TWO TOP CLASSES PUT HEAVY LOAD ON FACULTY TIME

It takes Thrice the Work to Teach a Senior That a Professor has 'something to say'...especially when it comes to Figures From the Past.

It takes three times as much work to teach a senior as it takes to teach a freshman. A professor of history is asked to put three times as much effort into his courses for seniors as he is for freshmen.

In the physical world, students are asked to do more work for seniors as they are for freshmen. A professor of history is asked to put three times as much effort into his courses for seniors as he is for freshmen. The professors of history are asked to put this extra effort into their courses for seniors in order to make them more effective and more interesting.
