FRESHMEN GIVEN VOCATIONAL TIPS

Psychology Department Head Advises Students on Choice of Professions.

Should freshmen be vocational? Are they certain of their training? Should they have control of their school curriculum? These are questions that many freshmen have been asking of their counselors, and James Leiber, chairman of the Psychology Department, was asked recently by freshmen at the University of Idaho.

Leiber stressed the importance of choosing the right profession and the need for freshers to get to know their own ability. He stated that every student should have a chance to learn more about their abilities and interests before deciding on a profession.

Leiber pointed out that the best way to choose a profession is to find out what you enjoy doing and what you are good at. He recommended that freshmen take a vocational test to help them make this decision.

In conclusion, Leiber advised freshmen to take their time and make a well-informed decision about their future profession. He emphasized that choosing the right profession is one of the most important decisions a student can make.
**SIGMA CHI HOME NEARLY FINISHED**

Cold Weather Not Stopping Work at Sigma Chi

Work on the new Sigma Chi fraternity house being built on Idaho Avenue adjacent to the campus is progressing rapidly, and the building should be ready for occupancy within another month, the contractor states.

Outside the frame of the partially completed house, the work itself is being radiated as rapidly as possible. The walls are being supported as foundation is laid under heat, being kept up during the present cold spell until work has been unbroken.

The building is under the care of Mr. Bertrand, the superintendent of this division. It is a special feature being constructed for the Sigma Chi fraternity, a new house for the house is being placed in the living room of unusual size. 

Bertrand, Warren, a college student, designed the house, while the Colonial Construction company of Spokane was the contractor.

IDAHO SLOW IN DEVELOPMENT OF POWER RESOURCES

Gem State Ranks Fourth in Potential for Development of New Resources of Natural Energy Yet Unchested

The states of the nation is potential wealth in the field of development of new resources of natural energy, yet unchested. Among the states of the nation, Idaho is in the fourth position, according to a report of the War Department, based on the war engineering, in the December 1927 issue of the Journal of the National Academy of Sciences, which is the leading authority in the field of natural energy development. The report indicates that Idaho has the potential to develop an extensive power industry, with a potential capacity of over 1 million kilowatts, which would make it one of the leading states in the nation in terms of power development. However, the report also notes that the state has not made significant progress in developing its power resources, and that there is a need for more concerted efforts to promote the development of natural energy in the state.

FRATERNITY WILL MEET TOMORROW

Purpose Is to Interest College and High Schools in Brannen's

A meeting of the Fraternity and Sorority members will be held tomorrow (Thursday) at 7:30 p.m. in the Fraternity House. The purpose of the meeting is to raise funds for the Fraternity and Sorority members of the university, including those who have graduated from the university. The meeting will include a discussion of the activities of the Fraternity and Sorority members, and the procedures for joining the Fraternity and Sorority. The meeting will be open to the public, and all interested students are encouraged to attend.

SINGLE LEAVES SATURDAY

The Christmas special for South High will be mailed Saturday night. It will be ready for mailing at 9:30 p.m. and will be delivered the following day. The special will include a variety of items, including cards, calendars, and gifts. The special will be produced by the South High press, and will be distributed to students and alumni.

THE MIDDLE PAST

Clara T. Hiney, a former Hempstead resident, has been named the new Likely High School principal. Ms. Hiney has extensive experience in education, including years of teaching and administrative positions in the Hempstead school district. Her appointment as principal is a testament to her commitment to the education of students and her passion for the field of education.

IMPRESSIONS

On the basis of the current situation, we made some changes to our plans for the upcoming season. We have decided to focus on a more detailed analysis of the market and to adjust our strategies accordingly. We believe that these changes will help us to achieve our goals more effectively.

Excavating by Explosives Power

DIGGING IN the earth has been practiced by mankind for centuries, and the modern method of excavation by explosives is no exception. The use of explosives for digging has been made possible by the development of powerful dynamite and other high explosives. The use of explosives has been particularly effective in digging large tunnels, such as those used in the construction of subway systems and power plants.
