Is This Your Organization?

It is a well known fact that man will not tolerate the dictatorship of any organization that he does not believe in or sees as disloyal or oppressive. A good example of this is the recent dictatorial attitude of some of the students on the campus.

The question is, what is the condition of anxiety that exists in the school? An example may be cited where a clique or faction has been completely opposed to an organized group. This faction may have been in existence for a period of at least 2 years, and yet if present conditions persist, the faction will not be eliminated.

The method of preventing this type of problem is simple, explain this. The president of the present student body will need to take an active interest in the program, in the organization, in the meetings, and in the activities of the group. In this way, the organization will be given the opportunity to grow and develop. If the organization is not given the opportunity to grow and develop, it will not be able to fulfill its purpose.

Discipline must be an integral part of the program, in the organization, in the meetings, and in the activities of the group. In this way, the organization will be given the opportunity to grow and develop. If the organization is not given the opportunity to grow and develop, it will not be able to fulfill its purpose.
