150 Delegates Expected For Regional IRC Meet

The International Relations club of the University of Idaho will meet this Friday and Saturday at the Northcote conference on the University of Idaho campus. The club, which has been active for nearly five years, will host more than three-fourths of its members on campus.

The purpose of the conference is to provide a forum for discussion of current international issues. The meeting will be held in the University Center from 10 a.m. to 5 p.m. on Friday and Saturday.

The conference will feature guest speakers from the University of Idaho, as well as representatives from other universities across the state. The program will include workshops on international relations, global politics, and international law.

The conference is open to all University of Idaho students, as well as to members of the general public. Registration is required and can be completed online. For more information, please visit the University of Idaho International Relations website.
Dear Jason,

An incident was taken by the AIDC executive board at its meeting on October 22nd. The students of the university were informed of this incident by the AIDC president. For the purposes of this letter, I will make recommendations that may be of interest to you.

1. A living group may sponsor only one event per semester.
2. It is recommended that the group be a living group and the event be scheduled throughout the semester. The group must also attend the event during the weekend of the event.

The AIDC executive board is looking forward to hearing from you. I hope you will consider these recommendations.

Sincerely,

[Signature]

N. S. A. IS WORTHWHILE?

By Vernon Banks

The National Security Agency (N.S.A.) is a federal agency that provides high-quality cryptologic services to the United States government. The agency is responsible for developing and maintaining cryptographic systems and for providing cryptographic support to the U.S. government.

The N.S.A. is one of the most powerful and secretive agencies in the United States. It is responsible for collecting and analyzing information about foreign communications, including phone and email traffic.

It has been estimated that the N.S.A. collects and analyzes data from billions of phone calls and emails worldwide. The agency is also believed to be able to intercept and decode data transmitted over the internet.

The N.S.A. is considered to be one of the most effective and powerful intelligence agencies in the world. It is responsible for protecting the United States from foreign threats and for providing critical intelligence to the government.

The agency is also considered to be one of the most controversial and powerful agencies in the world. It is often criticized for its lack of transparency and for its use of surveillance techniques that some people consider to be unconstitutional.

The N.S.A. is a complex and powerful agency that plays a critical role in the national security of the United States. It is important for the government to be transparent about its activities and to ensure that it is not being used to violate the rights of its citizens.

Sincerely,

Vandals Leave for Montana; WSC Babes In Moscow Today

The University of Idaho football squad, 11-1-1, (and the same team that played for the Idaho State Fair Farm Show football title last year) will leave tomorrow for Missoula where it will meet the University of Montana Grizzlies. The Montana homecoming contest will be played tomorrow after- noon with the kickoff set for 1 p.m., Moscow time.

Idaho Mice Move

The Vandals will be playing for possession of the "Lavender Blush Trophy" on a record attendance, and going for the winner of their overall contest. The Idaho squad replaced passion of the booster after defeating the Grizzlies 44-7 last season. 1947 Montana won the award after defeating Idaho.

In the contest one year the Grizzlies won out in the last second. The worst Idaho has ever faced was Montana in 1935 when they missed a field goal to make the score tie 7 all. It was the last time Idaho wore a football uniform.

"Power Against Idaho"

On the other side of the Idaho- Grizzly game, the University of Montana has been a success story under the leadership of Coach Kiilsgaard.

"The Grizzly defense is fast and strong. They have been known to start in the back yard and go out the front door," said the Idaho coach.

The Idaho fans are expected to be in the 11,000 capacity for the game.

Montana Sat Peace

Many Idaho fans have been left behind to their own in Idaho this week because of the snow storm in this state. A number of Idaho fans have already left for Missoula and Missoula for the game where they have been left behind are expected to be in this year's Idaho game with Montana.

"Evening at Audubon Park"

A Thursday evening event at Audubon Park will be held to help the University of Idaho students. The event will be held to help finance the University of Idaho students.

"Cigarette...I have BEEN A CHESTERFIELD FAN FOR YEARS!!"

CHESTERFIELD SURE IS THE 3 MILLIONTH SURE.

Chesterfield SURE is the 3 millionth sure cigarette to be produced at the Chesterfield Factory. It was given to Mr. J. H. Upjohn, President of the R. J. Reynolds Tobacco Company, at the Chesterfield Factory in Richmond, Virginia. The cigarette was presented to Mr. Upjohn as a token of appreciation for his support of the Chesterfield Factory and its workers.
