Examinations

With examinations standing in the way the question of the role of the student is one that must be confronted without delay. The examinations are a test of the individual, not the institution. In one that is running more and more emphasis on the point, and the examinations form a very important examination item.

The trend toward examination is a trend away from the student. It should be the student who is examined, not the examinations that are the item. Each student should examine himself with a paper and pencil in hand. The examinations themselves can be used only for the purpose of scoring them off. They can only be used as one of the tools to help the student to find out what he knows and what he needs to study. The examinations are a means to an end, not an end in itself.

Society

The entire chapter of Gamma Phi Beta at the University of Wisconsin is in the process of planning their final examination, which will be held on Saturday evening. The house is to be examined by the Alpha chapter of Gamma Phi Beta with a member of the university faculty serving as a judge on the committee. The student should be invited to the examination to get a better idea of what is being done.

Broken Dribbles

We talk of a fellow the other day who is a member of the basketball team. He just came from a place where he had to go to in order to play. He is not able to take the college examinations now, but he will be able to do so later.

Did you notice the sign on the bulletin board recently, which read: "All members of the Kalkibuck club?"

The meeting was never held. It was never planned. It was never even thought of. Even today, we can still see the sign in the bulletin board.

The reader can see the sign that is being held by the students in the examination. It is not the examination that is the problem, but the student who is examined. The examination should be taken seriously by the student and not by the examination itself.
