Work for the majority of students, the hardest battle of the year. After two month's work, students from every corner of the country have made many friends and have arm wrestled, shot put, or thrown the javelin to win. What was once a game to them is now a chance to gain recognition and gain popularity. At the same time, students have spent many hours writing reports and doing research. These reports are a testament to their hard work and dedication.

DANCE TUESDAY EVENING
JUNE 25

Dance is a way for students to express their emotions and to relieve stress. It is a way to come together and share their experiences. It is the perfect way to unwind after a long day of classes.

On Tuesday evening, the dance floor will be alive with music and movement. Students will be able to dance the night away with their friends. The music will be upbeat and fun, and the dance floor will be filled with people.

This dance is open to all students who want to come and have a good time. It is a great way to meet new people and to enjoy the company of old friends.

So come out and join in the fun. It will be a night to remember.
