.

Practically all of the Bureau's appropriation will be used in cooperation with the U. S. Government in the expenditure of $10,000 per year, in the State of Idaho. $2,500 is appropriated to work with the U. S. Bureau of Mines in the investigation of the Idaho coal fields, with a view to determine the position and extent of the mineral resources of the State. A portion of this will probably be spent in cooperation with the U. S. Geological Survey.

Among the projects already supported by the Bureau are the following: a topographical survey of the Tuttle Coal Field, with a view to determine the position of the coal resources of the region.

The topographical survey will also be made of the known deposits of coal as a basis for detailed geological investigations of the copper resources of the region.

As indicating the general policy of the Bureau, is the following resolution:

WHEREAS the mineral industry of the State of Idaho is of vital importance to the commerce and well-being of the State, and that large expenditures of time and money should be spent in determining the position and extent of the mineral resources of the State, and

THEREFORE, it is resolved that the policy of this Board in this respect be to make topographical and geological surveys of the known deposits of coal and copper in the State, in order to determine the position and extent of the mineral resources of the State.

The University of Idaho boys rank near the top of all of those from both large and small colleges, and have been made of an important part in the past year, according to the statement made by Dean A. C. Chumney, of the 31st Infantry.

Colonel Cummings stated that the University of Idaho boys, who belonged to other organizations, were frequently absent from their duties. This was the result of the fact that the University of Idaho boys had been made of an important part in the past year, according to the statement made by Dean A. C. Chumney, of the 31st Infantry.

"The University of Idaho boys, who have been made of an important part in the past year, according to the statement made by Dean A. C. Chumney, of the 31st Infantry, are deserving of the highest praise. They have been made of an important part in the past year, according to the statement made by Dean A. C. Chumney, of the 31st Infantry, and have been made of an important part in the past year, according to the statement made by Dean A. C. Chumney, of the 31st Infantry.
