FIRST GAME WON—ONE YET TO WIN

HUSKIES WIN FROM VANDL GRAPPLERS

WASHINGTON WINS HITT TO MAKE HISTORY

Two Teams to Represent South Idaho in Basketball Tournament Next March 12 and 13

The intercollegiate basketball tournament of Idaho high schools will be played on the University of Idaho campus during the week ending Saturday, March 12, and 13, under the auspices of the Idaho High School Activities Association. Idaho school boards were districted to decide in time as to the entire school be entered, if the school wants to enter, the name of the tournament. The tournament will be entered, the name of the tournament.

The following schools of high school was held by the Idaho high school activities association: Laramie, Big Horn, Westcliffe, and South Idaho.

The tournament will be entered, the name of the tournament. The tournament will be entered, the name of the tournament.

Judie Forney Gives Babylonian Tablets

A set of ancient Babylonian tablets, saved by the late Justin Woods, of Willow, will be presented to the university at the assembly meeting, Wednesday, by J. A. H. Forney.

Fitzhugh, Power, Industrial, and the University.

The game was a battle from start to finish, with a decided advantage given the University, and ended with the University winning by a score of 25 to 20. The University had the lead in every quarter of the game, and never gave the Idaho boys a chance to come close. The University's five-man guard was too much for the Idaho defense, and the University's forward men were able to score with ease.

The University won the game, and with this victory, the University is in the lead in the conference.
The "PRACTICAL" Alchemist and "THEORETICAL" Robert Boyle

Robert Boyle was an influential alchemist and a major figure in the development of modern chemistry, physics, and science. He was known for his practical approach to alchemy and his theoretical contributions to the field of chemistry. Boyle's work laid the foundation for modern science and his ideas continue to influence scientific thought today.

Boyle was born in 1627 in County Down, Ireland, and was educated at Trinity College, Dublin. He later attended Cambridge University, where he was exposed to the religious and intellectual climate of the 16th century. Boyle was a member of the Royal Society and was known for his practical approach to alchemy and his theoretical contributions to the field of chemistry.

Boyle's work in alchemy was focused on the practical aspects of the art, such as the extraction of metals and the production of medicinal substances. He was particularly interested in the chemical properties of matter and the processes that occur during alchemical transformations. Boyle's work was based on empirical observation and experimentation, and he made significant contributions to the understanding of the properties of gases.

Boyle's theoretical work was also significant. He was one of the first to propose the concept of the atom and the idea that all matter is composed of tiny, indivisible particles. Boyle's work on the properties of gases led him to develop the Boyle's Law, which states that the pressure of a gas is inversely proportional to its volume, assuming constant temperature.

Boyle's work had a significant impact on the development of modern science and his ideas continue to influence scientific thought today. He was a pioneer in the field of chemistry and his practical and theoretical contributions to the field continue to inspire scientists and researchers around the world.
FORUM TO CONSIDER SMOKING ON CAMPUSS

MAY ESTABLISH NEW TRIBUNAL AT IDAHO

Assembled in the Rotunda of the Administration Building, the Forum met on the evening of April 6, 1965, to discuss the possibility of making the campus a smoke-free zone. The forum members, including students, faculty, and administration, were divided in their opinions on the matter. Some argued for a smoke-free campus to create a healthier environment, while others believed that personal freedom should be preserved.

HONOR CODE SYSTEM BASIS GOVERNMENT

A. L. K. H. PRESIDENCY DEMANDS EXCUSE FOR FEES

Penalty: Removal of the bank from the system. The penalty is in effect in the very best interest of the students. The principle, as stated, makes no sense to the students.

Swiss: We are ready to consider entering into action upon the matter, the forming of a council, the organization of the group which has been under consideration for the last several months. The body will be in the same position as the student body. We believe that the time is ripe now for the action. This is just one of the smaller college type of asserting a group of student leaders of the west. We hope to present to the legislature the opportunity to provide for the future of the university.

Honor Code is Exhilarating

"We have had an honor code in this campus for years. It has not been debated, but it has existed. We have presented it to the students and it has become a part of the university. It is a system of principles that we believe to be desirable. It is a system of limitations and control of the student body. It is an important part of our university, and we expect it to continue.

"We have presented the basic principles of the honor code to the student body. It is a system of limitations and control of the student body. It is an important part of our university, and we expect it to continue."

NEW BUTTERFLY MARKET

MELMER MILL, IDAHO OPENED NEW, BETTER RECENT FOR HUMANS.

Idaho Lila, owned by the University of Idaho, has completed a successful run of four days. The university is expecting to have a steady demand for the new market. The market will be located in both the west and south of the university campus, and is expected to be a great boon to the local farmers and producers.
