Sudden Death Takes Professor Stump

Sudden death yesterday claimed George Stump, assistant professor of music, from a heart attack suffered during the 1st period, while he was leading his class in practice. Despite the suddenness of the end, Professor Stump always seemed to have had a heart attack before. He was found dead in the music room, where he had been conducting the class in practice. The cause of death was heart attack, brought on by secondary effects of smoking.

Despite the fact that Professor Stump had not been in good health for some time, his death came as a shock to his students and colleagues. Professor Stump was known for his dedication to his music students and his efforts to improve the music program at the university. There’s No Great News About Cigarette Tobaccos

There are four types of tobacco found in the more popular cigarettes, namely, Bright, Maryland, Burley and Turkish.

ALL THESE TOBACCO except Turkish (which is bought directly from the planters in Turkey and Greece) and Maryland (which is bought through sealed boxes under government supervision) are bought at public auction, just like any other auction where you might buy potatoes.

AT THE AUCTION SALE the tobacco is piled, and the quality is rated from one to five, weighing from about 100 to 600 pounds.

THE CHESTERFIELD BUYERS buy the best of these for Chesterfield cigarettes, and it is Chesterfield’s combination: the right amounts of Burley and Bright; just enough Maryland...and the right amount of difference between Chesterfield and other cigarettes.

IT IS BECAUSE OF this combination that Chesterfield are COOLER, have a BETTER TASTE and are DEFINITELY MILDER. They are made of the world’s best tobacco cigarettes. You can’t buy a better cigarette.
